ALEX. AITKEN, Proprietor.

TUTT'S EXPECTORANT

Is composed of Herbal and Mucilaginous products, which permeate the substance of the Lungs, expectorate the acrid matter that collects in the Bronchial Tubes, and forms a soothing coating, which relieves the irritation that causes the cough. It cleanses the lungs of all impurities, strengthens them when enfeebled by disease, invigorates the circulation of the blood, and braces the nervous system. Slight colds often end in consumption. It is dangerous to neglect them. Apply the remedy promptly. A test of twenty years warrants the assertion that no remedy has ever been found that is as prompt in its effects as TUTT'S EXPECTORANT. A single dose raises the phlegm, subdues inflammation, and its use speedily cures the most obstinate cough. A pleasant cordial, children take it readily. For Croup it is invaluable and should be in every family. In 25c. and \$1 Bottles.

TUTT'S PILLS

AOT DIRECTLY ON THE LIVER.
Cures Chills and Fever, Dyspepsia, Sick Headache, Bilious Colic, Constipation, Rheumatism, Piles, Palpitation of the Heart, Dizziness, Torpid Liver, and Female Irregularities. If you do not "feel very well," a single pill stimulates the stomach, restores the appetite, imparts vigor to the system.

A NOTED DIVINE SAYS:
Dr. TUTT:—Dear Sir:—For ten years I have been a martyr to Dyspepsia, Constipation and Piles. Last spring your pills were recommended to me; I used them (but with little faith). I am now a well man, have good appetite, digestion perfect, regular stools, piles gone, and I have gained forty pounds solid flesh. They are worth their weight in gold.
REV. R. L. SIMPSON, Louisville, Ky.
Office, 35 Murray St., New York.
DR. TUTT'S MANUAL of Useful Receipts FREE on application.

THE ATTENTION of the citizens of Hammonton is called to the fact that

GERRY VALENTINE
Is the only RESIDENT

**FURNISHING
Undertaker.**

Having recently purchased a
New and Modern Hearse,
And all necessary paraphernalia,
I am prepared to satisfy ALL who may call.

Mr. Wm. A. Hood

Will attend personally, to all calls, whether day or night. A competent woman ready to assist, also, when desired.

Mr. Hood's residence, on Second St., opposite A. J. Smith's.
Orders may be left at Chas. Simons' Livery.

Newspaper Advertising Bureau,
10 Spruce St., New York.
Send 10c for 100-Page Pamphlet.

Our Little Ones and The Nursery is a delightful juvenile publication, full of pictures and stories, both amusing and wise. The January number will be found interesting to children of larger growth. The Christmas Dinner Bell, by Sidney Dare, is delightfully realistic. A Turkey for One; a Novel Umbrella; Aunts and their Houses,—all are pleasing and entertaining. Russell Publishing Co., 36 Bromfield Street, Boston.

Vick's Illustrated Magazine and Floral Guide for January is an unusually attractive number. The cover is a marvel of taste and beauty (sorry Uncle Sam mutilated ours so badly) and the contents, including the two colored plates, one representing a variety of bedding plants, very pretty, the other plate showing collection of Trimardeau Pansies is simply magnificent,—the flowers are of immense size and gorgeous coloring. The catalogue contains all well known varieties of seeds, plants, etc., and many novelties; also illustrations of business as carried on in the different departments of their great ware house. The magazine has a handsome colored plate representing a flower and plant of Vallota Purpurea; also contains much information relating to the culture of flowers, fruits, vegetables etc. Published by James Vick, Seedman, Rochester, N. Y.

ELWOOD, Jan. 19, 1887.

EDITOR SOUTH JERSEY REPUBLICAN;
DEAR SIR:—Since my communication to you in regard to the "general government assuming all local war debt," I find that Congressman Price, of Wisconsin, has introduced a bill to refund "direct war taxes," and that the legislature of Ohio, by joint resolution, have requested their Senators and Congressmen to urge its passage. I do not know the details of Price's bill, but have written him for a copy.

There is now no grounds to dispute the justness of my proposition; and other States are in favor of all war debts being assumed and paid by the United States. I have no doubt but our member of Congress, Hon. James Buchanan, if properly requested, would not only introduce a bill to this effect, but successfully urge its passage. It is not impossible that our claim might be embodied in the Price bill. Of this, more when I receive the bill.

CHAS. B. THOMAS.

It is Governor R. S. Greene. He took the oath of office on Monday at midnight, and was formally inaugurated at noon of Thursday. Of all State executives of modern times, Gov. Greene has the largest list of appointments to make, to profitable offices. Here are a few of them: a chancellor for seven years at \$10,000 a year; an attorney general for five years at \$7500 a year; a secretary of state for five years at \$5000 a year; a Supreme Court clerk for five years at \$12,000 to \$15,000 a year; several justices of the Supreme Court for seven years, at from \$7000 to \$10,000 a year; a private secretary for three years at \$2500 a year; several members of the State Board of Assessors for three years at \$25,000 a year; and scores of other important officers at fair salaries.

Mrs. Florence Hooper Baker
Of New York City,

PIANIST and COMPOSER
Of the famous "Raguet Waltz," will give instruction in music. Teacher of Harmony and Thorough Bass. Terms reasonable.
Residence with Mrs. Fish, Hammonton

REMOVAL.

Larger Stock

And a better assortment. Thankful to my patrons for past favors, I shall seek, by trying my best to please, to merit a continuance of the same. Call and see me at my new store.

A small stock of Fall and Winter Millinery at Cost, to close out.

Cora F. Newton.

OH! MY BACK

Every strain or cold attacks that weak back and nearly prostrates you.

**BROWN'S
IRON
BITTERS**
THE BEST TONIC
Strengthens the Muscles,
Enriches the Blood, Gives New Vigor.

Dr. J. L. MYERS, Fairfield, Iowa, says:
"Brown's Iron Bitters is the best iron medicine I have known in my 30 years' practice. I have found it in all debilitating ailments that bear so heavily on the system. Use it freely in my own family."
Mr. W. P. BROWN, for Main St., Covington, Ky., says: "I was completely broken down in health and troubled with pains in my back. Brown's Iron Bitters entirely restored me to health."
Genuine has above Trade Mark and crossed red lines on wrapper. Take note. Made only by
BROWN CHEMICAL CO., BALTIMORE, MD.

RUSSIAN RHEUMATISM CURE

HAS PROVED TO BE
THE REMEDY
FOR RHEUMATISM.

Manassas, Ind., Aug. 12, 1884.
My wife was so afflicted with rheumatism in her shoulder and arm that she could do nothing for herself, and could not sleep in bed, but had to be bolstered up in a rocking chair. Physicians prescribed many patent medicines were used, but the pain still got worse. I sent for the Russian Rheumatism Cure, under a cloud of doubt. It was used according to directions for one week, and my wife was cured. It was one of those agreeable surprises that you meet once in a lifetime. It is now over four months since the cure was effected, and she can wash, iron, hoe in the garden, and do all kinds of work as well as ever, and has no symptoms of the old disease. We have no hesitation in recommending the cure to all similarly afflicted, as SAFE and SURE.
Truly yours,
H. J. FISHELL.

Thousands of others have been cured.
PRICE \$2.50.

For complete information, Descriptive Pamphlet, with testimonials, free. For sale by all druggists. If one or the other is not in position to furnish it to you, do not be persuaded to take anything else, but apply direct to the General Agents, **PFÄELZER BROS. & CO.** 819 & 821 Market Street, Philadelphia.

FOOD FOR THOUGHT

True politeness is perfect ease and freedom. It is simply contentment in treating others just as you love to be treated yourself.

If we hope for what we are not likely to possess, we act and think in vain, and make life a greater dream and shadow than it really is.

Love is like a painter, who, in drawing the picture of a friend having a blemish on one eye would picture only the other side of the face.

There cannot be a more worthy improvement of friendship than in a fervent opposition to the sins of those whom we profess to love.

There is no one among us that would not be worse than kings, if he continually corrupted as they are with a sort of vermin called flatterers.

He seldom lives frugally who lives by chance. Hope is always liberal, and they that trust he prosper will prosper, scruples of revelling to-day on the profits of to-morrow.

He is the greatest man who chooses the right with invincible resolution, who bears the heaviest burden cheerfully, and whose reliance on truth and virtue is the most unflinching.

Look upon every man as a suicide from the moment he takes the dice box seriously in his hand, and he will follow in his fatal career from that time only sharpening the dagger before he strikes it to his heart.

Men may as well expect to grow stronger by always sitting, as wisers by always reading. Too much overcharges nature, and turns more into disease than nourishment.

It is thought, that I did not digest, and that I was not so much as I should be, but books serviceable, and gives health and vigor to the mind.

Small acts of kindness, how pleasant and how desirable they do make life. Every day object is made more by them, and every tear brushed away. When the heart is sad, and despondency sits at the entrance of the soul, a trifling kindness drives away the despair, and makes the path cheerful and pleasant.

Like flakes of snow that fall unperceived upon the earth, the seemingly unimportant events in life succeed one another. As the snow gathers together so our habits form. No one can flake that is added to the pile produces a sensible change, no single action erases, however it may exist in a man's memory.

I love a serene preserver who speaks for my sake and not his own—who seeks my salvation and not his vain glory. He deserves to be valued who uses speech only to clothe his thoughts, and his thoughts only to promote truth and virtue. Nothing is more detestable than a professed declaimer, who retains in his heart a quick dose of his medicines.

There are chorons in the human heart, strange varying strings, which are only struck by accident, which will remain and continue to appear, without passion and earnestness, and respond at last to the slightest casual touch.

In the most insensible or childish minds there is some train of reflection which survives of former years, and which will reveal itself, as great truths have done, by chance, and when the discoverer has the plainest and simplest of views.

No day can be so sacred but that the laugh of a child will make the holiest day more sacred still. Strike with the hand of fire, oh, weird musician, thy harp, and sing, and Apollo's golden hair fill the vast cathedral aisle with symphonies sweet and dim, deft touches of the organ keys; blow, bugler, until the silver notes do touch the sky with moonlight, while the players and lovers wandering on the vine-clad hills, but know your sweetest strains are discordant all compared with childhood's happy harp.

We have certain work to do for our heads, and that is to be done strenuously, other work to do for our delight, and that is to be done heartily; neither is to be done by halves, but with a will, and what is not worth this effort is not to be done at all.

An able writer gives utterance to the valuable secret: "This looking forward to enjoyment don't pay. For what? I know it I would as soon chase butterflies for a living or bottle moonshine for a cloudy night. The only way to be happy is to take the drops of happiness God gives them to us every day of our lives." The boy must learn to be happy while he is learning his trade; the merchant while he is making his fortune. If he fails to learn this, he will be sure to miss his enjoyment when he gains what he has signed for.

The constant wash of the sea of life undermines the cliffs and wastes the coast. The production of such a class of occupations is ever acting upon our religious life. Travelers tell us that the constant rubbing of the sand on Egyptian hieroglyphs removes every trace of colors and even effaces the deep-cut characters from basalt rocks. So the unceasing attrition of multitudinous selfish will take all the bloom of our religion and efface the name of the king cut on the tablets of your heart. If you do not counteract them by honest, earnest effort, devotion, our faith, our love is only preserved by being constantly renewed.

A mixture to Erase Grease Spots:—Equal parts of strong ammonia water, alcohol, and alcohol, for use as a cleansing compound. Pass a piece of blotting paper under the grease spot, moisten a sponge, first with water, to render it "greasy" with the mixture, and rub with it the spot. At the moment it will be dissolved, sponged, and absorbed by the sponge and blotter.

The golden calf, having wealth without soul, finds more worshippers to-day than in the days of Moses.

EQUAL TO THE OCCASION.

An American Declines to Fall into a French Hotel Trap.

The pitfalls which the innkeepers prepare for the Americans are as whimsical and curious as they are numerous. He who speaks only the English language, no show whatever, and his as we could be to submit with good humor, and go his way. Therady device of not understanding what you mean, although you may be employing the most variegated and vigorous imprecations known to Anglo-Saxon ears, is common everywhere. And what can you say against a blank stare, or do against an outstretched "addition," with your trunk on the omnibus, or your train, or steamer, about to start? Perhaps, anticipating this every situation, you have demanded your bill some hours before. It will serve you little, you may ask, and ask again, and it will be denied you till the last moment.

This is a favorite and effective trick, and nearly always wins. Now and then, of course, it doesn't. For example, a friend of mine the other day came to settle his night's lodging at a hotel on the railway station here in Neuchâtel, called the Hotel des Alpes. In addition to the change for apartment, service, lights, and the like, he was asked to put in plain English that which followed.

"That is this," said my friend, with a simulation of his French, though he spoke the language like a native.

"That, monsieur, that is breakfast." "Breakfast? But I had no breakfast."

"That is breakfast," said my friend, with a simulation of his French, though he spoke the language like a native.

"That, monsieur, that is breakfast." "Breakfast? But I had no breakfast."

"That is breakfast," said my friend, with a simulation of his French, though he spoke the language like a native.

"That, monsieur, that is breakfast." "Breakfast? But I had no breakfast."

"That is breakfast," said my friend, with a simulation of his French, though he spoke the language like a native.

"That, monsieur, that is breakfast." "Breakfast? But I had no breakfast."

"That is breakfast," said my friend, with a simulation of his French, though he spoke the language like a native.

"That, monsieur, that is breakfast." "Breakfast? But I had no breakfast."

CAT SKINS.

How They Are Used—Prices Paid for Them.

For the past two months valued house cats have been missing from all parts of Indianapolis. In some neighborhoods the whole cat population has disappeared, and in others only a few have been seen. The mystery is not understood what you mean, although you may be employing the most variegated and vigorous imprecations known to Anglo-Saxon ears, is common everywhere. And what can you say against a blank stare, or do against an outstretched "addition," with your trunk on the omnibus, or your train, or steamer, about to start? Perhaps, anticipating this every situation, you have demanded your bill some hours before. It will serve you little, you may ask, and ask again, and it will be denied you till the last moment.

This is a favorite and effective trick, and nearly always wins. Now and then, of course, it doesn't. FASHION NOTES.

Vellings and various laces are used for day and evening dresses. They are lavishly made, and are considered far more stylish and appropriate than trains for the ball-room.

The fashion of velling flowers in tulle has now grown to a craze. Pearl and precious stone neckties are to be worn under the gulleps or chemises of high dresses, and for low bodices the neckties will be velted in tulle.

Another dress had a front made of a single dounce of point lace over a front of satin, with body and long train of gold brocade. In more simple dresses there are very artistic designs in plain fabric or satin, with overdrapes of plain or fancy tulle, very desirable and much less costly.

Some charming, inexpensive dresses are made of delicate lints of cashmere, velling and lace fabrics. They are made up with lace or by themselves. Some pretty combinations are made with fronts of light-colored tulle, and the rest of the dress in a contrasting color.

Bridemaids usually wear some transparent material mounted on a silk net or tulle. Large-meshed tulle, or gauze, is a favorite for these fluffy dresses. When color is introduced in bridesmaid's dresses it is added to white, as white and white and Suede, white with brown, etc.; the gold may be wrought in by yellow pearl beading, yellow velvet sashes, yellow roses, or beads of any color.

The new Suede passementerie, with tan Suede gloves, Suede shoes and stockings, is a favorite for these fluffy dresses. When color is introduced in bridesmaid's dresses it is added to white, as white and white and Suede, white with brown, etc.; the gold may be wrought in by yellow pearl beading, yellow velvet sashes, yellow roses, or beads of any color.

SCIENTIFIC.

A recent lecture at a London institution, Dr. B. W. Richardson stated that the work of the heart in a healthy man is equivalent to the feat of raising 5.5 tons one foot per hour, or 125 tons in twenty-four hours.

Use of eight ounces of alcohol causes the heart's work to show an excess of twenty-four hours. Illustrating this powerful engine's performance by a new calculation, he assumed that the blood is thrown out by an average of 69 strokes per minute, and at the force of nine feet to each stroke, which would give the mileage of the blood through the body as 207 yards per minute, seven miles per hour, 168 miles per day, 51,320 miles per year, or 5,132,800 miles in a lifetime of eighty-four years. In the same long life the great journey of the blood would be the grand total of 2,867,776,000 near beats.

Lightning flashes have sometimes been observed which, starting from one point, have ended in several, and some remarkable forms of flash have been lately described by Herr Leyser, of Paylow Observatory. In one case a flash started from a point in a northern sky, and in a second it divided, the two branches forming an angle of about seventy-five degrees. When these had reached about thirty-five degrees from each other, they turned and united again to one line. The path of the lightning thus formed a quadrilateral figure. It was further observed that the lightning struck in the same place, as if it were an oscillating discharge. In another interesting flash, the path was not a crooked line, but a series of loops, and the lightning followed last about eighty seconds.

How to Detect Poison in Canned Goods.—It is not interest to the public, said Dr. Grothe, the other day, to be informed of an easily applied test for the presence of copper in peas, beans and other canned vegetables or fruits. The test can be made by the most inexperienced person. Let a small quantity of the suspected goods be placed in two samples, in shallow glass or porcelain dishes, and pour over them a weak solution of ammonia. If the goods contain copper, the liquid will change to a much darker green. Other coloring matter than copper may show a similar reaction, but for reasons of safety, which should show such a marked chemical change with considerable accuracy.

Solar Spectroscopy.—Astronomical textbooks place the sun's density at a little more than that of water. But in a recent lecture, Mr. J. Norman Lockyer, the English astronomer, expressed the opinion that the sun really has not more than one-eighth the density of water. If this view be correct, the sun is a vast globe of glowing gas possibly liquid at the centre in consequence of the enormous pressure existing at that part. The sun's surface, however, is not so hot as it is generally supposed to be, and scientific estimates range from 3,000 to 18,000 degrees.

A Birmingham firm has recently patented a handy pocket case. It consists of a little metal case, 3 1/2 inches in length, 1 1/2 inches in width and one inch in depth, and within it a narrow compass is neatly packed. A compass for stanching blood, an singlass plaster, a foot of antiseptic bandages, a roll of tape for tying a bleeding limb, a bottle of disinfectant, a bottle of ammonia to be applied in the case of venous bites, a sheet of waxed silk and some safety and surgical pins for securing bandages.

Shown BERRY.—Cut into thin slices several large apples, have ready butter, and mix the butter with the apples. Put the mixture in a layer of bread, and grate bread crumbs, then layer of sliced apples; over these sprinkle sugar, and so on alternately, bread, apples, sugar, until you have a quantity of the layer. Put the top layer of bread crumbs, and put in place three large loaves of butter, put in place three large loaves of butter, put in place three large loaves of butter.

Mock-roast is the name given to an alloy for filling blow-holes, etc., in castings. It is made of one part bisulphide of carbon and nine parts lead. It has the property of expanding in cooling, so that a hole filled with the metal alloy will not show any cracks, and the plug will be tight when cold.

It appears that some time ago a "fath-cure" orphanage was established in New York, and under the management of a woman named Mrs. J. W. Richardson. The orphanage was for the purpose of preventing the cruelty to children has taken the matter up and shows that the fath-cure is not for children, and that they should have medical attention when ill.

Oil from pine wood is now manufactured on a considerable scale at the South. The material is subjected to intense heat in sealed retorts, and one retort of it is said to yield fifteen gallons of turpentine, eighty gallons of pine wood oil, fifty bushels of charcoal, one hundred and fifty gallons of wood vinegar, and a quantity of inflammable gas and asphaltum.

A mine of beryl is a new find in Connecticut. The beryl already taken out is of a fine quality, and is of a greenish color, and is of a fine quality, and is of a greenish color, and is of a fine quality, and is of a greenish color, and is of a fine quality, and is of a greenish color, and is
