HAMMONTON, N. J., JUNE 2, 1906

NO. 22

A GRAND FAIR AND ENTERTAINMENT

at
St. Mark's Parish House
June 5th, 6th, and 7th

Come and visit all the attractions—Crystal Cave, Japanese Garden, Post Office, Chinese Laundry, Tennis Drill, Sale of Household and Fancy Articles, Home-made Candy, Cakes, etc., etc.

Entertainment by best local talent. All invited.

Admission, 10 Cents

Children's Day

White Canvas, Shiny Leather, and Tan
Oxfords, appropriate for their day,
and all right for other days.

T. B. PAULLIN.

Cor. Bellevue Avenue and County Road.

We carry a line of Plows and Castings

Cultivators
Diamond Harrows
Wheelbarrows
and small Garden Tools—
Rakes
Hoes
Drags.

If you need

Fertilizer

for any crop, call on us.
Our stock comprises—
Mapes' Complete Manures,
The Taylor Provision Com-
pany's Special Potato and
Corn and Truck Manures,
Fifield's Pure Ground Fish
Guano,
Berg's Raw Bone.

GEORGE ELVINS.

J. I. Taylor, Practical Painter.
Don't pay \$1.50 a gallon for canned
oil, which ought to cost but 60 cents a
gallon. Ready mixed paint is half oil
and half paint. Buy oil fresh from the
barrel and add it to the L & M Paint
which is semi-mixed.
When you buy L & M Paint you get a
full gallon of paint that won't wear off
for 10 or 15 years, because L & M Zinc
hardens the L & M White Lead and
makes L & M paint wear like iron.
4 gallons L & M mixed with 8 gallons
linseed oil will paint a moderate sized
house.
L & M costs only \$1.20 per gallon.
Sold in the north, east, south and west.
C. S. Andrews, ex-Mayor, Danbury,
Conn., writes: "Painted my house 10
years ago with L & M. Looks well today."
Sold by Harry McD. Little.

Memorial Day.

A score or more of the comrades of
the Grand Army attended divine
service at St. Mark's Church, Sunday
morning last. The Rector, Rev. Paul
F. Hoffman, preached an excellent
sermon, drawing lessons from pro-
phetic writings,—claiming that our
advanced civilization is the product of
what was best in the past; that no
one becomes good or bad all at once,—
does not build up a character in a day,
it is the result of what he has been,
and his future life will depend much
upon what he is now. He commended
the G. A. R. for their efforts to inspire
the youth of to-day by bringing to
memory, every year, the noble deeds
of their fathers.

Memorial Day, Wednesday, was
truly delightful. Our good rain had
cleared the atmosphere, washed veg-
etation, and moderated the oppressive
temperature.

Stores closed about nine o'clock, and
the Bank and schools all day. The
Post-Office kept abbreviated hours,
and, in fact, nearly every place but
the print-shop took a holiday.

The Post gathered about nine o'clock
that morning, and proceeded in car-
riages to Greenmount Cemetery, where
the usual ceremonies were varied by
music by our excellent band; prayer
by Rev. W. W. Williams. Twenty-
eight girls—the "School Brigade"—
with flags, marched and drilled and
sang appropriate songs; three of them
recited each a verse of poetry, and then
scattered flowers upon the graves,
while their comrades sang the refrain of
"Cover them over with beautiful
flowers." It was one of the prettiest
ceremonies we ever saw. There was
a large concourse of interested people
present.

After decorating the graves, the
participants re-entered their carriages
and proceeded to Oakdale Cemetery,
where the ceremonies were repeated
with but little change. Rev. J. H.
Payran made the prayer.

The comparative scarcity of flowers,
caused by the backward season and
prolonged drought, was regretted by
the Post.

We were pleased to see that the
sentiment of the day is spreading
among the people. Few graves in
either cemetery, whose people are
within reach, were left without decora-
tion, and some of them were artistic
pictures. It is right to keep these
lowly resting-places always bright
and beautiful.

An innovation was a public meet-
ing in the evening, in Union Hall.
After music, Mr. Payran made the
Invocation. Post Commander Adams
read Lincoln's Gettysburg Address.
Twelve young ladies illustrated the
poetry of motion by an elaborate
drill,—forming tableaux and pictures,
and ending with a verse of the "Star
Spangled Banner." It was certainly
entertaining.

Rev. F. L. Jewett made the address on
lessons from national history; related
incidents, and gave facts from by gone
days; stated the cause of the war, and
urged those present to learn from the
past and strive to make this country
what its founders intended,—a God-
fearing people, ever striving for the
right as God gives us to see the right.
He closed with an earnest appeal to
veterans who so promptly answered
"Here!" at the daily roll-call, to enlist
under the great Captain, and so serve
that they may with confidence re-
spond when their names are called for
the final muster-out.

Our Board of Health is doing
considerable quiet work, not all becom-
ing public. Recently, they condemned
a house on Central Avenue because of
leaking pipes, foul odors, and an open
well in the cellar. The Inspector sent
a list of fire-traps to the fire company,
suggesting that it might be of value to
them to know of such in case of a con-
flagration. People should keep their
premises clean, free from rubbish heaps
and excavations,—the latter being dan-
gerous in case firemen were called on
for night duty.

A Week of Special Offerings

AT

BANK BROTHERS'

111 Bellevue Avenue.

Two Hundred Sample Waists

At almost half-price. The entire sample stock
of Philadelphia's best waist manufacturer,
embracing the season's latest styles of
high-price models.

We have divided this stock into two lots. Lot 1st consists
of \$2 and \$2.50 waists, marked at \$1.25. Lot No. 2 contains
\$2.75 and \$3 waists, marked at \$1.50.
Take advantage of this opportunity.

DRY GOODS SPECIALS.

Mosquito Netting, 3 cents a yard
White dotted Swiss, 7½ c a yard, value 12 c
Fancy Lawns, 5 c a yard, value 7½ c
Organdies in all the latest patterns, blue, green, and all
kinds of flowered goods, 9 c a yard, value 12½ c
Calicoes and Lawns at 4 c, value 6 c
Unbleached Muslin, 4 c, value 6 c
White Butcher's Linen, 8 c a yard, value 12½ c
White Nearsilk and Mercerized Longcloth, 10 c a yard,
value 25 cents
Batiste special at 6½ c a yard, value 9 c

Sunbonnets at 13 c, value 23 c
Fancy Belts, 9 c, value 23
Children's Hats, 45 cents, value 75 cents
Ladies' Collars, 9 and 15 c, value 15 and 25 c
Dressing Sacques, 19 cents, value 25 c
Seven hundred (700) pair Ladies 12½ c fast black Hose.
special at three pair for 25 cents

Interesting News from our Gents' Furnishings.

Men's 60 cent top Shirt, with collar, special at 29 cts
Men's 60 c. lisle web Underwear, special at 39 c
Men's 25 c balbriggan Underwear, special at 15 c
Men's 5 cent blue Handkerchiefs, special, two for 5 c
Boys' 25 cent Shirts, special at 15 cents

—STRAW HATS—

No doubt you are in need of a straw hat. Suppose you
step in and look over our stock. You will find a nice selec-
tion of up-to-date style at 75 c, 95 c, \$1.25, \$1.75, \$2, \$2.50
and \$3, while those at 45 c and 19 c are also of neat styles.
Panamas at \$5 and \$6.

Our line of Men's two-piece Suits is ready for
inspection. Get the habit of visiting

Science and Invention

Commenting on Benjamin Franklin's kite experiment, which proved that lightning and electricity are the same, a scientist says: "It was one of the most brilliant examples of luck yet recorded. To attempt the extraction of lightning flashes from a lowering sky was almost suicidal. Even at this late day timid persons occasionally fly to feather beds, sit on glass-legged chairs, or find refuge in rubber boots during thunderstorms."

A repetition of Franklin's experiment cost his immediate tumbler his life.

Emil Jung, a professor in the University of Geneva, says that until he perceived the odor of many substances, but only when not far away. In order to prove this it is necessary merely to dip a glass rod in a strongly smelling substance and bring it near the large tentacles of a small in motion. If it is put close to these horns, the tentacles are violently drawn back. As the animal perceives the odor, it changes its course, usually also smell by means of their skin. Contact is not necessary, for the mere vicinity of a perfume causes an indication of the skin.

An Englishman who is a large employer of labor has been investigating the arguments of those who say that a workman under modern conditions becomes at an early age valueless. He has kept a record of all accidents that have incapacitated his men for three days and longer. The number engaged in his employment are from 15 to 35 years of age, and he asserts that more accidents occur to men under 30 than to those over 50. He says: "I would much rather trust an exceptionally dangerous job to a man over 30 than to a boy of 20 years of age."

Antarctic climatologists will be interested in a suggestion by Dr. F. E. Lutz for the preservation of all kinds of spiders' webs. The webs should be sprayed from an atomizer with artists' shellac, and then, if they are of the ordinary geometric form, pressed carefully against a glass plate, the supported strands being at the same time removed. After the shellac has dried, the plates carrying the webs can be stored away in a cabinet. Even dome-shaped webs may be preserved in their original form by spraying them with shellac and then allowing them to dry before removal from their supports. Many spiders' webs are very beautiful, and all are characteristic of the species to which they belong, so that their permanent preservation is very desirable.

Prof. Silvanus P. Thompson, who recently visited the electric plant in Norway, where soil fertilizers are made direct from the atmosphere, describes the apparatus of which the plant consists of all others in that the flame of electric sparks is caused to move rapidly through the air instead of having the air blown over it. The result is the production of a much greater quantity of nitric acid in a given time. The flame dies off between the electrodes, swiftly expands and contracts, being now only half an inch and now six feet in diameter. To make nitrogen burn with oxygen, electric energy must be pumped in, because, whereas in ordinary combustion, such as occurs when carbon combines with oxygen, heat is given out, the formation of nitric acid is an endothermic reaction; that is to say, heat is absorbed. Prof. Thompson estimates the nitrogen hanging over the city of London alone at considerably greater in quantity than all that is contained in the nitrate beds of Chile.

FACE WEST FOR BEST WORK.

Experiments by a French Physician Prove Idea is Correct.

To test the truth of the assertions of many persons that they are better off with their heads pointing to the north, better facing the east and so on, Dr. Charles Fere, who is well known in France for his studies in physiological psychology, has constructed a delicate machine which he calls an encephalograph, with which he has achieved some interesting results. This machine registers the number, rapidly and quality of the movements of the eyelids, finger when writing or performing any accustomed work.

He announces that his experiments with it prove that work done by a person facing the west or east is better by 25 per cent than similar work done by a person facing the north or south, and that when working facing the west it is about 25 per cent better than when facing the east.

This matter of orientation seems to have an influence upon the nervous system, due largely, it is believed, to the fact that the earth is a gigantic magnet. Many learned men have noticed that they sleep best with the head to the north and work better facing the west, while at least one famous pianist has been known to play the piano when the player faces the east. It may be that the great magnetism of the human race, all of which have been from east to west, and the directed tendency of them to develop in the same way is related to this phenomenon.

ESTIMATED AGE OF THE EARTH

Scientists Declare This World Has Existed 100,000,000 Years.

The best geological estimates of the age of our globe are in close agreement. From the time when the record of the stratified rocks begin to the present the figures are something over 100,000,000 years, says the Review of Reviews. While some of the estimates vary considerably both above and below the period mentioned, the general results are not materially affected. A generation ago calculations of the earth's age were, for the most part, very much less than one-half of the figure given today. "For instance," computed the length of the paleozoic time at about 30,000,000 years; of mesozoic time, 9,000,000 years, and of cenozoic time, 3,000,000 years, making in all 42,000,000 years. Recently, however, there has been found beneath the vast paleozoic sequence an assemblage of rocks of enormous extent. All geologists are now agreed in placing the time equivalent of these pre-Cambrian rocks as equal, at least, to the entire time that has elapsed since the beginning of the paleozoic era. Taking into consideration this fact, even Dana's estimate is doubled and reaches very nearly the 100,000,000 mark.

Biologists tell us that at the beginning of Paleozoic time life in general was already nine-tenths differentiated. There must have been a period of time prior to this during which 90 per cent of the arguments of those who say that a workman under modern conditions becomes at an early age valueless. He has kept a record of all accidents that have incapacitated his men for three days and longer. The number engaged in his employment are from 15 to 35 years of age, and he asserts that more accidents occur to men under 30 than to those over 50. He says: "I would much rather trust an exceptionally dangerous job to a man over 30 than to a boy of 20 years of age."

MANY TOTTERING TOWERS.

Dangerous Condition of St. Mark's and Other Great Domes.

After the fall of the Campanile of St. Mark's in 1502, a careful examination of the structural stability of the building of St. Mark's was undertaken by Prof. Manfredo Manfredi, a well-known architect, and Signor Luigi Marangoni, an engineer. The committee appointed to watch over the condition of St. Mark's approved a proposal made in the report of these examiners for a thorough study of the foundations, which, owing to the peculiar position of the building, is a very difficult task.

Joseph Chamberlain was the guest of honor at a dinner in an important city. The mayor presided, and when the coffee was being served, the mayor-leaved over and touched Mr. Chamberlain, saying: "Shall we let the people enjoy themselves a little longer, or had we better have your speech now?"

After looking over the upper branch of Congress from the reserved gallery, Mark Twain was asked what he thought of the United States Senate. "Oh, I always make it a point not to criticize my neighbors," said Mr. Chamberlain. "How does that apply to the Senate?" was asked. "Why, I live in Connecticut and Mr. Aldrich lives in Rhode Island," replied Mr. Chamberlain. "That's right," said Mr. Chamberlain. "There was an Irish schoolmaster," he said, "who was 'examining' a class in geography one day. 'Now, my lad,' he said to a clever little chap, 'tell us what latitude is.' The clever little chap smiled and replied: 'Latitude?' he said, 'oh, sir, there's none of that in Ireland; the English don't allow us any air.'"

Two very great evils, one a young duke and the other a young viscount, brushed against each other one night at the theater. The duke, anxious to smile the viscount, pretended to take him for an usher, and said, holding out his hand: "Have you a program?" The viscount, too quick for the duke, smiled and replied: "Yes, thank you, my man; I got one from the other fellow."

Clerk McDowell of the House of Representatives has issued a report directory of the members, their residences, and their committees. What's this, Clerk? asked a disgruntled member who came into the clerk's office after he had had a session with the Speaker about getting recognized to call up a bill. "That's a vest pocket directory of the House," Clerk McDowell replied. The member examined it carefully. "Seems to me like a rotten waste of money," he said finally. "You could have made it a heap smaller and more accurate if you had printed Speaker Cannon's name in it and let it go at that."

Arranged being with wine to the school of being happened to that into the colony of devotees rehearsing "Ivan the Terrible." When the being began to rehearse, Mr. Mansfield grew pale and sadder and more dazed than a well man might. He had a hurried harvest with his treasurer, resulting in the forthcoming of a bundle of greenbacks. Then the caustic current in Mansfield's middle like came into play, and he courteously called the being with leisurely graduation away from the stage-entrance, and said good-bye. "Ah, my dear sir, if you stay and play that part it will inevitably result in a murder or a suicide. To prevent either, I beg you will return my manuscript of the part, not just the ten cent salary, and go home by the earliest train possible."

A babu in charge of the documents of a certain town in India found that they were being seriously damaged by rats. He wrote to the government to provide him with weekly ratna for two cents to destroy the rats. The request was granted, and the two rats were installed one, the larger of the two, receiving slightly better ratna than the other. All went well for a few weeks, when the supreme government of India received the following dispatch: "I have the honor to inform you that the ratna rat is absent with out leave. What shall I do? The problem seemed to be the supreme government for the babu received an answer. After waiting a few days, he sent off a proposal: 'In re Absentee Rat. I propose to promote the junior rat, and in the meantime to take into government service a probationer rat on full ratna.'"

Not a Student.

The curious structure shown in the cut is at Richmond, Va., and it is one of the most peculiar church edifices in America. It is a sixteen-sided building, planned for union services held by sixteen denominations. It was built as long ago as 1813 on the south side of the Whittaker River and is in an excellent state of preservation. In the construction of the building, the architect had not been paid for public worship for over thirty years.

GOOD Short Stories

WHAT HE REMEMBERED.

It is generally a usual thing which is the easiest to remember, but it seldom happens that exactly the same elements in any situation are most unusual or most striking to any two onlookers. A man who has traveled many times up and down the Mississippi stood on the levee at Cape Girardeau, Missouri, one noontime, waiting for the arrival of a down-bound packet. Another prospective passenger stepped up and greeted him.

"Parade me, sub," he said. "You and I have met before, but you do not remember me."

"Doubtless if you will recall the circumstances I shall do so," said the other.

"Well, sub, it was at Barbfield, Arkansas, one evening, five years ago. I remember Barbfield and the evening perfectly," said the man accented. "It was a frightfully stormy night. The mud at Barbfield was deeper than I had ever seen before. I had moored my boat at the bank in front of the town, but the bank was so soft I could not climb it. I climbed up a rope to the top, waded over my shoes in mud to a store, bought some groceries, and returned to my cabin by sliding down a number chute. My wife cooked supper, and we spent an evening reading aloud from Mark Twain's 'Life on the Mississippi.' A raft of logs broke loose and went down-stream, and as I had no skill to follow them with, I shouted an alarm, and others went. The rain turned to snow before morning, and the next morning, which was Sunday, the steamer Fred Herold came from Memphis at daybreak."

"Yes, sub," said the man who remembered him. "Yes, sub, I recall all those things as so. I do not recall them, however. Barbfield is always a memory in my mind. I was there when it rained, the Fred Herold came in every week, logs often break away, and none of those things is familiar to me now. My memory of Barbfield is a memory of a man who was in the boat that evening when you entered. When you came from no one of us knew you. I bought, sub, two pounds of rice and a can of tomatoes. Now, sub, I never meet a gentleman to buy just that combination of groceries at the same time before, and not one of us could imagine, sub, 'yes' what a man who, so far as we could see, didn't live there and didn't have any home but 'mine' then, was going to buy two pounds of rice and only one can of tomatoes. I have remembered you ever since, sub, and have always wondered what you did with them." Youth's Companion.

All Wrong.

Capt. William Klingler, the noted oyster grower of Chesapeake Bay, said recently: "Once I dined with an English farmer. We had him for dinner, a very delicious 'ham,' baked. 'The farmer's son soon finished his portion and passed his plate again. 'More 'am, father,' he said. 'The farmer frowned. 'Don't say 'am, my son,' he said. 'Yes, 'am,' the lad protested, in an injured tone. 'You said 'am,' cried the father fiercely. 'Am's what it should be. 'Am, not 'am.'"

No a Stepping Stone.

"No one can deny that 'honesty is the best policy.'"

"It is until you get prominent enough to drop policy and start playing the stock market,"—Outlook Standard and Times.

Remembrance, young man, it is far easier to find a wife than it is to lose her.

TWO KINDS OF PEOPLE.

No; the two kinds of people on earth I mean.

Wherever you go you will find the world's masses. Are always divided in just these two classes:

And, oddly enough, you will find, too, I mean, There is only one litter to twenty who lean.

To which class are you? Are you eating the loaf Of overrated letters who toll down the road?

Or are you a learner, who lets others beat Your portion of labor and worry and care?—Ella Wheeler Wilcox.

A Complicated Plot.

COWLES regarded the girl gravely. She returned his glance with one of half-veiled tenderness. Back noted the other's expression with some thing between disapproval and reluctance.

Cowles said to himself: "It's a nasty, contemptible position to find one's self in. She's a child—and it doesn't mean anything."

That was as coherent as he would allow even his thoughts to become on this subject—disconnected fragments that suggested something disagreeably deep, but not morbid; something that made Cowles feel like a cut, or at least in danger of becoming one, if he were not unusually careful.

"I wonder what he thinks of me," was what she was saying to herself for the hundredth time that night. "If I can ever make him feel that I am anything more than a silly young girl!"

When the audience became embarrassed Cowles said slowly: "Dear me! How stupid I am to-night! If I may be so bold as to suggest, I have been stealing into the fire—the same—some of the grandest grandeur in my series—and forgetting that I'm supposed to make some pretense, at least, of being clever as a social obligation."

"You are a bit serious tonight," said the girl, with a little laugh, "but it just suits my mood. I feel the same way. The rain, I guess, but you mustn't think I've been bored," she added hastily. "I've been trying to guess your thoughts."

Cowles gave an almost imperceptible start.

"Wondering if you were waving some sort of salute for your next story. Oh, it must be wonderfully fine to try to create little worlds and people them with men and women to get life and thought into them—make them express what you feel. Why, it's like being a god, the power you wield! I think one must possess a thousand minds and be able to see clear into human hearts and souls to do that."

She paused to regard him with wide open, wondering eyes.

"You make people laugh or cry. You teach them wonderful things they never even guessed before, and make them understand their fellowmen. And yet you say you are not clever; that you are old and stupid! Oh, no! Do you expect me to believe that?"

"Little difference," said Cowles, astonished at her eloquence and pleased, despite himself. "Don't overvalue me with your 'cousin of fire.' Don't encourage my bad moments by making virtuous of them. I've been a most foolish guest. I've taken up an evening which some younger man might have made vastly more entertaining for you, with my vapors and reveries. In exchange for this you play me with delicious compliments. All the answer but come uninvited. It's a woman's art, I guess. But it isn't fair."

Had to Have Room.

The revolutionist had arrived and been cordially greeted.

"Why are you here?" the reporters asked.

"Well," replied the visitor, "a revolution must involve, you know, and the aristocrats over there look cluttering up my orbit." Philadelphia Ledger.

"Wondering if you were waving some sort of salute for your next story. Oh, it must be wonderfully fine to try to create little worlds and people them with men and women to get life and thought into them—make them express what you feel. Why, it's like being a god, the power you wield! I think one must possess a thousand minds and be able to see clear into human hearts and souls to do that."

She paused to regard him with wide open, wondering eyes.

"You make people laugh or cry. You teach them wonderful things they never even guessed before, and make them understand their fellowmen. And yet you say you are not clever; that you are old and stupid! Oh, no! Do you expect me to believe that?"

"Little difference," said Cowles, astonished at her eloquence and pleased, despite himself. "Don't overvalue me with your 'cousin of fire.' Don't encourage my bad moments by making virtuous of them. I've been a most foolish guest. I've taken up an evening which some younger man might have made vastly more entertaining for you, with my vapors and reveries. In exchange for this you play me with delicious compliments. All the answer but come uninvited. It's a woman's art, I guess. But it isn't fair."

Had to Have Room.

The revolutionist had arrived and been cordially greeted.

"Why are you here?" the reporters asked.

"Well," replied the visitor, "a revolution must involve, you know, and the aristocrats over there look cluttering up my orbit." Philadelphia Ledger.

THE GIRL GAZED UP INTO HIS FACE.

girl? Am I anything more? I wonder—"

When the audience became embarrassed Cowles said slowly: "Dear me! How stupid I am to-night! If I may be so bold as to suggest, I have been stealing into the fire—the same—some of the grandest grandeur in my series—and forgetting that I'm supposed to make some pretense, at least, of being clever as a social obligation."

"You are a bit serious tonight," said the girl, with a little laugh, "but it just suits my mood. I feel the same way. The rain, I guess, but you mustn't think I've been bored," she added hastily. "I've been trying to guess your thoughts."

Cowles gave an almost imperceptible start.

"Wondering if you were waving some sort of salute for your next story. Oh, it must be wonderfully fine to try to create little worlds and people them with men and women to get life and thought into them—make them express what you feel. Why, it's like being a god, the power you wield! I think one must possess a thousand minds and be able to see clear into human hearts and souls to do that."

Base-Ball.
The Oneida A. A., after notifying the Crescent manager, last Saturday morning, that they would come on the 2:40 p. m. train, failed to appear; neither can the club get a reply from them as to the reason why.
The Crescents played two games with the Lehigh A. C., on Wednesday. In the morning, the Lehigh shut out our local team, and won by 7 to 0.
In the afternoon, the Crescents were on their mettle. Both sides played so well that not a run was made by either until the ninth inning, when Crescent scored one, and won,—1 to 0.
We regret that circumstances prevent us from giving the scores in full.

Da Costa Items.
Work has been pushed rapidly on the aluminum plant, this week.
The Sunday School will re-open tomorrow evening, at 7:30.
Hamonton will soon be proud to claim DaCosta as one of her suburbs, so fast is this place growing. Several new families have settled here.
Rev. Wm. K. McKinney will preach to his old friends in the near future, in this village.
The Atlantic Squab Company are shipping lots of their pretty birds.
Now that there is so much travel on our main street, can't we have it graveled, and put in good condition?
Mr. J. A. Cunningham and family are once more at home in their DaCosta cottage.
