Don't pay \$1.50 a gallon for canned oil, which ought to cost but 60 cents a gallon. Ready mixed paint is half oil and half paint. Buy oil fresh from the barrel and add it to the L & M Paint which is semi-mixed.  
When you buy L & M Paint you get a full gallon of paint that won't wear off for 10 or 15 years, because L & M Zinc hardens the L & M White Lead and makes L & M paint wear like iron.  
4 gallons L & M mixed with 8 gallons linseed oil will paint a moderate sized house.  
L & M costs only \$1.20 per gallon.  
Sold in the north, east, south and west.  
O. S. Andrews, ex-Mayor, Danbury, Conn., writes: "Painted my house 19 years ago with L & M. Looks well today."

### Town Council Meeting.

Council met last Saturday evening, with all present except Mr. Jones, who was ill.

Highway Committee reported that auto signs had been placed at ends of Bellevue. It was suggested that they were too near the corners to sufficiently warn approaching vehicles.

License Committee reported favorably on Jos. F. Bowker's application, and it was granted.

Light Committee recommended the purchase of testing machine to ascertain candle power of lights furnished the town. Committee instructed to ascertain the cost of having a test made by a competent man. Committee also stated that many shade trees have grown so low as to hide lights. Property owners will be notified to trim their trees, or the Overseer will do it.

Legal opinion from Judge Higbee stated that a Justice of the Peace has no authority to deputize any man to act as constable, except in case of riot; and any one should refuse to accept summons from an officer not regularly elected.

Property Committee found plenty of work at the Park, all of the one hundred dollars being necessary. The house on Eleventh Street owned by the Town reported badly in need of repairs.

Petition was received for lights on Fairview Avenue.

List of members of the two fire companies, required by the ordinance, were received.

Report of several fire-traps received from Health Inspector. Referred to Fire Committee, to act in conjunction with Chief.

Resident at Third Road and Thirteenth Street asked that road lines be marked, that he might work his land. Jos. Frabrizio asked that Eighth St. and Second Rd. be scraped. Referred to committee.

Mr. Jacobs called attention to oyster shell scale. As it must be attended to at once, committee will loan Town's apparatus.

A resolution was passed authorizing appointment of special officers for any entertainment or public gathering, for protection against disturbance,—the managers of said entertainments to make application for and pay officers.

A dry officer was deemed necessary, to prevent blockads of streets, disturbances, and violations of speed law. George Bernshouse, Sr., was elected unanimously, to serve from 8 a.m. to 7 p.m., from date to Oct. 1st, at two dollars per day, to be subject to orders from Law and Order Committee.

Overseer of Poor instructed to meet with Almshouse Committee and make arrangements for care of broken-back Italian. (He met the Committee on Thursday, but they arrived at no decision.)

Light Committee reported that Gas Company will give all-night lights on lower Bellevue, for \$25 additional, taking out gas lamps. These are necessary, and would do away with an additional night watchman during summer months.

In 1904-05 Germany sent about \$4,800,000 of silk goods to the United States, while Japan sent \$3,600,000. Japanese exports of silk goods have tripled within ten years, increasing from \$7,470,000 in 1890 to \$22,410,000 in 1904-05, and the ascending movement continues.

A papal bull is published by the Pope. It may be an edict, a decree or a rescript, which contains an order of a decision to be publicly declared. It is only indirectly that the word "bull" is applied to the document itself. It belongs properly to the seal, without which the paper would not be recognized. This seal is rarely of gold or of wax. It was originally of lead and is still commonly of that material.

Lead was used for seals in the time of the ancient Romans and is still used for that purpose in Italy.

Made in Italy. Original gardens are growing at their work, the most striking production of one of their number being a natural arm-chair, in which the reclining shape was attained during the growth of a vine. Almost from its first appearance the vine had been carefully trained in an anti-climatic way to the work it was to be put to. By the time it attained full growth it was found to have a curved arm-chair shape, and the chair was made by grafting, so that the chair is practically in one solid piece, and after it had attained a growth of some three feet it was cut and thoroughly dried. Finally it was polished, the wood fat, but a fluke not unlike maitre d'.

## A RUDE JOKE

One can display no greater breach of courtesy than in deriding anything which a people hold sacred, no matter how absurd the object of veneration may seem to the foreign mind. In an instance of this kind, the Japanese audience showed by their silence and restraint a politeness superior to the funmaker in the ring, although the circus men belong to a nation supposed to be more civilized.

The sacred white elephants of Siam are clearly albino, but they are seldom, if ever, white. Their usual color is a pale reddish brown, although there may be a few real white hairs on the back.

An English circus at one time visited Bangkok, where the performances were witnessed by the king and princes. One day it was announced that a "real white elephant" would take part in that evening's show. The circus was crowded.

After the usual program had been carried out two clowns came into the ring.

"Did you ever see a white elephant?" asked one.

"Oh, yes," answered the other. "The king's got a whole stableful of them."

"No, the king hasn't. They're all chocolate-colored, just like the only genuine white elephant in the world."

A small Indian elephant was led into the ring—as white as snow. The audience gave a gasp of admiration and reverence. The animal went through various stunts, tumbling about, grinding organs, and so forth. As it performed the secret of its color gradually leaked out. Whatever the elephant touched became white. Presently the first clown told the second to "rub his red nose on the head and trunk, leaving its mark on him."

The audience had been growing very still. They saw that the so-called white elephant had been chalked all over. When the clown made his speech it was received by an ominous silence. Their religious belief was being ridiculed.

With admirable restraint, they left the circus without any sign of annoyance, but outside they expressed their confident belief that the proprietor would be punished by Buddha. Curiously enough, not many days after the trick elephant was killed, and not much later the circus proprietor died.

When the audience heard of the calamities, they declared that it was a just manifestation of "Buddha's wrath" for the disrespect shown to the sacred animal.

## HOW CELLULOSE IS MADE.

Process injurious to Workmen and to the Public Health.

Cellulose is a chemical substance made mainly of paper and crude sulphur to imitate ivory, tortoise shell, coral, amber, glass, etc., says Fabrics and Fancy Goods. Considerable revenue is maintained by the makers of celluloid as to their respective methods of manufacture, but apart from dyestuffs and acid it may be said to consist of about equal quantities of paper and sulphur.

The process of its making is not a complicated one, although it is one that is highly injurious to the health of those employed in handling the ingredients. The workmen are compelled to wear clothing of rubber and invariably bear traces of the strong action of the chemicals used, their faces appearing corpse-like and ghastly.

The first process in the manufacture of celluloid is the preparation of the paper, which is composed of cotton and birch wood.

This made, it is wound upon a hollow spindle holding several hundred yards in length. A roll of the pulp is then unwound, being saturated with a mixture of five parts of sulphuric acid and two parts of nitric acid, which falls upon it in a fine spray.

This changes the cellulose of the paper of sulphur. The acid is then carefully washed off the pulp, which is then ground to a pulp and bleached.

After thoroughly drying the pulp there is added to it a due proportion of camphor. This is done by carefully weighing, mixing the two ingredients thoroughly and pressing it in canvas packets between plates. It is at this point that the dye matter is added to make the celluloid any desired color.

In the next operation the mixture is subjected to the grinding and pressure of masticators. These machines are simply heavy iron rollers about four feet long, geared together to run inwards. As the grinding continues the mass becomes more and more homogeneous and nearer to the dished appearance of celluloid.

It is then taken from the masticators in the form of huge sheets 8 feet by 4 feet in size and one inch thick. These sheets are cut up on top of the other until they fill a heavy iron box, which latter is run under a steam-heated hydraulic press, where it remains under enormous pressure for about two hours. That is done for the purpose of welding the superimposed sheets together in the form of a solid cake.

On removal the big celluloid cake is cut into sheets of the desired thickness. This may vary from one-thousandth of an inch to a full inch or more according to the variety of goods into which the material is to be worked. After cutting the sheets are hung up in the drying rooms six or seven months to "season," celluloid having the peculiar warping qualities of wood. It worked up without due regard to this fact.

From the seasoning room the sheets go to the various departments of the factory. Those taken to the novelty department are cut, turned and pressed into any number of fancy articles. The smaller articles are cut out of the sheets of celluloid while cold, then dipped into hot water, bent and shaped and plunged into cold water again. The comb manufacture is simpler than the variety of goods. The teeth are stamped out with dies, either by hand or machinery, and are then polished with cold water and pumice stone. Combs are cut from sheets of "amber," "tortoise shell" and "ivory" celluloid.

The comb manufacture is simpler than the variety of goods. The teeth are stamped out with dies, either by hand or machinery, and are then polished with cold water and pumice stone. Combs are cut from sheets of "amber," "tortoise shell" and "ivory" celluloid.

From the seasoning room the sheets go to the various departments of the factory. Those taken to the novelty department are cut, turned and pressed into any number of fancy articles. The smaller articles are cut out of the sheets of celluloid while cold, then dipped into hot water, bent and shaped and plunged into cold water again. Deeds of the Word.

To be simply a bearer of God's Word is not only to deceive oneself, but to increase one's responsibility. "Inasmuch as ye did it not," is a sharp sentence which Jesus one day passed upon His faithful followers. It is a great thing to remember that God's Word may be translated into Christian living. If for each day we should be guided by "one single precept," in the process of time we would come to know our own names, but we would also come to the place where the revelation of Jesus Christ would be very attractively presented to one who might not read God's Word, but who would study our lives. "Be ye therefore doers of the Word, and not hearers only."

W. L. Black has just doubled  
the size of his advertising space in the  
REPUBLICAN. Something interesting  
in the way "store news" will appear in  
that space each week. Read it.

Capt. Sheppard S. Hudson died  
suddenly on Thursday, at his home in  
May's Landing, of heart trouble, aged  
89 years. One of the best known and  
highly respected men in the county.

DON'T FORGET that at the Candy Kitchen  
you can get as good and as good a glass  
of soda as can be made from the pure fruit  
juices.

The Grand Army Post voted to  
change their night of meeting to the last  
Saturday evening in each month, instead  
of the first. Some of the comrades  
desire to attend Town Council meetings.

The responses to the friends' ap-  
peal for money for uniforms is very  
encouraging. Strange, but some heavy  
property owners have failed to contrib-  
ute, and some small holders prove most  
liberal.

junk in large or small quantities. Send  
us what you will call V. C. LEBERT,  
Hammononton, N. J.

The Baptists had a good time  
Saturday eve, at their "Block Party."

They were disappointed, however, in  
their automobile not turning up, — no  
driver being obtainable. A jolly straw  
ride pacified everybody.

Andrew E. Holman, at home on  
Middle Road, called up the REPUBLICAN  
office by phone, Tuesday afternoon, and  
heard the fire-bell as plainly as though  
he was right here, opposite the building.  
Good thing, this phone system.

The Baptist Y. P. C. C. E. have  
succeeded in organizing Will Christian,  
the poet and entertainer, for Tuesday  
June 19th, in Bellevue Hall. Mr. C.  
needs no introduction to reading people,  
who will be glad to hear him. Watch  
for circulars.

Have you noticed Black's new  
advertising in the REPUBLICAN? This  
issue contains the second one of a series  
in which Mr. Black is endeavoring to  
convince you as to the possibility of  
"buying in Hammononton" with as much  
or more satisfaction than in Philada.

PLANTS for SALE. Sweet Potato, Early  
Cabbage, Tomato, Pepper, Egg Plant, etc.,  
now ready.  
H. M. PHILLIPS, Main Road.

Mr. and Mrs. F. P. Myers had  
the pleasure of entertaining their son,  
Frank Myers, Jr., and their nephew,  
Wm. Myers, of Mt. Holly, over Sunday  
at the residence of Capt. Morton. They  
report a delightful drive here from their  
home.

PLANTS FOR SALE. Egg Plants, Tomato  
Plants, and Cabbage Plants.  
H. M. PHILLIPS, Main Road.

The Water Commissioners ask  
that all citizens shut off their lawn  
sprinklers when an alarm of fire is  
sounded. There are now three hundred  
and eighteen taps, and when a large  
proportion of them are running, it taxes  
our pumping facilities to maintain a  
supply. Then, when firesmen are at  
work, it is impossible to keep up suffi-  
cient pressure for good service. For the  
public good, shut off all you can during  
a fire.

Rose bugs 1117. \*

O. E. Fowler thinks of turning  
delictive. In trying to improve his  
property, on the County Road, he has  
become discouraged by the loss of tools,  
— stolen. He is almost afraid to build  
a substantial fence, for fear that will  
disappear.

That wide-spread waste from the  
gas house caught fire, somehow, on  
Tuesday afternoon, and threatened  
surrounding property. The fire boll  
rang, and the men responded, but had  
nothing to do. It was a hot fire, and  
made a dense black smoke.

Adam Helzer has had a home-  
coming of sons, daughters and grand-  
children, — George Helzer, wife, and  
children; Christian Helzer and Miss  
Hitchell, all of Philadelphia. — Mr. and  
Mrs. Henry Deaser and children of  
Polson. James Gerstenfeld, of West  
Philadelphia.

DIANOS. W. H. King Piano Parlor, 331  
L. Street, Camden, N. J., has recently  
moved to the home of J. M. Austin, a better  
place. These pianos cannot be excelled for  
power of tone or work. Pianos direct to you  
from factory. — For this reason I can save you  
money. Write for catalogue and free  
church plan. Write for you to investigate.

Harry Wells was thrown from a  
load of crates last Monday, on Central  
Avenue, and badly hurt. The horses  
(John L. Abbott's) were frightened at  
a standing auto, and the boy was so  
scared that he jumped. The horses  
were badly cut about the legs. Doctor  
Cunningham attended him.

Mr. Fowler is preparing an illu-  
strated history of Hammononton. He ap-  
proached one of our physicians the other  
day, and asked, "How many doctors are  
there in town?" The reply came  
quickly, "Only one!" Of course he was  
the one, but we didn't expect him to  
acknowledge it.

An interesting lecture will be  
given in the M. R. Church, on Wednes-  
day evening, June 20th, by Rev. J. H.  
Payson, on the "Tabernacle," its sym-  
bolic meaning, with its sym-  
bolic meaning, will be clearly presented,  
and some musical features added. A  
silver offering will be taken for the  
parsonage improvement fund.

Next week will be a full one:  
Monday and Tuesday evenings, enter-  
tainment in Bellevue Hall. Tuesday  
evening, Board of Trade. Wednesday,  
reception by Fourth committee, after  
which the committee will meet Mr.  
Chew at the Royal. — Thursday evening,  
annual banquet. Friday eve's, School  
Commencement. Saturday eve, Class  
of 1906 Promenade.

### Special to Lodge Officers.

All organizations, patriotic, beneficial  
and fraternal, in the southern section  
of the State, are invited by the Ham-  
moncton Fourth of July Committee to  
participate in the parade and exercises  
on the Fourth. Secretaries of such  
organizations as will join us are earnest-  
ly requested to communicate as early as  
possible with our Secretary, Mr. L. F.  
Horne, stating the number of visitors  
and floats, so that proper assignments  
to line may be made. Full programme  
of the day's events will be sent upon  
application. We understand that special  
invitations to outside organizations will  
be mailed in a day or two.

### Elm Items.

The social on Saturday evening, given  
by the Base-ball Club, was a success.  
Miss Rose Wuert and Walter Ack-  
ley, of Bridesburg, were Sunday visitors.  
Our base-ball team defeated Winslow  
last Saturday. Score, 13 to 4.  
The Misses Steward are spending a  
short vacation with friends here.  
Fruit growers are getting sixteen cts.  
a quart for fancy strawberries.  
Base-ball this afternoon, — Elm vs.  
Winslow Truckers (Colored Giants).

MR. EDITOR: It was my privilege to  
attend the excellent entertainment given  
by the Artisans on Tuesday evening.  
Among the pleasing features was the  
canary-like whistling of Miss Yard.  
While commenting upon the skill of this  
charming artist, a stranger asked me if  
we had no young ladies in Hammoncton  
who had similar gifts. I wished to give  
him to understand that our girls are  
not without talent, so told him that  
while I did not know of any who could  
whistle, yet there were several here who  
could play Tucker. But, somehow, I  
could not understand why he smiled so  
queerly. Perhaps he had never seen  
that inspiring performance.

Look at Steel's show-window.  
All those shimmering creations of the  
silversmith's and jeweler's art, bearing  
little cards, are prizes for the Fourth of  
July athletic and racing events. Get  
your entries in quickly, — many are al-  
ready made. Blanks can be procured  
at Mr. Steel's, or from Sec'y Horne.

Hammoncton Grange, because of  
school commencement on Friday eve'g,  
15th inst., by order of the Worthy Mas-  
ter, will meet on the Thursday evening  
provisions. Every member should be  
there, to assist in preparing for the pic-  
nic on Saturday afternoon following,  
and the Fourth of July celebration. It  
being the last meeting of the quarter,  
and perhaps the last before vacation,  
all come prepared to settle all dues.  
A. J. KING, Sec'y.

Squire Garton had several cases  
this week. One was a charge against  
Antonio Pugliese for shooting Charles  
Demarco. A counter charge was made,  
and the case dropped for want of evi-  
dence. Another case was from Elwood.  
Mr. McManus was charged with break-  
ing his son-in-law's jaw. The accused  
was held for court, and the young man  
went to the hospital; but on his return  
he may face a charge of repeated wife-  
beating.

The Board of Education had a  
long session on Tuesday night. They  
had important business, which could  
not be transacted hastily. Among other  
things, one of the boys had been detect-  
ed in destructive mischief, and confessed.  
Legally, he could be sent to the State  
Reform School; but the Board sentenced  
him to solitary confinement for balance  
of the term, during school hours, —  
having no communication with other  
pupils. A girl, guilty of discourtesy to  
teachers, was expelled.

## Oak Hall is a Busy Place These Days

We're Clothing Scores of Men and Boys in the Way  
That Will Make Us Glad to See Them  
When They Come Again.

We mean by this, of course, that there are no  
cotton mixed, poorly tailored suits in the stock.  
We use nothing but all-wool materials and tailor  
them in first-class fashion. That is the only kind  
of clothing to buy if you wish your money to do  
its utmost.

Men's Black, Blue and Gray Serge Suits and  
Gray Worsted Suits are in great demand—\$10 to  
\$25. Gray Worsteds begin at \$15.

All wool Suits in black and mixed chevots as  
low as \$10.

Men's Black Unfinished Worsted Suits \$12 to  
\$27.50. This popular fabric grows in favor each  
year and for all 'round service it is hard to match.

## We Save Big By Doing Our Own Manufacturing

For example: We keep one big plant busy on  
clothing for young men and boys—and a big part  
of the saving goes to those who buy in this thor-  
oughly up-to-date department.

You'll find fine materials, thoroughly tailored  
and fairly priced. Some examples:

Double-breasted Sack Suits at \$5 in a big as-  
sortment of fabrics for boys 7 to 17 years.

Double-breasted Sack Suits at \$13.50 in gray  
worsteds, with black and white check, for young  
men 30 to 34 inches chest measure.

Double-breasted Sack Suits \$15 and \$16.50,  
in medium and dark colored gray serges, for young  
men measuring 30 to 34 inches chest measure.

We pay excursion car fare to Philadelphia and  
return upon the purchase of a certain amount.
