## The Presbyterian Picnic.

Yes, we had a beautiful day and a delightful time. Of the three days selected, we finally chose the last, Tuesday, Aug. 14th, which proved to be the best of the three. About nineteen times we overheard the pastor say it was ideal.

Merry indeed were the picnickers as they departed for dear old Greenbank, at about eight o'clock. Arriving at 10.45, we tumbled off the wagons, and the boys immediately prepared for the long-talked-of base-ball game. But the women folks roped in Superintendent Zietz before he had a chance to sneak away to the ball field, and consequently during the first two innings he was warming his hands over the coffee can. Now he is trying to console himself by explaining that while he was absent from the base-ball grounds he was present at the coffee grounds.

Well, the game started immediately after shooting the cows out of the diamond. The teams were captained, as last year, by Reid and J. Walther, and were evenly matched. Reid came off victorious, with a score of 14 to 8.

Below are the positions:—

Reid's	Walther's
Rogers	J. Walther
Reid, A. Walther	Doerr
Paullin	Rev. Stewart
Smith	Kramer
Doerr	Deppe
Reid	Whiffen
O. Reid	Seely
Hurley	Joelyn
Zietz	Peguesso
Umpire	Sobules

After the ending of the fourth inning somebody said the coffee had settled, and that settled base-ball too, for an hour. I'll let you guess what happened in that hour. At 1.15 the game continued. The features of the game were two-baggers by Hurley and professional Rogers, and a corner-out (between third and home) by Rev. Stewart; but he reached home, just the same.

Paullin, after batting a ball, made a bee line for first, but lost his cap on the way, and to this day I don't know which got there first, the ball or the bald—they looked so much alike.

The girls lined themselves along the fence to watch the play. Looked like "rail" birds.

It was a game peculiar to itself. The fielding positions were as follows: Left field, right field, center field, and corn field. Most of the balls were knocked into the corn field, and the preacher (and others) were kept jumping the fences in searching for the ball.

Well, after the game ice-cream cans were tapped, and a swarm of human bees took possession. Not everybody got a spoon with their cream, and consequently, forks, knives, ladles, and sticks of wood were pressed into service.

Then came the races. Rogers proved himself champion of the day, carrying off first prizes in the young men's 100 yards dash, relay, and potato races. John Walther won the sack race with ease. The ribbons for the relay were awarded to Paullin, Peguesso, Kramer, and Rogers. In the boys' races, John Peguesso led in the 100-yards dash, while Fred Small won out in the potato race.

To Dorothy Sanford belongs the honor of capturing the prize for the girls' potato race.

Of course, Phil. was on hand with his launch, and many enjoyed the trips down the river and back. There was also an interesting game of quoits in the afternoon.

At 9.00, after a moonless and spoonless (?) ride, we dumped off the remains of the picnic at various streets and corners, and each felt, down in the bottom of his or her heart, the satisfaction of a good day's fun.

ONE OF 'EM.

The Hammonton Dramatic Association, under the direction of George H. Davidson, are preparing to present the great moral temperance drama, "Ten Nights in a Bar-room," in Bellevue Hall, at a near date. In the cast will be Miss Lillian Smith, Miss Mattie Naxton, Miss Florence Davidson, E. V. Courney, Leroy Jackson, James White, Paul Seely, Doyle Hollamy, and George Davidson.

## OLD Favorites

The Old Clock on the Stair.  
Stands the old-fashioned country seat;  
Across its antique porch  
Till poplar trees their shadows throw,  
And from its station in the hall  
An ancient timepiece says to all,  
"Forever—never!"

Halfway up the stairs it stands,  
And points and beckons with its hands  
From its case of mahogany oak,  
Like a monk, who under his cloak  
Crosses himself, and sighs, alas!  
With sorrowful voice to who pass—  
"Forever—never!"

By day its voice is low and light;  
But in the silent dead of night,  
Distinct as a passing footstep's fall,  
It echoes along the vaulted hall,  
Along the ceiling along the floor,  
And seems to say at each chamber door,  
"Forever—never!"

Through days of sorrow and of mirth,  
Through days of death and days of birth,  
Through every swift vicissitude  
Of changeful life, it has stood  
And as if, like God, it all things saw,  
It calmly repeats those words of awe—  
"Forever—never!"

As that mansion used to be  
Pre-bested Hospitality;  
His great face up the chimney peered;  
The stranger feasted at his board;  
But like the skeleton at the feast,  
That warning timepiece never ceased—  
"Forever—never!"

Three groups of merry children played,  
And golden maidens dreaming strayed;  
O precious hours! O golden prime,  
An influence of love and time,  
Even as a mirror counts his gold,  
Those hours the ancient timepiece told—  
"Forever—never!"

From that chamber, clothed in white,  
The bride came forth on her wedding  
night;  
There, in that silent room below,  
The dead lay in his shroud of snow;  
And in the hush that followed the prayer  
Was heard the old clock on the stair—  
"Forever—never!"

All are scattered now and fled,  
None are married, none are dead;  
And when I ask with throbs of pain,  
"Ah! when shall they all meet again?"  
As in the days-long-ago-gone—  
The ancient timepiece replies—  
"Forever—never!"

Never here, forever there,  
Where all parting, pain and care  
And death and time shall disappear—  
Forever there, but never here!  
The herbage of the vale reply—  
"Forever—never!"

Always in Heaven,  
When Hiram Russell went down on  
the Cape to pay a visit, his friends  
provided him with every sort of fish  
they could muster, and for five days he  
was treated to mackerel, halibut, oys-  
ters, clams, scallops, and many other  
delicacies in the best of the season.

"Well, Hiram," said his host, on the  
day of Hiram's return to his home,  
"I'd like to see what you got from  
Hawaii to cook with me. I've got a  
good fish, I reckon you've got some  
fish enough to last you for one while."  
"Pshaw!" said Mr. Russell. "I guess  
you don't know anything about it. You  
haven't heard of the Hawaiian long  
enough. Hiram'll get me some things  
she always does when I'm real away  
from home for a spell a real good  
mess of codfish and potato hash. That's  
what Hiram'll get me!"

A Happy Afterthought.  
The story of a proposal by telephone  
is covered by a writer in the Phila-  
delphia Public Ledger. Peter, a colored  
youth, was very handsome, and having  
decided, first, that he wanted Miss  
Johnson for his wife, and, second, that  
he dared not ask her in person, he had  
resorted to the telephone. He rang her  
up at the house of her employer, and  
inquired:

"Is that you, Miss Johnson?"  
"Yes," came the reply.  
"Well, Miss Johnson, I've got a most  
important question to ask you."  
"Yes?"  
"Will you marry me, Miss Johnson?"  
"Yes. Who is it, please?"

## A THIRSTY MAJOR

Soldiers, among marches and sports,  
travelling around a but little  
known country know what thirst  
means. In "A People at School" the  
author tells of an adventure in India,  
in which an officer got into trouble by  
his undue haste to satisfy his thirst.

We were camped in a little pleasant  
place in some fields. There was a vil-  
lage near, and supplies were plentiful.  
The water, however, was thick and  
muddy, so it was filtered through our  
little pocket filters and stored in bot-  
tles, which were placed in rows inside  
the door.

One day we went out for a long ex-  
pedition. We were out all day in the  
sun, and came back in the evening very  
hot, very hungry, but most of all, thirst-  
y. Sir Frederick Johnston, a major in  
the British Mounted Infantry, was  
thirstiest of all.

On the way back he had been talk-  
ing all the time of the thirst he had  
known. He began by imagining all  
sorts of cool drinks with ice in them.  
But as the time went on and his thirst  
increased, he dropped them one by one.  
He was too thirsty to think of  
having his bottle for plain liquid, and  
the best liquid of all was water.

When we got to camp he hung him-  
self from the water-bottles. He opened his  
parched mouth and tilted the contents  
down his throat in one great gurgling  
stream.

Fortunately, we had a doctor with  
us, and he took the astonished and pal-  
lid Johnston and laid him out upon  
a cot. He made him lie down, and by  
means of water and mustard by the  
throat, and poured them into him. If  
Johnston wanted fluid, he got as much  
as any man could desire, and he was  
"desperately ill" for a while. But  
little by little he recovered, and by  
dinner-time was nearly all right again.

The bottle he had seized contained  
kerosene. He said that he tasted kero-  
sene for weeks.

As for the servant who mixed the  
bottles, containing kerosene with the  
water-bottles, I forget what happened  
to him. But I have an idea he never  
knew certainly who he was.

LUNATIC AND SPORTSMAN.  
No Wonder the Farmer Extended a  
Little Friendly Advice.  
A gentleman of fortune, visiting  
a lunatic asylum, observed, where the  
treatment consisted chiefly in forcing  
the patients to stand in tubs of cold  
water—those slightly affected up to  
their knees; others, whose cases were  
worse, up to the middle; and the most  
seriously ill were immersed up to  
the neck. The visitor entered into con-  
versation with one of the patients, who  
appeared to have some curiosity to  
know how the stranger passed his time  
out of doors.

"I have horses and greyhounds for  
courting," said the latter in reply to the  
other's question.

"Ah! they are very expensive."  
"Yes, they cost me a great deal of  
money in the year, but they are the best  
of their kind."

"Have you anything more?"  
"Yes, I have a pack of hounds for  
hunting the fox."

"And they cost a great deal, too?"  
"A very great deal. And I love  
birds for hunting."

"I see; birds for hunting birds. I dare  
say." "You may say that, for they are not  
common in this country. And then I  
sometimes go on one—time with my gun,  
accompanied by a sister and a relative."

"And these are expensive, too?"  
"Of course. After all, it is not the  
nature of the thing that runs away with  
the money—there must be men, you  
know, to feed and look after them,  
houses to lodge them in—in short, the  
whole sporting establishment."

"Yes, I see. You have horses, hounds,  
and all for the capture of foxes and  
birds! What an enormous revenue they  
must cost you! Now, what I want to  
know is this, What returns do they  
give?"

## SEARCH FOR NEW FOODS

The World Leveled Upon for  
the recent agitation on the subject  
of preparing meats and most products  
has turned popular attention more  
strongly than any other cause to an in-  
terest in a vegetable diet, and this in-  
terest has induced curiosity as to the  
origin of the vegetables which we know  
best in this country, says the New York  
Post. Every one knows, of course, that  
potatoes are the staple of the Irish and  
rice of the Chinese. If there is a  
failure of the wheat crop, there is fan-  
tasy in India and the sympathy of the  
whole civilized world is drawn upon  
to supply the wherewithal to tide over  
the year's deficiency. England must  
maintain a great army to prevent its  
being isolated from its base of food  
supply in case of war, as much as for  
the protection of its colonies.

Taking lesson from these patent facts  
this country, in spite of the unusually  
wide range of its products and the  
immunity from harm on this score  
even under stress of war, has been  
taken, through a bureau of the Depart-  
ment of Agriculture, to search the  
whole world for every sort of growing  
thing which has possibilities as a food  
product. Having been successful in a  
few, it has been imported here for develop-  
ment in the government laboratories  
and subsequent distribution to such  
government experiment stations or pri-  
vate growers as could develop it most  
scientifically for the climate to which  
it is best suited.

Many persons consider Ireland the  
home of the potato, which has become  
such a necessary part of the average  
American's diet. The plant came to  
this country from the highlands of Co-  
lumbia and Peru, a section of the world  
which has furnished a number of the  
best known and most widely cultiva-  
ted vegetables of the present time. The  
tomato was introduced from Peru back  
in civil war days, when Spanish pres-  
sures had an idea that it was a poison-  
ous plant. Agricultural statistics of  
the past year show that superstitious  
fear of the tomato has disappeared  
definitely, to encourage the growing of  
it has been food on 500,000 acres.

The lima bean is another vegetable of pop-  
ular consumption which came from the  
same South American country, having  
been introduced here in the eighteenth  
century. Thousands upon thousands of  
dollars invested in the orange groves  
of California and Florida obtained that  
opportunity for investment in orange  
cuttings from Brazil. Europe is given  
credit for having provided this country  
with asparagus, while celery came  
originally from southern Europe, and  
rhubarb from central Asia.

Still unsatisfied with all that other  
countries have given us in the way of  
food supply, the aggressive agricul-  
tural scientist of today has been turn-  
ing the world and exploring in far-  
away corners and uninhabited desert  
lands for new food products. The  
only one to be only a slip of a plant or  
a sample of an undeveloped fruit. Each,  
however, brings to the explorer the  
germ of an idea by which he hopes to  
develop the new fruit, through govern-  
ment aid, into a staple of both food  
value and financial profit.

Descriptions have been given in the  
Evening Post's correspondence of the  
last six months of some of the note-  
worthy results brought to this coun-  
try in this way. In the midst of the  
uncertain world; chaotic, the new deli-  
cacy of the eggplant variety; the cas-  
sava, which is so nearly like the  
ordinary cake chocolate as to be read-  
ily mistaken for it, and many other  
new varieties of tangerines and  
other specimens of the orange family,  
and of grazing plants which will grow  
in the arid parts of the west, where  
there are less than six inches of  
rainfall a year.

There has been an accomplishment  
worthy of note, but the fact has not yet  
been exhausted. Other plants and  
fruits are being developed along the  
same line, and descriptions of some of  
them will be available before long for  
the information of the public. At the  
present moment it is possible to give  
some brief facts about several experi-  
ments which have progressed far  
enough to indicate a gratifying suc-  
cess in a great measure, probably, as those  
just mentioned.

Salads have come to be a part of the  
principal daily meal for most persons  
who live reasonably well, because of  
the many kinds which can be prepared  
and the pleasure which they afford  
to the enjoyment of the repast. But  
there is a continual longing for new  
kinds of salad, and chefs are puzzling  
their brains to arrange new combina-  
tions. To meet the demand has been  
one of the tasks which the agricultural  
explorer has set for himself, and at  
ready he has succeeded to a degree.

In Japan he has found a vegetable cal-  
led by the Japanese uchi, which he has  
imported here. It is a very small plant  
so enjoyed by the Japanese that they  
import the canned uchi to this coun-  
try rather than do without their ac-  
quired food. It cannot take the place  
of lettuce for variety of uses, but may  
be used in salads, and is a very good  
addition of certain sources. It has not  
yet been given a distinctive American  
name, but it grows in thick bladders  
about two feet or more in length,  
and grows rapidly.

## DOMESTIC LIFE IN CHINA

Women Have Many Privileges and  
Spend Much Time in Novel-Reading.  
A Chinese woman of charming per-  
sonality, Dr. Yauwei K'ing, delivered a  
lecture at the Washington residence  
of Senator Keam. Her audience was  
representative of all that is best in  
Washington society. Several years  
ago Dr. Yauwei K'ing completed her  
course in medicine at an American  
university and returned to her native  
land to practice. She is now making  
a tour of the United States, trying to  
create a wider interest and sympathy  
between the women of these distant  
lands.

Dr. K'ing, who wore the very becom-  
ing dress of her country, talked magis-  
trally of the domestic life of the higher  
and middle class Chinese. Many  
verses, ranging from the oriental  
counterpart of Mother Goose to se-  
lections from Confucius, were read  
and recited, which is almost an  
art of decorum, which is almost an  
art, with clever anecdotes gathered in  
the practice of her profession, and  
told in the purest English, made up  
a delightful half hour that formed the  
lecture proper, which was followed by  
twenty minutes during which Dr. K'ing  
invited questions from her audience,  
which she answered fully and clearly  
to the enlightenment of all present.

## NEWS OF RECENT BOOKS

A competent authority on things Chi-  
nese states that during the last two  
years China has made more real ad-  
vancement than in the previous millen-  
nium—a judgment with which Dr. Jo-  
seph Franklin Griggs, medical misson-  
ary at Peking for the Presbyterian  
Board of Foreign Missions, is heartily  
in sympathy. He calls the changes  
now in progress in China "a miracle  
of natural reeducation."

Justin Huntly McCarthy's latest  
story, based on the career of Joan of  
Arc, calls attention to the fact that  
there exists a sworn narrative of the  
private and public life of the maid of  
Domremy. Twenty years after her  
death Charles VII. ordered an investi-  
gation made and two years later Joan's  
mother appealed to the Pope. The case  
dragged along until 1466, when more  
than a hundred witnesses were exam-  
ined and with solemn religious cere-  
monies a new sentence was proclaimed.  
For nearly 400 years the record of the  
trial was buried in the official archives  
of France, when Quicherot gave it to  
the world in five volumes of modern  
French. The substance of the pathetic  
narrative has been done into English,  
but it is little known to the world.

The Woodland Elf, is the title of  
a juvenile by Florence A. Evans.  
It is a series of imaginary stories told  
by a little girl lost in the  
woods. He explains numerous won-  
derful things—why snakes shed their  
skins, why seals wear furs, why cat  
tails grow, how we can have the  
morning glory, why Indian pipes grow,  
how the dandelion seed blows its name,  
why wishes no longer come true, and  
so on through the list. These are just  
a few of the pretty tales the author  
has so cunningly woven around the life  
of the forest, and which will be of  
great use to the children of the world.  
A minute description of the process  
of foot-binding, which happily, she  
said, is passing out of fashion, and  
is said to have originated some 900  
years ago, when the eunuchs of that  
time used the feet, which she consid-  
ered fully disguised in the most beauti-  
ful of small shoes that speedily became  
the fashion, and an illustration of the  
changing fashions of dress and  
clothing, and the changes in the  
changes in the changes in the changes  
in several generations, were a few of  
the especially interesting features of  
the lecture.

The Bookman's list of "best places"  
gives "Pewee's Career" first place,  
with 250 points; "Lady Baltimore,"  
a "loss second, with 221 points; "The  
Spillies" drops to 177 points, and "Pan  
Doodle" to 171 points. In the "Al-  
ways" and "The Jungle" follow in  
the order given. In Minneapolis "Pew-  
ee's Career" is not included in the  
list of favorites, but in St. Paul it has  
third place. In Birmingham, Ala.,  
"Doodle" is first, "Lady Baltimore" is  
second, "The Jungle" is third, and  
"Pan Doodle" is fourth. Mr. Ward's novel  
is apparently unappreciated, since it is  
not in the lists. Following these reports  
of the popularity of certain books as  
evidenced by "Pewee's Career" it is  
difficult to understand why publishers are  
battled in making forecasts as to the  
success of a story. The showing dem-  
onstrates the fact that the ownership of  
a book, even one of so much dignity  
as "Pewee's Career," is not a matter  
of mere ownership, but a matter of  
value, as much of a gamble as raising  
a racehorse or taking a flyer in the  
street.

### Auto Accident.

A serious automobile accident occurred on Thursday afternoon, between here and Elwood. William Moody and John Barrett, of New York City, were driving their automobile, along the County Road, on their way from Atlantic City to the Winslow Inn, when suddenly, while going at the rate of thirty miles an hour, a pin dropped out of the steering gear and the machine became unmanageable. Barrett started to jump, but the auto caught him in the back as it turned turtle, and both men were pinned under the machine. But in a few seconds the car had righted itself and started off into the bushes.

A passing chauffeur took the injured men to Hotel Royal, where Drs. Bart and Crowell attended to their injuries. Mr. Barrett was seriously injured internally, though probably not dangerous. A slight operation performed Thursday night, afforded relief. Mr. Moody suffered a cracked rib, and several bruised muscles. No signs of external injuries, save a few scratches, are visible on the victims. A trained nurse from Philadelphia is attending the men, and it is expected that they will be about in a few days.

The auto was damaged somewhat, but not so much so but what Cordery was able to run it up to town after the insertion of the bolt which was discovered nearby.

The Hammoncton Ice Manufacturing Company at last have their machinery started. Tests of pipes, etc., were made yesterday, repairs made, and it is expected that they will be making ice to-day, for sale next week.

Charlie Loveland, with a party of young friends, rescued five young ladies from drowning, Sunday last, at Fortescue. The ladies were swept into deep water, while bathing, and were in imminent peril, when Charlie and another, in a row-boat, reached them, with the assistance of one swimmer and two others in a launch, all were rescued.

At the mention of fleas, nearly everyone begins to scratch and act very uncomfortable. We judge that same feeling was manifested, this week, in one of our lodge rooms, when a swarm took possession of the members, all but driving them out. How the insects were introduced into the room is a mystery.

Obituary.

Mrs. Margaret E. Crowell, widow of the late Edwin Crowell, died about noon on Saturday, Aug. 11th, 1906, after long and tedious illness, aged 73 years. She was a good neighbor, beloved by all who knew her, best loved by those who knew her best. With a heart full of sympathy, she comforted those in trouble, and aided those in need. She will be sadly missed by a wide circle of friends. Funeral services were held at the family home on Tuesday afternoon, conducted by Rev. H. W. Wilson. Burial in the cemetery at her home, Dr. G. M. Crowell, Preston, Chester, John and Winslow, (the last two not being able to be present), her daughter, Miss Sarah, several grandchildren, and numerous relatives, here and elsewhere.

## Base-Ball.

The Crescent A. A. met a reverse in  
their winning streak, last Saturday,  
when they were defeated by Egg Har-  
bor, 7 to 2. This was the third game  
— Hammononton having won the other  
two. Blake was not quite up to his  
usual form, allowing possibly twelve  
hits, though in the eighth he struck  
out three men with ten pitched balls.  
It was in the fourth inning when the  
worst mischief was done, when two  
clean hits, a scratch, a couple of errors  
and two sacrifices resulted in four  
runs. Still, the boys have been doing  
such excellent work that we can over-  
look their dropping this one game to  
the veterans from Egg Harbor.
