# DEVUTED TO THE INTERESTS OF HAMMONTON AND MAKING MONEY.

LOV. II.--NO.7

HAMMONTON, N. J., SATURDAY, FEBRUARY 15, 1873

\$2.00 PER YEAR

#### Santo Dor wew

The recent purchase & Samaus Say by a party of American capitalists has igain brought the island of Santo Homingo prominently before the attention of the public. A few facts therefore respecting sh, country may be interesting to our readers :

The island of Santo Domingo is about half way between Galveston and New York and lies due south from the latter It was settled by Columbus as carry as 1493 and the present city of Santo Domingo was founded prior to the year

It is 400 miles long and in the widest part 150 miles broad. The mountains rise 7,200 feet above the level of the sea. It has fine rivers, numerous valleys and rich plains. The whole island is tertile and can yield sugar, coffee, mahogany, honey, cedar and the various products of the tropics, while the highlands give the wheat, the apple, the grape, the straw-berry and the fruits of the temperate sone. Lying in the full influence of the Trade winds Dominica is regarded as a remarkably healtny place. The Island is divided between the government of Dominica, held by descendants of Spaniards, who occupy the castern and central pertions, being rather more than three fifths of the Island, and of Hayti, now under negro government, who occupy the western part, being between one and two fitchs of the Island.

The intelligence of New Jersey is shown by the sar'e number of publications by the sar'e number of publications numbering 153, an average of one to every 4,000 population. Of these, twenty-five are daily (five of them issued only in July and Augu t of each year), one hundred and eighteen weekly, one semi-weekly, and thirteen monthly. Ten dailies and thirty-eight weeklies are Republican in political seven isilies and thirty-five in politics; seven dailies and thirty-five weeklies are Democratic in politics; three dailies and forty-six weeklies are independent or neutral; one daily and one weekly devoted to Temperance and one to Educa ton. One dairy, one semi-weekly and eleven weekles are printed in weekly and eleven weekles are printed in the German language and one weekly in the Holland language; all others in English. During the past year one daily, fifteen weekly and six monthly publica-tions have commenced, and three daily, tions have commenced, and three daily, five weekly and two monthly publications have been discontinued. Of the publications named Atlautic county has 7, Bergen 4, Burlington 8, Camden 3, Cape May 3, Cumber and 14, Essex 16, Glouce ter 8, Hudson 12, Hunterdon 8, Mercer 9, Middlesex 5, Monmouth 6 Morris 4, Ocean 3, Passale 8, Balem 4, Somersec 4, Sussex 3, Union 11, Warren 8.

It will be even on comparing the population of the Counties, that Atlantic county is very near the head, though we are credited with one mere paper than we rearry have, the seventh being published only in the Summer, t-Atlantic

## BOOK TABLE

Before us is a copy of Briggs and Brothers' Floral Work and Catalogue, for January. To say it is about as near periodion as typographic and inhograph icart can be is not too much. In fact, one cannot form any idea of the gorgoous beauty which is attribed in there arts until he has seen this work. The cover firshif is a thing of beauty; on the area page of which is the Goddess Fora resplendant with golden light contradilig grandy with the unramatine blue back grand. She is kinneling upon a pedestar bedecked with flowers, over which she was supposed to preside. In front of this pedostal, partly surrounding it, in good and brown forters, is the word "he lustrace..." and beneath on an emptical base are the fixures, 73. On the back of the cover is a spinnitia monogram of the firm. The whole inside contents are in harluonia kooping with the cover disest fi d and so arranged that the name of any se d. plant or vogotable can be found with readiness. There are low things in the flower world you emmor find the manie of in this work. Its utility is equal to un bours. It is to be published quarterly, and is turnished so cheaply one can hardly reads: new any business oan enable the firm to distribute hundreds of

thousands of copies to its catrons.

Limited 25 of to Brigge & Brother, Roonester, A. Y., and get a number and thise learn the great advantage gained by dealing with a house whose immense Dusinoss consides it to be thus generous HO HA DALFOS:

Ma press for tonus to shork we me should like of the four beautiful Chromosministrare coules of which are presented. That of 1873 , if he sent to those who Datopuse \$6 motif of seeds! the others will be sent to those who order \$5 worth; \$1 will secure either without ordering any seezs; \$1.50 will get them monuted ready for framing.

One of the most useful journals published in this country is The American Land and Loss Advisor. It should be in the hands of every man of business.

It te 's how to draw up legal papers; it explains doubtful points of Law; it gives important decisions; it explains the laws Which the people want to understand-Homestead, Exemption, and Land grants —in everything permining to the matter mentioned, besides hosts of excellent misreaders, by taking their subscriptions, Price \$3 a year. Let us nave your names gentlemen. The number before us contains one arricle which gives advice for which you would have to g ve a law-yer \$5. \$4.50 will pay to it and our own paper for one year, with Chrome.

We will take subscriptions for Scribner's Monthly, or we will frinish it withour paper for \$5.25. This is offering an excellent opportunity to secure one of the best manthlies published.

Our Temperance triends should, by all means, have The Temperance Blessing, edited and published by Chas. Heritage at 26 N. 9th St., Philadelphia. It you want to know what is being done among temperance people, have it.

WHAT NEXT? This favorite juvenile magaz ne is quite a w-nder in its way. It gives 168 large pages of excellent reading, and a \$1 00 Chromo, 10x12 mches, mounted for framing, to every subscriber, all for only 30 cents a year. Enough, certainly, for the price.

The February number, just received, is a real gem, every way. Specimen 3 cents. John B. Alden, Publisher, Chicago, Illinois.

Harper's Weekly and Harper's Bazar are always richly freighted with good things. The tashion plates in the Buzar make it most desirable for the ladies. Every intelligent lady shou d have it. The Weekly is one of the best educators of all the litustrated weeklies, and every lamily ought to have a copy.

FARM AND HOUSEHOLD.

If We Had Cheap Freights? If we had cheap freights, we would keep on doing what we have been doing for many years. We would in set those crops, and only those that are best suited to our soil and climate, and would leave producers in other regions to cul-tivate and supply-us with those things We would have corn fields stretching for miles, plowed by steam power produced particle of fat. Season and serve. by our inexhaustible coal deposits. We would bring to our aid in the cultivation of this crop all the appliances of machinery, and all the skilling men trained to the business. We would have hog Borren Chickey.—Plain, artless but

pastures where the clover should blossom over a hundred acres in a single inclosure, and where water should be supplied of convenient places. We would water and lemon juice, and to insure laws corn cribs and cooking apparatus whiteness, delicacy and succulence, on extensive scales, and concentrate our should be boiled in a paste made of flour skill and capital on the production of a red water, and after being put in the few things for which we have the great boiling water, should be allowed to simple the production of a red water, and after being put in the few things for which we have the great boiling water, should be allowed to simple the production of th est natural advantages. We would carry mer slowly. This method is very ef-on our few branches of business with fectual in preserving all the juices of the same thrifty economy that a manu-the fowl, and the result is far more facturer of a single-staple article shows toothsome and nourishing than the lucking conducting his business. in conducting his business. ... less bird which has been "gall If we had cheap freights we would not death" in plain boiling water.

war against nature, or work to a disadisable is also much better for being boiled in vantage in the production of crops. We paste would not try to raise cotton in Illinois, How TO SWEEF.—The right way to sweet potatoes in Michigan, peanuts in sweep is to incline the handle a little lown, or tobacco in Minnesota. In the forward, then give a light drawing great corn region of the Mississippi touch the carpet. Not one-half the stroke, allowing the broom to hardly touch the carpet. Not one-half the weight of the broom should be allowed to press on the carpet as the dirt is but we would leave the grain markets of the world open to those regions of country especially adapted to these crops, and not well suited to producing what we can produce with greater ease. By skilled, each in his own particular busieminent in our specialty, experts in our particular busi-smart woman who is the terror to dirt ness. We would dispense with half our will-frequently hurl it about the room as fences, half our barn buildings, and if it were impelled by a whirlwind, and half our farm machinery; and in the when the task is ended iter dust pan will producers of those raised at home. We would buy as well as sell, and thereby we would all be gainers. Neither we, nor the farmers at a distance from us, would try to raise crops that are only for dessert, and very easily prepared: produced at a disadvantage on account Boil two quarts of rich milk. Beat

of soil and climate. If we had cheap freights, we farmers gether, and after the milk has boiled, would carry on a business as manufacpour it over the eggs and sugar, stirring turers and merchants do, and not simply work for a living. We would double kettle, and let it come to a boil, stirring the commerce of the country instead of doing as we now do, study to see how and let it become cold. Flavor with we can avoid buying what other men whatever essence you prefer. produce. As the matter stands, how- freeze it. ever, it seems that we must patiently APPLE SHORT-CAKE.—To one quart o wait for the good time, which we trust sifted flour and two teaspoonfuls of is coming, when the men who control our transportation lines shall see the propriety of encouraging trade between of butter, sweet mllk or cream, enough farmers in different sections of the country, and of fostering the exchange of roll and bake in a sheet. As soon as production to the full extent that is de-baked split open the whole cake, spread one cake quickly with butter, cover with mate... While it costs four bushels of

corn to get one bushel to market, farmers some thick sweet cream, grate on nutcannot afford to buy articles produced at a distance, and pay four times their side down, spread with butter, cover value at the place of production. We with apple sauce, cream and nutmeg. must-study to live as though we were cut off, or shut off, from the rest of the other lands and produce luxuries in our It is a perverse habit children are of the sweets obtained from the tropics, of their fingers. Boys more frequently own gardens. We must give up route prone to establish descripting the beauty of the sweets obtained from the foreign. Of their fingers. Boys more frequently and guther honey from the flowers, and than girls gnaw their digits, but the manufacture sirup from sorghum and latter occasionally fall into the vulgarity, sugar from forest trees. We must make a though determined to eat them off at the farm serve the purpose of the whole the palm.

went of the support, and enjoy ment of the following treat. Notice appeals to the passed to the property of the support of the

steeped in the silicate like varnish, has well nigh turned to stone, but without losing a single quality of sweetness or resonance. The violin is the only fossil that still lives, and lives with a fullness of life and freshness that contrasts mysteriously enough with the failing, sickly and withering generations of man. Even should mishaps bruise or break its beauty it can be endlessly restored—it is never fit for death, but survives a thousand calamities; nay, even when out up, dismembered, its several parts scattered through a dozen workshops and through 500 years, it lives on with a kind of metempsychosis in new forms, and still clings strangely to its individuality, so that men taking up a patchwork violin, say it is fine, the front is poor, the head is tame; but then, see, here is a Stradivarius back. Thus human in its immortal fabric, the violin reigns the passing through the great door, the visitor finds himself in a large unpayed upond it. On one side are perhaps six or eight guest rooms, little boxes about twelve feet square, with paper in place of glass for windows, doors which do not fit, and through the openings of which wind and dust find their way. A very rickety old and find their way. A very rickety old through for multiple payed and free place the openings of which wind and dust find their way. A very rickety old form the openings of which wind and throu steeped in the silicate like varnish, has

The Woman's City.

Mrs. Leonowens thus describes, after a short sketch of Bangkok, capital of Siam and Venice of the East, the Woman's City:

"Not far from this is another semicircular space surrounded by a high wall, which defends all entrances to the part inclosed by the inner of the two parallel walls before mentioned; and lere stands the city of the Nang Harem, or Veiled Women. In this city live none if he can; but rats and lesser vermin or Veiled Women. In this city live none if he can; but rats and lesser verms but women and children. Here the often disturb his rest. houses of royal princesses, the wives, concubines and relatives of the King, with their numerous slaves and personal attendants, form regular streets and avenues, with small parks, artificial

with their numerous slaves and personal attendants, form regular streets and avenues, with small parks, artificial lakes, and groups of fine trees scattered over the miniature lawns and beautiful flower-gardens. These are the residences of the Princesses of Siam. On the east, high above the trees, may be seen the many towered and gilded roofs of the grand royal palace, brilliant as sapphire in the sunlight, and next to this is the old palace, to both of which is a private covered entrance for the women; at the end of these passages is a bas-relief representing the head of an enormous sphinx, with a sword through the mouth, and this inscription: Better that a sword be thrust through thy mouth than that thou utter a word ter that a sword be thrust through thy mouth than that thou utter a word against Him who ruleth on high.' Not far from this are the barracks of the Amazons, she women's hall of justice, and the dungeons (where, as in the days of old, female judges daily administer justice to the inhabitants of this woman's city), the beautiful temple, with its long, dim gallery and antique style of architecture, in which I taught the royal children, the gymnasium, and the royal children, the gymnasium, and the . A poor man's family never lack for an royal children, the gymnasium, and the theater, where the princesses and great ladies assemble every afternoon to gossin play games or watch the avergises rich cake, highly seasoned dishes and sip, play games or watch the exercises of the dancing girls. In the southern dancing girls. In the southern nurtured in luxury, are the life of docpart of this strange city, which is the most populous, the mechanical slaves of tors and druggists. So says science. he wives, concubines and princesses live and ply their trades for the profit of their mistresses. This woman's city is as self-supporting as any other in the

We will not intrude upon them durbic ing their walk home, as Henry asked in the world, but he doesn't is a brindled cat, the other a limit to were borne off in triumph.

The Bank of Louisana is making an At the sight of Henry she uttered a fort of you (issue) paper.

We will not intrude upon them durbic ing their walk home, as Henry asked in the state of the subscribers paper.

We will not intrude upon them durbic ing their walk home, as Henry asked in section important to them alone; and she answered it satisfactorily, we loarding house isn't on fire.

At the sight did with.

The Bank of Louisana is making an At the did in the sight of the usual rigm they said she would fall in love with a light-haired gentleman, but she wouldn't light-haired gentleman, better light-haired gentleman, be

he looked and so please won't you go and have them tell our fortunes?"

The speaker was a lovely girl of periods beautiful hazel eyes, a rosebud of a month, long dark hair, which hung in which rivated that of Hebe.

Her cheek was slightly flushed with exercise and excitement, which added still more to her already beautiful face.

The person she addressed as Florence

Triphtened at the strange manner of Thornton and Gussie Hamilton were married the following winter. Florence married the to the western part for which has 12,000 and 12,000 a

I don't care to have my fortune told -I don't believe in gipsies.' "O, well, no matter for that. You can have it told all the same, and not believe any more than you want to. Come,

when the conversation contesting shows a serior of the house afther her hat, show to the house after her hat, show to the her hat her

Thornton, who had been studying the past eight years in Europe, and had now returned—changed from a noisy boy of fourteen to a polished man of the world. He had known Grassie Hamilton only is a romping school-girl before he left home, and she appeared all the more lovely to him from contrast when his tatter introduced him.

The sether they returned to the house, and the next more lovely to him from contrast when his tatter introduced him.

The sether they returned to the house, where they found Florence helping to set the fable for supper. After Henry had been miner than had been miner than had been miner than half a mile!

Henry Thornton decided to remain water shining through the trees. He crossing; presented the usual appearance of such encampment. There was the complement of sarsage-loaking men, that she like the configuration and hard had been struck at the complement of sarsage-loaking men, that she returned held they were immediated when had been struck at the complement of sarsage-loaking men, that she returned to the returned station.

The returned—changed from a noisy boy of found files from a noisy boy of found files from the structure of the protection of the protection

the gipsy, Gussie fled from her to her

older than her eager questioner.

"But, Gussie," she replied, "youknow that your guardian doesn't approve of spending your money so foolishly as getting your fortune told by vagrant gipsies."

"I know that; but then he wouldn't object if he knew I wanted to—and I do want to so much! So please do go with me and I know he won't care."

They affected to laugh at her fears and the warning, and so much reassured her that she was in her usual spirits on that arrival at the house.

For three weeks Henry Thornton lingered at L—. Was it the joyous laugh and sparking eyes of Gussie Hamilton, or the quiet smile and liquid oyes of Florence Lincoln, that attracted him, and prolonged his stay? Were he

PORGET ME-NOT." BY J. AUGUSTINE SIGNATOO. entiful the wild flowers grew. where beautiful the win howers give.

By Danube's turbid stream,
And nature bloomed bright to the view,
Like youth's romantic dream.
There knelt, beneath the mellow light
Of Luna's golden hue,
Armed cape-pie, a gallant knight
Bidding his love sdieu.

She said, "I give thee to our God,
For right to dare and do,"
Then plucked a violet from the sod,
A gift to blind the two.
Just then an idle zephyr's breath
The flower blew on the wave;
The kinglit plunged in, delying death,
That precious gift to save,

"The Captain—is—convinced—that the right whale has a trace of hair within the skin. He says that when the skin is fresh, if it be scraped with a knife so as to remove—the superficial parts, there will then be seen a trace of hair in the inner section. This point is worthy of attention from those naturalists who have opportunities for such work. It is evident that if the whale is the descendant of some land mammal form, it would be likely to preserve a trace of the hairy covering. In this connection it is interesting to note that, in the museum at Nantucket, there is a tooth of a sperm whale with two langs after the fashion of an ordinary mammalian canine. The Nantucket, there is a tooth of a sperm whale with two langs after the fashion. The naturalists who for an ordinary mammalian canine. # Ayers Hair Vigor,

Por restoring to Gray Hair its natural/Vitality and Color.

A dressing which is at once agreeable. healthy, and effectual for preserving the hair. It soon restores fuded or gray hair to its original color, with the

loss and freshness of youth. Thin hair is thickened, fallen hair checked, and baldness often though not always, sured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophicd and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning grey or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the formation of dandruff, which is often so uncleanly and offensive. Free from those deleterious substances which make some preparations dangerous and inju-rious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a HAIR DRESSING, nothing olso can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich, glossy lustre, and a grateful perfume.

Prepared by Dr. J. C. Ayer & Con-Practical and Analytical Chemists, LOWELL, MASS.

#### Ayer's Cathartic Pills.

For the relief and eure of all derangements in the atomach, liver, and bowels. They are a mild aperient, and an excellent purgative. Being purely vogewhelm to the first they contain no mercury or minneral whatever. Much serious atthewes and suffering is prevent, and every family should have them on hand for their protection and roller, when required. Long experience has proved them to be the safes, sured, and best of all the Pills with which the market abounds. By their occasional—ucc, the blood is purified, the corruptions of the system exposited, obstructions removed, and the whole machinery of his restored to its healthy activity. Internal organs which become elogged and sluggish; are cleaned by Asyr's Pills, and stimulated into socion. Thus inclinent disease is changed into health, the value of which change, when rockoned on the wast multitudes who enjoy it, can hardly be computed. Their enger conting makes them pleasant to take, and preceives their virtues unimpaired for any longth of time, so that they are even fresh, and perfectly reliable. Although searching, they are mild, and operato without disturbance to the constitution, or diet, or compation.

Full directions are given on the wrapper to

Although searching, they are mild, and operato without disturbance to the constitution, or diet, or ecoupation.

Full directions are given on the wrapper to each-box,-how-to-use-them-as-a-Family-Physic, and for the following complaints, which these Pills rapidly cure:—

For. Dyspepsia—or-Indigection; Eistless-mees, Languor, and Loss of Appetito, they should be taken moderately to atimulase the states should be taken moderately to atimulase the estates should be taken moderately to atimulase the states should be taken moderately to atimulase the states should be taken moderately to atimulase the states should be taken and Billious Powers, they should be judiciously taken for each case, to current the diseased action of remove the obstructions which sawe it.

For Dysentery or Diarrhosa, but one mild does is generally required.

For Rheumatism, Gout, Gravel, Paipitation of the Heart, Fain in the Bide, Stack, and Loins, they should be continuously taken as required, to change the diseased action of the system, With such change those complaints disappear.

For Dropsy and Dropsical Swellings, they should be taken in large and frequent does to produce the effect of a drastic purge.

For Suppression, a large does should be taken, as it produces the desired effect by sympathy.

taken, as it produces the desired enters by sym-pathy.

As a Dinner Pill, take one or two Pills to promote digestion and relieve the stomach.

An occasional does stimulates the stomach and howels, restores the appellte, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who fiels salerably well, often finds that a does of these Pills makes him feel decidedly better, from their desaning and renovating effect on the digestive apparatus.
