\$2.00 PER YEAR

### Canada Letter.

A letter received a few days ago, from afriend in Canada, contains some matters soft felt hats, cloth hats and caps. Also, of general interest to readers on this side an assortment of neat childrens goods of the Canadian line. It must be remembered that the old element of Toryism is atill rampant in Canada, and the tories are generally slow to catch the manners as they rise, but live in the past and are always behind the age. In spite of this element, Canadians are aroused to one important interest, which tories almost to a man, oppose, that is, closerrelations with "the States." The postmaster at Picton, Ont., is of the above stripe, and requires the papers of that place to pay postage on papers that come from Yankeedom as exchanges. This our friend thus ventilates :- "The law (the present law) allows them to be carried free, but S- works, I think, under the old law, and being a rigid tory it is not to be wondered at. That party calling themselves conservatives do not believe in reform, consequently what was right and lawful twenty years ago, is so now. Many of that party are of the Rip Van Winkle order, possessing a sort of fossiliferous humanity, and when really awakened by a reform blow, or by a Republican idea, they find things have grown, and ideas bave advanced so much that they cannot understand the state of affairs."

The reform Legislature have granted a charter for a railroad to run from the head of the Bay of Quinte, some 80 miles shove Kingston, on the south side of that Bay, to a piece called Picton, with power to extend it to a Point on Lake Ontario opposite Oswego, connecting with the latter place by steamers, thus opening a new, direct, and continuous route from N. Y. City by the Midland Railroad to the great north-west, through Canada. This road is also to connect with a road running into the great mineral region of Canada, the wealth of which will attract American enterprise and capital. Our correspondent continues :- " I

look upon every railroad leading from the great lakes into the country, as so many links to bind the two governments together. By these means the enterprising republican spirit of the United States will be extended in this country, the interests of one will be the interests of the other. Thus a union will be formed, stronger than any legal enactments would make, and annexat on will, in reality, be offectual without the noise and confusion of a murderous warfare. These ideas would, no doubt, appear absurd to some of our Conservative triends, but I believe they will be realized. Perhaps not in my day, but I have long believed in the certainty of the peaceable annexation of the Province of Ontario to the United States. Statesmen here will not openly advocate this, but we find them willing to Invite capitalists to invest their money here in establishing manufactories of various kinds. And why? Do they not know "knowledge is power," and that money increases that power? Do they not know that skill implies knowledge, and that skillful mechanics command high wages? Hence successful manufacturers possess great power. Certainly they know all chis. Bring on your money then, and you will surely conquer.
Of the ITEM he says, "I think it has

improved greatly, and as it is conducted by a live Yunkee it ought to succeed, and it ought to be well austained by the people of Hammonton and vicinity. Of course the Democracy will not take it with a very good grace, but they have many hard pille to swallow, and when administored by a Dr. they should not make wry faces. It they would take the political prescriptions of the REPUBLICAN and ITEM and digest them properly. I wave no doubt that a radical cure would be effected, and many of them might become useful men. Perhaps some of them might even become Republicans of value

### A KISS IN THE DARK.

"Will you be at home to-night, Annie?" The person who asked this question, a tall, muscular, good-looking young farmer, was leaning upon Squire Moore's front gate talking to the Squire's pretty daughter, who stood inside of it. As the ample words passed his lips he reddened suddenly to the very roots of his hair, as if he had just been guilty of some great impropriety. "Will you be at home to-night, An

was bashful—extremely bashful ences from these two facts and the additional one of her being dressed with more than usual care to spend an evenpresence of young ladies, most of all in the presence of the girl he loved. No young man in all Wilkes county owned a better kept farm, or talked with more confidence among his cronies of stock and crops and such like. But the sight of a pretty foot or face coming his way so that I might have David all to myself." So, like a wise little puss, she was silent.

they were walking together from a corn husking. That had been just one week ago. Annie, who wished to put off the ordeal of avowal as long as possible—at any rate to gain time for one more confidential talk with David on the subject—said hastily, in reply to that stammered query of his with which we have pre-faced this narration: "Mother is going over to Aunt Ruth's with father to spend

nuts were on it, in close proximity to Annie's coquettish work-basket made, of pine cones by her own deft little hands, and daintily lined with blue silk. On one side of the fireplace set Mrs.

Moore, fat, fair, more than forty, and at peace with all the world. She sat She had got a new idea into her head; swaying backwards and forwards at and instead of settling herself for anintervals in her low rocking-chair, knit-other nap, she pursued her train of ting as she rocked, and refreshing her-self now and then with a mouthful from with wonderful rapidity. At length a half eaten apple which lay within easy stopping and looking keenly at reach, just upon the corner of the table, over her spectacles, she said: 

the tip of her foot a sleek, lazy-looking gray cat that lay purring and blinking David Winthrop."

on the hearth rug before her.

Annie sat on the other side of the table deftly drawing her needle in and out of a long piece of white cambric, and with her head as busy as her hands with trying to contrive some clever way of incidently mentioning the mist which

of incidently mentioning the visit, which she was now momentarily expecting, to her mother, without exciting the suspicions that it was a pre-arranged affair.
She would have given a good deal to be able to say in an off-hand manner that she wouldn't wonder if Mr. Winthrop were to drop in, as he was in the habit of calling occasionally on Saturday even-ings at about this time. But she recolated with a twinge of conscience how some great impropriety.

He was bashful—extremely bashful sharp enough to draw her own inferences from these two facts and the ad-

about in grotesque mimicry as she nod-ded to and fro now crushing the voluminous white satin bows on her ded to and fro now crushing it over-your old mother."

the voluminous white satin bows on her spruce cap against the back of her chair, —now almost falling forward, while her fat hands at length dropped listlessly in her lap, and her ball of yarn rolled down upon the hearth. Pussy espying it over-your old mother."

it over-your old mother."

Thus adjured, our small feminine During the forence he observed that a paper was being passed from much relieved to find that mother seat to seat by some of the toughest of the crew, and by careful watching he give father a talkin to about it an' bring of one of the number. At recess he was to the desk and found the paper: it, was soon busy in unwinding and con-verting it into all sorts of Gordian-

All at once came a double rap at the said "Let me in!" so loudly and impatiently, and in such a self-assured manner, that Annie, rendered nervous by suspense, started up with a little scream and set her foot on Madam

things to right by that time."

Of course David was not too obtuse to understand that he was specially favored by this arrangement, and he so far forgot his bashfulness as to petition left. Almost at the same moment she "You are generally looking at something" awkwardly for a parting kiss, which was at once refused in the most inexorable door, and, opening it, she suddenly you are smiling to yourself. Then your manner possible,

back against the wall. The crumbs had so an infantile dove. She tried to soothe been carefully bringhed with a turkey the indignant matron by representing wing from aneat home made carpet, and that it might, have been (1) one of the Africe's workstand was drawn up in front of the ample and blazing fire of fluence of a weather than the hickory loss which gracked alternative the matrix that the state of the control of the sample and blazing fire of the control of the sample and blazing fire of the control of the been carefully britished with a tarkey the indignant matron by representing wing from aneathome-made carpet, and that it might have been (I) out of the latine's workstand was drawn up in front of the ample and blazing fire of fluence of a wea drop too much, had hickory logs which cracked cheerily in the old fashioned fire-place. She searched the entry for the missing spectacles, arrianged the rumpled carp in the day ples and a plateful of cracked walnuts were on it in close proximits to attend to the indignant matron by representing the indignant matron by rep stirred the fire—all in the most amiable manner possible—and at last had the satisfaction of seeing her mother subside into her rocking-chair and her usual tranquility of spirit.

But Mrs. Moore was fully awake nov

"Pears so to me; 'cause them big whiskers put me in mind of his'n; and then the awkward way he gripped me

with his big paws."
No answer. But Annie was wonderfully busy. She bent over her work and drew her needle through so quickly that the thread snapped, and then she didn't have time to talk, she was so taken up with trying to coax the thread through the eye again!

Inflexible Mrs. Moore went on:

"I don't believe that kiss was intend-

for me at all-do you, Annie? Well course we know it wasn't. But ther I do wonder who it was intended for And I wonder if you don't know some thing more about it than you see fit t

### - The Hardscrabble School:

A certain school district in the town of Waterford, Maine, was called "Hard-scrabble," and it was appropriately named. It was a tough, hard place, mamed. It was a tough, hard place, and the inhabitants were for the most miles. It is for the main purpose of part, rough and uncultivated. The school of Hardscrabble was a difficult one to manage. We write of the years agone when boys in the country were in the habit of attending school during the winter term until they were one and twenty; and thus, especially in the farming districts, the teacher wis apt to find scholars under his charge hard know," he states, "that, if you touch a to handle. The Hardscrabble school

On the first of December, 1817, my sponds to every impulse of the solar father, then a youth of twenty, standing six feet and an inch in his stock-

determined to make the effort.

A bright, crisp Monday morning of December it was when the new teacher

hearing, or sight, travel along the nerves at the comparatively slow rate of from sixty to seventy feet per second. December it was when the new teacher entered the Hardscrabble school-house from sixty to seventy feet per second. For instance, if a man of average height for the first time. He had been in receives an injury in the foot, there will be a lapse of rather less than one-tenth to board that a plot had already been formed by the larger scholars to turn him out and put him into the snow, before the injured member, in obedi-

of evil intent in their faces.

The forencon passed without hostile demonstration. The teacher laid down late writer, we find that thought does not spring instantaneously—it is a phenomena of the same along the whole length of the nerve. Thus, as has been stated by a late writer, we find that thought does not spring instantaneously—it is a phenomena of the same along the whole length of the nerve.

"But, Annie," said Mrs. Moore, drywent to the desk, and found the paper;
ly, in conclusion, "I want you to tell which proved, to be a written agreeDavid I'd rather he'd not make such a ment, entered into by six of the hercuters into the final calculations. mistake as that again. I don't like to lean scholars, by which they were to feel his big whiskers about my face, and, moreover, I don't approve of promiskus kissin'!"

Davidnever heard the last of that kiss in the dork Cold Squire Moore of the cold recession of th

and with dignity the teacher related it! Now it seems only the

Talentating the Distance of the Nun. At present the distance from the earth to the our is reckprised at ninety-

to find scholars under his charge hard to handle. The Hardscrabble school had gained a bad reputation. No teacher could manage it when the big boys of the winter term took their carried out from the school-house and dumped into the deep snow, and certain of the shock-headed giants had declared that so they would serve any master who should be placed over them. They were not exactly totally deprayed, but they were fearfully demonstrated who should be placed over the distance of the sun, and should put my fingers into the solar flame, and burn them there, it would find it out, and another hundred years before I would find it out, and another hundred years before I could remove my hand, such is the distance of the sun, and moralized. ings, his frame strong, and his muscles to keep the Hardscrabble school. It was his first essay at school-keeping, and, knowing the character of the district; and having heard of the threats of the big scholars, he entered upon the work with some misgivings; but he had pride as well as strength, and he determined to make the effort.

acter, while it elicited the applause of the audience, failed, we doubt not, to convey to many any more definite idea of this immense distance than that obtained from the simple statement of that distance in English miles. That the idea may be rendered more clear, it may be stated that all external impressions, that-is, impressions conveyed to the brain from the organs of touch, hearing, or sight, travel along the The pupils were in their places in good ence to a return-signal from the brain, season to the number of forty, or thereabouts, and as the teacher looked them over he found at least a dozen who had over, that the nerve-currents travel attained the stature of full-grown men, more slowly at low temperatures than and of these more than half bore stamp at high ones, and that the speed is not the same along the whole length of the affected him queerly. On such occasions he never knew what to do with his hands and eyes, and seemed always to feel like screwing himself into the nearest mouse hole until the danger—that is to say, the young lady—was past.

This state of things being considered, here after the constant and comprehensive, and haven't quite lost my eyesight yet, nor haven't quite lost my eyesight yet, nor was silent.

So, like a wise little puss, she haven't quite lost my eyesight yet, nor my hearm'either. I've surmised a lit.

Eight o'clock and past! Worthy Mrs.

The Loss of a Wife.

In comparison with the loss of a be-

Moore, and she started wildly into an errect posture, rubbing her eyes, settling her cap border, and exclaiming:

"Bless my soul, Annie! What was all that? What time is it anyhow, and who can it be? So late as this, too!"

"It is not very late, mother. Only a little after eight. I'll go and see who it is," said Annie, demurely, at the same time taking the one candle from the table.

"No! Here, Annie, you wind up my occurrence will be a lesson to you and or the school at the cuter door of the school."

"No! Here, Annie, you wind up my occurrence will be a lesson to you and over the school at the usual hour of opening exercise was time taking the one candle from the table.

"No! Here, Annie, you wind up my occurrence will be a lesson to you and or the school."

"No! Here, Annie, you wind up my occurrence will be a lesson to you and or the school."

"No! Here, Annie, you wind up my occurrence will be a lesson to you and or the school."

"No! Here, Annie, you wind up my occurrence will be a lesson to you and occurrence will be a lesson to you and or the six stout, tough beech woods and cut six stout, tough b the evening; she wants me to go, too, but I guess I won't. I've been working on father's new shirts all day, besides doing the dairy work yesterday, and I'm about tired out." Then she added, before he could reply: "Don't come until 8 o'clock, I shall be through putting things to right by that time."

"No! Here, Annie, you wind up my get a kiss from me then. I hope the occurrence will be a lesson to you and Annie again the un-policy of underhearth the poker. This poker was a large logs used in the wide, old-fashing to right by that time."

"No! Here, Annie, you wind up my get a kiss from me then. I hope the occurrence will be a lesson to you and Annie again the un-policy of underhearth the poker. This poker was a face to look up in the eye of love—no they're liable to end in such cases, in kissin' the wrong one in the dark."

8 o'clock, I shall be through putting things to right by that time."

It was By this time the school was in amaze; sweet music when you could count the but enlightenment was to come. Calmly hours with her-when she could hear the particulars of the discovery he had made. Then he read the paper which he had found, together with the names But many a tale it tells of joys, past

# Farm, Garden and Household.

I have been much interested in Mr. Van Wyck's recorded experience in using corn fodder; with his conclusions I d not agree. He says, "it does not payat all where labor is high and fodder cheap, and it will not do to dependupon eneap, and it will not do to depend upon as a general rule." For three years I have cut all my stalks; my practice is to sprinkle them with meal and bran, wet them with hot water, cover the feed box with a tight cover, and let it stand from morning till night. My stalks go three times as fur as in the common way of feeding; the cows eat them nearly clean, and they keep in better order than cows fed in the usual way. I keep three cows, and it takes about 15 minutes a by using stars for bedding (feed wheat straw sprinkled with meal and brain in the morning) and drawing ming fewns of Inglund, to absorbed wheat straw sprinkled with meal and brain in the morning) and drawing ming fewns of Inglund, to absorbed wheat straw sprinkled with meal and brain in the morning) and drawing ming fewns of Inglund, to absorbed into of freglint over the read of tool into the born-yard, I make more manure in an any of - my neighbors, in protectorate, scheme. From the protectorate scheme By using straw for bedding (1 100d) wheat straw sprinkled with meal and

Mr. Von Horskyfeld, the owner of large landed estates in Bohemia, has, since 1854, introduced a method of treating the accumulating stable manure which differs from the usual process, and for which he claims many advantages, viz: economy of time, space, feed and bedding, a great saving of money and of hands, and no necessity for cellars, tanks, pumps, etc.; also a far better product, no loss occurring from the development of the island in every tion, which authorized the Legislature to "pass laws to correct abuses and prevent unjust discrimination" in rates of freight, and to enforce such laws by the point of charter by offending companies.

The form the development of the island in every tion, which authorized the Legislature tropical is to "pass laws to correct abuses and prevent unjust discrimination" in rates of freight, and to enforce such laws by the point of charter by offending companies.

The form the development of the island in every tion, which authorized the Legislature tropical is to "pass laws to correct abuses and prevent unjust discrimination" in rates of freight, and to enforce such laws by and enforce such laws by the point of the public propical is to "pass laws to correct abuses and prevent unjust discrimination" in rates of freight, and to enforce such laws by the point of freight, and to enforce such laws by the propical is to "pass laws to correct abuses and prevent unjust discrimination" in rates of freight, and to enforce such laws by the propical is to "pass laws to correct abuses and prevent unjust discrimination" in rates of freight, and to enforce such laws by the to effect the Legislature and fine it to "pass laws to correct abuses and prevent unjust discrimination" in rates of freight, and to enforce such laws by the freight, and to enforce such laws by the to propical in the option of charter by offending companies.

The form the usual process, and for which he claims many advantages, viz: economy of time, space, feed and bedding, a great saving of money and for which he claims lars, tanks, pumps, etc.; also a far better product, no loss occurring from evaporation and rot; and, finally, a decided improvement in the condition of the cattle-yards, which never show any trace of manure, either solid or liquid. He says all these favorable results are obtained in the following way:

The manure is not removed from the stable until it reaches the height of five lengths of about five inches, and thus more readily absorbs the liquid portion, and facilitates the distribution of the manure in the furrows. The entire mass is constantly compressed by the weight of the animals, and thereby kept moist, while air and consequent putrefaction are excluded. After about three months this manure is carried to the field and immediately covered with the furrows. his manure is carried to the field and to a private station, as the choice of mmediately covered with the furrows, the nation fell upon Baez. Cabral went immediately covered with the furrows, the nation fell upon Baez. Cabral went where it readily decomposes and yields to work with the guerrilla chieftans and

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We san assure our old patrons that it is most fully up to its high standard; and it is the only reliable and perfect-ed preparation for restoring GRAY OR FADED HAIR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and dandruff, and, by its tonic prop-erties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair

grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most eco-nomical HAIR DRESSING ever used, s it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPA-EATION for its intended purposes." Sold by all Druggists, and Dealers in Medicines.
Price One Dollar.

Buckingham B. FOR THE WHISKERS.

As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents. Memufactured by R. P. HALL, & OG., NARHUA, N.K.

Ayer's

# Sarsaparilla

Is widely known as one of the most effectual remedies ever discovered for cleansing the system and purifying the blood. It has stood the test of years, with a constantly growing rep-

intrinsic virtues, and sustained by its remarkable cures. So mild as to be safe and beneficial to children, and yet so scarching as to effectually purge out the great corruptions of the blood, such as the scrofulous and syphilitic contamination. Impurities, or diseases that have lurked in the system for years, soon yield to this powerful antidote and disappear. Hence its wonderful cures, many of which are publicly known, of Scrofula, and all scrofulous diseases, Ulcors, Eruptions, and eruptive disorders of the akin, Tumors, Blotches, Boils, Pimples, Pustules, Sores, St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, and internal Ulcorations of the Uterus, Stomach, and Liver. It also cures other complete to which it would not seem concelled. intrinsic virtues, and sustained by its recerations of the Uterus, Stomach, and Liver. It also cures other complaints, to which it would not seem especially adapted, such as Dropsy, Dyspopsin, Fits, Nouralgia, Heart Disease, Fomale Weakness, Debility, and Leucorrhosa, when they are manifestations of the scrobiling rolesns. tions of the scrofulous poisons.

It is an excellent restorer of health and

strength in the Spring. By renewing the appetite and vigor of the digestive organs, it dissipates the depression and listless languor of the season. Even when no disorder appears, people feel better, and live longer, for cleaning the blood. The system moves on with renewed vigor and a new lease of life.

AMMONIATED

# Super Phsophate

The New Jersey Chemical Company having purchased the Chemical Works late of Potts & Klett, are now manufacturing ammoniated Super-Phosphate of Lime, fully equal in quality and condition to the Rhodes Super Phosphate, formerly made by Potts & Kiett, shih has-heretofore give.: such general satisfaction.

We are now prepared to furnish consumers and dealers with the above duper thosphate, and shall be glad to supply our old customers. and others.

We also beg to call your attention to the

"Orchilla Guano."

This Guano we receive direct from the Orchil Island. Wherever it has been fairly tried is pronounced one of the best and one apast iertili-

ronounced one or the sers in the market.

YANALL & TRIMBLE,

(Sole Westernle Agents.)

147 South Front St., Philade.
