A New Article of Food.

Mr. George G. Campbell, of Oswego N. Y., has patented as a new article food an improved mixture of rye and corn meal, to be used in making rye and Indian bread.

It is claimed that the mixture of the

two substances in large quatities, may be made so as to obviate the necessity of scalding the corn-meal before adding the rye floor, as the usual custom. The ye-meal is first sifted through a screen of suitable fineness in order to remove the coarsest portions; and it is then of corn-meal. The mixture is then placed in suitable packages for market. The inventor claims that by sifting the rye-meal to such fineness that its granules will be permeated by the fer ment uniformly with the corn-meal; the necessity of first scalding the meal is obviated and that this necessity is all that has practically prevented the two were put upon the market.

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We an assure our old-patrons that it is kept fully up to its high standard; and it is the only reliable and perfected preparation for restoring GRAY OR FADED HARR to its youthful color, making it soft, lustrous, and silken. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most eco-nomical Ham Dressing ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the Best Preparation for its intended purposes." In the selection of a Sewing Machine, it is

Dear Madam:

important, first, to consider III uses to which it will be put. If heavy work only is to be done, a slow and ponderous machine may, perhaps, Din answer the purpose; but if it is designed for general family service, the strength and ELASTICITY of the NEW IN should conform to the flexible character of the materials which usually predominate: while the WALL itself should be simple in its construction-rapid, quiet, and easy of movementand not liable to disorder. A all these respects, the WILCOX & GIBBS Silent, Family Machine stands far THE superiority of this machine in advance of all others. for all light sewing is obvious; and its popularity is rapidly extending the WORLD over. A thorough examination of it, is respectfully solicited.
