

The Hammonton Item.

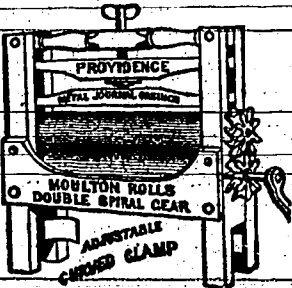

DEVOTED TO THE INTERESTS OF HAMMONTON AND MAKING MONEY.

VOL. II., NO. 14.

HAMMONTON, N. J., SATURDAY, APRIL 19, 1873

\$2.00 PER YEAR

THE MANUFACTURERS OF THE
RELIANCE WRINGER
Have had unusual opportunities of ascertaining precisely what is wanted, and of producing a perfect Machine. They have brought out an entirely **NEW WRINGER** which they call the
"PROVIDENCE."
New 1871 Perfect
A GREAT IMPROVEMENT

It Saves Labor. It Saves the Clothes. It Saves Time. It will Save its Cost Every Year.
It wrings Faster than by Hand. We consider the Providence superior to all others for the following reasons:
1st. The **ROLLERS**, of large size and best quality of White Rubber, are all secured to the shafts in the most permanent manner by the Mouton Process, making the best roller in the World.
2d. The **PATENT METAL JOURNAL CASINGS** prevent any wear upon the journals. [The wooden journals in which the iron shafts of other machines, run soon wear, and the efficiency of the Wringer is thereby greatly reduced.]
3d. The **DOUBLE SPIRAL COGS** used on this wringer give the utmost ease and steadiness in working, while the double stop prevent them from bottoming or being thrown out of gear. We furnish either single or double geared Providence as desired.
4th. The **ADJUSTABLE CURVED CLAMP** readily adjusts this machine to tubs of any size or thickness, making a perfect fastening. No wooden pegs or rubber straps on this Clamp.
5th. **SIMPLICITY, STRENGTH and BEAUTY** are combined in this machine, with all the requisites of a great class wringer.

The Best!

Life Insurance at Actual Cost

Mutual or Reciprocal

The Practical Results!
Since its organization in 1870, the NATIONAL has paid in death losses \$57,700, at a cost to the deceased of \$741.90 in premiums. Old Line Companies would have paid for the same premiums \$21,224, showing a gain by insuring in the NATIONAL of over \$36,000.
The Capital and Securities of this Company are sufficient to comply with the Insurance Laws of any State in the Union.

KEEP THE BLOOD PURE
And the health of the system for by the purification of the blood. This preparation of Iron and Fellee is more effectual than all others, which will remove from your system the impure and vitiated blood which causes disease, and at the same time build up your health and strength. It never fails to cure. If you have **Scrofula, Scrofulous Diseases of the Eyes or Ears, or Scrofula in any form, Rickets, White Swelling, Old Sores, Ulcers, or Scrofulous Inflammations**, you can rely on being cured with this preparation known as **Dr. Crook's Compound Syrup of Fellee**. It is a pleasant and palatable medicine, and is sold in Amber BOTTLES. Constitutions broken down by Mercurial or other poisons are all cured by it. For **Syphilis, or Syphilitic Taint**, there is nothing equal to it. A trial will reveal it.

Beauty your Complexion.
Do not use paint or powder, but get a more permanent beauty by purifying your blood. BOOK AGENTS WANTED
J. B. BURR & HYDE,
Publishers,
Hartford, Conn.
Agents Wanted For The
FUNNY SIDE OF PHYSIC.
800 Pages. 250 Engravings.
A startling expose of Medical Humbugs of the past and present. It ventilates Quacks, Impostors, Travelling Doctors, Patent Medicine Vendors, Noted Female Cheats, Fortune Tellers and Mediums, and gives interesting accounts of Noted Physicians and Narratives of their lives. It reveals startling secrets and instructs all how to avoid the ill which flesh is heir to. We give exclusive territory and liberal commissions. For circulars and terms, address the publishers, **J. B. BURR & HYDE,** Hartford, Conn., or Chicago, Ill.

Agents wanted for the GREAT INDUSTRIES OF THE UNITED STATES,
1300 pages and 600 engravings, printed in English and German. Written by 20 eminent authors, including John B. Gough, Hon. Leon Case, Edward Howland, Rev. E. Edwin Hall, Philip Ripley, Albert Brisbane, Horace Greeley, F. B. Perkins, etc., etc.
This work is a complete history of all branches of industry, processes of manufactures, etc., in all ages. It is a complete encyclopedia of arts and manufactures, and is the most entertaining and valuable work of information on subjects of general interest ever afforded to the public. It is adapted to the wants of the Merchant, Manufacturer, Mechanic, Farmer, Student, and Inventor, and tells to both old and young of all classes. The book is sold by agents, who are making large sales in all parts of the country. It is offered at the low price of \$1.50, and is the cheapest book ever sold by subscription. No family should be without a copy. We want Agents in every town in the United States, and no Agent can fail to do well with this book. Our terms are liberal. We give our agents the exclusive right of territory. One of our agents sold 138 copies in eight days, another sold 563 in two weeks. Our agents in Hartford sold 397 in two weeks. Specimens of the work sent to agent on receipt of stamp. For circulars and terms to agents, address the publishers.

THE ITEM.

SATURDAY, APR. 19, 1913. HAMMONTON ATLANTIC CO., N. J.

The New York Independent has been singularly unfortunate in discussing the President's treatment of the Louisiana difficulty. By some strange mishap, the editor appears to have fallen under the influence of the grand committee of citizens and their paid lawyers. His articles at best, oddly enough, by implication, limited the right to decide and exercise discretion in the matter to himself, excluding the President altogether from any chance of the sort. After saying many things in several wonderfully legal articles, he has finally, in writing upon the "guaranty power," treating this unhappy case, found in the Constitution, the laws and decisions of the Supreme Court, that "the President must, of necessity, decide," and not the editor, however eloquent and superior he may be. But this wonderful director of the President, seemingly so reasonable, after finding the Constitution, laws, and judicial decisions imposing the responsibility upon the President, and the President himself, is no better satisfied—the President did not do it in this way. This excellent editor has a good conception of things as they were before the war; indeed, he appreciates the value upon the worth of the improved properties just as is now witnessed in corner lots in business cities. Where this will end, he would be a bold man indeed who would venture to predict, but the result may be fore told without hazarding anything. This condition of things, if continued, as there seems now to be no question, will add immensely to the permanent wealth of the State, and make the coast the chief resort of workers after health and pleasure from all parts of the country. Already the railroads running to the coast find it necessary to increase the speed and number of their trains, while places here and other adjuncts are brought into requisition to give comfort to the trip. New roads and branches to "kiss" lines will follow in their order, until the facilities for reaching every part of the shore, will be as numerous as the wants of the future may render necessary.

Bright sunshine, a warm, soft breeze, and a clear blue sky are atmospheric conditions peculiar to the New Jersey coast in summer. Therefore, with the necessities we have fore-mentioned, combining so much of health and comfort, will tend still further to depopulate our great Atlantic cities during the heated term, and to draw thither the invalid and the pleasure seeker from their more remote western homes.—West Jersey Press.

The Sea-Side of the Future.

The coast of New Jersey, from Cape May to Sandy Hook, is undergoing a rapid transformation. This change has no reference to the shifting sands and treacherous shoals which are the sport of every storm, but to the improvement going on with a view to the accommodation of summer visitors. These are not confined to Cape May, where the "busy note of preparation" resounds the year round, neither to Atlantic City, at which place the number of new cottages are counted by the score, nor to Long Branch, where the wealthy Gothamites exhaust themselves in their endeavors to out-rival each other, but all along between the points named new resorts are springing into being, until at no distant day every available rod of seacoast will be opened upon as a site for a cottage, for the more fortunate merchant, or banker, or well-to-do man of business, from Baltimore, Philadelphia, or New York, longing, on a leisurely day, to escape the heat and dust of the city, and the scores and hundreds of the gentlemen in the lesser cities who are spending themselves with summer homes at Yonmouth Beach and other desirable localities along the shore. Parties are prospecting now, and we look full for positions combining the advantages of fishing and bathing, with plenty of sea air, and a paucity of mosquitoes, either for permanent summer quarters for themselves or for speculative purposes. In a little while these will all be monopolized, and we shall see a speculative value set upon the worth of the improved properties just as is now witnessed in corner lots in business cities. Where this will end, he would be a bold man indeed who would venture to predict, but the result may be fore told without hazarding anything. This condition of things, if continued, as there seems now to be no question, will add immensely to the permanent wealth of the State, and make the coast the chief resort of workers after health and pleasure from all parts of the country. Already the railroads running to the coast find it necessary to increase the speed and number of their trains, while places here and other adjuncts are brought into requisition to give comfort to the trip. New roads and branches to "kiss" lines will follow in their order, until the facilities for reaching every part of the shore, will be as numerous as the wants of the future may render necessary.

Our Washington Letter.

WASHINGTON, D. C., Apr. 18, 1913. The warm rains of late here are fast hastening the ripening of all kinds. Early vegetables are already in the market. The botanical gardens are interesting places of resort; flower beds have already a growth of color, and soon it will not be necessary to patronize hot-houses for any kind of greens. Nature will supply us. As an evidence of the healthy and cheerful disposition of the city, the Agricultural Department has numerous calls for seed. A number of seeds have been denied in the District of Columbia involving an important question and will probably go up to the Supreme Court of the United States. The Young Presbyterian Church has just received \$11,000 in damages from the Baltimore and Potomac R. R. for the disturbance of the congregation on the S. B. track and for destruction of real estate. The church being in possession of the ground has a right to sue for damages. The right of the railroad is a question of law. The railroad being a new corporation was under obligation to exercise its franchise in such a way as not to disturb the church. It is likely now that the recent fatal car accident will end with the proper legislation of Congress at its next session. The case is now in the hands of the Supreme Court. The Baltimore and Potomac R. R. is now in possession of the ground has a right to sue for damages. The right of the railroad is a question of law. The railroad being a new corporation was under obligation to exercise its franchise in such a way as not to disturb the church. It is likely now that the recent fatal car accident will end with the proper legislation of Congress at its next session. The case is now in the hands of the Supreme Court.

Hammononton the Best Place No. 7.

I find it will take too much of your valuable paper to state all or half the objections to the different places I have visited or sought for in my fruitless search for a better place than Hammononton. I will try to condense a few of the more prominent ones in reference to places I have thought of moving to, and soon it will not be necessary to patronize hot-houses for any kind of greens. Nature will supply us. As an evidence of the healthy and cheerful disposition of the city, the Agricultural Department has numerous calls for seed. A number of seeds have been denied in the District of Columbia involving an important question and will probably go up to the Supreme Court of the United States. The Young Presbyterian Church has just received \$11,000 in damages from the Baltimore and Potomac R. R. for the disturbance of the congregation on the S. B. track and for destruction of real estate. The church being in possession of the ground has a right to sue for damages. The right of the railroad is a question of law. The railroad being a new corporation was under obligation to exercise its franchise in such a way as not to disturb the church. It is likely now that the recent fatal car accident will end with the proper legislation of Congress at its next session. The case is now in the hands of the Supreme Court.

Opponents Court Business.

The following guardian accounts were examined and approved: Simon Hammon, guardian of Lizzie Amble, John George, and Rebecca Hammon, minors. Sarah Adams, guardian of Mary A. Carter, a minor. The following final accounts were allowed and paid by the Court: David B. and Deborah Somers, administrators of Washington Somers, dec'd. Mary S. Spain, executrix of Mark Somers, dec'd. Rebecca Stibbens, administratrix of Joseph Stibbens, dec'd. Hannah Robinson, administratrix of Regis A. Robinson, dec'd. Commissioner's Report on the real estate of James M. Babcock, dec'd, among the heirs confirmed and ordered recorded, and also the dower set off to the widow, Harriet I. Babcock. D. B. Somers, Joseph Scull and T. P. Randolph were appointed Commissioners to divide the real estate of Elizabeth Scull, dec'd. Wm. Moore, Esq., C. E. P. Mayhew and L. A. Down, appointed Commissioners to divide the real estate of Ambrose Panoos, dec'd. Six months rule to Bar Creditors granted to John T. Lake, administrator of Ezra A. Lake, dec'd. Also to J. P. Smith, administrator of Richard H. Blackman, dec'd. Rule to show cause granted to Elizabeth English, administratrix of Peter English, dec'd. Order to sell land was granted to Barr Sandler, administrator of Samuel Oberdorff, dec'd; and to D. B. Somers, J. G. Abbott and P. D. Collins, Commissioners of the estate of George Ireland, dec'd. S. Hanthorn, Esq., gave a new bond as guardian.

Pear Culture No. 13.

To all those who are engaged in the raising of pears, I would strongly urge the use of marsh mud. It is heavy, and of course does not pay for carting, but salt marsh mud seems to have peculiar good effect on pear trees. Next to Hammononton, Eastern Massachusetts has been most successful in pear culture east of the Rocky mountains, and the best pear orchard in Massachusetts is on a level land over salt marsh mud. Doubtless, this is partly due to perfect drainage and uniform moisture, being only a few feet from water, and yet never rising any higher or settling away; but it is largely due to salt marsh mud. I have no doubt that the best young orchard I saw in my trip along the eastern shore of South Jersey was sown with salt marsh mud. A liberal use of both salt and potash in compost for pears will most certainly be safe in all cases, and in many, it will be of the most marked advantage. Marl being a marine deposit and rich in potash and phosphates will be first rate for pears and should be supplied liberally, composted. Salt sown around pear trees annually at the rate of five bushels per acre, or one quart per square rod is highly recommended. But I would say do not use too much and be careful to use evenly, and not in a little circle around the trunk of the tree. A California largely engaged in pear culture has been travelling over the Eastern States and finds we are not gaining much, if any, in raising pears. Millions of trees are sold (purchasers are often sold too, but trees) but fine, cold winters, rabbits and mice, neglect and starvation, wet seasons and careless planting use up most of them. There is very little danger of overdoing the business of raising pears. BEN. RADICAL.

Cook and Parlor Stoves.

A large assortment constantly on hand at prices that defy competition. Tin and Sheet-Iron Ware, of our own make in great variety. STOVE PIPE of all sizes, joints in hand. TIN ROOFING, and all Jobbing in our line promptly attended to. BUILDING HARDWARE, LOCKS, KNIVES, DOOR HANDLES, LUGS AND SCREWS, NAILS, HAMMERS, HATCHETS, AXES, FILES, CARBIDE LIGHTS, ETC. A. G. CLARK, 112 Broadway, N. Y.

Local Advertisements.

Our townsman, Thos. S. Weatherbee, has secured the agency of Gardner, Fire Extinguishers, and will shortly call on the citizens of the county and explain its merits. The "Gardiner" is one of the most efficient machines of its kind, and ought to be in the possession of every household. Since the introduction of Fire Extinguishers, a large amount of property has been saved from fire, that would otherwise have been lost. The principal cause of loss in arranging the means with which to combat the flames, while with a good extinguisher at hand the fire might and could be extinguished in less time than would be required to ring the alarm and summon help. The machine is light and effective and can be easily operated by the most delicate feeble. With our stockkeepers, who are thick hereabout make a note of this, and provide against the "impending crisis," which is sure to come, and unless the "Gardiner," or some other efficient machine is obtained in time, the result of a conflagration will be most disastrous. Mr. Wright stands confirmed as Co. Sup't, by virtue of the law which provides if no action is taken by the Freeholders, or on before the 15th of April, the appointee of the State Board of Education is understood to be confirmed. Next in order is a grand Calico Ball on the evening of May 1st, at the Quailade Hall. The mesquerade last week failed to realize quite enough for that fiddle, hence the "Calico," which has the same object in view. The event of the evening will be the presentation of a gold ring to the lady presenting the best appearance in calico. Gentlemen, ditto. Full particulars in our next. See posters next week. Mr. W. friends of Murphy, the itinerant shoemaker, will be interested in the following paragraph which we clip from a Westfield, Mass. paper: "Murphy, the blistering shoe manufacturer, who came into town in a fall, and induced the citizens to subscribe \$5000 for a shoe shop, and move his machinery thither from Vermont, N. J., has been forced to transfer his goods to the freight depot. It now appears certain that he had not the slightest intention of fulfilling his agreement. Of the \$5000, in compensation for which he was to bring 2000 workmen to the town, \$3000 has already been paid in, and the other complete loss for no time having over 200 hands been engaged. Before he came to Westfield he had bargained two other towns. The only good result to Westfield from his experience is that it will tend to make the people more careful in the future. Several of our exchanges predict for their locality, the coming season, the Egyptian or seventeen year locusts. These rustlers appear once in seventeen years in such numbers as to destroy vegetation, and are generally regarded as a nuisance. We, of Hammononton, are badly afflicted with an entirely different species of Locusts—a species parasitical in their habits, living off the sweat and blood of their parents; they can be seen every day in the vicinity of the different stores, basking in the sun, and expropriating large quantities of a dark fluid upon the sidewalks. Various means have been tried by the storekeepers to rid themselves of this pest, but as yet without success. We hope our Council will try and devise some means for exterminating these vermin. On May 1st, the ordinance to regulate hawking and peddling fruit in the neighborhood of the station, goes into effect. This ordinance is regarded necessary by the disagreeable behaviour of the boys engaged in this business last year. Numbers would come up in the morning train, and remain all day in the vicinity of the station, annoying passengers by their noisy demonstrations and riotous behavior. If the effect of the ordinance will be to put a stop to the nuisance of last year, the people of the town who have to bear the odium of these transactions, ought to be thankful. In a few short weeks the season for seaside travel will commence. Last season over 100,000 persons visited Atlantic City, to enjoy the breezes of old ocean, and the present year will probably show a large increase of passengers, who will be whirled by our town at the rate of 30 miles per hour. On the downward trips, "down brakes," will be sounded before reaching Fairview Avenue and the same signal will be given by the up train, about Eleventh Street, thus affording ample opportunity to read the signs on the Shore Factories located between the points named, the only difficulty perhaps in ascertaining the business carried on in these buildings will be as heretofore, the want of the signs. Now among the large number of persons passing the town, there must be a considerable number who deal in Shoes, Jobbers, Storekeepers and Country Dealers, and it does occur to us that a cheaper method of making your business known, and therefore by extending it, than is here offered, Gentleman Cripples, can not be found. Hang out your banners on the outer wall, the cry is still they come."

Riot in Louisiana.

NEW ORLEANS, April 16. The steamboat Southwestern which arrived yesterday, brings striking and important news from Grand Parish. The whites have retaken Colfax, and there is not a negro to be found for miles around. (From passengers we glean the following: The negroes had strongly entrenched themselves in the Court House, and built breastworks three or four feet high. There were, it is said, about 400 men, armed and equipped thoroughly. On Sunday about noon, some 150 men who had gathered from the surrounding parishes, made an attack on the breastworks, and a brisk fight was kept up until about three P. M., when the works were stormed and captured, the negroes taking refuge in the Court House, the doors of which were barricaded. After some further fighting, the negroes threw out a flag of truce, and several detachments of men advanced on it, when they were fired on by the besieged party, wounding several, amongst whom were Captain Hadnot, who was shot in the bowels, and it is feared fatally wounded. Two whites retreated outside of the breastworks, and as the only means of dislodging the negroes, the Court House was set on fire, and the blacks were shot as they came from the burning building. It is reported that nearly 100 negroes were killed, and that there were some to be found for miles around. The captain of the Southwestern says he saw from the boat some fifteen or twenty lying dead on the banks. One white man was reported killed, and two very severely wounded. A terrible catastrophe has befallen the city of San Salvador. It was almost totally destroyed by an earthquake on the 4th of March last. 800 lives were lost, and \$12,000,000 worth of property destroyed. Although there had been some slight shocks during a few days previous, they were not alarming, and the destruction came as suddenly as a flash of lightning.

Ayer's Hair Vigor,

For restoring to Gray Hair its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. It soon restores faded or gray hair to its original color, with the gloss and freshness of youth. Thin hair is thickened, fallen hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed; but such as remain can be saved by this application, and stimulated into activity, so that a new growth of hair is produced. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning grey or falling off, and consequently prevent baldness. The restoration of vitality it gives to the scalp arrests and prevents the formation of dandruff, which is often so uncleanly and offensive. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a HAIR DRESSING, nothing else can be found so desirable. Containing neither oil nor dyes, it does not soil white-cambric, and yet lasts long on the hair, giving it a rich, glossy lustre, and a grateful perfume.

Prepared by Dr. J. C. Ayer & Co., Practical and Analytical Chemists, LOWELL, MASS.

Ayer's Cathartic Pills,

For the relief and cure of all derangements in the stomach, liver, and bowels. They are a mild aperient, and an excellent purgative. Being purely Vegetable they contain no mercury or mineral whatever. Much serious sickness and suffering is prevented by their timely use; and every family should have them on hand for their protection and relief, when required. Long experience has proved them to be the safest, surest, and best of all the Pills with which the market abounds. By their occasional use, the blood is purified, the corruptions of the system expelled, obstructions removed, and the whole machinery of life restored to its healthy activity. Internal organs which become clogged and sluggish are cleansed by Ayer's Pills, and stimulated into action. This infrequent disease is changed into health, the value of which change, when reckoned on the vast multitudes who enjoy it, is incalculable. Their sugar-coating makes them pleasant to take, and preserves their virtues unimpaired for any length of time, so that they are ever fresh, and perfectly reliable. Although containing they are mild, and operate without disturbance to the constitution, or diet, or occupation.

For Dyspepsia or Indigestion, Listlessness, Langor, and Loss of Appetite, they should be taken moderately to stimulate the stomach, and restore its healthy tone and action. For Liver Complaint and its various symptoms, Bilious Headache, Sick Headache, Jaundice or Green Sickness, Bilious Colic and Bilious Fevers, they should be judiciously taken for each case, to correct the diseased action or remove the obstructions which cause it. For Dysentery or Diarrhoea, but one mild dose is generally required. For Rheumatism, Gout, Gravel, Pains in the Side, Back, and Loins, they should be continued, as long as required, to change the diseased action of the system. With such change those complaints disappear. For Dropsy and Dropsical Swellings, they should be taken in large and frequent doses to produce the effect of a drastic purge. For Suppression, a large dose should be taken, as it produces the desired effect by sympathy. As a Dinner Pill, take one or two Pills to promote digestion and relieve the stomach. An occasional dose stimulates the stomach and bowels, restores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these Pills makes him feel decidedly better, from their cleansing and renovating effect on the digestive apparatus.

Keystone Mill Company's

Prepared Wheat

AND Sugar of Milk.

Patented July 23, 1872.

A FARINACEOUS FOOD FOR INVALIDS AND INFANTS.

By the peculiar process in which this preparation is made, all the flesh forming constituents—EARTH and ALKALINE elements of the grain are retained with none of the STARCH, all of which being converted into DEXT. INE. It contains all the LIME, SULPHUR, PHOSPHORUS, IRON and MANGANESE for the animal juices, and GUM and FIBRE for respiration and fatty tissues, with the protoplasmic compounds (GLUCIN, ALBUMIN, &c.) from which nerve and muscle tissues are formed. It is believed by the most intelligent men that much of the suffering, sickness and mortality of mankind is traceable to deficient or faulty nutrition. To the same cause may also be assigned the frequent disappointment of physicians in the result of the action of the most approved remedies. We feel sure that this article will supply the deficiency.

Sugar of Milk.

[LACTIN.]

Is a crystallized sugar, obtained from the whey of cow's milk by evaporation. It is manufactured largely in Switzerland and the Bavarian Alps as an article of food and for medicinal purposes. It has been used considerably in England as a non-nitrogenous article of diet in Consumption and other PULMONARY DISEASES, and with excellent effect in extreme IMPAIRMENT OF THE STOMACH, (see Wood & Loock's Dispensatory.) We manufacture two grades:—No. 1, in yellow wrapper, ground coarse, to be eaten as cracked wheat, with cream. No. 2, white wrapper, is ground into FLOUR for PUDDINGS, BLANC MANGE, and BRAN.

DIRECTIONS.

FOR MAKING MUSH with No. 1, GROUND SCARF—Mix 1/2 cup of the material of the Wheat with a gill of cold water; rub into a smooth paste; then pour it into a pint of boiling water, stirring briskly; boil for 20 minutes. To be eaten with rich cream. FOR PUDDINGS, &c., USE No. 2, GROUND FINE.—Mix a tablespoonful of the Food with a small quantity of cold water; rub to a smooth paste; add to one-half pint of boiling water, constantly stirring, and boil about 8 minutes over a moderate fire. Add milk and flavor to taste. For bread, use as ordinary flour.

PRICE 50 CENTS A POUND.

New Jersey Chemical Co.

AMMONIATED

Super Phosphate

The New Jersey Chemical Company having purchased the Chemical Works late of Potts & Klett, are now manufacturing Ammoniated Super-Phosphate of Lime, fully equal in quality and condition to the Rhodes Super Phosphate, formerly made by Potts & Klett, and has heretofore given such general satisfaction. We are now prepared to furnish consumers and dealers with the above Super-Phosphate, and shall be glad to supply our old customers and others.

We also beg to call your attention to the "Orchilla Guano."

This Guano we receive direct from the Orchilla Island. Wherever it has been fairly tried it is pronounced one of the best and cheapest fertilizers in the market.

Address all letters to CROFT & PHILLIPS, Publishers, PITTSBURGH, PA.

Philadelphia, A. D. 1873.

Dear Madam:

In the selection of a Sewing Machine, it is important, first, to consider THE uses to which it will be put. If heavy work ONLY is to be done, a slow and ponderous machine may, perhaps, BEST answer the purpose; but if it is designed for general family service, the strength and ELASTICITY of the SEWING should conform to the flexible character of the materials which usually predominate; while the MACHINE itself should be SIMPLE in its construction—rapid, quiet, and easy of movement—and not liable to disorder. IN all these respects, the WILCOX & GIBBS Silent, Family Machine stands far in advance of all others. THE superiority of this machine for all light sewing is obvious; and its popularity is rapidly extending the WORLD over. A thorough examination of it, is respectfully solicited.

D. S. EWING,

720 Chestnut Street
