#### The Cheapest

AND

#### The Best!

#### Life Insurance at Actual Cost

THE NATIONAL LIFE INSURANCE COMPANY OF OHIO—invites the attention of those contemplating insuring their lives to its

#### Mutual or Reciprocal

#### PLAN,

which enables even the poorest man to provide for his family in case of death, without depriving them of the necessities of life, as do many who on leaving to pay the high premiums of old life companies, who charge for Assurance Double Losses Never Occur, and then add a heavy loading for extravagant expenses. On this plan you only pay for the cash value actually experienced, and as they occur, with a small fixed sum for expenses. Call on the agent for circular fully explaining this system.

#### The Practical Results!

Since its organization in 1870, the NATIONAL has paid in death losses \$57,760, at a cost to the deceased of \$791.90 in premiums. Old Life Companies would have paid for the same premiums \$21,224, showing a gain by insuring in the NATIONAL of over \$36,000.

The Capital and Securities of this Company are sufficient to comply with the Insurance Laws of any State in the Union.

BENJ. LOMBARD, Pres. J. C. TAYLOR, Sec'y

H. E. BOWLES, Agent for Atlantic City, New Jersey.

## From Our Own Correspondent.

PHILADELPHIA, June 6.

### THE CENTENNIAL.

It is now finally settled that Congress will not appropriate a dollar to this object, and the people of Pennsylvania have therefore determined of themselves to make the Centennial a success. The National Commission is to be continued, and the money contributed by our people is to be spent in paying the mileage, hotel expenses, and refreshment bill of the members comprising this Commission, whenever their duties to the Centennial require their august presence in Philadelphia. They have fastened upon us a

large number of persons in lucrative positions, and our money must pay their large salaries. Even some of the States that voted solid against an appropriation by Congress, have the principal and most important officers, and these Commissioners have the assurance to inform and instruct us how the money of Pennsylvania shall be spent. Connecticut voted against us, and while she has subscribed for six shares, she has sent two Commissioners, and Idaho, after having subscribed for one share!! favored us with the presence of her Commissioner. The mileage of these gentlemen, not to mention their expenses in this city, must be paid from the Centennial funds.

Is it surprising that our people will not take any more of the stock, and will not contribute money to the cause? They are opposed to strangers, and even enemies to their interests, holding the important positions, directing all the workings of the Centennial, and being paid from the funds furnished by Philadelphia. We should insist upon these persons going home, and none but our friends ought to manage the affairs. Common decency would suggest their immediate departure, but they still abide with us, realizing, perhaps, how pleasant it is to receive a large salary for their inadequate services.

#### FUNERAL OF J. EDGAR THOMPSON.

On June 1st the remains of this distinguished man were removed to their last resting place in Woodland Cemetery in this city. The funeral procession was so long that the remains were buried before the last carriage had crossed the Choctaw street bridge. The floral tributes of respect and affection were numerous and most beautiful. They were gotten up in a large variety of designs, consisting of wreaths, broken columns, crosses, anchors, and a magnificent basket, surmounted by a cross. All these were taken to the cemetery and placed around his grave, literally hiding the earth from sight.

While this grand display was made in the funeral of the rich man, at the same time a hearse was driven to the opposite side of the Woodlands, and only one mourner was in attendance. A plain coffin contained the remains of a poor creature, and the only person who mourned for her was a sister. She was alone in her grief, and no floral offering were given to soothe her sorrow. She had not been favored with a fortune, and therefore her friends were few. The coffin was placed in its humble grave, and the sister went away as she had come, sorrowful and alone.

Such a scene is seldom witnessed even in a crowded city, and it is indeed true that death is the great leveller. The rich may bask in the sunshine of prosperity, and enjoy all the luxuries and comforts of life, yet at last they must be brought down to the grave, and corruption feeds upon them as upon the vilest outcast. Death is no respecter of persons, and the poor and the rich, the honored and degraded, must all come to one common end.

The will of J. Edgar Thompson, which was probated yesterday appoints Trustees. After providing for his wife, two sisters, a niece and a nephew, the said Trustees are to appropriate the net income of the remainder of the estate, after the payments specified, or so much of it as may judiciously be applied thereto, to the education and maintenance of the funeral orphans of railway employees who may have been killed while in the discharge of their duties. Preference is to be given to the orphans of the employees engaged upon the Pennsylvania R. R. The estate is valued at \$2,000,000.

## THE SALVAGE SUIT.

Captain Brady, after having assumed command of the steamship Pennsylvania, when she had been disabled in a terrible storm on her return trip from Liverpool, has seen proper to decline the gift of the company for his valuable services on that occasion, and he brought an action of salvage for damages. If this suit is decided in his favor, he will make a handsome fortune out of the speculation.

The case has been several weeks before the United States Commissioner, and the testimony of the third officer, Mr. Rivers, is very damaging, if not fatal to Brady's claim. Mr. Rivers was the only person who had the right to take the command, and he was entirely competent for the occasion. The crew had chosen Brady as their commander, and Mr. Rivers wisely refrained from coming into collision with him, because he feared that a mutiny would result, and this would have been the total wrecking of the vessel.

If Captain Brady obtains salvage, the large amount to be paid will probably destroy the company, and American steamships will be once more driven from the ocean. It is currently reported that New York is backing Brady in this suit, as they are jealous of Philadelphia, and they wish to ruin her shipping interests.

#### PENNSYLVANIA RAILROAD.

The directors of this company have unanimously elected Col. —or, as he is commonly called, Tom—Scott to the presidency, in place of the late J. Edgar Thompson. This is a wise selection, and one that must increase the confidence of all persons in the stability of the company. The stock has been for some time selling below par, but this is due to the speculation of brokers, who wish to make money from the fears of outsiders. There are two parties in the Board of Brokers, technically called Bulls and Bears. The former are for keeping up stocks, and the latter for knocking them down. The Bears have managed to get and keep the Pennsylvania Railroad low down, but in a short time the stock must advance, particularly, when Col. Scott is now president of the company. The road is doing a very large business, and it was never in a more prosperous condition.

#### MARRIAGE OF COUSINS.

There should be a law against these marriages. In England a widower may not marry his deceased wife's sister, and yet cousins are permitted to intermarry ad libitum. Victoria was married to her first cousin, and among the nobility such alliances are very common.

We cannot understand why the marriage of a man with his deceased wife's sister is worse than the marriage of blood cousins. First cousins—children of sisters or brothers, or of brother and sister—are as nearly related as the children of the second-generation can be. According to the statistics in this country, a large proportion of the deaf and dumb, the blind, the idiotic, are the offspring of married cousins. Surely, the world is large enough to make a selection of a partner for life, without being obliged to confine ourselves to a narrow circle as that of blood relations. It would be far better for humanity, if the marriage of cousins were prohibited by law, and so much misery would not then be entailed upon our race.

#### SEANIDE EXCURSIONS.

A great advance has been made this season in these favorite trips. It is generally conceded that Atlantic City is one of the most delightful places at the seaside, and it is not, therefore surprising that excursionists prefer it to any other place. On June 18th the first excursion takes place, and a very accommodating arrangement has been made by the officers of the road with regard to all excursions, the fare is only \$1.50, and the ticket holds good, until the ninth day, to return on any excursion train in that time. This will enable persons to remain for a few days longer, and not to hurry back as in the case in former seasons. The road is engaged for almost every day, and there is no danger of a person missing some excursion train in which to return. These trips are always pleasant, and no accidents occur on this well-managed road.

#### DEATH FROM EATING HAM.

A person recently died in this city from

eating uncooked ham. His sufferings were of the most excruciating kind, and he was literally devoured by worms. A powerful microscope revealed in the ham hundreds of trichinae that were sporting around like immense boa constrictors. We advise all persons not to eat meat of any kind unless it has been previously cooked, as there is always more or less danger from the presence of these nauseous vermin.

#### DEATH OF PROMINENT MEN.

This week two gentlemen died, who were engaged in almost identical pursuits. Richard Norris was the celebrated builder of locomotives, and Asa Whittier owned an extensive establishment for the manufacture of car wheels. These two men died within twenty-four hours of each other, and their places of business had been for many years almost in the same neighborhood. It is seldom that such a singular coincidence occurs. Norris was the first and only man who made a locomotive run up and down an incline plane with perfect safety. When the Columbia Railroad was built, there was an incline plane near the Schuylkill, and over it Norris exhibited a locomotive that actually ran down and stopped on the plane at the pleasure of the engineer. Truly this, BROADBENT.

The monthly report of the public debt for May makes the reduction during the month \$4,456,838.97. The total principal of the debt outstanding is \$2,261,091,027.47, on which there is due and unpaid of interest \$33,364,093.86, giving a total of principal and interest of \$2,294,455,121.35. There was at the same time cash in the Treasury, of coin, \$81,958,970.59; of currency, \$11,177,703.66, exclusive of \$56,050,000 of special deposits for redemption of certificates, making the total cash in the Treasury \$149,139,683.25, reducing the total debt, less cash in the Treasury, to \$2,145,268,428.10. Debt less amount in the Treasury 1st of May, 1874, \$2,149,725,277.02—showing a decrease during the past month of 4,456,838.97. Bonds issued to Pacific Railroad Companies, interest payable in lawful money, principal outstanding, \$64,623,512; interest accrued and not yet paid, \$1,615,587.80; interest paid by United States, \$22,386,691; interest repaid by transportation of mails, etc., \$5,095,450; balance of interest paid by United States, \$17,291,241. By the above statement of the public debt it has been decreased in the last eleven months \$2,550,275. It is gratifying to see that the currency balance in the Treasury has increased to eleven millions dollars, which though small, is an improvement over what it has been since the panic.

HOW TO GROW FAT.—If any one wishes to grow fleshy, a pint of milk taken before retiring at night will soon cover the scrawny bones. Although nowadays we see a great many fleshy females, there are many lean and lank ones who sigh for the fashionable measure of plumpness, and who would be vastly improved in health and appearance could their fingers be rounded with good solid flesh. Nothing is more coveted by thin women than a full figure, and nothing will so cause the ire, and provoke the scandal of one of those "climber builds," as the consciousness of plumpness in a rival. In cases of fever and summer complaint, milk is now given with excellent results. The idea that milk is "feverish" has exploded, and is now the physician's great reliance in bringing through typhoid patients, or those in too low a state to be nourished by solid food. It is a mistake to scrimp the milk pitcher. Take more milk, and buy less meat. Look to your milkman, have large-sized, well filled milk pails on the table each meal, and you will also have sound flesh and light doctor's bills.

The July number of Demorest's Monthly Magazine has an unusual array of attractive novelties in literature as well as a grand display of the summer fashions. No magazine that comes to our table presents such a rare combination of attractions as Demorest's Monthly. We see by the announcement in its prospectus for 1874 that a choice of the two valuable, large and popular chronicles, "The Captive Child," and "The Old Oaken Bucket," by Jerome Thompson, are now offered to all \$3 yearly subscribers to commence with the July number, 1874. Address W. J. Demorest, 17 West 14th St., N. Y. Demorest's Young America for July is received and still continues to be the delight of little ones.

# THE GEORGI PIANO-FORTES.

## LATE NEWS REGARDING THEM.

The Georgi Piano-Fortes have taken the first premium over all competitors at the State Fair of West Virginia, in Kentucky, and at all other fairs and expositions where they have been exhibited.

Their durable-build and refined expression of tone causes them to be the favorite instrument in seminaries of learning.

From Rev. L. VAN BOKKELEN, Rector of Jane Grey Seminary, Mr. Morris, N. Y., August 14th, 1873.

"I have pianos of other celebrated makers in the Seminary, but the Georgi was selected and used at the concert as the best. It is preferred by teachers and pupils."

From Rev. Wm. F. MORRISON, Rector of St. Luke's Church, Buffalo, N. Y.

"On leaving Iowa, I was reluctantly obliged to part with my Georgi Piano-Forte. When I settled in Buffalo one of my first cares was to provide my family with one of the same manufacture. It fully sustains the high reputation the Georgi instruments have in all parts of the country."

Mr. JOHN ZUNDEL, Organist of Henry Ward Beecher's Church Brooklyn, says:

"The Georgi has an exquisite action, and everything about it shows thorough workmanship and judicious durability."

Rev. S. H. McCOLLESTER, President of Buchtel College, certifies:

"We have been using two of your pianos the past year in our college. They have given great satisfaction. We regard them superior instruments."

From the New York Independent:

"As they were highly recommended to us, we bought one for our own use, and we find that they are worthy of all the praise they have received."

The above are only a few selections from letters continually arriving which prove

The Georgi to be the Leading Piano of the day.

I guarantee entire satisfaction and never fail to give it.

life and tone to the broken-down system. In

malarial and malarious districts they are

worth a ship load of quinine powders and pills.

They are especially adapted to persons suffer-

ing from

Dyspepsia, Liver Complaints,

Costiveness, Headache,

Neuralgia, Rheumatism,

Chills, Fever and Piles.
