

The Hammononton Item.

DEVOTED TO THE INTERESTS OF HAMMONTON AND MAKING MONEY.

VOL II.--NO. 25.

HAMMONTON, N. J., SATURDAY, JULY 5, 1873

\$2.00 PER YEAR

A FUNNY PLACE.—Danbury, Connecticut, is getting to be considered the most funny place in the country. Here is a part of a poetic letter received some time since from that interesting locality, ordering *Viel's Floral Guide* for the year:

My wife of the dear, darling flowers is fond,
As a bee of the clover or duck of the pond—
A frog of the water—a snake of the grass—
The maid of her mirror—the toper his glass—
An oyster of ocean—a lawyer of fees—
The youth his cigar or the rat of his cheese.
If you talk about buds, why the mere whispered name
Blows up conversation at once in a flame;
The sight of a raven of seeds, you must know,
Sets both of her eyes in a rapturous glow,
And a glance at a bulb, if the truth may be told,
Delights her far more than a nugget of gold;
A green-house or flower-stand—mercy on me!
Sets everything flying in chatter and glee;
Nor would she then care, in so glowing a scale,
If the whole swallowed Jonah, or Jonah the whale.
Such perfect beatitude never, dear sir,
You saw, as the flowers impart unto her.

The New Cave.

THE WONDER OF DELAWARE WATER GAP.

Two or three years ago a Mr. Frear bought one hundred acres of land on the Kittatinny Mountain on the Delaware Gap. One day last summer Mr. Frear, while cutting wood on the mountain, discovered near the base a wall ten or twelve feet high laid up against a perpendicular precipice of apparently solid rock. He took down a portion of the wall and came to an opening in the rock large enough to permit the passage of his body. The instant the opening was uncovered a strong current of air escaped. It was so cold that Mr. Frear was in a very short time chilled through and through. Determined to explore this singular cavern, Mr. Frear entered the opening. He found himself in a large chamber, the walls being of rough and jagged rocks. The cold was so intense that he could not explore the cave further than fifty feet. Since then no person has penetrated further than sixty feet under the mountain. The draft of air is so strong at the mouth that trees at thirty yards' distance are kept in constant motion. One can stand but a few minutes in the mouth.

A thermometer standing at ninety degrees above zero will in a short time fall to thirty in the current. A piece of pure lead, a gun-barrel, and a collection of bones were found by Mr. Frear in the cavern. He threw the bones in the river before ascertaining whether they were human bones or not. A dog accompanied him on the first exploring tour, and jogged into the cave. Since then the dog has never been seen.

Hundreds of people have visited this remarkable cavern and witnessed the mysterious phenomenon of the cold current of air. No satisfactory explanation has as yet been given as to its cause. There are a number of crevices in the rocks near the opening, from which the cold air also issues. Mr. Frear erected a temporary platform in front of the cave. A person standing on this five minutes would experience a sensation of almost complete numbness. It was the owner's intention to excavate a passage way and erect a building over it for the accommodation of inquiring visitors. He was killed on the railroad, however, before his project was carried out. The cave is considered one of the greatest curiosities of the world.

The Sanitary Value of Light.

Professor W. A. Hammond, in *The Sanitarium* for May, argues strongly in favor of a freer admission of light into dwellings and school rooms. After mentioning many illustrations of the effect of this agent upon normal and abnormal conditions of the body, he says:

As has already been intimated, the management of the light in the sick-chamber is rarely the subject of intelligent and scientific action. In anæmia, chlorosis, phthisis, and in general all diseases characterized by deficiency of vital power, light should not be debarred. In convalescence from almost all diseases, it acts, unless too intense or too long continued, as a most healthful stimulant, both to the mental and physical systems. The evil effects of keeping such patients in obscurity are frequently very decidedly shown, and cannot be too carefully guarded against by physicians. The delirium and weakness which are by no means seldom met with in convalescents kept in darkness, disappear like magic when the rays of the sun are allowed to enter the chamber. I think I have noticed that wounds heal with greater rapidity when the solar rays are occasionally allowed to reach them, and when they are as far as possible exposed to diffused daylight, than when they are kept continually covered.

In this country it is rarely the case that disease or injury is induced by excessive light. Occasionally, however, we meet with eye affections due to excessive light, either coming directly from the sun or reflected from water, snow, or sand, or resulting from the intense light of a flash of electricity passing near the individual. Bright artificial light may also cause de-

range of the visual organs. A child of my acquaintance was rendered permanently amaurotic by looking intently at a bright object while her photograph was being taken.

The practical application of these imperfect remarks is, that care should be taken both in health and disease to insure a sufficient amount of light to the inmates of houses, and that it is impossible to rear well-formed, strong and robust children unless attention is paid to this requirement. Sun-baths, or apartments in which the solar rays can fall upon the naked body, are doubtless highly advantageous to health, and rooms for this purpose could probably easily be constructed in or on most of our city houses. At present a chief object of city families seems to be to devise means for keeping the sunlight out of their houses. That this is contrary to nature needs no argument. The world is said to be under-led; it is certainly under-lit, as we manage it. Let us then, to use the dying words of Humboldt, have "Mehr Licht."

[It was Goethe, not Humboldt, whose last words were, "More light."]

The Lava Beds in Northern California, comprising about a hundred odd square miles of territory, the scene of the trouble with the Modoc Indians, is thus described by a writer in an Oregon paper:

"If you can imagine a smooth, solid sheet of granite ten miles square and 500 feet thick, covering resistless mines of gunpowder, scattered at irregular intervals under it; that these mines are exploded simultaneously, sending the whole field into rectangular masses from the size of a match-box to that of a church, heaping these masses high in some places and leaving deep chasms in others. Following the explosion, the whole thing is placed in one of Vulcan's crucibles and heated up to a point when the whole begins to fuse and run together, and then suffered to cool. The roughness of the upper surface remains as the explosion left it, while all below is honeycombed by the cracks and crevices caused by the cooling of the melted rock. From the top of one of these stone pyramids an Indian can shoot a man without even exposing a square inch of himself. He can, with due haste, load and shoot a common muzzle-loaded rifle ten times before a man can scramble over the rocks and chasms between the slain and the slayer. If, at this terrible expense of life, a force dislodges him from his cave, he has only to drop into and follow some subterranean passage with which he is familiar, to gain another ambush, from whence it will cost ten more lives to dislodge him; and so on."

DEATH OF HIRAM POWERS.—Hiram Powers, the American sculptor, died in Florence, Italy, a few days ago, after a lingering illness, at the age of 68 years. He was born in Woodstock, Vt., and was the eighth child of a poor farmer. His first attempt to earn a living was as a waiter in a hotel. Becoming weary of that line of business, without giving it a very prolonged trial, his next experience was that of a commercial traveler. Not believing that his second effort had opened to him a career for which he was best qualified, he quit the calling of "bagman," and apprenticed himself to a clockmaker in Cincinnati. But this trade offered him no satisfactory prospect of the kind or advancement of life he desired, and he engaged himself as assistant to a Prussian sculptor, who happened to be in Cincinnati executing a bust of General Jackson. His progress from aid to principal must have been easy and rapid, for in a short time he had modelled certain busts and medallions of his own, which possessed marked merit, and secured for him the friendship and substantial patronage of the late Nicholas Longworth. The works secured him a high reputation in Washington, whence, after a comparatively brief residence, he was enabled by Mr. Longworth's assistance to go to Florence in 1837, when he was thirty-two years old. He had resided in Florence almost continuously for thirty-seven years, and the people of that city were proud of him as a denizen. Shortly after the first Boston fire he wrote a very practical letter concerning fire-proof buildings, in the course of which he stated that no dwelling-house had been burned in Florence during his residence there.

Hiram Powers' reputation came swiftly when it did come, and will be brilliant as well as enduring. He was an American of whom his countrymen will always be proud.

THE SPREAD OF GRANGES.—It would seem that our western farmers were in earnest in their determination to organize for their own protection. Our eastern farmers have not so many evils to redress as their western brethren, but it is quite time they were using the power which their numbers and influence entitle them to.

The official enumeration of the Granges of Husbandry, shows that on the first of June there were 3,377 Granges in the United States. They are distributed as follows: Iowa, 1,007; Missouri, 245; Illinois, 431; Wisconsin, 140; Indiana, 142;

Minnesota, 218; Kansas, 128; Michigan, 24; Arkansas, 15; Georgia, 15; California, 8; Nebraska, 180; Mississippi, 112; Ohio, 47; Vermont, 23; Tennessee, 13; South Carolina, 118, and other isolated ones scattered over the country. One has lately been formed at Trappe, Montgomery county, and it now numbers over forty members. In Illinois a large number of farmers' clubs have been formed on the same basis as these, except the secrecy. In all combined action these may be counted with the Granges.

A correspondent of the *German Town Telegraph*, writing from North Eastern Georgia, states that the Baltimore Oriole is very destructive to their grape crop, and that "one of them will destroy as many in a day as a hog. They go from one bunch to another, and clip a gash in nearly every berry, as neatly as one could do it with a pair of scissors." This is the first time we have heard of such a charge being brought against the Oriole, and have never noticed such behavior in our latitude.

Master's Sale.
In Chancery of New Jersey.
Between the Farmers' Loan & Trust Company, Comptls. and The Vineland R. R. Company, et al., Defs.
On foreclosure.

Under and by virtue of a writ of *fi. fa.* of the Court of Chancery of the State of New Jersey issued in a certain cause in said court wherein the Farmers' Loan and Trust Company are complainants and the Vineland Railway Company and the New Jersey Southern Railway Company are defendants, I will expose to sale at public vendue on

Wednesday, July 2nd,
at two o'clock in the afternoon, at the Vineland House, in the town of Vineland, in the County of Cumberland and State of New Jersey, the following described real estate, its real estate, personal property, and all its franchises and appurtenances of every nature whatsoever, that is to say:
All and singular the railroad of the Vineland Railway Company, or which the said Vineland Railway is by law authorized to construct, being the line of railroad heretofore known or hereafter to be known as the Vineland Railway, as the same is and hereafter shall be constructed from the town of Afton in the County of Burlington and State of New Jersey to the town of Vineland in said State, and thence to low water mark in the Delaware River, including to the line of survey of said railroad, including all the tracks, bridges, viaducts, culverts, ways, depot, station-houses, engine-houses, car-houses, freight-houses, wood-houses, water-stations, machine-shops, and all other buildings and structures, with the lands, appurtenances to the same, and all locomotives, tenders, cars, and other rolling stock or equipment, and all machinery, and all other personal property of every nature, kind, and description whatsoever now held or acquired, or hereafter to be held or acquired by the said company for use in connection with the railroads or branches of the said Vineland Railway Company, or with any part thereof; or with the business of the same. And also all franchises connected with or relating to the said railroad or branches, or to the construction, maintenance, or use of the said railroad or branches, and all the franchises, rights, and things of whatsoever name or nature now held or hereafter to be acquired by the said Vineland Railway Company or its successors, together with all and singular the tenements, hereditaments, and appurtenances to the said railroads, branches, lands, and premises, or either thereof belonging or in any wise appertaining, and the reversion and reversions, remainder and remainders, tolls, incomes, revenues, rents, issues, and profits thereof, and also all the estate, right, title, interest, property, possession, claim and demand whatsoever, as well in law as in equity, of the said Vineland Railway Company of in and to the same and any and every part thereof with the appurtenances. Conditions will be made known at the sale. WILLIAM L. DAYTON, Dated April 4th, 1873. Master in Chancery.

THE MANUFACTURERS OF THE
RELIANCE WRINGER
Have had unusual opportunities of ascertaining precisely what is wanted, and of producing a perfect Machine. They have brought out an entirely NEW WRINGER which they call the

"PROVIDENCE."
New 1871 Perfect
A GREAT IMPROVEMENT

It Saves Labor. It Saves the Clothes
It Saves Time
It Will Save the Cost Every Year.
It Wrings Faster than by Hand.

We consider the Providence superior to all others for the following reasons:
1st. The **ROLLERS**, of large size and best quality of White Rubber, are all secured to the shafts in the most permanent manner by the Moulton Process, making the best roller in the world.
2d. The **PATENT METAL JOURNAL CASINGS** prevent any wear upon the journals. The wooden journals in which the iron shafts of other machines, run-noon wear, and the efficiency of the wringer is thereby greatly reduced.
3d. The **DOUBLE SPIRAL COGS** used in this wringer give the utmost ease and sturdiness in working, while the double stop prevents them from bottoming or being thrown out of gear. We furnish either single or double-gear End-donors as desired.
4th. The **ADJUSTABLE CURVED CLAMP** readily adjusts this machine to tubs of any size or thickness, making a perfect fastening. No wooden pegs or rubber straps on this Clamp.
5th. **SIMPLICITY, STRENGTH and BEAUTY** are combined in this machine, with all the requisites of a first class wringer.

HALES VEGETABLE SICILIAN HAIR RENEWER

Every year increases the popularity of this valuable Hair Preparation; which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard; and it is the only reliable and perfect preparation for restoring GRAY or RAVED HAIR to its youthful color, making it soft, lustrous, and silky. The scalp, by its use, becomes white and clean. It removes all eruptions and dandruff, and, by its tonic properties, prevents the hair from falling out, as it stimulates and nourishes the hair-glands. By its use, the hair grows thicker and stronger. In baldness, it restores the capillary glands to their normal vigor, and will create a new growth, except in extreme old age. It is the most economical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair a splendid, glossy appearance. A. A. Hayes, M.D., State Assayer of Massachusetts, says, "The constituents are pure, and carefully selected for excellent quality; and I consider it the BEST PREPARATION for its intended purposes." Sold by all Druggists, and Dealers in Medicines. Price One Dollar.

Buckingham's Dye. FOR THE WHISKERS.

As our Renewer in many cases requires too long a time, and too much care, to restore gray or faded Whiskers, we have prepared this dye, in one preparation; which will quickly and effectually accomplish this result. It is easily applied, and produces a color which will neither rub nor wash off. Sold by all Druggists. Price Fifty Cents. Manufactured by R. P. HALL, & CO., NASHUA, N.H.

Ayer's Sarsaparilla

Is widely known as one of the most effectual remedies ever discovered for cleansing the system and purifying the blood. It has stood the test of years, with a constantly growing reputation, based on its intrinsic virtues, and sustained by its remarkable cures. (So mild as to be safe and beneficial to children, and yet so searching as to effectually purge out the great corruptions of the blood, such as the scrofulous and syphilitic contamination. Impurities, or diseases that have lurked in the system for years, soon yield to this powerful antidote and disappear. Hence its wonderful cures; many of which are publicly known, of Scrofula, and all scrofulous diseases, Ulcers, Eruptions, and eruptive disorders of the skin, Tumors, Hives, Boils, Pimples, Pustules, Scrofula, Anthony's Fire, Rose or Baysipile, Itch, Salt Rheum, Neuralgia, Head, Ringworm, and Internal Ulcerations of the Uterus, Stomach, and Liver. It also cures other complaints, to which it would not seem especially adapted, such as Dropsy, Dyspepsia, Hiccups, Hemiplegia, Heart Disease, Female Weakness, Debility, and Leucorrhoea, when they are manifestations of the scrofulous poison. It is an excellent restorer of health and strength in the Spring. By renewing the appetite and vigor of the digestive organs, it dispates the depression and listless languor of the season. Even when no disorder appears, people feel better, and live longer, for cleansing the blood. The system moves on with renewed vigor and a new lease of life.

Directions.—Use one bag to the acre; spread broadcast or with drill ten days before planting. Harrow in it.

Keystone Mill Company's Prepared Wheat AND Sugar of Milk.

Patented July 23, 1872. A FARINACEOUS FOOD FOR INVALIDS AND INFANTS.

By the peculiar process in which this preparation is made, all the flesh forming constituents—EARLY and EARLY elements of the grain are retained with none of the starch, all of which being converted into DEXTRINE. It contains all the LIME, SULPHUR, PHOSPHORUS, IRON and MANGANESE for the animal juices, and GUM and FIBRE for respiration and fatty tissues, with the proteino compounds (GLUTEN, ALBUMEN, &c.) from which nerve and muscle tissues are formed. It is believed by the most intelligent men that much of the suffering, sickness and mortality of mankind is traceable to deficient or faulty nutrition. To the same cause may also be assigned the frequent disappointment of physicians in the result of the action of the most approved remedies. We feel sure that this article will supply the deficiency.

Sugar of Milk.

[LACTIN.]

Is a crystallized sugar, obtained from the whey of cow's milk by evaporation. It is manufactured largely in Switzerland and the Bavarian Alps as an article of food and for medical purposes. It has been used considerably in England as a non-nitrogenous article of diet in Consumption and other PULMONARY DISEASES, and with excellent effect in extreme IMBIBILITY OF THE STOMACH, (see Wood & Bach's Dispensatory.) We manufacture two grades—No. 1, in yellow wrapper, ground coarse, to be eaten as cracked wheat, with cream. No. 2, white wrapper, is ground into FLOUR for PUDDINGS, BLANCO-MANUE, and BREAD.

DIRECTIONS.

FOR MAKING MUSH with No. 1, GROUND SUGAR—Mix four teaspoonfuls of the Wheat with a gill of cold water; rub into a smooth paste; then pour it into a pint of boiling water, stirring briskly; boil 20 minutes. To be eaten with rich cream. FOR PUDDING, &c., USE No. 2, GROUND SUGAR—Mix a tablespoonful of the Food with a small quantity of cold water; rub to a smooth paste; add to one-half pint of boiling water, constantly stirring, and boil about 8 minutes over a moderate fire. Add milk and flavor to taste. For bread, use as ordinary flour. PRICE 50 CENTS A POUND.

Our agents are making \$5 to \$40 per day. Write once, stating territory desired. Address all letters to CROFT & PHILLIPS, Publishers, PITTSBURGH, PA.

Philadelphia, A. D. 1873.

Dear Madam:

In the selection of a Sewing Machine, it is important, first, to consider THE uses to which it will be put. If heavy work ONLY is to be done, a slow and ponderous machine may, perhaps, BEST answer the purpose; but if it is designed for general family service, the strength and ELASTICITY of the SEWING should conform to the flexible character of the materials which usually predominate; while the MACHINE itself should be SIMPLE in its construction—rapid, quiet, and easy of movement—and not liable to disorder. IN all these respects, the WILCOX & GIBBS Silent, Family Machine stands far in advance of all others. THE superiority of this machine for all light sewing is obvious; and its popularity is rapidly extending the WORLD over. A thorough examination of it, is respectfully solicited.

720 Chestnut Street.

DR. CROOK'S WINE OF TAR!

Ten Years of a public test has proved Dr. Crook's Wine of Tar to have more merit than any similar preparation ever offered to the public. It is rich in the medicinal qualities of Tar, and unexcelled for diseases of the Throat & Lungs, performing the most remarkable cures. It effectually cures all Coughs and Colds. It has cured so many cases of Asthma and Bronchitis, that it has been pronounced a specific for these complaints. For Pains in the Breast, Side or Back, Gravel or Kidney disease, diseases of the Urinary Organs, Jaundice, or any Liver Complaint it has no equal. It is also a superior Tonic, Restores the Appetite, Strengthens the System, Rectifies the Weak and Debilitated, Causes the Food to Digest, Removes Dyspepsia and Indigestion, Gives tone to your System.

KEEP THE BLOOD PURE

And the health of the system will follow. There is a preparation of Iron and Poke Root more effectual than all others, which will remove from your system the impurities and vitiate blood which causes disease, and health and strength. It never fails to cure. If you have Scrofula, Scrofulous Diseases of the Eyes or Ears, or Scurvy in any form, or Liver, White Swelling, Old Sores, Ulcers, or Scrofulous Inflammations, you can rely on being cured with this preparation known as Dr. Crook's Compound Syrup of Poke Root, Rheumatism, Spina, Lymphatic Glands, Constitutional breakdown by Mercurial or other poisons, are all cured by it. For Syphilis, or Syphilitic taint, there is nothing equal to it. A trial will prove it.

Beautify your Complexion.

Do not use soap or powder, but get a more permanent beauty by purifying your blood. This preparation of Iron and Poke Root makes a rough and scaly skin soft and smooth; changes that sallow complexion to one of freshness and health; and removes any Eruptive Diseases of the Skin, Pimples, Pustules, Blisters & Eruptions. If you wish to have a healthy complexion, use Dr. Crook's Compound Syrup of Poke Root.
