Those Glass Oil Cans, at 29 c., have given such perfect satisfaction that we have hesitated to mention any other kind; yet we have one other we will direct your attention to, viz: can holding one gal., made of Galvanized Iron,—stout, and warranted not to leak or rust. 22 cents is the price.

Those Double Roasting Pans fill the bill completely. Another lot is now on sale. If you don't own one already, be sure to secure one from this lot. Small, medium, and large size. Medium, 68 c.

We have just received direct from the importer some of the finest Irish Mackerel, we venture to say, that has been offered to the people in this vicinity in some time. Very fat and white, no rust about them. All this season's catch, and the price makes them quick sellers.

We quote at 10 c. per pound.

Kipperd Herring is also very palatable. While a canned fish, yet it is put up with great care, and when properly served, is excellent. If you have not tried them, we advise you to invest in a can—which at 22 c. we think is cheap.

Codfish Cakes, ready for the table in 10 minutes when you use X. C. L. R. Shredded Codfish. No soaking, no boiling, no bones, and no bad smell in the house. Simply mix with potatoes, and fry.

Large package, 10 c.

English Cured Cod, we have mentioned before,—simply wish to remind you that we have it constantly in stock. Price a little higher than the ordinary fish, but those who are acquainted with it are quite willing to pay the difference. 10 c. per pound.

Have you tried Taylor's Prepared Ham? If not, let us have your order for at least one pound. Every body that has used it speaks in the highest terms of its superior qualities. Remember, there are no bones, no waste—all solid meat. 15 c. per pound.

We would like your ear a few moments, on the Butter question. We think the quality we are now offering will please the most fastidious, being finest Elgin Creamery that the market can furnish. We ask a trial. Our price at present, 33 c. Compare with others,—you will find us on the right side.

Genuine Vermont Maple Syrup is the proper thing to serve with Buckwheat Cakes. We have it put up in very attractive shape,—full quart glass jars,—and at 35 c. we think it cheap.

We have also a full stock of Buckwheat Flour, both prepared and the plain old-fashioned kind.

We quote Hecker's prepared at 16 c.

Grove's prepared at 15 c.

Hecker's Griddle Cake Flour at 16 c.

Plain Buckwheat, the price is so unsettled that we refrain from quoting, but depend on us being right on the prices.

Let us remind you, in passing, we still hold the price of Sugar at 4½ c., in any quantity. Can't tell how long this price will hold; depend, however, on finding our price as low, if not a trifle lower than some others, at all times.

A small quantity of White Clover Honey, in the comb. We offer it at the extremely low price of 10 cents per pound. We anticipate a ready sale at this price.

Those California Prunes, advertised last week, 30 to the pound, at 12 c., all closed out. We offer for a few days only, same quality, 50 to the pound, at 9 c. These are new bright goods, eat just as well as the larger sizes.

We also keep constantly in stock the very best of Gasoline. 5 gallons for 50 cents.

N. B. We are now booking orders for Dried and Ground Fish Guano. If you expect to use any the coming season, we would suggest that your order be placed early.

When Governor Werts retires from office, to make place for a Republican successor, it may perhaps occur to him that the part he is now playing in the race-track and rump combination is ill calculated to advance either his own or his party's political fortunes. In the long run, honesty is the best policy—in politics as well as business.

The diplomatic break made by Mr. Cleveland's Minister to Hayti is just about what might have been expected from a Smith who spells his name with a "y".

Don Dickinson will second Cleveland in his fight with Senator Hill for the confirmation of Peckham's nomination to the Supreme Court, Senator Murphy acting in the same capacity for Hill. Dick Croker wanted to be referee, but neither side had enough confidence in him.

There's a lesson in the riots of the ignorant Slavic coal miners in Pennsylvania that should be studied by all those who value the privileges of American citizenship.

The people can now enjoy the fight without gloves between Cleveland and Hill. The former has strength and weight in his favor, but the latter has never been excelled in trickery.

Murat Halstead accuses Congress of being a congregation of money cranks, patent medicine money peddlers, flat foals, professional socialists who know nothing of socialism, and statesmen escaped from the protection of asylums for the feeble-minded. Sorry we can't defend the majority.

A man mad with whisky naturally uses intemperate language.

Congressmen are complaining of the bad air in the House, at Washington, but not half so loudly as the people are complaining of the bad acts of Congressmen. Perhaps it is the bad air that has made bad Congressmen.

Sec. Carlisle had to make a personal appeal to Wall Street bankers to help him out of that bond issue. This must have been humiliating indeed.

There is a marked difference in the policies of Benj. Harrison and Grover Cleveland on the bond question. The former reduced the nation's indebtedness by redeeming several hundred millions of outstanding bonds; the latter increases the national debt by a new issue of bonds.

The Cleveland tariff bill gives Canadian products free entry to our markets, while Canada imposes a tariff upon our manufactured articles, in order that England may supply them.

Senator Chandler stirred up the Tennessee Democrats when he expressed the belief that if elections were as fair in Tennessee as they are in Massachusetts, the former State would have two Republican Senators; and yet he only voiced a belief that is general among those who know anything about elections in that and other Southern States.

A NEW CURE FOR RHEUMATISM.—JOS. V. Dory, of Warsaw, Ill., was troubled with rheumatism, and tried a number of remedies, but says none of them seemed to do him any good; but finally he got hold of one that speedily cured him. He was much pleased with it, and felt sure that others similarly afflicted would like to know what the remedy was that cured him. He states for the benefit of the public that it is called Chamberlain's Pain Balm. For sale by A. W. Cochran, druggist.

A superb mammoth tintograph in 12 colors by the distinguished artist, Maud Humphrey. It is 2 feet long and 14 inches wide and will be sent free if you tell your friends. It is called "Our Visions," and shows a beautiful, dimpled darling clad in a warm, rich, fur-lined cloak, basket and umbrella in hand; she pulls the snow covered latch, while her golden hair shimmers in the sunshine, her cheeks blush with health and vigor and her roguish eyes sparkle merrily. Sure to delight you. A copy will be sent free, postpaid, if you promise to tell your friends and send 1 cent in stamps or silver for a three months' trial subscription to

It seems that there's still a Republican party in Alabama. At least it is fair to infer as much from a call for a meeting of the "Alabama Republican campaign committee," at Birmingham, on the 8th inst.

THE YEAR'S DAY

After the winter's... From the world's... The dark and gloomy... The bright and sunny...

MR. FAVERILL, SR.

It was nearly 9 o'clock on a July evening when the Comte de Paris walked with an easy air into the smoking-room of the Pericles Club...

The Comte threw himself on one of the lounges, and called for some brandy and soda. The waiter who brought the compound was a Frenchman named Maxence...

"I am aware of the circumstances under which the money was lost," he said in a dignified manner. "I wish to wish to enter into that. My errand is purely one of business. You were paid, I believe, by a check for \$500."

"I believe so. Let me see—yes," said the Comte, as he took the slip of paper from his pocketbook and glanced at it. "That is correct."

"Thank you, I would rather keep it for the present, I believe," said the Comte, moving away in the direction of the breakfast table. "But don't you understand? It is worthless; absolutely worthless."

"You squandered, you've wasted me!" cried the Frenchman with just indignation. "Pardon, sir," said the matron. "I thought you must be Mr. Faverill."

"I hope he is not going to ask me to keep back the Comte's few dollars," thought he. "He looked pale and sickly, but when he signed it last night..."

"I am Mr. Faverill," he said to the other, the father of the unhappy Comte. "You were gambling with last night's money, and I have been told that you won a large sum of money from my son last night, a sum of \$200, I believe."

"I am aware of the circumstances under which the money was lost," he said in a dignified manner. "I wish to wish to enter into that. My errand is purely one of business. You were paid, I believe, by a check for \$500."

"I believe so. Let me see—yes," said the Comte, as he took the slip of paper from his pocketbook and glanced at it. "That is correct."

"Thank you, I would rather keep it for the present, I believe," said the Comte, moving away in the direction of the breakfast table. "But don't you understand? It is worthless; absolutely worthless."

Mr. Faverill moved to a side table on which was a dilapidated inkstand and a rusty pen, and took a blank check from his pocket. "Stop a moment," said the Comte. "I don't want to see you going to the bank with that?"

"I mean that this but paper is worth a good deal more than \$200 to Mr. Faverill, Jr., or Mr. Faverill Jr.'s friends, and, therefore, of course, it is worth more than \$200 to me."

"I am aware of the circumstances under which the money was lost," he said in a dignified manner. "I wish to wish to enter into that. My errand is purely one of business. You were paid, I believe, by a check for \$500."

After a short and bitter quarrel, in which the German seemed about to annihilate his opponent, who was by far the smaller of the two, the conductor stopped the car and ran back over the heads of the passengers...

The California Outlook. The catch will eat and thrive on a great many plants. Their principal food is alfalfa. They will do well on natural grass, such as alfalfa, bur clover and salt grass; also, green barley and cornstems (cut half an inch in length), red or white clover, cactus with the spines removed, grape pampas, beet pulp, calla lilies, banana fronds and sweet potato vines. Alfalfa hay and clover cut up and moistened is a good substitute when green feed is scarce...
