**"Dutch" In the Schools.**

EDITOR REPUBLICAN:—It is strange, in this nineteenth century, when free education is given all classes, that some one objects to German in our schools because it is a foreign language. Some one in your last issue thought that German should be taught only to those who prefer it. Such is the case now. German is not compulsory in the schools, yet the classes are voluntarily full. So far as the cost to taxpayers is concerned, I will state that only \$270 per year was paid for German, of which State returns \$200, leaving \$70 to be "wring" from the pockets of the taxpayers, or about ten cents per year for each voter,—a terrible condition of affairs.

The \$70 does not pay for German alone, but also for substituting for eleven teachers (during absence or sickness), not only at Central, but any of the outside schools. She does fully four days' teaching in the month, which, at \$2 per day (the amount paid other teachers) is \$8 per month, yet she receives only \$7.50. The German really costs nothing at all, as she more than renders service for the \$70 in her other capacity.

In Germany, English is compulsory, and every child must learn it. If we are so Americanized that we must bring in prejudice against a language, why not abolish our present English, which is a "foreign" language, not our own. I regret that in my younger days I had no opportunity to learn German. In the Johns Hopkins University, a student cannot enter some departments unless he can translate both German and French, as textbooks in those languages are essential to their advancement.

All objections used against German may be made against any other study. The cost of German in our schools is too insignificant to excite the prejudices of anyone, and it is not keeping pace with Americanism to oppose progress. There is no person in our town gifted with too much learning. Let our children have a chance.

The suggestion to secure water-works by reducing salaries of teachers is at least original, if not novel. I suggest, instead, that the salaries of the members of the Board be reduced. Reducing a salary of \$360 per year of a teacher because our town has no water is "child-like and bland." Perhaps if we abolish the schools it would accomplish the desired result sooner. But I prefer to pay my ten cents tax per year.

SCIENCE AND INVENTION

Dunraven's fiasco in the Defender... The noble lord made definite charges of malice against the man who was the defender and demolished his readiness to prove them.

The Earth's Temperature. The first attempt in the southern hemisphere to ascertain the increase of the earth's temperature below ground has just been completed at Cremona, near Port Jackson, New South Wales.

A Substitute for Gold. A French journal describes a new and promising substitute for gold. It is produced by alloying ninety-four parts of copper with six of antimony.

CHASING BY A TIN BUG.

An Unfortunate Woman in Broadway, New York. Among the soil-turfing mechanical boys which infest the pavements of lower Broadway, none is so distressing as the green beetle, which is a favorite among the tinners.

Recording Music. A French gentleman has at last perfected and brought out an invention which has long been looked for by many musicians.

How Whittier Tricked Her. The 1877 "great fair" was held in Boston under the direction of prominent philanthropists.

Bedroom Light. There has been designed by a clever Englishman a little electric light fitting for the bedroom.

Lighter than Aluminum. The metal-galuminum, hitherto a chemical rarity, is likely to come forward as a new material, especially in electrical work.

It Ain't Nothing but Tin, Lady. The fakir who owned the beetle, said "it ain't agone to hurt yer none. Buy one to take home to the children."

And the fakir had to hold his tin creature down to the sidewalk while the terrified woman braved the perils of a rowdy crossing and reached the other side of the street.

Dangerous Passage in the Rhone. Below Viviers the Rhone breaks out from its broad upper valley into its narrower lower valley through the Dent de Donzere.

Gold from the Sea. The sea as a whole contains an enormous quantity of gold, but every gallon contains a quantity expressible chemically only as a trace.

Notes on New Things. American agricultural implements and barb wire are in great demand in South Africa.

All Depends. Miss Blithely (interested in science) - Can you get a shock from a telephone? Spiffkins (intent on ethics) - That depends, my dear young lady, on who is talking at the other end.

The Rush Hour Past. State-Well, I must be going. Ethel - How do you like the paper? It is just as bad now as it will be when you hang on another hour.

Unemployment. She-Why is it American women are so much more attractive to foreigners than they are to their own countrymen? Because they have more dollars and less sense.

EVOLUTION EVEN HERE.

The Dog's Bark Has Become More Expressive as His Cutters Advance. The most curious imitations which we find in dogs is as to the measure of expression to which they have attained.

The effect of advancing culture on the dog, however, has been commonly to decrease this ancient undifferentiated mode of expression by howling and yelping, and to replace it by the much more speech-like bark.

A French journal describes a new and promising substitute for gold. It is produced by alloying ninety-four parts of copper with six of antimony.

FUN WITH THE DOCTOR.

The Doctor Also Had Some Fun with the Joker. The other morning, a belated member of the Yacht Club was steering home through the dense fog.

What do you want? said the man. I take it for granted that you are in a hurry to get home.

What do you want? snapped the doctor, who was beginning to feel as though his legs were a pair of elongated tentacles.

What do you want? snapped the doctor, who was beginning to feel as though his legs were a pair of elongated tentacles.

[Entered as second class matter.]

SATURDAY, FEB. 8, 1896.

The third lecture of the course inaugurated by the Delphic Literary Society, at the Central School, will occur Friday evening, February 21. The lecturer is Rev. George B. Hancher, Ph. D., Principal of the State Normal School, at Kutztown, Pa. His subject is "You and Your Grandfather." Dr. Hancher is one of the most eloquent speakers in the State of Pennsylvania. He accepts but few of the many invitations to lecture; and it is only in consideration of his long friendship for Mr. Krebs that he has consented to come on this occasion. This lecture is a presentation of to-day as compared with the day of our grandfathers; and it is brim full of striking thoughts and anecdotes. The humor pervading the discourse renders it very acceptable to a popular audience. It is hoped that many will take this opportunity of enjoying a beneficial lecture, and of aiding in the establishment of the school library which is now contemplated.

Yes, we have moved, and are well pleased with the change. It was even more of a job than we anticipated. With heavy machinery to transport down stairs and up again, with a hundred or so cases of type, cases, stands, tables, and the thousand and one things essential to the printing business, we had all that we cared to handle, with men and team. The storm did not aid us any. Altogether, we are glad it is all over, and hope that another thirteen years will elapse ere we feel it necessary to go through with it all again.

The program for the meeting of the Delphic Literary Society, next Friday, is as follows:  
Readings—Henry Whiffen, Cora Crowell, Isabel Quinn.  
Recitations—Ivy Smith, Arthur Geppert, Joe Young, Thayer, Roberta Maxwell, George Shaw.  
Drama—Received. "That Washington was a greater man than Lincoln." Affirmative speakers, Mary Roberts and Albert Gay; negative, Howard Monfort and Louis Camarillo.

List of uncalled-for letters in the Hammon-ton Post-Office, on Saturday, Feb. 8, 1896:

Vincenzo Cipriano, M. Cipriano, Vincenzo Prosseri, Vincenzo Pisto, Vincenzo Avicello, Antonio Carriero.

Persons calling for any of the above letters will please state that it has been advertised.  
JOHN T. FANSEN, P. M.  
Misses Martha Saxton and Mary Rexford have rented the Fairchild store, which is being refitted to accommodate a stock of millinery and fancy goods. Dressmaking will be given particular attention.

A millionaire Congressman, Elijah A. Morse, of Boston, gives this sound advice to boys: "I have seen young men who thought they could play Jeky and Hyde, and ride in the smoking car and drink soma and wear some, and go to questionable places, and the people wouldn't know it. Young man, you are mistaken; read the questions that Boston banks ask about a young man who is seeking a situation. Young man, young woman, a good character, yes, and a clean religious life, good habits, no drink, no tobacco, no cigarettes, are the foundation stones for success in business. My son, with all thy getting and understanding, get wisdom (heavenly wisdom), the merchandise whereof is better than the merchandise of silver and the gain thereof than pure gold."

A Cincinnati man has invented a new bicycle. It operates on an entirely new pedal plan, and speed approximating a mile a minute is claimed for it. The pedals move vertically. In one revolution of the wheel the foot travels eighteen inches to forty in the ordinary way. An actual trial of the invention, in the presence of numerous witnesses, resulted in a half mile in 31 seconds. "It can be adjusted to any wheel."

The credit that is got by a lie only lasts until the truth comes out. Christ was crucified by sinners who occupied front seats in the church.

## BICYCLES.

Our Bicycles are of three classes.—First, Second, and Third,—or \$100, \$75, and \$50.

First comes the Syracuse (probably better known as the Crimson Rims). We cannot speak too highly of this wheel. Its design is simple, and we think perfect.

If you have ever had any experience in cleaning the bearings of a bicycle, you surely must appreciate the quick access to the bearings of the Syracuse, without touching the cones or interfering in any way with the adjustment of the wheel. We hope to have at least one of these wheels among the racing team of the H. A. A. this season, and if you are thinking of racing you can mount no better wheel than the Syracuse Racer.

Second, the Eldridge. We have a wheel that if you once look at you will say, as others have said,—that for \$75 it is at the head of its class. Finest seamless steel tubing, and finish of a very high order.

Third,—and last but not least,—comes the "Grand." This wheel is cheap in price, but NOT CHEAP in quality. In every way, to the common observer, it comes up to the higher grade wheels, its finish is black enamel and nickel, nickel-sprocket, spokes, and head. It is, like all of our wheels, selected by old and experienced buyers, and every one comes with a guarantee.

Call, and be convinced.

## Furniture.

We have bought a very fine line of Bedroom Suits, Stands, and Extension Tables, which will be in the first of the week. Call and look them over. The price will suit you.

Many of our readers will regret to learn that our former townsman, Mr. F. P. Van De Vere, was stricken with paralysis, on the 18th of December last, while working in his mine, near Redding, Cal. He has rallied quite a little, and hopes to be about again soon.

Wm. Bernhouse and his sons, Wm. H. and Andrew K., have bought the old Fay property; but now the heirs have begun proceedings for a final accounting, which may cause some delay, but will doubtless result in substantial improvements on that long unsightly corner.

In reply to the question, oft repeated, we would say that our only reason for moving our printing plant was the need of more room. Our relations with our late landlord, Mr. Elvins, have been and are uniformly pleasant; but after thirteen years of occupancy, we found the place too crowded for convenience, and succeeded in securing a long lease of our present rooms.

MR. EDITOR:—In answer to the article by "Tax Payer" in your issue of 1st Inst., where he wants to economize in order to get water-works, and mentions going into the school and striking a blow at the teaching of the German language, as the expense of same is saddled on the town. I find this is not the case, as it is a voluntary act on the teachers' part, and there is no extra expense attached.

Now I say, as the pupils are willing to learn it under those conditions, I am of the opinion that no one has any cause for fault finding. Let us give the young all the chance of attaining as high an education in our public schools as the teachers can teach, then we shall turn out of them young men and women of whom we shall be proud. No narrow-mindedness on education. Strike elsewhere; let that alone. If you stop German, put Latin in the same boat. Respectfully, J. F. JENISON.

If the conceit was taken out of some people there wouldn't be enough of 'em left to hang clothes on.

France has women letter carriers.
