AND
Demorest's Monthly Magazine.

A WONDERFUL PUBLICATION.

Many suppose DEMOREST'S MONTHLY to be a fashion magazine. This is a great mistake. It undoubtedly contains the finest FASHION DEPARTMENT of any magazine published, but this is the case from the fact that great enterprise and experience are shown, so that each department is equal to a magazine in itself. In DEMOREST'S you get a dozen magazines in one, and secure amusement and instruction for the whole family. It contains Stories, Poems, and other Literary attractions, including Artistic, Scientific, and Household matters, and is illustrated with original Steel Engravings, Photographures, Water-Colors, and fine Woodcuts, making it the MODEL MAGAZINE OF AMERICA.

Each copy contains a PATTERN ORDER entitling the holder to the selection of ANY PATTERN illustrated in any number of the Magazine, and in ANY OF THE SIZES manufactured, each valued at from 20 cents to 50 cents, or over \$3.00 worth of patterns per year, free.

Yearly subscription, \$2.00. A trial will convince you that you can get ten times the value of the money paid. Single copies (each containing Pattern Order), 20 cents.

Published by W. JENNINGS DEMOREST, New York.

The above combination is a splendid chance to get our paper and Demorest's MONTHLY at reduced rates. Send your subscriptions to this office.

SCHOOL REPORT.

The following pupils have received an average of 90 in deportment, 80 or above in recitations, and have been regular in attendance, during the week ending Friday, Feb. 1st, 1889, and thereby constitute the

ROLL OF HONOR.

HIGH SCHOOL.

Mrs. Hank Neely Taken in by a Reporter—Telling Fortuna.

There are in this, as there are in all large cities, says the correspondent of the Indianapolis News, a number of persons who live because of the superstition of others. The "fortune-tellers," "astrologers," "clairvoyants" and "sooth-sayers" seem to be everywhere. It would be a surprise if the list of people who visit these places should become known. They are not ignorant victims, all of them either, but men and women of bright minds and great intelligence. But from servant girls, many of whom are ignorant, the fortune-tellers reap harvests, marked alike by their scanty earnings, so much of their "sooth-sayers" purse in exchange for a few words of comforting rubbish that a school boy could chatter as well.

One blank street stands a certain little frame house. It is old and weather-beaten, and a window with varicolored glass would make it an object of curiosity. It does not look like a place where uncautious spirits abide, neither does it have a supernatural appearance. Jutting out from above the door is a sign.

Resting against the side of the house is another sign, worn and old, which informs the passer-by that the Madame is a fortune-teller, who works charts of luck and brings absent friends.

A "Vice reporter's" ring at the door brought a woman about 35 years of age. She was well dressed and informed the visitor with a slight French accent that she was the Madame. Two middle-aged and well dressed ladies were in the room, and the reporter was ushered into a back room, where the Madame, Madame had read the fortunes of the two ladies. He did not have long to wait, and soon he was within the "Innards" of the astrology of a 23-assault street pipemaker recently.

"Because it is not very plentiful, and the trouble of collecting it is very great, the astrologer has decided to try any great extent in the Baltic Sea. There the veins run from Russia to Denmark, Norway and Sweden. In the acid gas used to be picked up on the shores of the Baltic, where it was washed after a heavy storm. A number of persons used to make their livelihood of the amber and they were not very far from all I know. The demand for it during the past few years has grown so much that engineering appliances have been used to collect it. Dredging-boats are sent out in the fine weather. These boats have long strings of iron palis that are constantly dragging up the bottom of the sea and turning their contents on to the decks of the boats. There the amber is quickly picked out and the remainder thrown overboard. Another method of collecting amber is by the divers who go down with the regular divers' costume, and by means of the air-pump, are enabled to remain under the water for four or five hours. The divers who collect the amber are rewarded according to their find. This vein of amber has been found to be as good as any under the sea, and a mine has now been sunk to a depth of 150 feet below the sea level, and is worked just like a coal mine."

Simple Rules of Etiquette.

Don't repeat the scandal of the day. They are old. Invent new ones. Never be witty at the expense of another. Don't command a larger credit than yourself. Don't lounge in company. If you are at all lounge on the chairs or sofa. A boy should always tip his hat when meeting other persons or a gust of wind. Let ladies pass through a door first. If it is a party, so you had better wait and see. Eat as fast as you can, as slow as the rest. As fast as get your share. For the same reason, don't be slow to encourage any possible superior into a contest. Finish the course with the others. You cannot well do otherwise, for after you have finished it how can you continue? Cover the mouth with the hand or napkin (both if nature has made it necessary) while removing anything from it, as the hand. A gentleman usually vacates his seat for a lady if he sees a better one unoccupied. This, however, is not always necessary if the lady is his "best girl" and no one else is present. Never leave home with unkind words on your lips. Stay till you have said the "etiquette" of calls depends a good deal on whether you are calling on the minister or calling the crows. "Where Ignorance is Bliss," etc. This is from the Des Moines (Iowa) Leader: An accomplished young lady of this city made a call upon somebody the other day, and she avowed she had had a very delightful afternoon. Who the person was she called on she does not know. All she knows is that she started out to call upon somebody else and by mistake she got into the wrong house, where she met with a very cordial reception from a young lady who evidently knew her well. This young lady rushed up to her when she entered the door and told how awfully glad she was to see her, calling her by name. She evidently knew her well. This young lady and everything appeared to be so agreeable all around that the latter did not have the heart to break the spell by saying she was not the person she was, and the unknown friend never knew that she was not known by her guest.

The First Iron Road Successfully Opened in the Celestial Country.

This railway, the first built by the Chinese Government, and as yet the only one opened recently by H. E. Li Hung Chang, which was the official opening, but the line has been open for a considerable time on its Tang-shan line, and within the last month or two regular trains have been running upon both the Tientsin and Tang-shan branches.

The whole mileage is eighty-six and a half miles, with ten miles of siding, or twenty-eight miles from Tientsin to Tang-shan, which lies on the bank of the Peiho. The route was fifty-eight and a half miles from Tang-shan to Tang-shan near the city of Keping. The rails are built-head frame fastened with claw spikes to sleepers; these are not cross-ties, as is the case at home; it is found that the wood stands as well in its natural state as cross-ties timber would, the life of a sleeper here being quite equal to that of those used on our lines.

The points are worked with the simple, but rational hand-switch, a complicated system of interlocking being quite unnecessary, and, indeed, quite unsuited for use by Chinese employees; the signaling is equally primitive, a red and a white hand disc, completing the equipment of the signal man. All the carriages and trucks are connected by American spring buffers and claw couplers, the whole making a long and more or less imposing train.

The whole journey of about 100 miles is completed in five and a half hours, the train being very respectable, \$130 covering the expense of first-class accommodation; the line is evidently very popular, and large numbers of Chinese travel by it daily.

WHY AMBER IS EXPENSIVE.

It Comes from the Baltic Sea—It is Obtained by Dredging and Diving.

Why is it that amber is so expensive? The astrologer of a 23-assault street pipemaker recently.

"Because it is not very plentiful, and the trouble of collecting it is very great, the astrologer has decided to try any great extent in the Baltic Sea. There the veins run from Russia to Denmark, Norway and Sweden. In the acid gas used to be picked up on the shores of the Baltic, where it was washed after a heavy storm. A number of persons used to make their livelihood of the amber and they were not very far from all I know. The demand for it during the past few years has grown so much that engineering appliances have been used to collect it. Dredging-boats are sent out in the fine weather. These boats have long strings of iron palis that are constantly dragging up the bottom of the sea and turning their contents on to the decks of the boats. There the amber is quickly picked out and the remainder thrown overboard. Another method of collecting amber is by the divers who go down with the regular divers' costume, and by means of the air-pump, are enabled to remain under the water for four or five hours. The divers who collect the amber are rewarded according to their find. This vein of amber has been found to be as good as any under the sea, and a mine has now been sunk to a depth of 150 feet below the sea level, and is worked just like a coal mine."

Simple Rules of Etiquette.

Don't repeat the scandal of the day. They are old. Invent new ones. Never be witty at the expense of another. Don't command a larger credit than yourself. Don't lounge in company. If you are at all lounge on the chairs or sofa. A boy should always tip his hat when meeting other persons or a gust of wind. Let ladies pass through a door first. If it is a party, so you had better wait and see. Eat as fast as you can, as slow as the rest. As fast as get your share. For the same reason, don't be slow to encourage any possible superior into a contest. Finish the course with the others. You cannot well do otherwise, for after you have finished it how can you continue? Cover the mouth with the hand or napkin (both if nature has made it necessary) while removing anything from it, as the hand. A gentleman usually vacates his seat for a lady if he sees a better one unoccupied. This, however, is not always necessary if the lady is his "best girl" and no one else is present. Never leave home with unkind words on your lips. Stay till you have said the "etiquette" of calls depends a good deal on whether you are calling on the minister or calling the crows. "Where Ignorance is Bliss," etc. This is from the Des Moines (Iowa) Leader: An accomplished young lady of this city made a call upon somebody the other day, and she avowed she had had a very delightful afternoon. Who the person was she called on she does not know. All she knows is that she started out to call upon somebody else and by mistake she got into the wrong house, where she met with a very cordial reception from a young lady who evidently knew her well. This young lady rushed up to her when she entered the door and told how awfully glad she was to see her, calling her by name. She evidently knew her well. This young lady and everything appeared to be so agreeable all around that the latter did not have the heart to break the spell by saying she was not the person she was, and the unknown friend never knew that she was not known by her guest.

WOMAN'S WEAKNESS.—He had a lack of feather dusters as he rang the door bell on Mountain street and the other day, and when a woman opened the door about two o'clock, he said that nothing was wanted he inquired.

"What name, you kindly inform me who lives next door?"

"Next door?" she queried, coming out on the step. "Why, it's the name, and I don't remember the name."

"Lady puts on a good deal of style, doesn't she?"

"I thought so. That's the way with those sort of people, they put it all on their backs. I asked her if she didn't want a duster to dust off her upholstery. Furniture and bric-a-brac and she slammed the door in my face. She didn't have any to dust, you see. People who have plush furniture and articles of value and bric-a-brac and my goods. Pleasant day, madam?"

"Yes."

"What did you say the price was?"

"Twenty-five cents, madam, and the woman next door is peering through the parlor blinds at us."

"Is she?"

"Well, I'll take one, and if she should see any other invention to buy, she'll be sure to come to me. You may also bring me a box of polish for my silverware."

HE TRAVELED.—He had been wondering for some time how he could escape from the tolls that were gently creeping upon him, and break the spell of soft converse and winking eyes. An opportunity came at last. As she ended a spirited description of the beauties of the Alps, she said, impulsively:

"Oh, Mr. Slowpace, I think you ought to travel!"

He looked at her rigidly, rose slowly, and grasped his hat.

"No woman shall say that twice to me," he remarked in a firm and desperate voice, "but I know it is better to hope—no matter. Farewell, Miss Pineweb—I will travel." And he did, with alacrity.

Mrs. VENTREME.—Really, my dear doctor, you have come to my ball. It is Lucy's coming-out affair, you know, and I shall take no refusal; none at all. Dr. Bigfeet—Well, you see, my dear madam, I am a very busy man. My time is not my own.

"Say no more. Include your visit in your bill. There, I shall expect you, Good bye."

WHY THE OLD MAN'S HEART.—Old man, from the head to the feet, hardly—Bass't that young feller goes yet, Clara?

Clara—No, papa, he's in a serious way. He's in the bank this afternoon, and is nervous about carrying it with him so late at night.

Old man, in a softer tone—Tell him to wait a minute and I'll be done. He can put it in my safe until morning. And you'd better bring up half a dozen bottles of beer from the cellar.

BETTY KIND.—Miss Smith, to her friend Miss Barr, who has made her debut at a musical entertainment—

Miss Barr—Yes, I got along pretty well, but I was considerably disconcerted when somebody in the audience remarked that I had left my voice behind.

"That was awfully rude."

"Yes, but he was immediately reproved by somebody else, who said, 'Womankind should be a little more very kind, don't you know, and I plucked up courage immediately.'"

THE USE OF BRAINS.—"Do you know, Miss, that it's really a waste of time to do so much thinking?" said Gus de Jay. "It's quite worthy of you to think, you know."

"Do you mean to encourage any possible superior into a contest?"

"Yes, I sometimes really wonder why we have brains, anyhow."

"Oh, everything has its purpose, Mr. de Jay. Brains are very useful to keep their heads from caving in, you know."

OUTWARD INDICATIONS.—The little by had come with his clothes torn, his hair full of dust, and his face bearing unmistakable marks of a severe conflict.

"Oh, Willie! Willie!" exclaimed his mother, deeply shocked and grieved, "you have disobeyed me again. How often have I told you to play with that wicked Napoleon doll!"

"I'm afraid I did, do I look as if I had been playing with anybody?"

HE KNEW.—Brown—I say, Smith, what's the attraction up this way? I see you passing quite frequently.

Smith—Yes, six nights in the week, and twice on Sunday. There's a lady in the case, old man.

"Ah! ha! I see. But six nights in the week and twice on Sunday is rather the thing, isn't it? I found that twice a week was."

"Yes, but you married a young lady. I'm courting a widow. I know what I'm about, old man."

TEACHER.—Miss Sinuco, please parse the sentence "Adolphus married Caroline."

Mrs. S.—Well, "Adolphus" is a noun, because it is the name of a thing, "married" is a conjunctive, because it joins Adolphus and Caroline, and "Caroline" is a verb, because it governs the noun.

SUNDAY SCHOOL LESSON.

SUNDAY FEBRUARY 10, 1890.

The Fierco Democra.

LESSON TEXT.

Mark 5: 1-20. Memory verses, 10-20.

LESSON PLAN.

TOPIC OF THE QUARTER: Jesus the Mighty Worker.

GOLDEN TEXT FOR THE QUARTER: Believe me that I am in the Father, and the Father is in me; or else believe me for the very works' sake.—John 14: 11.

LESSON TOPIC: Freeing the Enslaved.

Lesson 1. Enslaved, vs. 1-10. Outline: A. Enslaved, vs. 1-10.

GOLDEN TEXT: Go home to thy friends, and tell them how great things the Lord hath done for thee, and how us com-mission on thee.—Mark 5: 19.

DAILY HOME READINGS:

M.—Mark 5: 1-20. Freeing the Enslaved.

T.—Matt. 8: 28 to 9: 1. Matthew's parallel narrative.

W.—Luke 9: 37-40. Luke's parallel narrative.

Th.—Rom. 3: 1-20. Enslaved by Sin.

F.—John 6: 1-23. Sin's bondage broken.

S.—John 8: 31-51. The way of deliverance.

S.—Gal. 5: 1-26. The life of liberty.

LESSON ANALYSIS.

I. ENSLAVED.

A. Hailed by Demons:

1. A man with an unclean spirit (2). There met him two possessed with devil (Matt. 8: 28).

2. Seven other spirits... enter in and dwell there (Matt. 12: 45).

3. My name is Legion; for we are many (Mark 5: 9).

4. Recover them selves out of the snare of the devil (2 Tim. 2: 26).

B. Separated from Friends:

1. Who had his dwelling in the tombs (Matt. 8: 28).

2. They that did see me without fled from me (Ps. 31: 11).

3. No man careth for my soul (Ps. 142: 4).

4. Depart from me, ye cursed (Matt. 25: 41).

5. Who had devils;... and abode not in any house (Luke 8: 27).

6. He that is... cutting himself with stones (5).

7. The evil men shall not live out their days (Mark 4: 35, 36).

8. He that smeth against me wrongeth his own soul (Prov. 8: 36).

9. Thou hast fallen by thine iniquity (Isa. 13: 24).

10. The wages of sin is death (Rom. 6: 23).

11. In the bank this afternoon, and is nervous about carrying it with him so late at night.

12. Old man, in a softer tone—Tell him to wait a minute and I'll be done. He can put it in my safe until morning. And you'd better bring up half a dozen bottles of beer from the cellar.

13. BETTY KIND.—Miss Smith, to her friend Miss Barr, who has made her debut at a musical entertainment—

14. Miss Barr—Yes, I got along pretty well, but I was considerably disconcerted when somebody in the audience remarked that I had left my voice behind.

15. "That was awfully rude."

16. "Yes, but he was immediately reproved by somebody else, who said, 'Womankind should be a little more very kind, don't you know, and I plucked up courage immediately.'"

17. THE USE OF BRAINS.—"Do you know, Miss, that it's really a waste of time to do so much thinking?" said Gus de Jay. "It's quite worthy of you to think, you know."

18. "Do you mean to encourage any possible superior into a contest?"

19. "Yes, I sometimes really wonder why we have brains, anyhow."

20. "Oh, everything has its purpose, Mr. de Jay. Brains are very useful to keep their heads from caving in, you know."

21. OUTWARD INDICATIONS.—The little by had come with his clothes torn, his hair full of dust, and his face bearing unmistakable marks of a severe conflict.

22. "Oh, Willie! Willie!" exclaimed his mother, deeply shocked and grieved, "you have disobeyed me again. How often have I told you to play with that wicked Napoleon doll!"

23. "I'm afraid I did, do I look as if I had been playing with anybody?"

24. HE KNEW.—Brown—I say, Smith, what's the attraction up this way? I see you passing quite frequently.

25. Smith—Yes, six nights in the week, and twice on Sunday. There's a lady in the case, old man.

26. "Ah! ha! I see. But six nights in the week and twice on Sunday is rather the thing, isn't it? I found that twice a week was."

27. "Yes, but you married a young lady. I'm courting a widow. I know what I'm about, old man."

28. TEACHER.—Miss Sinuco, please parse the sentence "Adolphus married Caroline."

29. Mrs. S.—Well, "Adolphus" is a noun, because it is the name of a thing, "married" is a conjunctive, because it joins Adolphus and Caroline, and "Caroline" is a verb, because it governs the noun.

III. Prudent Pre-claimant.

He... began to publish... how great things Jesus had done (20).

He went out, and he began to publish it much (Mark 5: 20).

So much the more, and he published it published it (Mark 5: 20).

Declare how great things God hath done for thee (Luke 8: 39).

Why is it that you have not had done for thee (Luke 8: 39)?

1. "Clothed and in his right mind." (1) A marvelous transformation; (2) A mighty Transformer.

2. "That he might be with him." Fellowship with Jesus; (1) In bodily companionship; (2) In spiritual companionship; (3) In heavenly companionship.

3. "Go... and tell." (1) An appointed mission; (2) A ready message; (3) An accessible audience.

LESSON BIBLE READING.

CHRIST'S WORK WITH DEMONS.

He cast out demons with authority (Matt. 4: 24, 8: 16; Mark 1: 32, 29, 9: 33; Luke 6: 13).

Sometimes, many from one person: His power at the synagogue (Matt. 9: 34; 12: 24; Luke 11: 15). His own claim (Matt. 12: 25-28; Luke 11: 17-22).

Demons knew him (Matt. 8: 29; Mark 1: 24, 34; 3: 11; 5: 6, 7; Luke 4: 34, 41; 9: 17, 19).

Effects of demons on man (Matt. 8: 28-32).

Outcasting of demons (Mark 1: 25; 26; 9: 20, 27; Luke 4: 35; 9: 43; 11: 20).

Men empowered to cast them out (Matt. 7: 22; 10: 1, 8; Mark 3: 15; 6: 13; 16: 17, 19; Luke 9: 49; Acts 19: 11, 12).

Results of casting out demons (Mark 1: 27; 5: 15; Luke 4: 36, 37).

Work of the cure (Mark 5: 18-20). Peter's confession (Matt. 16: 13-19). A stupendous failure (Acts 19: 13-16).

LESSON SURROUNDINGS.

The great discourse in parables is reported most fully in Matthew, though probably many parables were uttered on that occasion which have not been recorded (Mark 4: 33-34). Mark gives but three. The second (Mark 4: 26) is peculiar to his narrative, setting forth the gradual growth of the kingdom of God. Notice the miracles peculiar to this Gospel were the casting out of devils (Matt. 8: 28-32). Chapter 4: 21-24 contains a list of names similar to those in the Sermon on the Mount. The voyage across the lake took place on the evening of that day (Mark 4: 25, 35). The miraculous sitting of the leper is narrated by all three evangelists (Matt. 8: 23-27; Mark 4: 37-41; Luke 8: 22-26). The landing on the other shore probably took place early on the next day.

The place was on the east shore of the lake in the country of the "Gerasenes" (Mark, Rev. Ver.), which is also called the country of "Gadaraes" (Matt., Rev. Ver.), and is now "Gerges" (Luke, Rev. Ver., marg.). The confusion in the readings of Mark is due to the fact that the name of the locality which was a small place called Gersa (or some similar name) south of Wady es Semak, about midway down the eastern shore, and that the name "Gergesenes" was derived from this. The locality which he claims to have identified meets all the requirements of the various narratives; and his theory is favored by the better supported readings (which, in his argument, he fails to indicate with exactness).

The time was the day after the discourse in parables, in the latter half of 781, year of Rome—A. D. 28.

The parallel passages: Matthew 8: 28-34; Luke 8: 26-33.

Even animals, especially parrots, have singular habits. In Philadelphia, for example, a parrot in a family lived for near to a church whose chimneys ring out the "Angels," observing a little girl of the family wrote the prayers one evening, at the bell, and the parrot jumped from his perch to the bottom of its cage, and assuming a reverent position, bowed its head and mumbled the first few words of the prayer. Since that time, it is claimed, the parrot is as regular and attentive to its daily prayers as any member of the family.

The result of the excavations made by archaeologists at and near Mycenae, Greece, the past season, have been highly satisfactory. Fifteen prehistoric tombs were opened and a large number of valuable objects were found. Among them a circular tablet of Homeric age discovered. Among them are stones with inscriptions, the so-called "Iliad gems," copper vases and a variety of other objects of ivory, gold and glass. The whole collection will be deposited in the museum at Athens.

The American Commissioner-General to the Paris Exposition of 1889 has issued a circular to American artists in this country and abroad. Only works of art executed since 1878 can be admitted; and copies, even in the form of medals, are not received. Artists residing in the United States must have their exhibits in New York by February 15, 1889. There will be no extension of time. A jury of artists will be chosen to examine and pass upon the works submitted. This jury will include representatives of the five different mediums, viz., sculpture, architecture, and engraving. The selection of the jury will probably be by the artists, but no formal action has yet been taken.

FARM NOTES.

WINTER CARE OF COWS.—The arrangement of the barn and yard should be such as to facilitate the work as much as possible. Excessive warmth is not conducive to robustness or profit. If a man's house is kept closed up and heated with stoves at a temperature of eighty degrees, and his cows and calves are all taken hot with a view to preventing the effects of the cold and to insure more comfort, the dwellers in that house will become fat and sleek, the impure air will poison the blood; the warmth will relax the skin, dry it and open the pores, and the slightest draft will cause it to shiver and induce colds. It is in precisely such houses that sore throats, diphtheria, scarlet fever, and other diseases are so frequent while in the house where the windows are thrown open in the breeze, and the cold, brisk, pure air is welcomed, and exercise and health give way to the fresh air coming through the blood, there are health and vigor and comfort. It is the same in the dairy. Neuro-phrenia invades those herds which are kept in warm, close quarters, some stable, and the dreaded tuberculosis finds there its prey; while from the wide airy stable, well ventilated and filled with pure air, the cows and calves will emerge to frolic in the snow, and enjoy themselves in the bright sunshine and the crisp air, when the thermometer marks twenty or thirty. Except in stormy weather, the cows should spend at least three or four hours every day in the yard, picking some rough feed and getting water and exercise.

MANURING PLANTS.—After mixing soil with the manure, or half and half, it should be drawn around the plants so as to cover the stems to the same height as formerly, but no higher. It is a great mistake to draw soil around the stems of plants with a view of forcing roots from parts where nature never intended there should be any. The roots of plants are not so numerous as the stems of no kind of plants should be set deeper in the soil than they originally grew. Thus arranged, the manure will act far better than it would if it were kept close to the stems. The stems of no kind of plants should be set deeper in the soil than they originally grew. Thus arranged, the manure will act far better than it would if it were kept close to the stems. The stems of no kind of plants should be set deeper in the soil than they originally grew. Thus arranged, the manure will act far better than it would if it were kept close to the stems.

It is held that "in order to secure the best returns, cows should be milked at regular hours, and the milk should be divided evenly, in order not to make the time between milkings too long. When the flow is quiet heavy it is better to milk twice a day, and in the case of a cow giving a full flow of milk, with a little variation in the amount from day to day, the natural impression would be that the secretion of milk through the udder should be as regular and uniform as the products of successive days; but there is reason for believing that the variation in the rate of secretion between milkings is large, and that it is far more rapid while the milkings are being done."

The following is the way to grow new varieties from potato seed: The seed is planted in a shallow box, and a quantity of small seeds which are separated from the balls when these are dry by rubbing. The seeds may then be kept as usual, as other seeds, in a box, and when the plants are ready to be sown in a bed after all danger of frost has passed. The first crop will be small, some no larger than peas and up to a bushel, but the plants, when they are kept over in the usual manner and planted out in the next spring, producing potatoes of the ordinary size, but all differing considerably in appearance.

In drying off cows in the fall of early winter, when," says one, "the milk is rich and thick, and the cows, perhaps, a little feverish from change of food and exposure to changes of the weather, there is more need of watchfulness than at some other seasons of the year when the milk is poorer and thinner, and more easily indurated away. On an account should milk be kept long in the bag as to become thick. The best way to dry off cows is milk daily or at regular periods, leaving back a part of the milk at each milking."

A POULTRY-HAIBER tells that when he cuts a chicken's wings he gets some one to hold the bird; then the tip of the wing and stretches it out, and with a sharp knife commences near the body, leaving three or four of the quill feathers and the rest of the wing cut and cuts all the rest except three or four at the tip end. That will take the wing out of their sails and prevent flying. The feathers left at the tip of the wing enables the hen to keep her legs in place if you let her sit, and when the wing is shut up it does not disfigure her.

As a rule, all summer pruning checks growth, and by producing maturity of wood and fruiting wood, induces fruitfulness. All winter and early spring pruning favors growth, i. e., causes a more exuberant growth in the parts remaining.

SELF-HELP THE BEST HELP.—State aid to agriculture is commendable when properly administered. We fear, however, that there is a growing and too common tendency to call for public money to be expended in carrying out what farmers should do themselves. We see the same thing in the demand for the enactment of the laws to regulate the practice of agriculture, which is righted by a widespread, energetic and popular public sentiment. The AMERICAN AGRICULTURIST is keenly alive to the fact that the State governments owe an important duty to the agricultural interests, but he is also firmly convinced that farmers owe a duty to themselves. Self-help is always effectual. What we learn by our own effort is always of more value to us and has a greater influence on the public welfare than similar knowledge learned through assistance from the State. Let us not run to the Legislature or the Congress unless we have done our best work at home. A prominent builder of machine tools asserts that he has had difficulty often with forged-steel spindles for lathe heads, which are made of the best steel, annealed, while those cut from the bar and annealed turned and drilled easily without any hard points. He insisted that the lathe men were not properly lath direct from the bar amounted to much more than the value of the steel turned into chips.

Edward W. Fell of Cleveland, Ohio, after experimenting for years, asserts that he has succeeded in perfecting an invention which will produce a surface in admittance of its being covered with a pillow with a heavy silk cover, white, or of any contrasting color. Upon one end outline in wash embroidery or any other design, and the other end is a fine eyelet brighter colors than the open ever do." These covers can be removed and laundered, which is a great advantage where a pillow is wanted for use.

A KITCHEN CONVENIENCE.—Not every convenience can be supplied with all modern improvements, and not every housekeeper has the means to possess them; but every one can afford to have a few improvements which will make life more comfortable and pleasant. A reporter who called upon the inventor was shown some photographs on pieces of wood, which were not only perfect in outline and finish, but possessed a peculiar softness not obtainable by any other process. "The importance of this discovery," he said, "is that it will enable the inventor to produce a pillow which will be as comfortable as the best now in use, and will be as durable as the best now in use. It is not intended to interfere with the portrait work of the average photographer."

BORDER PLANTS.—Every lover of flowers who has space on his farm or garden in which to grow them, ought to have a collection of hardy border plants. I know nothing which affords greater satisfaction to the gardener than to see the flowers of his plants in their full bloom. The care required in their culture. A bed of annuals calls for quite a deal of labor. The general rule is to plant them in the early season. The seed has to be sown, there is weeding to do, and there is nothing the average amateur dislikes to do more than to get on his hands and knees and pull weeds, and in small beds this has to be done, as the hoe cannot be used advantageously among such a mass of plants. The border plants, on the other hand, require but little care, and they will give a fine effect to the garden. The border plants should be planted in the early season, and they will give a fine effect to the garden. The border plants should be planted in the early season, and they will give a fine effect to the garden.

It is held that "in order to secure the best returns, cows should be milked at regular hours, and the milk should be divided evenly, in order not to make the time between milkings too long. When the flow is quiet heavy it is better to milk twice a day, and in the case of a cow giving a full flow of milk, with a little variation in the amount from day to day, the natural impression would be that the secretion of milk through the udder should be as regular and uniform as the products of successive days; but there is reason for believing that the variation in the rate of secretion between milkings is large, and that it is far more rapid while the milkings are being done."

As a rule, all summer pruning checks growth, and by producing maturity of wood and fruiting wood, induces fruitfulness. All winter and early spring pruning favors growth, i. e., causes a more exuberant growth in the parts remaining.

SCIENTIFIC.

IT may well be doubted if the common practice of forging from the steel bar is economical. The steel bar is a waste of material, and the planer work is economical. This is the reason given for the practice, that the work of the anvil saves so much material, and the work of the planer and also saves the material. But there is one consideration that appears to be generally unnoticed; that is, the steel bar is a waste of material, and the planer work is economical. This is the reason given for the practice, that the work of the anvil saves so much material, and the work of the planer and also saves the material. But there is one consideration that appears to be generally unnoticed; that is, the steel bar is a waste of material, and the planer work is economical. This is the reason given for the practice, that the work of the anvil saves so much material, and the work of the planer and also saves the material. But there is one consideration that appears to be generally unnoticed; that is, the steel bar is a waste of material, and the planer work is economical. Directions for Feeding.
CATTLE & MILCH COWS;
Give every time they are fed, according to the size of the animal, from one to four double handfuls mixed with the other feed, and a great improvement is noticed in their condition in a very short time—the milch cows yielding a large increase of rich milk.

HORSES:
At each feed a double handful mixed with the other food. It keeps the bowels regular and makes the coat slick and glossy.

SHEEP AND HOGS:
One to two double handfuls whenever fed, and they lay on flesh rapidly.

POULTRY:
About one-half teaspoonful daily to each fowl, according to the other feed.

Manufactured only by
E. W. Blatchford & Co.,
Chicago, Ill.

Sold in Hammoncton by
P. S. TILTON & SON.

GO TO
Wm. Bernshouse's Lumb'r Yard
For all kinds of Lumber, Mill-work, Window-glass, Brick, Lime, Cement, Plaster, Hair, Lath, etc.

Light Fire Woods
For Summer use.

We manufacture
Berry Crates & Chests
Of all kinds. Also, Cedar Shingles.

We have just received our Spring stock of goods.

Very nice
Pennsylvania Hemlock

At Bottom Prices. Manufacture our own Flooring. Satisfaction Guaranteed.

Our specialty, this Spring, will be full frame orders.

Your patronage solicited.

HAMMONCTON ATLANTIC CO. N. J.
SATURDAY, FEB. 9, 1889.

Over thirty friends of Mr. and Mrs. Robert E. Thomas unexpectedly called at their residence, last Monday evening, bringing as a gift a fine hanging lamp. The evening was spent very agreeably, so say all who were present.

There was a change in Railroad time-card, Jan. 23rd. The up-train leaves here at 7:54 A.M.; express, 10:37; accommodation at 4:16 P.M.; express, 5:21. Leave Philadelphia, mail, 8 A.M.; 4:30 P.M.; express (from Market St.), 3:30 and 5:00 P.M.; reaching Hammoncton at 9:19 A.M., 3:57, 5:15, 5:56 P.M. Our local accommodation train has not been changed.

Sunday and Monday were moderately cool days; Tuesday was decidedly warm; Wednesday morning's sun saw a slight sprinkling of snow, with mercury down to sixteen above zero, and bitter winds blowing. There was but little moderation on Thursday, and skates were sharpened and the ice-men's tools collected, in hopes that pleasure and profit might result from the cold wave.

Next Saturday evening, Col. L. F. Copeland, the eloquent orator, will give his lecture, "What's to hinder?" in the Universalist Church. Atlantic City friends were delighted with this lecture, last winter. Col. Copeland has lectured twice in Hammoncton, and all who have heard him will attend this time. This will be the fourth, and last, entertainment of this winter's course.

At a meeting of the State Board of Agriculture, last week, some one (we would like to know who) said that there "is not a self-sustaining farm in Atlantic County." That fellow had better come to Hammoncton. We will sell him a farm that will, the first year, pay all running expenses, support his family, and give him a handsome percentage on the money invested; and no poultry business on it, either.

W. D. Washburn was elected United States senator in Minnesota. Callous was re-elected in Illinois and Plumb in Kansas.

J. D. Critchfield, a lawyer of Mt. Vernon, Ohio, began suit against his mother in law, Mrs. Caroline H. Henderson, of Erie, for \$100,000 for alienating his wife's affections.

Yet Sing, a Chinaman, established a laundry over a boiling spring in Canyon City, near the Yellowstone Park. The spring was a geysir which suddenly spouted forth, scalding four Chinamen to death.

Don't judge a man by the clothes he wears. God made one and the tailor the other. Don't judge him by his family, for Cain belonged to a good family. Don't judge a man by his failure in life, for many a man fails because he is too honest to succeed. Don't judge a man by the house he lives in, for the lizard and the rat often inhabit the grander structures.

The Rev. Dr. Parker, is making a curious experiment with mid-day meetings for workmen. They bring their dinners and pipes and eat and smoke while he talks to them. Interruptions and questions are always in order. The first meeting was a big success.

While a Democratic Congress is holding back the bill to pension Mrs. General Sheridan she is in actual need of money to pay her dead husband's just debts. For shame!

The 400 nominations now awaiting ratification by the Senate will doubtless continue to wait. They are in a tie up that beats the New York street car strike all to pieces.

General Harrison encounters only one difficulty in making up his Cabinet. That is, the burdensome surplus of raw material.

The course of the Republican party of Pennsylvania in submitting the Prohibition amendment to a popular vote is a splendid example of moral courage and political good faith. The party cheerfully recognizes the right of the people to vote on a question involving changes in their organic law; it pledged itself to defend and uphold that right, and its obligation has been honestly and fearlessly fulfilled. The record is one in which every true Republican and every patriotic believer in free institutions based upon the expressed will of the governed may take an honest pride.

Building lots for sale—some of the best located in town for the least amount of money. **W. L. COLWELL.**

For Sale.—A sixty-acre farm, 14 miles from Elwood station. About thirty acres have been cleared and farmed. Inquire of **W. M. BERNHOUSE,** Hammoncton, N. J.

PLANTS.—Pearl and Jessie strawberry plants for sale. **W. H. FRENCH,** Lake View Nursery, Hammoncton.

Insurance with A. H. Phillips, 1328 Atlantic Ave., Atlantic City.

Five dollars down, and one dollar a week, will purchase one of those lots on Pratt Street—50x250 feet. Price, \$55. Apply to **C. M. JORDAN,** Real Estate Agent.

FOR SALE.—Two good cows. **W. H. FRENCH,** Central Avenue.

New Lard! new lard! at Jackson's.

EXCHANGE.—I will give, in exchange for Crescent or Wilson strawberry plants, Apple, Pear, or Cherry trees, Currants, or Gooseberries.

INSURANCE.—I have been in the insurance business in Hammoncton for over seven years, and in all that time every loss in my agency has been honorably and promptly settled in full. The lowest rates to all, and no backlist. **WM. RUTHERFORD.**

A Woman's Discovery.
"Another wonderful discovery has been made, and that too by a lady in this county. Disease fastened its clutches upon her, and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she coughed, sneezed, and could not sleep. She bought of us Dr. King's New Discovery for Consumption, and was so much relieved on taking first dose that she slept all night, and with one bottle she was miraculously cured. Her name is Mrs. Luther Lutz." This writes **W. C. HANRICK & Co.,** of Shelby, N. C. Get a free trial bottle at Cochran's drug store.

E. KEENE
Has a good carriage, and will **CARRY PASSENGERS** Anywhere in town. Leave orders at Fairchild's store.

SATURDAY, FEB. 9, 1889.

LOCAL MISCELLANY.

Colds are prevalent.

Mr. and Mrs. John Keyser have a little son, and are pleased.

Car of good chicken wheat just arrived at Fruit Growers' Union.

Miss Dr. Nivison has replaced her old wind-mill with an improved iron turbine wheel.

Some very fine overcoats will be closed out at a liberal reduction, at the Fruit Growers' Union.

Mr. G. W. Kates and wife will give a lecture and teas, in Union Hall, to-morrow, at 10:30 A.M.

Street dirt, stable manure, lime, and marl (marl 90 cents per ton), furnished by Fruit Growers' Union.

Alex. Aitken has leased J. B. Small's house, on Bellevue; he refuses to take to the woods before Spring.

The first term of Prof. Matthews' night-school has closed, and the pupils regret that it is not to be continued until Spring.

The ground hog saw his shadow, and if there is anything in old superstitions we shall not have spring before St. Patrick's Day.

Mr. Theo. S. Mason, of the Bank of Topeka, Kansas, a former Hammoncton boy, is mourning the recent loss of a little daughter.

Jesse Treat is the name of the new landlord of the Arnot House, and are told that he proposes to make of it a first-class boarding house.

The Board of Freeholders allowed Sheriff Johnson \$500 for hanging Rob. Elder, but nearly one-half of that sum he had to pay out for expenses.

Messrs. Andrews & Roberts are making extensive alterations in and about their recently purchased property, and propose to have a neat and convenient store.

Miss Flora Potter, of Pleasantville, is succeeding well as teacher of the Weymouth school. Miss Mabel, her sister, has a large music class at the same place.

The Workingmen's Loan Association sold about \$5000, Monday night, and borrowers had their wants supplied at very low rates,—ranging from 50 to 75.

Remember the Board of Trade meeting, next Monday evening, in the Council Room. An amendment to the By-Laws will be considered, and other business introduced.

Mrs. Jordan is having very gratifying success in her sewing machine business. She has sold quite a number, in some cases replacing nearly new machines of other makes.

Commander Wilson, of Washington, D. C., visited his brother-in-law, J. H. Parkhurst, and escorted Mrs. Capt. Hubbard, his mother-in-law, to the Capital City, on Tuesday.

Justice Atkinson has removed his office from Rutherford's to Fay's building. Mr. R. announces his intention to occupy the vacated rooms himself, as an insurance and real estate office.

St. Mark's Church, 6th Sunday after Epiphany, Feb. 10th, 1889. Services: Holy Communion at 7:30 A. M. Morning Prayer, Litany, and Sermon, 10:30. Evening Prayer at 4:30 P. M. Sunday School at 3:00.

A rare sight was witnessed in Hammoncton, last Saturday, a man deaf, dumb, helplessly stretched across the sidewalk; and his clam (all tongue) only a degree better off. The **Marshall** deposited them in the cooler.

Last Friday, the Directors of the Fruit Growers' Union unanimously re-elected L. T. Matthews Secretary and Treasurer, and manager of their affairs. Chas. Woodnut was again appointed Chairman of the Shipping Committee.

Mr. William A. Hood is again in Massachusetts, being detained by vexatious delays in business. Writing from thence on Tuesday, he stated that the thermometer had indicated for ten to twelve degrees below zero for four days in succession.

At the High School, recently, the class in physiology found a sentence something like this: "The human body is ramified and permeated in all its parts by arteries and veins." In a subsequent examination or review, one pupil astonished the principal by announcing that "the body is rammed full of veins and arteries."

A PROPOSED BOOM.

Hammoncton is being visited by people from all sections, and now is the time to prepare to give her a big boom. It is proposed to call a meeting (probably at Union Hall) on Wednesday evening, Feb. 20th, of the citizens, with a view of holding a poultry show next winter, exhibiting also the broiler and fruit farms, in order to attract visitors. The meeting is suggested by the Poultry Association, as the citizens must all join in or the enterprise will be abandoned. The money that will be brought here, farms and wild land sold, additions to population, and advertising, will be great. It is a matter that concerns all. Upon the attendance at the meeting will depend the success or failure of the proposed enterprise. It will at least cost nothing to listen to the suggestions that may be offered.

A CARD.—Allow me to express my gratitude to the many friends who so kindly aided me during my recent illness. May they never fail to find sympathy and consolation in trials dark hour, and may all most in that happy dwelling-place where sickness and sorrow are no more.

NEWTON C. HOLDRIDGE.
Feb. 7th, 1889.

Mr. Woolley showed us, the other day, a letter copying book which appears to be just the thing needed by every business man. We have at times felt willing to pay a dollar if that important letter writing time previously. This book, with one hundred leaves, costs one dollar, requires no press or other machinery, and makes perfect copies. Call at Mr. Woolley's store, and buy one.

Mr. A. M. Hammer was greeted by a full house, last Friday night, and gave us a very entertaining lecture, composed mainly of incidents drawn from personal observation while actively engaged in the temperance work, and the experience of several with whom she was acquainted. These facts served to elicit her arguments in favor of the home as opposed by the saloon. The lady is a very pleasant speaker, earnest in her work, and convincing.

On Friday afternoon, Mrs. Hammer addressed a large audience of children, and gave them practical lessons upon the evils of intemperance, and urged them to begin right by avoiding all evil habits. The little ones were pleased with the address, and are gaining in self respect as they gradually realize of how much importance they are in the minds of older people.

Mr. E. R. White, of Vineland, Deputy Inspector of factories and workshops, was in town on Wednesday; and after performing his official duties, called upon several of our citizens in an endeavor to interest them in "industrial education," with a view of introducing it in our schools. Mr. W. has no interest in the matter, except to benefit the rising generation. During his visits to the many factories, he has seen so many boys and girls who are growing up with no practical education,—knowing how to read and write, and add, but unable to sew a straight seam, patch, or darn, drive a nail or saw to a mark—that he is striving to have the larger towns adopt a course similar to the one which has for two years proven a success in Vineland. In this way by a regularly laid out course, the boys learn the names and use of various tools, grafting, etc., and both sexes given instruction in free hand and mechanical drawing and the use and combination of colors. Mr. W. brought and exhibited many samples of work, actually done by pupils in Vineland, illustrating the working of the system. It seems entirely feasible here, and a proposition will be made at the Board of Trade meeting, on Monday night, which may lead to the adoption of some methods of teaching these useful branches of knowledge.

Wice Home for Sale.—Two town lots, good location; neat 9-room house, heated throughout by Novelty furnace, large well-lighted cellar, with coal-room. On first floor, pleasant parlor, large sunny bed-room (might be used for sitting and sewing-room), very large dining-room with closet and clothes-dresser, pleasant kitchen and pantry with conveniently arranged. Second floor contains large hall and closet, four nice sleeping-rooms each with closet, attic for storage. Large side yard, good wood lot, large sunny back-yard, many fruit trees, grapes vines, and berry plants, lots of roses and flowers of various kinds. To be sold before Spring. Particulars at the **REPUBLICAN** office.

The Republican.

A Model Newspaper
THE NEW YORK MAIL AND EXPRESS

The Advocate of the Best Interests of the Home—The Enemy of the Saloon.
The Friend of American Labor.
The Favorite Newspaper of People of Refined Tastes Everywhere.

The New York MAIL AND EXPRESS, the favorite American newspaper of many people of intelligent and cultivated tastes, has recently made some noteworthy improvements, materially increasing its general excellence. It is in the broadest sense

A National Newspaper,
Most carefully edited, and adapted to the wants and tastes of intelligent readers throughout the entire country—North, South, East and West. It is a thoroughly clean paper, free from the corrupting, sensational and demoralizing trash, miscolored news, which defiles the pages of too many city papers.

OUR POLITICS.
We believe the Republican party to be the true instrument of the POLITICAL PROGRESS of the American people; and holding that the honest enforcement of its principles is the best guarantee of the national welfare, we shall support them with all our might; but we shall always treat opposing parties with consideration and fair play.

AGAINST THE SALOON.
The MAIL AND EXPRESS is the recognized National organ of the great Anti-Saloon Republican movement. It believes that the liquor traffic as it exists to-day in the United States is the enemy of society, a fruitful source of corruption in politics, the ally of anarchy, a school of crime, and, with its avowed purpose of seeking to corruptly control elections and legislation, is a menace to the public welfare and deserves the condemnation of all good men.

Send for Sample Copy
They are sent free to all who apply.
SUBSCRIPTION RATES.—WEEKLY, per year, \$1.00; six months, 50 cents; three months, 30 cents. DAILY, per year, \$6.00; six months, \$3.00; three months, \$1.50; one month, 50 cents.

Valuable Premiums are given to all subscribers and agents. We want a good agent in every town and village where we have not one now at work. Send for our Special Circular to Agents and see our liberal offers.

You Can Make Money by accepting our Cash Commission offers or working for our valuable and popular premiums. Address the MAIL AND EXPRESS, New York City.

Land Sale for Taxes of 1886.
Town of Hammonton.

Return of taxes laid on unimproved, and unimproved land, and on land tenanted by persons not the lawful proprietors, who are unable to pay taxes, and on other real estate, in the town of Hammonton, County of Atlantic for the year 1886.

List of delinquent taxes returned to the Town Council, Sept. 20th, 1886, with description of property by block and lot, as laid down in the assessment map of the Town of Hammonton, which map is to be found at Town Clerk's office, also on file in the clerk's office of Atlantic County, at May's Landing, N.J.

Names.	Block No.	lot.	Acres	Tax.

JOHN ATKINSON,
Justice of the Peace.

Sept. 27th, A. D. 1886.

Pursuant to the act to facilitate the Collection of taxes in the Town of Hammonton, County of Atlantic,

The Chairman of the Town Council, on
Tuesday, Feb. 26th, 1889,

at TWO O'CLOCK in the afternoon, at the TOWN CLERK'S OFFICE, sell the above described lands, tenements and hereditaments to the above named persons, or so much thereof as will be sufficient to pay the tax, interest and costs thereon.

THEODORE B. DROWN,
Chairman of Town Council.

Attest,
A. J. SMITH, Town Clerk.

Hammonton, Jan. 9th, 1889.

G. M. Crowell, M. D.,
PHYSICIAN & SURGEON,
Hammonton, N. J.
Office at Residence, Bellevue Avenue near Fourth Street.

The New York Tribune
CONGRATULATES

Every American Farmer, Wage-Earner, and Business Man, the Union Volunteers, the Lettlers of the Western Territories, every Young Man and Woman, the Freedmen of the South, our American Fishermen and Ship-builders, and the Whole People Generally, on the

Salvation of their Welfare

Which was won at the polls on November 6th. In the prosperity which is likely to follow, the men of both parties will share; but to the Republican voters, workers, and press is due the credit.

During Gen. Harrison's administration, the Tribune will continue to advocate the great measures of public policy with which its name is identified. Great responsibilities now rest, not only on the new administration, but on the Republican party and press, with reference to shaping legislation so as to give practical effect to the will of the people. It is no time now for those whose interests are in the administration of free traders and rebel brigadiers to relax interest in public affairs, and let things take their course. On the contrary, it would seem to be the duty of all voters to cooperate earnestly in advancing measures undertaken in their behalf, and to lend support to great newspapers which are doing original and aggressive work for the welfare of the people.

It is conceded by the whole country, that the New York Tribune has initiated a great variety of the valuable and successful popular discussions of the past year. Its labor for the farmers (not yet half finished) was aggressive and effective. Its great exposure of the "reform" of the Cleveland administration was crushing and final; no attempt was ever made to answer it. Its position on temperance brought back numerous third party voters to the Republican ranks. Its broadside on the tariff and other questions have done much to prove, beyond question, that the Republican party is the best friend of the poor people of the country and of settlers of the western territories. It stood beyond controversy the responsibility for the defeat of much needed pension legislation in Congress. In many other important questions the Tribune did original and successful work. It undertook, for the sake of the cause, many important, laborious, and for reaching tasks, involving immense research, and careful editing in quicker motion the forces which won the victory. Its course in the future may be judged by the past.

The Tribune is not exclusively devoted to politics. It is a general newspaper, presenting the news of the world in each issue, together with fiction, miscellany, letters for the home circle, and for Young Folks, with excellent and accurate market reports, book reviews, foreign correspondence, and two pages a week on Agriculture. For the family, it is absolutely unequalled among newspapers.

SUBSCRIPTION.—Weekly, \$1 a year; extra copy with every five. Semi-weekly, \$2 a year; extra copy with every five. Daily, \$9.50 a year Sunday, \$2. New subscribers receive the paper until Jan. 1889.
PREMIUMS. (1) Waverly Novels, complete in 6 v. 2. Cooper's fascinating "Leather Stocking Tales," 6 vols. 3. Irving's "Life of Washington." 4. Ten one dollar books, any one of which is sent for two subscribers, viz: "Essays of Lord Bacon," "Edgar A. Poe's Tales," "French Revolution by Carlyle," "Great Generals by Great Authors," "Poems of Sir Walter Scott," "Greek Mythology," "Don Quixote," "Arabian Nights," "Robinson Crusoe," and "Swiss Family Robinson." 5. Winchester Hunting Rifle, breech loading. 6. Remington breech loading Shot Gun. 7. New York Tribune History of the United States and Pocket Atlas of the World. 8. The Tribune's great "Book of Open Air Sports." 9. Wood's Household Medicine. 10. Webster's Unabridged Dictionary. 11. Waltham Watch. Send for circular describing them in full.

Library of Tribune Extras,

Every year the Tribune prints and issues an Almanac and Index and several bound "Extras." It is proposed now to systematize the publication of these Extras, and issue them regularly each month, 12 numbers a year. The Almanac will be issued in addition to the only with new, valuable and interesting material. The number of 1889 containing complete returns of the Presidential election. The other numbers will be made up with pages of about monthly magazine size. There will be one or two numbers per year devoted to latest ideas in "killing an old fellow" and several up of entertaining features of special and permanent value relating to Science, Society, Literature, Politics, etc. Single copies, 25 cents. Price for year, for the 12 numbers, \$2.

THE TRIBUNE, New York City.

Work for the Season.

Now, while the ground is frozen, is the time to cut out all old canes from the blackberries and raspberries. Do not forget that the eggs of the blackberry borer are deposited in the canes, and that it is very important that they should be burned at once, and not thrown into the woodland or waste places to remain indefinitely.

I notice plenty of basket worms still remaining on trees and hedges. Winter is fast wearing away, and Spring will bring a rush of other work. Don't neglect this any longer. Reader, this means you, and is not intended specially for your neighbor. Some of these cocoons are out of reach by ordinary methods, and I would suggest that a light pole of any required length might be fitted, by any ingenious man, with a pair of jaws at top, opening by a spring and closing by a strong cord like a Waters' tree pruner, that would enable one to reach them.

Early potatoes, for planting, should now be spread in single layers on shelves, or in shallow boxes in a light place in the cellar.

WM. F. BASSETT.

The new issue of Panama canal shares is pronounced a failure.

The Republicans of Richmond, Va., appointed a committee of colored citizens to visit General Harrison to urge Mahone for a Cabinet position.

It is stated that the Lehigh Valley Railroad Company intends to build a terminus of its own in Jersey City.

Congress has failed to put the express companies under the Interstate Commerce act and the result is that the companies combine to raise rates, which the railroads are prohibited from doing.

Sanitary experts declare that the White House is unfit to live in. Nevertheless, the present tenant has been willing to worry along in it for four years more and put up with things just as they are.

If it is true as charged by Secretary Bayard that the Senate has persistently belittled his foreign policy, all we can say is that the Senate ought to be ashamed of itself. That foreign policy is little enough in its normal condition without any belittling from anybody.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

The Verdict Unanimous.

W. B. Sult, druggist, Bippus, Ind., writes: "I can recommend Electric Bitters as the very best remedy. Every bottle sold has given relief in every case. One man took six bottles, and was cured of rheumatism of six years' standing." Abraham Hare, druggist, Belleville, Ohio, affirms: "The best selling medicine I have ever handled in 20 years' experience is Electric Bitters. Thousands of others have added their testimony, so that the verdict is unanimous that Electric Bitters do cure all diseases of the liver, kidneys, or blood. Only a half-dollar a bottle at Cochran's drug store."

Bucklin's Arnica Salve, the best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price, 25 cents per box. For sale by A. W. Cochran.

Papers and magazines of all kinds, in any language, furnished at reduced rates by the Editor of the SOUTH JERSEY REPUBLICAN. Call and get our figures for anything of the kind wanted, whether literary, religious, trade, or any other sort of periodical.
