AND
Demorest's Monthly Magazine.

A WONDERFUL PUBLICATION.

Many suppose DEMOREST'S MONTHLY to be a fashion magazine. This is a great mistake. It undoubtedly contains the finest Fashion Department of any magazine published, but this is the case from the fact that great enterprises and experience are shown, so that each department is equal to a magazine in itself. In Demorest's you get a dozen magazines in one, and secure amusement and instruction for the whole family. It contains Stories, Poems, and other literary attractions, including Artistic, Scientific, and Fanciful matters, and is illustrated with original Steel Engravings, Photographures, Water-colors, and Fine Woodcuts, making it the MOST MAGAZINE OF AMERICA. Each copy contains a PATTERN CARD, enabling the holder to the selection of ANY PATTERN illustrated in any number of the Magazine, and in ANY OF THE SIZES manufactured, each valued at from 20 cents to 50 cents, or over \$3.00 worth of patterns per year, free.

Yearly subscription, \$2.00. A trial will convince you that you can get ten times the value of the money paid. Single copies (each containing Pattern Order), 20 cents.

Published by **W. JENNINGS DEMOREST, New York.**

The above combination is a splendid chance to get our paper and Demorest's Monthly at reduced rate. Send your subscriptions to this office.

FOOD FOR THOUGHT.

Not earthly inheritance is without its peculiar disadvantages.

A simple light answers as well for a hundred men as for one.

Intelligent assassins and tyrants are the most dangerous enemies of the world.

There is such quality as luck, except it is in a very unknown quantity.

Thy friend has a friend, and thy friend's friend has a friend; but thy friend's friend's friend is thy enemy.

Rumor is a spark at first, then a fire, then a conflagration, and then ashes.

Enough is as good as a feast, whether the diet be for the body or for the soul.

To be content with what we possess committes the greatest and most certain of riches.

Talk is cheap. The man who talks too much gets so liberal that he gives himself away.

No traveler is so roared that he does not find a road.

One of the greatest blessings you can enjoy is a tender, honest and enlightened conscience.

Property is not an absolute possession, to be used or abused at will, but a responsible trust.

No consciousness of rectitude will entirely take away the sting of being cruelly misjudged.

Learn to think and act for yourself. Be vigilant. Keep ahead of rather than behind the time.

Be sure you have long friends; and it holds equally good with your land-lord and your clothes.

If you want to be well informed, take a paper every day of your life.

What makes wishing and hoping for better times? We make these times better by our own efforts.

To Wives—Man is very much like an egg, keep him warm and he is hard to be broken.

A book is often wiser than the man who wrote it, for it contains the results of his thought and also of his study.

People who are extravagant on themselves are often wonderfully ingenious in devising plans of economy for others.

In moments of decision there is danger of mistaking the exhaustion of long spiritual struggle for resignation to fate.

Bad habits and wars grow, we scarcely know how. But can, however, be burned out by a little resolution.

The man who hums softly to himself while he is at work may show that he is not a careful or conscientious worker.

The indolent are not wholly indolent. Though the body may shirk labor, the brain is not idle. If it does not grow it will rust.

Never give a dollar to charity if you can help it. You are better off.

A great humbling is a great blessing to the soul. Sometimes it comes from God, but oftener through man as an instrument. In this case how hard it is to bear!

One of the most unhappy men in the world is he who, instead of measuring his strength against his work, is always measuring it against the strength of the man.

Let us make a note of this, as a point of spiritual interest, never to restrain an impulse to pray. Who can tell what treasure He is laden when the Holy Spirit in this way knocks at our heart's door?

The rays of the sun may be so concentrated by an ice-berg as to kindle a fire without melting the lens, so God sometimes uses men to kindle the hearts of their fellows, while their own remain cool as marble.

All education begins in work. What we think, what we know, or what we believe, we learn by doing.

The only thing of consequence is what we do—and for man, education is what the first point of education is to make them do their best.

We have duties so positive to our neighbor that if we give more of our time and of our attention to ourselves and our own matters than is our just share, we are taking what is not ours, and are guilty of fraud.

A College For Women.

From an article in the Public Ledger we glean some important facts with respect to the contemplated establishment, by Mr. A. J. Drexel, our millionaire banker, of an institution at Wayne, Delaware County, Pa., for the proper training and education of young women.

The project which has been in contemplation for some time past by Mr. Drexel, was put in practical shape the other day by the purchase of the Lovella mansion at Wayne, and a selection of trustees and managers for the institution, which is to be called "Drexel Industrial College for Women."

The object of the institution as set forth in the charter, is to instruct females between the ages of 13 and 18 years in all duties appertaining to the care of a household, and to teach such trades and businesses as will make them practical women, able to earn a respectable livelihood.

The benefits of the college are to be extended, first, to the daughters of clergymen, and second, to the daughters of respectable parents, who, through adverse circumstances, are unable to give their children proper training and education.

The property which has been purchased, as stated above, at Wayne is well-known as a summer home, and it is to be retained as the home or living quarters of the college. Mr. Drexel proposes to erect the college and administration buildings.

It is said that Mr. Drexel contemplates devoting \$1,500,000 to this laudable object. It is stated that in connection with the college, instruction will be given upon the plan of the Cooper Institute, of N. Y., by which the students are furnished with residing at their own homes.

It will be about eighteen months before the college will be in full operation. About one hundred women will be accommodated in the beginning, and when the new buildings are completed there will be room for three hundred.

Mr. Drexel has selected the following persons for Trustees: President, the Right Rev. Bishop Whittaker; Vice President, A. J. Drexel; Treasurer, James W. Paul; Secretary, Rev. T. K. Conrad, D. D.; The other Trustees are, John H. Drexel, A. J. Drexel, J. G. Drexel, J. P. Felt, G. C. Thomas, George W. Childs, J. C. Bullitt, R. C. Dale, George B. Peppercorn, H. C. Gibson, Dr. William H. Reynolds, W. F. Watkins and Dr. H. B. Howe.

Mr. Drexel, who takes great personal interest in the project has selected the following ladies as managers: Mrs. John Bellahugh Cox, Mrs. H. B. Conrad, Mrs. James N. Paul, Mrs. J. F. Lippincott, Mrs. H. C. Gibson, Mrs. George W. Childs, Mrs. Martha Brown, Mrs. Wayne MacVeigh, Mrs. Harry Bidde, Mrs. Edward Robb, Mrs. Horace Fassett, Mrs. George F. Preston, Mrs. George W. Childs, Mrs. J. D. Lippincott, Miss C. B. Smith, Mrs. H. J. Rowland, Mrs. George W. Childs, Mrs. A. W. Meigs, and Miss Marion Bidde.

Until the college is completed the meetings of the managers will be held at the Lincoln Institution. The first was held on the 14th inst., at which Bishop Whittaker delivered an address explaining the needs and usefulness of the magnificent institution of which these ladies are to assume the control.

Mrs. Cox also made some very interesting statements regarding what is to be accomplished through the instrumentality of this institution.

The Center of Population. The center of population of the United States is steadily moving westward at the rate of about 50 miles every 10 years. The following is the center point at each census:

1790—22 miles East of Baltimore. 1800—18 miles East of Baltimore. 1810—40 miles Northwest of Washington. 1820—16 miles North of Woodstock, Virginia. 1830—10 miles West by S. W. of Moorefield, West Virginia. 1840—16 miles West of Clarksburg, West Virginia. 1850—23 miles Southeast of Parkersburg, West Virginia. 1860—20 miles South of Chillicothe, Ohio. 1870—48 miles East by North of Cincinnati, Ohio. 1880—8 miles West by South of Cincinnati, Ohio.

The Oldest Timber. Probably the oldest timber in the world, which has been subjected to the use of man, is that found in the ancient temple of Egypt in connection with which is a stone known to be at least 4,000 years old. This the wood used in the construction of the temple, is in the form of ties, holding two blocks were laid in place. An excavation about an inch deep was made in each block, in which a tie shaped like a wedge was driven. It is, therefore, very difficult to force them apart from their position. The ties appear to have been of the timarisk or Shittim wood, of which the ark was constructed.

We are never so happy or so unhappy as we suppose. Lawyers ought to be good poets; they write lots of "verses" for their clients. Each man wants his neighbor to be more virtuous than himself. A thrifty animal is the snake; it can always make both ends meet. Bottles are now being made of paper. Old cream will make streaked butter.

SCIENTIFIC.

Air is a great mechanical agent. While it remains at rest, it supports within it an innumerable quantity of particles which sport with utmost freedom and ease. And when the air itself is put in motion, it becomes the instrument of most important operations.

The air is constantly bringing a fresh supply of air to those places in which it is wanted. Currents of air are continually passing over tracts of land, and replacing the heated atmosphere of the plains, and the unwholesome vapors that arise from crowded cities. Meanwhile, the breezes which thus convey health and freshness with them, afford the means of navigating the ocean in various directions, and the changes of the variable winds being such as enable the sailor to pursue his voyage in almost any direction.

In other parts of the earth, the winds blow regularly in nearly the same direction for a length of time, and thus become a certain means of conveyance. On the surface of the earth, the wind will blow in the same direction for a regular is its performance by means which appear so irregular. In different parts of the country we may see corn raised on the same soil, marshes drained, various other work done, all by that invisible and apparently weak and inconstant agent, the wind. The currents of air are thus strong enough to do us incalculable good, and very seldom, comparatively, are so violent as to occasion much injury.

Farnes made with alcohol will get dull and spongy by the evaporation of the alcohol, which leaves water in the varnish, as all commercial alcohol contains a certain amount of water. It is a safe rule to take a thin sheet of gelatine, cut it into strips, and put it into the varnish; it will absorb in the thin sheet most of the water, and the varnish can be used clear, and bright to the last drop. The gelatine will get quite soft; it can be taken out and dried and used again.

The experiments of steam-disinfection recently tried in Jacksonville have proved that the steaming process is superior to all other methods in destroying microbes in general, and the less violent fever microbes. Active germs placed by Dr. Gibber in a gelatine-filled glass, and subjected to the steaming process for only ten minutes, and under very imperfect conditions, were afterwards found to be entirely inert.

The fact that the elementary substances now number, according to chemists, is a steady increase, and an increase within the last fifty years of nearly one-fourth in the number known. The size of an atom of oxygen is about one-tenth of a centimeter; they are supposed to be in a state of constant motion, at the rate of about 100,000,000,000 feet per second, and to make a magnifying power of the microscope would have to be increased nearly a thousand fold.

A HONEYMOON PROFESSOR.—It was in Waukesha last summer that a Chicago woman became acquainted with a distinguished professor from the East. He was a man of great talents and refined demeanor, and inspired the somewhat flippant Chicago woman with no little awe. With the professor she had a particular interest in a young woman, who seldom speaks of the Chicago woman, being left alone with her, undertook to furnish the chat.

"You are a very serious gentleman like yourself," said she, "after every one had left, and I chanced to overhear a scrap of conversation from one of the young women who were sitting at the table, and I heard the man say: 'Poor little birdie, so afraid to be all alone in the world, what a great big birdie man!'"

The microscope often reveals impurities in diamonds, particles of organic matter and bubbles of gas being common. Quartz, chlorite, pyrite, hematite and topaz have also been seen.

Baron Ledebur, the great German chemist, says that "a table knife can be on the point of a table knife contains as much nutritive constituents as eight quarts of the best and most nutritious beef that is made."

During the recent fogs in London papers are said to have suffered not only from the absence of light, but from the pores of their surface becoming filled up with the sulphurous sooty matters contained in the fog.

It is stated that an alloy made from copper and a new metal called silicon has the malleability and color of virgin gold.

A report from Elba states that the whole of the island is infected by phylloxera. In Toscana the efforts to check the plague of insects have been unsuccessful. The insect has also made its appearance at Farmi, in Calabria, and Novara and Cervo, in Liguria. It is feared that the phylloxera of San Romo and from Lombardy state that the affected areas are constantly increasing.

DR. TALMAGE'S SERMON.

DR. TALMAGE'S SERMON: The Moonlight Ride. "Then went I up in the night by the brook, viewed the wall, and turned back, and returned by the gate of the valley, and so returned."—Luka 19: 37.

A dead city is more suggestive than a living city—past Rome than present Rome—ruins rather than newly frescoed cathedral. But the best time to visit is by moonlight. The moonlight is far more fascinating to the traveler after sundown than before. You may stand by daylight and the monastic ruins of Melrose Abbey, and study the shafted oriel, and rosetted stone and mullion, but they throw their strongest witchery by moonlight.

Some of you remember what the exchanquer of Scotland said in the "Lay of the Last Minstrel": "Wouldst thou view fair Melrose bright, Go walk it by the pale moonlight."

Washington Irving describes the Andalusian moonlight upon the Alhambra ruins as amounting to the enchantment. My text presents you with Jerusalem by moonlight. The Church of God is absolutely nothing. You would make more sacrifices for the night of the moonlight than for the day.

DR. TALMAGE'S SERMON: The Moonlight Ride. "Then went I up in the night by the brook, viewed the wall, and turned back, and returned by the gate of the valley, and so returned."—Luka 19: 37.

A dead city is more suggestive than a living city—past Rome than present Rome—ruins rather than newly frescoed cathedral. But the best time to visit is by moonlight. The moonlight is far more fascinating to the traveler after sundown than before. You may stand by daylight and the monastic ruins of Melrose Abbey, and study the shafted oriel, and rosetted stone and mullion, but they throw their strongest witchery by moonlight.

Some of you remember what the exchanquer of Scotland said in the "Lay of the Last Minstrel": "Wouldst thou view fair Melrose bright, Go walk it by the pale moonlight."

Washington Irving describes the Andalusian moonlight upon the Alhambra ruins as amounting to the enchantment. My text presents you with Jerusalem by moonlight. The Church of God is absolutely nothing. You would make more sacrifices for the night of the moonlight than for the day.

A Model Newspaper
THE NEW YORK
MAIL AND EXPRESS
The Advocate of the Best Interests of the Home—The Enemy of the Saloon.
The Friend of American Labor.
The Favorite Newspaper of the People of Refined Tastes Everywhere.

The New York MAIL AND EXPRESS, the favorite American newspaper of many people of intelligent and cultivated tastes, has recently made some noteworthy improvements, materially increasing its general excellence. It is in the broadest sense

A National Newspaper,
most carefully edited, and adapted to the wants and tastes of intelligent readers throughout the entire country—North, South, East and West. It is a thoroughly clean paper, free from the corrupting, sensational and demoralizing trash, mis-called news, which daddles the pages of too many city papers.

OUR POLITICS.
We believe the Republican party to be the true instrument of the POLITICAL PROGRESS of the American people; and holding that the honest enforcement of its principles is the best guarantee of the national welfare, we shall support them with all our might; but we shall always treat opposing parties with consideration and fair play.

AGAINST THE SALOON.
The MAIL AND EXPRESS is the recognized National organ of the great Anti-Saloon Republican movement. It believes that the liquor traffic as it exists to-day in the United States is the enemy of society, a fruitful source of corruption in politics, the ally of anarchy, a school of crime, and, with its avowed purpose of seeking to corruptly control elections and legislation, is a menace to the public welfare and deserves the condemnation of all good men.

Address
The World, New York.

The Navy Department has received a despatch from Admiral Kimberley confirming the report of the disaster at Apia. The Trenton and Vandalla are a total loss. Vandalla lost four officers and thirty-nine men. Nipsic lost seven men. All saved from the Trenton. Trenton and Vandalla crews ashore, Nipsic's on board. All stores possible saved. German ships Adler and Eber total losses. Olga beached—may be saved. All the war ships attempted to put to sea, but only the English steamer Calliope succeeded in getting out. Merchant vessels suffered severely. The bark Peter Godeffrow, one other bark and seven coasters were wrecked and four persons were drowned.

It troubles the New Jersey Solons exceedingly to find a way to raise money for the State. It is not probable that the direct tax bill will be passed. It seems hardly likely that a railroad equalization tax bill will even be offered. The school fund certainly ought not to be touched. It is hard to see any other way out of the difficulty.

A Sound Legal Opinion.
E. Bainbridge Mundav, Esq., County Attorney, Clay Co., Texas, says: "Have used Electric Bitters with most happy results. My brother also was very low with malarial fever and jaundice, but was cured by the timely use of this medicine. Am satisfied that Electric Bitters saved his life."
Mr. D. I. Wilkinson, of Horse Cave, Ky., adds a like testimony, saying: "He positively believes he would have died had it not been for Electric Bitters. This great remedy will ward off, as well as cure all malarial diseases, and for all kidney, liver, and stomach disorders stands unequalled. Price, 50 cents and \$1, at A. W. Cochran's."
