## New Process Vapor Stove

In operation.

"A thing of beauty, and a joy forever."

ALSO, A GOOD STOCK OF

**Hardware, Furniture, Groceries,**

Etc., etc.,—Hall's old stand,

Cor. Bellevue and Central Avenues, Hammonton.

## The Climax Insect Poison

Is the best preparation

For Spraying Fruit Trees.

Better than Paris Green or London Purple.

For sale by **Bassett & Son, Hammonton.**

## New Lard!

## New Lard!

At **M. L. JACKSON'S,**

Cor. Second St. and Bellevue Ave., Hammonton.

## Our own make of Sausage

THE OLD TREE stands out in bold relief. It has become a conspicuous landmark. Honest goods, low prices and fair dealing form its roots; on these it depends for its life. They have given it fame, popularity, and success.

Both the Yates Stores are now consolidated in one, at 13th & Chestnut Sts. The Ledger building store no longer exists. This consolidation gives the old firm added vigor, which will result alike to your interest and ours.

**A. C. YATES & Co.,**  
13th and Chestnut Sts.  
Philadelphia.

## Memorial Day.

Headquarters D. A. RUSSELL POST,  
No. 63, G. A. R. of New Jersey,  
GENERAL ORDER.

Comrades of the Post will assemble at Headquarters on Sunday morning, May 24th, 1891, at 10 o'clock, to attend divine services at the Baptist Church. Comrades of other Posts are invited to join us.

Comrades will assemble at Headquarters on Saturday, May 30th, at 2 o'clock P. M., in full uniform if possible, with white gloves, to participate in the services of Decoration Day. The graves of all deceased comrades at Greenmount and Oakdale Cemeteries will be decorated, with appropriate ceremonies.

The public is invited to assist the Post in observing Memorial Day, and in perpetuating the memory of deceased soldiers, by contributions of flowers and by participation in other ways. Flowers may be left with Mrs. Rutherford.

The following details are made for Memorial Day: Com. C. H. Vanderlip will have charge of the ceremonies at Elwood and Weymouth; Com. George Huntsman at Pleasant Mills; Com. H. M. Jewitt at Winslow; Com. Porter at Waterford and Bates' Mill.

GEO. BERNHOUSE,  
Post Commander.

P. H. JACOBS, Adjutant.

PROGRAMME FOR HAMMONTON.

Form in front of Post Headquarters, in the following order:

Morris Guards.  
American Mechanics.  
Pioneer Corps.  
Post.  
Citizens.

The procession will start at two o'clock, marching up Bellevue Avenue and Main Road to Oakdale Cemetery. After the ceremonies, procession will re-form and return to headquarters; from thence to Greenmount Cemetery.

The population of Seabright has been increased by the arrival of a Swedish family composed of father, mother, and twenty-one children.

They say that the Jersey peach crop was not injured by late frosts.

Rumors are again rife that the Sea Shore Railroad is to be completed to Cape May this summer.

A blush can't be counterfeited.

Be slow to promise and quick to perform.

Sow good services; sweet remembrances will grow from them.

Curiosity is a thing that makes us look over other people's affairs and overlook our own.

There is no way of making a permanent success in the world without giving an honest equivalent for it.

A sinner's time is wasted if he does not repent. A saint's time is wasted if his heart does not grow in grace.

There is a serious state of affairs in the mining regions near Liege and Charleroi, Belgium, owing to the frequent conflicts between the strikers and the military.

Pitman Grove has been improved by the erection of over thirty cottages since last season, and four artesian wells have been driven.

Ex-Senator Ingalls has not made up his mind what he will do. There is unanimity of opinion in the Republican party as to what he ought not to have done.

Money makes people do some very strange things, so does the want of it.

If you spend as much as you get, you will never be richer than you are.

## BARBER SHOP.

Having rented the old stand known as Hancy's Barber Shop,

I take pleasure in announcing to the public that I have secured the services of a First-class Colored Barber, and will be pleased to serve you with prompt attention, and the best workmanship guaranteed. Hoping to merit your patronage.  
THOS. W. SWANN.  
xxix, 1891

## Bicycles For Sale or Hire!

Several second-hand Safetys for sale at a bargain!

## BIGGS & ELVINS.

Inquire at P.O. or Elvins' Store.

## Star Brand Fertilizer

Is one of the very best!

And I can furnish any of them at bottom prices, as I have the sale of it in this vicinity.

Give it a trial, and be convinced. Orders taken at once.

Also, I am again handling the

## White Velvet Flour

That is so well known to my customers.

## WHAT

SCOTT'S EMULSION CURES CONSUMPTION SCROFULA BRONCHITIS COUGHS COLDS Wasting Diseases

Wonderful Flesh Producer. Many have gained one pound per day by its use.

Scott's Emulsion is not a secret remedy. It contains the stimulating properties of the Hypophosphites and pure Norwegian Cod Liver Oil, the potency of both being largely increased. It is used by Physicians all over the world.

VALUABLE AS MILK.

Sold by all Druggists.

SCOTT & BOWNE, Chemists, N.Y.

## HUMPHREYS' VETERINARY SPECIFICS

For Horses, Cattle, Sheep, Dogs, Hogs, AND POULTRY.

500 Page Book on Treatment of Animals and Chart Sent Free.

CURES: Fevers, Congestions, Inflammation, A. A. Spinal Meningitis, Bill Fever, B. B. Strains, Lameness, Rheumatism, C. C. Distemper, Nasal Discharge, D. D. Bots or Grubs, Worms, E. E. Coughs, Hoarseness, Pneumonia, F. F. Colic or Gripes, Bellyache, G. G. Miscarriage, Hemorrhages, H. H. Urinary and Kidney Diseases, I. I. Excessive Discharges, Mange, J. J. Diseases of Digestion, Paralysis. Single Bottle (over 50 doses) .60

Stable Case, with Squeezer, Manual, Veterinary Cure Oil and Siccator, \$7.00

Jar Veterinary Cure Oil, 1.00

Sold by Druggists or sent prepaid anywhere and in any quantity on receipt of price.

HUMPHREYS' MED. CO., 111 & 113 William St., New York.

## HUMPHREYS' HOMEOPATHIC SPECIFIC No. 28

In use 30 years. The only successful remedy for

Nervous Debility, Vital Weakness,

and Prostration, from overwork or other causes.

50¢ per vial, or 5 vials and large vial powder, for \$2.

Sold by Druggists, or sent prepaid on receipt of price.

HUMPHREYS' MED. CO., 111 & 113 William St., New York.

## PISO'S CURE FOR CONSUMPTION

I believe PISO'S Cure for Consumption saved my life.—A. H. DOWELL, Editor Enquirer, Edenton, N. C., April 23, 1887.

## PISO'S CURE FOR CONSUMPTION

The Best Cough Medicine is PISO'S CURE FOR CONSUMPTION. Children take it without objection. By all druggists. 25c.

## PISO'S CURE FOR CONSUMPTION

CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes good. Use in time. Sold by druggists.

## PISO'S CURE FOR CONSUMPTION

CURES WHERE ALL ELSE FAILS. Best Cough Syrup. Tastes good. Use in time. Sold by druggists.

FOOD FOR THOUGHT.

Hold fast by the present. Every moment is of infinite value. Truth is like a torch; when shaken it shines. Some men have to die to head a procession. Presumption begins in ignorance and ends in ruin. There is a vast deal of vital air in doing words. We would all be rich, but the Lord cannot trust us. All is not lost when anything goes contrary to you. Among the books that help most people is the pocketbook. What we ought not to do we should not think of doing. The golden stair appears to be the only reliable escape. Some people only understand enough of a truth to reject it. He who is never satisfied with anything satisfies no one. Don't growl at this world until you are sure of a better one. The saddest thing under the sky is a soul incapable of sadness. Few persons live to-day, but are preparing to do so to-morrow. A prudent man is like a pin, his head prevents him going too far. Reputation will do for the present; time will attend to the future. The man who laid up money for a rainy day just struck it last winter. The man who turns over a new leaf too often will soon use his ledger. A single grateful thought toward Heaven is the most effective prayer. About the only objection that has to the new year is that it runs up tonight. Don't allow yourself to be carried away with enthusiasm—you may have to walk back. Hypocrits may pass mutter on earth, but there will be no masquerading in Heaven. Nature's tendency is to restore the balance; as a man gets "short" his face gets long. A woman's happiness is in danger when she begins to compare her husband with other men. Laziness of mind, or inattention, are as great enemies to knowledge as impiety. Somewhere in man's best efforts you will find the saving grace of woman's influence. You cannot dream yourself into a character; you must hammer and forge yourself one. There will always be something worth living for while there are almsbury afternoons. The eccentricities of a great man furnish more material for his biographer than his deeds. The heart must be beaten or bruised and then the sweet scent will come out. The man who prays loudest and longest usually has something on his conscience. Comparison, more than reality, makes men happy and can make them wretched. The young lady who has the most beaux is not always the one who gets tied to the best husband. The first thing for acceptance of truth is to unlearn human doctrines and become as a little child. When lovers hang over the gate there is a good deal to be said on both sides before they quit. How many things there is to laugh at in this world to the girl who has pretty teeth and dimples. Harsh counsels have no effect; they are like hammers which are always repulsed by the anvil. Blessed is the man who at forty has the fire of twenty and the peace of seventy in his soul. Strange, isn't it, that a stately woman's carriage shows to the best advantage when she walks. It is the lawyer that asks a suspension of public opinion until he has secured his fee in a criminal case. Not the cry, but the flight of a wild duck, says a Chinese author, leads the flock to fly and follow. The Lord used but one pattern for all men, but he cut the majority of them smaller than the pattern. When the weather is cold and miserable it is not difficult to find many men who have a son better days. If a young man wants bright prospects he should hurry up and make them bright by rubbing against the world. Great souls are always loyally submissive, reverent to what is over them; only small, mean souls are otherwise. Train a boy to be brave and to speak his truth, and you have done your best by him; the rest he must do for himself. Nothing can be had for nothing. What ever a man achieves, he must pay for; and no favor of fortune can absolve him from his duty. The art of getting rich consists not in industry, much less in saving, but in a better order, timeliness in being at the right spot. The way to emancipate man is to make him so large that you can afford to furnish him enough to make a fetish. No matter how good a man may be, he does not like to have people think he does not like to be kicked if he should try.

SUNDAY SCHOOL LESSON.

SUNDAY, MAY 24, 1914. Captivity of Israel. LESSON TEXT. (2 Kings 17: 1-18. Memory verses: 16-18.) LESSON PLAN. TOPIC OF THE QUARTER: Captivity and Spring. GOLDEN TEXT FOR THE QUARTER: God's law is profitable unto all things. - 1 Tim. 4: 8. LESSON TOPIC: Forsaking and Forgetting. GOLDEN TEXT: Because ye have forsaken the Lord, he hath also forsaken you. - 2 Chron. 24: 20. DAILY HOME READINGS: M. - 2 Kings 17: 1-18. Captivity of Israel. T. - 2 Kings 17: 1-18. Cause of the captivity. W. - Lev. 26: 14-33. Captivity foretold. Th. - Deut. 28: 58-58. Captivity foretold. F. - Deut. 29: 10-29. Captivity foretold. S. - Jer. 1: 1-9. The psalm of captivity. S. - Jer. 33: 1-10. Return from captivity. LESSON ANALYSIS. I. FORSAKING THE LORD. I. Jehovah's Goodness to Israel: The Lord, who brought them out of Egypt (7). The Lord brought them out of Egypt (Exod. 13: 9). I am the Lord thy God, which brought thee out (Exod. 20: 2). Thou broughtest a vine out of Egypt (Jer. 17: 6). With a high arm led he them forth out of it (Acts 13: 17). II. Israel's Sins Against Jehovah: Israel did secretly those things that were not right (9). Clear thou me from hidden faults (Psa. 19: 12). Their course is evil, and their force is not right (Jer. 23: 10). They know not to do right (Amos 3: 10). Thy heart is not right before God (Acts 8: 21). III. Israel's Provocation of Jehovah: They wrought wicked things to provoke the Lord (11). Hearken unto his voice; provoke him not (Exod. 23: 2). How long will they rebel against him? (Num. 14: 11). How oft will they rebel against him? (Psa. 78: 40). Do we provoke the Lord to jealousy? (1 Cor. 10: 22). I will be angry against the Lord thy God. (1) Their rebellion to Israel; (2) Israel's conduct to Jehovah. (1) Israel's gracious God (2) Israel's grievous sins. 2. That we are not right. (1) Sinning seriously; (2) Sinning secretly. 3. "Wrought wicked things to provoke the Lord to anger." (1) Man's wicked deeds; (2) God's righteous anger. - (1) Men provoking God; (2) God provoked at men. II. SERVING FALSE GODS I. Idols Served: They served idols (2). He did so abominably in following idols (2 Kings 21: 23). He... served the idols that his father served (2 Kings 21: 21). They forsook the house of the Lord, and served the idols (2 Chron. 2: 13). Ashame be all they that serve graven images (Psa. 97: 7). II. Jehovah Disregarded: They would not hear, but hardened their neck (14). The Lord spake to his people; but they gave no heed (2 Chron. 34: 10). My people hardened not to my voice (Psa. 81: 11). They did, We will not hearken (Jer. 44: 17). They rebelled against me, and would not hearken (Ezek. 20: 8). III. Commandments Rejected: They rejected his statutes, and his covenant (15). Thou hast rejected the word of the Lord (1 Sam. 15: 23). Ye have set at naught all my counsel (Jer. 2: 25). As for me, they have rejected it (Jer. 6: 19). He that rejecteth me, and receiveth not my sayings (John 12: 48). 1. "They served idols." (1) In disobedience to God's commands; (2) To the neglect of Jehovah; (3) To the neglect of the Lord's covenant. 2. "They rejected his statutes, and his covenant." (1) Commandments; (2) Abandonment; (3) Penalty. III. FORSAKEN OF GOD. I. Israel Carried Away: The king... carried Israel away into Assyria (6). The king of Assyria carried Israel away (2 Kings 18: 11). Behold, the Lord will hurl thee away (Jer. 49: 12). The wind shall carry them away (Isa. 41: 16).

An Ideal Small Boy.

Johnny (aged 6, brother to Amelia) - "My sister will be up directly. She is now engaged in washing supper dishes." Mr. Spooner - "I thought young ladies left that business for their mothers to attend to." Johnny - "Some young ladies who think only of their own ease may leave such work for their mothers, but Amelia never does. She never permits mother to do anything which she can do herself. I don't think I ever saw a young lady who kept herself so busy about the house. Really, I think she is never so happy as when at work." Mr. Spooner - "Tell me, Johnny, does she ever say anything about me?" Johnny - "She frequently speaks of you as a gentleman whom no woman could help esteeming highly. You know she has many suitors, but never, she says, until she saw you, did she experience anything approaching to love." Mr. Spooner - "Of course, she knows that my fortune is ample, and -" Johnny - "Excuse me, sir, but while, of course, she is not insensible to the advantages of wealth, she has repeatedly said that when she weds it will be because of the love she bears the man who asks her hand." Mr. Spooner - "Come, Johnny, do you think she would have me?" Johnny - "I can't say positively, sir. I know she thinks well of you. Indeed, I am sure she cannot fail of recognizing your worth. But there is a Mr. Quick who has pressed his suit very industriously for some time, and if I may be allowed to make a suggestion, I should advise you to propose as quickly as possible. You will excuse me now, Mr. Spooner, I hear Amelia on the stairs, and it might be embarrassing for you to meet her in my presence. Good evening, sir." - Boston Transcript. Dead Sea Myths. Between 1870 and 1880 came two killing blows at the older theories, and they were dealt by two American scholars of the highest character. First came Dr. Schall, a professor in the Presbyterian Theological Seminary at New York, who published his travels in 1877. In a high degree he united the scientific with the religious spirit, but the trait which made him especially fit for dealing with this subject was his straightforward German honesty. He tells the simple truth regarding the origin and characteristics of the Dead Sea, and leaves his reader to draw the natural inference as to its relation to the myth. With the fair Dr. Robertson Smith in Scotland and Dr. Woodrow in South Carolina before him - both originally driven from their professorships for truth-telling - Dr. Schall deserves honor for telling as much as he does. Similar in effect, and even more bold in statement, were the "Travels" of the Rev. Henry Osborne, published in 1878. Thus came out, little by little, the truth regarding the Dead Sea myths, and especially the salt pillar at Udsam, but the final truth remained to be told, and now one of the purest men and truest divines of this century told it. Arthur Stanley, dean of Westminster, visiting the country and thoroughly exploring it, allowed that the physical features of the Dead Sea and its shores agreed with the myths and legends, and he sums up the whole as follows: "A great mass of legends and exaggerations, partly the cause and partly the result of the old belief that the cities were buried under the Dead Sea, has been gradually removed in recent years." - Popular Science Monthly. Penny Walk. Some time when you are in the state of mind that wants the amusement that comes from idle observation of people and their ways, and when it isn't raining or snowing and the streets are not filled with a puddle or a puddling-batter with the mud, at a time ever is to be found anywhere ahead of you, you may want to take the new kind of stroll which the ingenious originator has called a "penny walk." To take a "penny walk" you toss a copper before you start, to know whether you shall turn to the right or to the left on leaving your doorstep. If you toss heads, turn to the right; if tails, take the left. At the first crossing give the coin to the right, and there are more ways than one of tossing a copper, and it need not be after the frank fashion of the street gamblers unless you really prefer to do it in that way - and turn again to the right or left as the coin directs. At every crossing turn by the copper tells you. You will be led into strange quarters sometimes on the responsibility of this little guide, and will see strange sights, and hear more wonderful things in an hour, if you haven't left your wits and your senses at home, than will occur to you in weeks of your routine experience. It is always been supposed that there were no coal veins in California, the geographical formation not being favorable, but soft coal and lignite have been found and are now mined in large quantities. Electric motors are being applied by the French Government to train heavy guns for armor-plated vessels.

IT MIGHT HAVE BEEN.

A Possible Tramp With Possible Agricultural Notes and Hints for the Household. How to Make Farm Work Easier and Home Brighter. When a man says there is no use in planting slubbery in the school house yard, because the boys will destroy it, some parents need spanking more than their boys need it. The powdered lillibore used for destroying the currant worm is a less virulent poison than Paris green. In the small amounts needed to effect a clearing of these pests there is less danger from careless handling than there is from any mineral poison. No effective method of fighting rose bugs has been found except hand-picking. Aspidiot poisons, kerosene emulsions, pyrethrum powder, and all the usual insecticides have proved powerless against this sturdy pest, which defies everything except actual capture by hand. It requires good, practical judgment to forecast probable work to be done and adapt it to the help that is employed to do it. Trying to do too much is the besetting sin of American farmers. They have been led into this through the cheapness of land, and of late years by the increase of labor-saving machinery. Land that has grown much clover seed is not good for a strawberry patch. It is good for almost any other farm crop for which clover is either harmless or a valuable manure. But among strawberries clover is one of the most dangerous enemies. For the reason it is not best to sow gypsum or land plaster on the strawberry patch lest it cause too great an intrusion of clover. A college-bred man of twenty-eight, falling in health from office work, purchased a farm of sixty acres at Northport, Long Island. The second year he tried a few acres in vegetables and small fruits, which he found sale for the village of Northport at most satisfactory prices. I was on his farm in the summer of 1883, and I must say that for a man who had got his knowledge almost wholly from books, his venture looked as if it would be a complete success. Mr. Peter Henderson tells of an asparagus grower near Atlanta whose crop gave for three successive years a net profit of \$1,500 per acre; and as instancing departments from old methods, cites the case of a farmer residing near Rochester, who had a dozen years ago, timidly made the attempt of growing a half acre of his fifty-acre farm in vegetables for a village market. His venture was so satisfactory that he gradually increased this area, so that he now uses thirty of his fifty acres mostly for the Rochester market. The net profit from the cabbage garden last year was \$6,500, or a little over \$200 per acre, and it was not a very good year for cabbages at that. Paper in the Six Room. While on the subject of paper, newspaper especially, did it ever occur to you what a useful article it is? I serve so many purposes. Placed between the sheet and bedspread or another sheet it will keep out the cold, thus making a very light cover for patients unable to stand the weight of bed clothes and warm, or a blanket to those who cannot afford one. The great objection to it in this capacity is the noise it is likely to make. If you want to keep ice for any length of time, fill the wine cooler or any similar shape vessel, and wrap several thicknesses of paper close around it, standing it on paper, having a blanket or something thick to cover it, and your ice will keep for twelve hours or longer. - The Trained Nurse. Smoke Treasures. The subject of smoken treasure reminds one of the hoards of gold carried in the galleons of the East. It is a ship of war from Lisbon had on board, 3,000,000 of crusades in diamonds and about 100,000 "crowns turmoils" in pistres, making the whole 29,050,000 livres turmoils. In 1774 two Spanish ships from Vera Cruz and Havana arrived with 22,000,000 of crowns, exclusive of 2,000,000 crowns. Of the cargo of an English ship in 1731, one item alone - a diamond in the rough - was valued at £100,000. His Cure For It. "O, Mr. Chahokia," exclaimed the Boston young woman with enthusiasm, "is it not wondrously pathetic, even in its utilitarian aspect, to observe the general encouragement of rationalistic concepts and methods on the time-honored superstitions of the age? While our judgment may commonly sympathize involuntarily excited. "Of course, of course," rejoined the St. Louis friend, "but, heartily, 'tis of folks going sneezing under the way they're doing. Quinine and gongre will knock it sky high in three days." His Swing Around the Circle. Caricatured Nash has joined the staff of Time and will be semi-independent. His work has now come to be, Nash has been successively Republican, Mugwump, Democrat, and he seems to threaten to return to his old faith. His work for the Democratic national committee was done with apparent good will. Voltairo: Shun Idleness; it is the pest that attacks itself to the most brilliant metals.

FACTS FOR FARMERS.

AGRICULTURAL NOTES AND HINTS FOR THE HOUSEHOLD. There are many ways of getting rid of the pests, but none is believed to be better than spraying the trees frequently with a solution of Paris green. Of the fly species, the Country Gentleman says the horse-fly is the most cruel and bloodthirsty of the entire fauna. It is armed with most formidable weapon, which consists of four lancets, so sharp and strong that they will penetrate leather. When not in use they are nicely folded away in a sheath. He makes his appearance in June, and may often be seen in the vicinity of small streams of water. He is said to subsist in part upon an airy diet, and to pass his life harmlessly. Not so the female, for she is armed with six lancets, with which she bleeds both cattle and horses, and even human beings. She lays her eggs in moist places, and after they are hatched into footless maggots, they make all necessary journeys by stretching and closing the segments of their bodies, their heads being supplied by two hooks, by which they get their food. In process of time this maggot goes down into moist earth, where it reposes for some weeks, after which it bursts the pupa case, and comes forth a large black fly, armed and equipped like its predecessors. PAIRM NOTES. There is much written about being too like to your wife, and the idea is a good one. But more than one wife would like to trade kisses for stove wood. Better supply her with both, can be put on in three minutes by the driver, and saves time and possible injury, while it is as serviceable as the old way was. Prof. Cook, of the Michigan Agricultural College, says: It is my practice to harrow my corn ground before the corn is up, and until it gets five or six inches high. I use a very broad fine-toothed harrow, with the teeth slanting back. This does no damage to the corn even when the latter is well up. There is something peculiar in the small tract of land in Holland on which are raised the celebrated Dutch bulbs. There is only 148 acres of it, and there are many smaller tracts in land, France, Germany and the United States over \$300,000 worth of bulbs from this less than a quarter section of land. The production of wool in India, Central Asia and China is estimated at 300,000,000 pounds, Australia and New Zealand possess 75,000,000 sheep, producing 200,000,000 pounds of wool worth \$14,100,000. La Plata possesses 100,000,000 sheep, producing 50,000 tons of wool, worth \$4,340,000. Europe possesses 200,000,000 sheep, yielding 400,000,000 pounds of wool. There is no root that is better for milk cows than the parsnip of the Jersey islands. A feeding with it for successive generations has probably had much to do with developing the "butter-making" qualities of the Jersey breed of cows. The parsnip is less difficult to keep clear of weeds than the carrot, and is fully as good, if not better, cropper on deep, rich soil. The population of the United States is only one-fifteenth of that of the globe; yet our agriculture amounts in volume to one-sixth of the world's total. We are becoming more and more a nation of manufacturers, and miners and producers in various lines, and yet our agricultural supremacy is so far maintained that there is no question that it can be held against any change that may take place in any other part of the world. Of late years, mainly by large importations from South America, nitrate of soda and nitrate of potash are much cheaper than they used to be. Still they are too costly to be used in large amounts. A little concentrated nitrate goes a long way as a fertilizer. As they are very soluble they should only be sown in the spring, that crops may at once use them. If sown in fall most of their value will be washed away and wasted. Take three pounds each of flowers of sulphur and quick-lime. Slack the lime and boil with the sulphur in six gallons of water reduced to two gallons. Allow this to settle, then pour off the clear liquid and bottle it for use. An old iron pot will answer to boil it in. A gill of this liquid, mixed with five gallons of water, is an excellent prevention and cure for mildew upon plants - showered upon them as soon as the mildew appears. As soon as the buds open, a little caterpillar will be found to have drawn the leaves together by its nest, thus protecting it from liquid applications. Hand-picking is the most effective remedy. When the grape is in flower the rose-bug sometimes attacks the flowers in great numbers. This insect does for an "iron clad," so far as insecticides are concerned. They really do get their hold if the fine is jarred or shaken. They may thus be caught in a vessel containing a little water and then destroyed. UNDER SUSPICION. "Somebody has picked my pocket," cried the Fat Woman. "Whom do you suspect?" asked the Midget. "That sneaking Armless Wonder over there has a consocious look on his face. I believe it's him."

ABOUT THE FARM.

Hints for Farmers and Busy Housewives to Appreciate. Prof. Maynard insists that potash will cure the yellows in the peach; that the liberal application of bone, potash and some additional nitrogenous matter - even if the soil were very poor - has caused trees that were thoroughly diseased to start into vigorous growth again, living years and bearing crops of fine peaches. A necessity about a poultry farm is a good rat dog. See that you have a good one, and always take him with you when you go to close up your place at night. If there are mice or rats about, he is sure to get the scent of them, and even if he does not succeed in catching them, the varmints will soon learn that he is about and keep out of the road. An Eastern paper quotes a Mr. Kirby, of Brookfield, Vt., as stating that he keeps his Summer butter by putting it into cloth bags about the size of the tub he wishes to fill, and keeping it submerged in a tank of strong brine. He takes it up and packs in clean tubs or boxes at any time the market is good, and he thinks it comes out as fresh as newly made butter. The superiority of well-grown, well-ripened fruit on properly trained vines, and conveyed short distances, was shown by the fact that while the abundant supply of Concord grapes by the ton from the South and West sold at wholesale at from three to five cents a pound, choice Concord grapes near the market, and brought into it in a fresh condition, sold at from five to ten cents at wholesale. The Pennsylvania Board of Agriculture reports that a certain "complete fertilizer," offered at \$20 per ton, is really worth, by analysis, only \$11.12. Another, selling for \$21, has a manurial value of just 71 cents. A third, whose price is \$18, is worth but 17 cents. And yet there are many valuable fertilizers, and they are furnished by trustworthy parties. The only safe rule is to purchase of reputable manufacturers or dealers, after a careful study of the reports of the most capable official analysts. Prof. Maynard says that the peary-like apple, must have an abundance of plant food; and where well-decomposed plant food is not to be had, nothing will give better results than 500 pounds up to a ton of bone and potash to the acre - five pounds of bone and one pound of muriate of potash. But the fact should not be overlooked that this mixture is not suited to all soils. We have known some good soils not benefited by potash, and others where phosphate produced no sensible increase in the growth of crop. C. F. Jones of New Jersey is reported as having adopted heroic treatment for his quince trees with great success. He prunes them, but very carefully, taking out all superfluous wood, and the next autumn he spreads well-rotted manure around the trees, covering the ground further than the limbs extend. Two inches deep of clear manure are applied, to lie during winter, to be forked the following spring. This manure tells. Of the quinces, fifteen will make a peck, well colored, so that people will buy them. He has sold them for \$6 a hundred. Mr. Briggs said he had successfully tried linseed oil on the black knot for the past three years. He applies it with a paint brush, and daubs the knots, which prevents the knots from increasing, while the trees keep on growing. He tried it on forty trees where the knot had appeared, and had his trouble. We much prefer butting off all the excrescence before applying the remedy; and have used chloride of lime and crude petroleum. But experience is the most reliable remedy, if used on the very first appearance of the disease, instead of first leaving it for months as most people do. MORE POTASH NEEDED. Prof. Whiteley, of the New Hampshire Experiment Station, in Bulletin No. 6, discusses the necessity of potash and expresses the opinion that more potash should be employed in the manufacture of commercial fertilizers. That while most of the ordinary superphosphates contain only about 4 per cent of potash, if the amount was increased to 10 per cent it would be bet-

TER, and the special potato fertilizers are valuable on that account. These suggestions are worthy of consideration by all farmers.

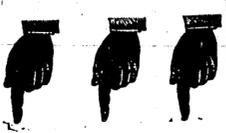

THINNING ROOT CROPS. An expert cultivator advises that in thinning turnip, beet or carrot crops, a great deal of work can be saved by using the garden hoe for that purpose. The plants should be separated about the width of a common hoe and one thrust forward and a pull back with the hoe will do what is necessary. If too many plants are left, all but the strongest should then be pulled out by hand; but one cannot afford to spend time enough to thin the whole crop by pulling out the surplus plants with the fingers. In Europe, where root crops are extensively grown, thinning is always done by hoed. Some authority, wise or otherwise, says a dry-picked fowl is better than one picked after scalding, and that to spring chickens should never be scalded, as it is spoiled thereby. One of the most essential requirements to success with poultry is proper ventilation; during the warm weather a circulation of air is imperatively necessary to the health of our fowls. When poultry is kept in yards, whether large or small, a portion of the ground should be left for grass, and the rest should be frequently turned over by ploughing or spading. Worms, fresh earth, and green food will then be supplied, all of which are necessary. The many and various wants of fowls are synonymous with necessities, and no better word can be used in expressing them, nor a better meaning understood in supplying them. Any one want left unsupplied will be sure to be heard from unfavorably in one way or another. The old-style way of fixing roosts for the fowls was to make them as high as the roof of the house would permit. This did well enough when birds were blessed with greater length and strength of wing than weight of body, but to compel the heavy Asiatic to climb, fly, and flutter half way up to the moon to get to their roosts is a very poor way of doing. Rats are among the worst enemies that the poultry-breeder has to contend with. They are ever on the alert and ready for any kind of mischief, and from the time the egg is laid until the chick is fully feathered it is one continued battle for the ownership; and if the breeder relaxes his vigilance for a moment, the rats will be likely to come out first best. WELCOME CONTRIBUTIONS. "I write for the Century Magazine now," said "Arthur." "All!" replied Penniss, admiringly. "Yes, every six months. You see I only subscribe for a half-year at a time." A factory for making ivory out of skim milk has been successfully established in Iceland. SYMBOLIC SATELLITES. - "What a fitting token of married love is the wedding ring!" He - "It is. A ring has no end; and it is bound to be wearing. It is absolutely without variety; and it is much easier put on than taken off." HAD A HOLIDAY THEN, ANTHONY. "Are you really sick, Sonny?" asked the doctor, one day. "Dr. McCarty, I'm perfectly surprised at your asking such a question. I suppose you forget that it's Saturday," was the reply. The Cincinnati Enquirer estimates that in the last fifty years over \$100,000,000 in cash has been raised to teach the Africans to love his neighbor as himself. GOOD - Professor to one of his pupils - "When Alexander was as old as you he had already conquered the world." "But you said he had Aristotle for his teacher!" INCONSISTENCY. - "You said the other day in your paper that poverty is not a crime." "Eh? No?" "Yes." "And yet you decline my verses simply because you say they are poor." PERSISTENCE DID IT. James Payne, the popular English novelist, had twenty-six articles rejected in one year by various periodicals. Still he persevered, feeling that he had something to tell, if he only knew how to tell it and could get an editor to read it. He did finally write something worth telling and made a successful hit, and has since written thirty-six novels, all more or less popular. According to Prof. Lawes, a ton of

POULTRY NOTES.

The key which unlocks the mystery that lies hidden in many poultry-keepers is natural devotion and personal perseverance. Poultry at certain seasons are sometimes over-stimulated by high feeding to make them lay. It should be remembered that fowls can be injured in this way. Some authority, wise or otherwise, says a dry-picked fowl is better than one picked after scalding, and that to spring chickens should never be scalded, as it is spoiled thereby. One of the most essential requirements to success with poultry is proper ventilation; during the warm weather a circulation of air is imperatively necessary to the health of our fowls. When poultry is kept in yards, whether large or small, a portion of the ground should be left for grass, and the rest should be frequently turned over by ploughing or spading. Worms, fresh earth, and green food will then be supplied, all of which are necessary. The many and various wants of fowls are synonymous with necessities, and no better word can be used in expressing them, nor a better meaning understood in supplying them. Any one want left unsupplied will be sure to be heard from unfavorably in one way or another. The old-style way of fixing roosts for the fowls was to make them as high as the roof of the house would permit. This did well enough when birds were blessed with greater length and strength of wing than weight of body, but to compel the heavy Asiatic to climb, fly, and flutter half way up to the moon to get to their roosts is a very poor way of doing. Rats are among the worst enemies that the poultry-breeder has to contend with. They are ever on the alert and ready for any kind of mischief, and from the time the egg is laid until the chick is fully feathered it is one continued battle for the ownership; and if the breeder relaxes his vigilance for a moment, the rats will be likely to come out first best. INGENUITY ON THE FARM.

To be a skillful workman should be the ambition of the farmer as well as the mechanic. Men of the highest attainments, in every calling, are always in the ascendency. It is peculiar to some men to especially excel in one branch, while with others their talents are of the opposite order, inclining towards a versatility of attainments. Among the latter class we should look for the man who is not sufficient to manage a fraction horse, drive a four-horse team, plough a straight furrow, or even raise a good crop of grain under favorable circumstances, but it is equally as much in his line, and to his credit, to be an adept at some veterinary work, do a little doctoring upon occasion, to pickle a barrel of good meat, to make a batch of sourkraut, trim a fruit tree, set a hen or some cabbage-plants, thin a bed of radishes, and do a score more of useful things. TEN DON'TS FOR THE FARMER. (1.) Don't deprive yourself and family of fruit and vegetables. (2.) Don't depend upon wild berries. (3.) Don't depend upon the markets or your neighbors. (4.) Don't set aside your poorest land for the garden. (5.) Don't plant in a restricted area closely fenced in. (6.) Don't plant in little beds. (7.) Don't plant in an old orchard. (8.) Don't plant largely of anything which demands greatest attention when farm work is most pressing. (9.) Don't get plants or seeds of neglected neighbors or from old plantations. (10.) Don't put implicit faith in ovelities. DON'T NEGLECT THE PASTURES. In the press of farm work, it is very natural to give little or no thought or attention to permanent pastures. In some sections of country there are pastures that have been subjected to the task of supplying food for thirty to forty and more years, with little or nothing being done to restore any exhaustive condition. Although the natural evacuations of animals are returned to the soil during the day, in case of milk cows, if yarded during the night, there is much that is not so returned, and as a consequence gradual exhaustion follows. Many pastures are selected because of their roughness and the impossibility of cultivation, and the only means of improvement comes from top dressing. And because this can be accomplished with no great amount of trouble, it should not be neglected with to the extent of impairing the feeding value of the pasture. Fine manure, bone meal, phosphate, ashes, or other fertilizing materials may be employed to good purpose. VALUE OF CLOVER AS A FERTILIZER. Some idea of the value of clover as a fertilizing crop may be obtained from the experiments of Prof. Lawes, a distinguished agricultural chemist in England. According to a careful analysis made by him, the manure from a ton of straw is worth about \$2.60 - taking the price of chemical fertilizers as a basis. The manure from a ton of clover hay is worth a little more than \$9.00 - or more than three times as much. The value of any yard manure depends mainly upon the amount of potash, nitrogen and phosphoric acid it contains, the carbonaceous or woody matter being usually in excess of that required by the soil; excepting perhaps on sandy land that has been long cultivated without stable manure. According to Prof. Lawes, a ton of

SATURDAY, MAY 23, 1891.

Why I am a Protectionist.

I am a Protectionist because I think by that policy the workmen of America will be well paid and not underpaid.

Because I think by that policy the variety of industry will be created here which will make America strong in peace and in war.

Because the industries we fostered will develop the skill and brain power of my countrymen, and raise the people of the United States to the first rank in intelligence among the nations of the earth.

Because that policy has already made the richest and strongest nation on earth, and under a properly restricted immigration will bring to us much that is most valuable in the population of other lands.

There are signs of the McKinley Tariff producing the effect its promoters designed and anticipated—that is, the transfer of manufacturing industries from foreign countries to the United States.

There are signs elsewhere as well, of transfers of factories to America—a movement that would increase in magnitude if confidence were felt in the permanency of any fiscal policy adopted in the United States.

The New Zealand paper manufacturers, who were unable to hold their own without protection, have after a short period of protective duties been able to manufacture paper enough for the islands, and to sell at the same rate at which paper can be brought from Australia or from Europe.

Land Sale for Taxes of 1888. Return of taxes sold on unimproved, and unimproved land on land tax assessed by persons not the lawful proprietors, who are unable to pay taxes, and on other real estate, in the town of Hammononton, County of Atlantic for the year 1888.

List of delinquent taxes returned to the Town Council, Sept. 25th, 1890, with description of property by block and lot laid down on the assessment map of the Town of Hammononton, which map is to be found at Town Clerk's Office, also on file in the Clerk's Office of Atlantic County, at May's Landing, N. J.

Table with columns: NAMES, Block, Lot, Acres, Tax. Lists names like Balfour, Balfour, Balfour, etc.

Interest, cost and back taxes, if any, will be made known at time of sale.

State of New Jersey, S. S. Orville E. Hoyt on his oath saith that he was Collector of Taxes of the Town of Hammononton for the year 1888, that the taxes accompanying this exhibit assessed on the respective lands for the year 1888 are unpaid, that he has used every legal diligence for the collection of the same, and returns said delinquent taxes to the Council of said town, as by law he is required to do.

Witness my hand and seal of Office, this 22nd day of May, 1891.

GEO. W. PRESSEY, Town Clerk.

Permanently to assist in facilitating the Collection of Taxes in the Town of Hammononton, County of Atlantic.

THEODORE B. DROWN, Chairman of Town Council.

There can be little doubt about the general popularity of the Protective system in the Dominion of Canada, and Sir John Macdonald's long possession of power has been facilitated by his adoption of the so-called National policy, and not disturbed by the existence of a serious free-trade opposition.

The adoption of the National policy has affected the import of manufactures and has caused Canadian manufacturers to win the greater portion of the Canadian market, while there is a general belief that average prices have not risen.

The growth in wealth of the Dominion by every test that can be applied has been rapid since confederation, but more rapid since the adoption of the Protectionist policy than it was before that moment.

Said an old-colored man in a lecture: "When I see a man going home with a gallon of whiskey and a half-pound of meat, that's temperance-lecture enough for me, and I see it every day. I know that everything in his home is on the same scale—a gallon of misery to a half-pound of comfort."

An infidel sneeringly remarks, "Two-thirds of the church members in this country are women." Granted. Is that anything to be ashamed of? Here is another fact: Out of 45,000 convicts in our state prisons, more than 43,000 are men.

New Jersey pays a surplus of \$200,000 per year into the U. S. P. O. D.

Work Wanted.—Hauling, plowing, and cultivating, by S. T. TWOMEY, 181st First Road, or P. O. box 121.

Good Looks. Good looks are more than skin deep, depending upon a healthy condition of all the vital organs.

Consumption Cured.

An old physician, retired from practice having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of consumption, bronchitis, catarrh, asthma and all throat and lung affections, also a positive and radical cure for nervous debility and all nervous complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellow-men.

Actuated by this motive and a desire to relieve human suffering, I will send free of charge, to all who desire it, this receipt in German, French, or English, with full directions for preparing and using. Send by mail by addressing with stamp (naming this paper) W. A. NORRIS, 820 Powers Block, Rochester, N. Y.

For Sale.—A sixty-acre farm, 14 miles from Elmwood station. About thirty acres have been cleared and farmed. Inquire of W. M. BERNHOUSE, Hammononton, N. J.

If this should meet the eye of any one who would like to buy a business property, let him write to the Editor of THE REPUBLICAN for particulars.

After suffering for years with the worst form of dyspepsia, such as heartburn, indigestion, vertigo, acid stomach, etc., I came across Dr. Deane's Dyspepsia Pills. Using them as directed 2 months, and still continuing, find great relief. Would not be without, and cheerfully recommend to any suffering with the above symptoms.

Real Estate for Sale.—Five acres at Chew Road and Tenth Street; or my house with five or ten acres; or ten or twelve acres on Second Road; or the whole 27 acres, with house, at Second Road and Tenth Street. Inquire on the place. J. Q. A. GREENWOOD.

SATURDAY, MAY 23, 1891.

LOCAL MISCELLANY.

Fine growing weather.

The Fisk Jubilee Singers do not need commendation. They were here last October, and have been secured for next Monday evening because so many expressed a desire to hear them again.

The Bank will be closed all day, next Saturday.

The Jr. O. U. A. M. expect to turn out eight strong.

Chester Crowell is taking the school census, this week.

Mass at St. Joseph's Church tomorrow morning, at 10:30.

Stockwell made needed repairs in front of his store, this week.

Henry G. Thayer has a good position with the Gny Family.

Ellis & Knights have a dozen or more orders for their tubular wells.

Hurlbut Tomlin fell and sprained his wrist, Monday, at the roller-skating rink.

An infant child of Capt. D. P. Crowley died on Tuesday, about eight months old.

Rev. S. G. Eiler was warmly greeted, on Wednesday. He will spend Sunday here.

Teachers' examinations at Egg Harbor City, on Friday and Saturday, June 5th and 6th.

Mr. Alfred D. Whitmore, Great Barrington, Mass., is visiting the family of his late brother, E. D.

New advertisements this week.—Black's General Store; Frank Roberts, grocer; Land Sale for Taxes.

Mr. Browning has bought Mr. Murphy's property, near the depot, including residence, stables, etc.

Granulated sugar, 41 cents per pound. You can afford to wash the sand from your berries, this year.

Messrs. Wm. and Frank Simons, with their families, expect to move into the Murphy property, when vacated.

The Post-office will be closed on Memorial Day, except from 7:00 to 10:15 A. M., and from 4:00 to 6:00 P. M.

Morris Guards, of Atlantic City, will be here in full force, and rumor says that they will bring a good band.

Nearly all cemetery lot owners are brushing up and beautifying their plots, so as to look nice next Saturday.

Grand Army Post at the Baptist Church to-morrow morning. Rev. L. R. Swett, the ex-Pastor, will preach the sermon.

Will. A. Faunce and family will board in Hammononton this summer, having rented their new house, in Atlantic City.

Mr. Newcomb handed us the first ripe home-grown strawberries we have seen this year. They were the "Jessie" variety.

It has been many months since we heard anything about electric lights and water-works. What has become of that committee?

One of our grocers remarks that Hammononton must contain some sweet people; for he sold 2500 pounds of sugar one day this week.

Dedication of the new Methodist church to-morrow. The Presbyterians and Baptists will unite with them in the afternoon and evening.

Hammononton never looked more beautiful than it does at the present time; and it grows of itself, too, without a word of so-called booming.

Miss Eliza Moore, daughter of the late Rev. Asher Moore, fell and broke her wrist, a few days ago. It was promptly attended to, and is healing rapidly.

Charlie Hedrick has sold his residence, on Twelfth Street, to William Murphy, who will soon move thereto. Mr. Hedrick and family will board, for the present, with Mr. Aitken.

The assessors started out for their annual "sawing around the circle," on Wednesday. The new tax law requires them to assess property at its full value, this year, which gives the assessors many a knotty problem to solve. The first man approached was compelled to swear in his statement of valuation. It will be interesting to look over the list when completed.

He who has no desire to trade with the devil should be wise enough to keep from his shop.

GENTS' FURNISHING GOODS.

There are a few stores in Philadelphia that have a larger stock than we; but none that excel us when price and quality are considered. In hats we lead. We have nobby hats, common-sense hats, children's hats, old men's hats, hats for all ages and conditions.

Pietro Anastasia, whose ball-bond was declared forfeited last week, returned since, bringing a physician's certificate that he was too ill to attend the hearing last Thursday. The case was called on Thursday. Anastasia had an Italian attorney from Philadelphia, who acted as interpreter, and Mr. Taylor, from Camden, as attorney. No evidence being given against the defendant, Justice Jacobs dismissed the two complaints.

Monday was more agreeable, and the attendance at the picnic was large. Boats, swings, skating rink, ice-cream stand, and dinner-baskets were well patronized, and every one seemed to be happy.

At a recent special meeting of the County Board of Assessors, the new tax law was discussed, and a resolution adopted to administer the oath to property owners when obtaining statements of valuation. Messrs. H. J. Monfort, Harry May, and William Hiddle were appointed a committee to protect the county in the valuation of townships within their own and the other counties in the state.

Did you ever see an apple tree decorated with fringe? We saw an orchard (?) every day, in which some of the trees have scarcely a leaf remaining, and the skeletons are no ornament. The worst of it is, the worms dropped from these trees and started off on a still-hunt for fresh pasturage. Who will suffer the penalty of that property owner's neglect?

List of unclaimed letters remaining in the Post Office at Hammononton, N. J., Saturday, May 23rd, 1891: Mary Vassett, M. Smith, Johann Rampsberger, Cadwa Langston, Geo. Raaby, Mr. Rowley, Salomon Palmer, S. Palmer.

Persons calling for any of the above letters will please state that it has been advertised. GEORGE ELVINS, P. M.

The Fisk Jubilee Singers will give a concert in the Methodist Episcopal Church, next Monday evening. Admission, 50 cents. For the benefit of those who wish to secure seats in advance, three hundred have been reserved. These can be secured, without extra charge, at A. H. Simons' on Saturday and Monday, May 23rd and 25th.

Mr. Heartwell noticed a lot of nearly ripe strawberries in his patch, and watched them with increasing desire, until he thought they must be ripe enough for the table; but he never picked them—a flock of chickens kept closer watch than he could, and stored them away in their little crops,—strawberry crops, in their flight, and the old gentleman was displeased.

Mr. Will. A. Whitmore has dissolved his connection with the Strong & Green Cycle Co., Philadelphia, and is now one of the firm of Smith, Whitmore & Maloney,—the last-named our former citizen, James H. They have a fine store at 1738-40 North Broad Street, with a well-equipped repair shop in the basement, and a very large and handsome riding-school near by. They report business good.

The dedication of the M. E. Church will take place to-morrow. The music will be rendered by the combined choirs of all the churches in town, conducted by Prof. Seely. Three services will be held during the day. Rev. M. Relyea, P. E., will preach at 10:30 A. M. Rev. J. B. Graw, D. D., of Camden, at 3:00 P. M. Rev. T. Hudson, D. D., Principal of Pennington Seminary, at 7:30 P. M. The formal dedication of the house will take place at the close of the evening services. A cordial invitation is extended to the whole community.

Bishop Foss has been obliged to cancel all engagements, on account of his health.

Sealed bids will be received by the undersigned, up to and including Friday, May 29th, 1891, for the labor of ungrading and lighting the Street Lamps of the Town of Hammononton for one year,—the Town to furnish all supplies. Specifications furnished by either member of the committee. The right to reject any and all bids is reserved.

JAMES H. SEELY, SAML. R. HOLLAND, Council's Committee on Street Lights.

A man proves himself fit to go higher who shows himself faithful where he is.

A. H. Simons & Co. Bakers and Confectioners. KEEP A FINE ASSORTMENT OF Confectionery, Nuts, Oranges, Bananas, Lemons, Dates, Figs, etc.

ALSO, FRESH DAILY, THE BEST BREAD (Wheat and Graham), Rolls, Buns, Cakes, Pies, etc. We fill orders for all kinds of Fancy Cakes, Furnish Weddings, etc. Try our home-made Mince and Pumpkin Pies.

A. H. Simons & Co. Decoration Day is Coming Don't fail to Decorate your Building. Call and see our stock of Bunting.
