ELVINS & ROBERTS

SOLE AGENTS FOR

The Styron Fence Co.

This style of fencing is becoming very popular, being made from sharpened cedar pickets and heavy wire cables; and when properly put up makes one of the neatest and most durable fences in use, either for poultry yards or other enclosures. When in want, we will be pleased to quote prices.

DID YOU EVER

Stop to think what a fine piece of mechanism your watch is? and that you are injuring it by letting it run too long without having it cleaned and oiled?

A watch is injured more in one month, when running dirty, than in a year's time when properly cleaned and oiled.

Why neglect to have it cleaned, when you can get it done, and guaranteed, for One Dollar?

Our World's Fair Letter.

CHICAGO, JULY 29, 1893.

Seventeen years ago, at the Centennial Exposition, a little corner in machinery hall was devoted to the display of electricity and its uses. One arc light was on exhibition as a great curiosity. To-day one of the main buildings of the Columbian Exposition is filled with the electrical exhibit. As for the future, many scholars now predict that within a few years electricity will be as common as fire, and its uses as varied, so that it will be counted man's chief agent and best friend in nature.

Think how we already enjoy its services. A young man proposes building a cosy cottage, and is looking especially to the comfort of his wife. He lays wires for the use of electricity all thro' his house, and if living in the city connects with the electric main in the street; and if living in the country he connects with a 10 horse power generator of his own, which costs now about \$250. This will give electric lights in every room, always ready and always clean, no smoke and no matches. This will also heat every room. Radiators are fastened on the wall and connected with the wires. Then, by simply turning a key, an abundance of heat is soon spreading through the room. In the kitchen, instead of a stove he puts a table at one side and an oven on it, also several little round stands about three inches high, just right to set a pot or kettle or pan or flat iron on. These make his kitchen range. What a comfort they are to his wife; so cosy and so clean. The kettle is set on, the key turned and soon the things are boiling without any smoke or flame or noise. For the further lightening of labor he may get a small electric motor and connect it with the main. This will run his clothes-washing machine, his dish-washer, his ice-cream freezer & etc. Besides this, he may run a wire to an electric fan in his dining room, which in these sultry days will furnish a strong cool breeze to refreshen him while he dines. Perhaps he and his wife are both fond of music, but neither plays. He will run a wire to a motor in his piano, and will regale the family with favorite selections *ad libitum*.

This is no stretch of the imagination, but simply an enumeration of a few of the uses to which electricity is now put. All of these things can now be seen in the electricity building at the World's Fair. Among the many other uses of electricity displayed is Prof. Gray's late invention, the teleautograph. By it whatever a man writes on the machine at one end of the line is reproduced at the other, no matter how great the distance, with perfect exactness in every particular. Thus a man may sign a note a thousand miles away from him that would be accepted anywhere he is known.

Another application of this useful force is found in an electric incubator,—a battery both supplies and regulates the heat. It seems to work very well, for it was hatching when I last saw it. The chicks were coming out well and the inventor said he expected a chick from every egg of that setting. There were some lively looking ducks on exhibition there that had been hatched some time previous.

Another interesting exhibition of electricity is found in the lightning chamber. This is a large dark room with no openings except the two doors. When the observer enters, the sky of glass seems serene enough. But presently the lights are turned off, and at a movement of the operator, forks of lightning pierce the sky in all directions while a deafening crash smites the ear, and the eye is dazzled by the brightness. There is no interval between the flash and the crash; it strikes right there. Many people come away with a peculiar smile on their faces, as if they enjoyed it immensely, but at the same time were a little apprehensive lest some of the lightning might get loose.

Another interesting place in the electricity building is an Egyptian temple. An air of mystery hangs over it and as you enter that feeling is confirmed by what you see. There's no furniture

in its rooms at all. The ceiling is supported by several large pillars made of green glass thro' which from the hollow centers a dim light struggles. The walls are double with quite a space between; the inner one being of glass. In this space the exhibits are exposed, plainly lighted by hidden electric lights. The mystery deepens as we glance at the odd and curious pieces here, until with a laugh we discover that they are only parts of electrical apparatus. The ceiling of one of the rooms is of glass and here is another lightning display. This time, however, it is not the dazzling zigzag line, but a quivering glow that sometimes appears at the close of a hot summer day. There is no thunder here, but all is as quiet and natural as the common wild lightning.

PAINT! PAINT!
—THE—
HAMMONTON.

When you buy the Hammonton
Paint, you do not buy seven-
eighths of a gallon for a gallon,
or three pints for a half gallon;
nor do you get one of those
packages that weigh 12 to 14
pounds, and containing so much
alkali that it appears to be so
thick that it is impossible to
use it without thinning; but in
buying the Hammonton you get
a full standard gallon of paint,
weighing 14 to 16 pounds to
the gallon, made from the best
materials known to the trade,
and costs the consumer from \$1
to \$1.50 per gallon for honest
paint.

If the purchaser doesn't want
honest paint, and wants to be
honest to himself, then be sure
to buy the Hammonton Paint,
and the manufacturer will give
a receipt with every gallon sold
telling you how to make two
gallons of paint out of one of
the Hammonton. It will cost
33 cents for the extra gallon.

One Dollar.

Add then here comes Commercial
Paint, in 30 shades,—the best wearing
paint ever put on the market for so low a
price as \$1 per gallon, and guaranteed
to be a first-class wearing paint. If any
one should not want to pay so high a
price for a good exterior paint, then work
the 33 cent racket, and get two gallons
for \$1.33. Manufactured at
Hammonton Paint Works.

SATURDAY, AUG. 5, 1893.

Mon. Levi P. Morton lost from
\$125,000 to \$160,000 by fire, early on
Tuesday morning, at his farm near
Rhinecliff, N. Y. The origin of the fire
is a mystery, but it destroyed buildings
covering three acres,—the huge barn,
containing 98 Guernsey cattle, the finest
in the world; poultry houses (James H.
Sedy in charge), with 3000 broilers;
incubators with 3000 eggs.

Two points of law should be
remembered by every bicycle rider: In
meeting a team, turn to the right; if
you desire to pass a team, turn to the
left. A few suggestions: when you
pass a team, don't go too close,—your
machine makes no noise, and its sudden
appearance from behind may frighten
even a safe horse. When riding in the
evening, if you have no lamp, ring your
bell almost continuously,—a collision
that might have proved serious was
narrowly averted, the other night, on a
corner, the driver not knowing that
the bicycle was approaching. Keep off of
sidewalks, everywhere,—you are liable
to prosecution under a State law. Do
not insist upon your right to half of the
road when meeting a loaded team,—be
generous, as well as just.

Wittschall, N. Y., Sept. 30, 1892.
A commercial traveler came into my
store recently and said: "I am looking
for something that saved my life. I was
taken with terrible symptoms of cholera
morbus about a year ago, and stopped
into some store along this street and got
a cure for it." I showed him Chamber-
lain's Colic, Cholera and Diarrhoea Rem-
edy. He did not recognize it at first, but
on tearing off the wrapper says: "Yes,
this is it. It saved my life. I don't need
it now, but I am going to buy this so as
not to be without it." This remedy
meets the wants of the people and sells
well here. C. H. BUCCHON, druggist.

Small bills are becoming so scarce
in New York and manufacturing cen-
ters that great difficulty was experienced
in conducting business.

Fewer banks have failed during the
past week, but mills and iron works by
the score have closed up, and many
thousands of men and women thrown
out of employment.

In September, 1892, dysentery in a very
severe form prevailed at Jamesburg, N. J.
Water Willard, a well-known mer-
chant of the place, procured a supply of
Chamberlain's Colic, Cholera and Diar-
rhoea Remedy. He says: "It is certainly
one of the best things ever made, and
has given the highest satisfaction in the
most severe cases of dysentery." For
sale by A. W. Cochran, druggist.

The popular excursions to Chicago
which are being run by the Penna. R. R.
seem to furnish exactly what people
want. The first two trains were well
patronized, and the remaining excursions
will undoubtedly attract a much
larger number. A decided improve-
ment in train schedule, which enables
passengers to reach Chicago at an early
hour the following afternoon, places the
special train almost on an equality in
matter of speed with the best express
trains. The special trains are composed
of the standard coaches for which the
Pennsylvania R. R. is famous. Only
one night is passed on the road, and
the arrival is so timed as to give an
abundant opportunity for engaging
quarters before nightfall.

The dates of the next excursions are
Aug. 12th and 16th. The special train
will leave New York 9:00 a. m., Jersey
City 9:13, Philadelphia 11:30, arriving
in Chicago early the next afternoon.
The excursion rate, good only on the
special train and valid for return within
ten days, is \$20 from New York, \$18.25
from Philadelphia, and proportionately
low from other stations.

No one should fail to visit the Fair
with such facilities at hand.

ditto Milk and Cream.
All you need

now is
We have them from \$1.35
upwards.

About Curtains.

We presume to say that we
sell quite as many Curtains as
all the other dealers in town
together. We carry a larger
assortment, and our prices are
correct. We sell a Spring
Fixture Curtain for 30 c. We
particularly recommend, how-
ever, the "Knapp" for smooth-
ness of action and durability.
While the price is a little
higher, once in position it
should last for years—some-
thing that the cheaper sorts
won't do.

In both the Knapp and the
Hartshorn, we carry a full line
of Colors, both Fringed and
Plain. We also have the
material by the yard, and the
spring fixtures separate.

Special Size Curtains made
promptly to order. Measure-
ments taken and curtains hung
if desired.

A dozen or more odd cur-
tains, of various kinds of fix-
tures, probably no two alike,
are to go at 19 cents each—
have been 45 to 70 cts. For a
kitchen or back window, one
of these would be just the
thing.

Some people think that taking
out hedgus and putting in fences will
destroy the beauty of the town. Few
places can boast of more pretty hedgus
than Hammonton; but it is a matter of
taste. If kept well trimmed, a hedge is
ornamental; but if, as in too many
cases, they are neglected, we prefer a
fence.

JOHN BERNHOUSE'S house and
farm are for sale at a fair price. There
are acres of good land, fruit trees, grass
and crops, six-room house, good barn, and all
the necessaries of life. Particulars at
the Republican's office.

The Band will give a serenade
entertainment on Saturday evening,
Aug. 10th, at Mr. Saxton's. The pro-
gramme will be varied, and refresh-
ments will be for sale. Admission, ten
cents. It is hoped that our citizens
will turn out, and thus partially repay
the boys for their willing assistance on
many occasions.

A key to the firemen's building
should be left in some well-known place
in town, or in several places, that there
may be no delay when an alarm is to
be given. It is known that each fireman
has a key, but after hunting up one of
them, it may be in his "other pocket, at
home," and the fire is not waiting while
you are delayed.

Mrs. Amanda F. Whittier, widow,
died on Thursday morning, Aug. 3rd,
1893, aged 73 years. The Whittier
family were among the first settlers in
Hammonton, coming from Maine. They
were among our earliest acquaintances,
in 1855. Mrs. W. was a sincere work-
ing Christian woman, loved by all.
Almost her last words, addressed to a
friend, were: "A sick-bed is no place to
prepare for death and eternity; I set-
tled that long ago, and I am glad, for I
couldn't do it now." Though in feeble
health for many months, her last sick-
ness was short, but severe. Funeral
services will be held at the family resi-
dence, Third Street, this afternoon, at
two o'clock.

Fire! Fire!

Albert S. Gay's two barns and tool
house were destroyed by fire Wednesday
afternoon. Mr. Gay had walked past
the barn, and saw nothing wrong, but
when some eighty rods away, his son
called out: "Look at the barn!" and
the whole roof seemed covered with
smoke. Immediately neighbors rushed
in, all the live stock and wheeled imple-
ments saved, but there was no time for
anything further. This barn was 60x60
feet, 18-foot posts, with wind-mill, tank,
power fodder-cutter, feed-mill, eight big
loads of new hay, etc. About fifteen
feet distant was the old barn, and near
that the tool-house, in which several
hundred crates were stored, with tools
of all kinds that a farmer will collect.
All these were destroyed. Next was a
picker house, which, with the residence
(perhaps fifty feet distant) were likely
to burn. Everything movable was
removed from the house, but by hard
work the two buildings were saved. A
telephone message was sent from
Elvin's store to the post-office, the fire
bell was rung, firemen and their appa-
ratus were speedily transferred to the
scene of danger, and effective work was
done. It was more than two miles
from the engine-house, the fire was
burning fiercely when the alarm was
sent out, the only water supply was
neighboring wells, yet two of the big
buildings were saved. Mr. Gay had
\$1900 insurance, in all, and his loss will
exceed that amount by \$2000. The
origin of the fire is unknown, but is
charged to spontaneous combustion
among the new hay.

Regular meeting of Town Coun-

P. H. Jacobs stated that last Town
Meeting voted an appropriation of \$150
to the Fire Company, for the purchase
of supplies, and asked that sum be
now paid to the company. On motion,
Clerk directed to draw an order for said
amount.

Water Committee reported cisterns
completed at Third and Vine Streets,
and in front of M. E. Church.

Light Committee reported all street
lamps out in order.

Annual financial report of the School
District received and filed.

Alex. Aitken called attention to the
frequent violations of law by bicycle
riders, whereby serious accidents have
been narrowly escaped. Referred to the
Highway Committee.

Water Committee instructed to con-
nect cistern at Egg Harbor Road and
Orchard Street with roof of Bernshouse
storehouse.

Wayland DePuy complained of a
nuisance near his residence. Referred
to Health Physician.

The new school-bell is in position
on the new building, back of the tower.
It was the general impression that the
tower was built to accommodate the
bell; but the powers that be ordained
otherwise. Now desks and seats have
been placed in some of the rooms, the
water pipes are being arranged, and a
turbine wind-mill, with lifting-derrick,
will soon force water into and through
the building.

SUNDAY SCHOOL LESSON. AUGUST 1, 1914. PAUL AT MILETUS. LESSON TEXT. Acts 20: 22-23. My brethren, I must needs go to Rome.

IN PERILS AMONG FALSE BROTHERS. False brethren privily brought in (Gal. 2: 4). They went on from us, but they were not of us (1 John 2: 19).

IN THE SCHOOLS. Notwithstanding the thoroughly accepted fact of the existence of normal schools and colleges in which it is presumed to be trained by the State.

OF ITS MEMBERS, HE CONTRIBUTED BY HIS example and fidelity to the normal power of endurance. The practical character of the society under his administration of its affairs secured for him the unlimited confidence of the teachers, and the present favorable condition of the normal school.

THE USUAL CROWD WAS GATHERED to the usual school room, occupying all the best seats, when a little, weazen-faced man sneaked in by the back door and slunk into a dark corner.

Between the Compound Oxygen Treatment of Diseases and that by the use of Drugs? It is an important one.

WHAT

Drugs are taken into the stomach. For this reason their action is not direct. Compound Oxygen is taken into the lungs, and, therefore, comes immediately into contact with and is absorbed into the blood.

IS

Drugs, being generally poisons, act by causing a disturbance in the body. Compound Oxygen, being composed of the elements of the air, and acting upon the blood, is not open to this objection.

THE

But, however it may act, it has certainly cured many cases of chronic disease, in which drugs have failed. This is the point of greatest interest to all chronic sufferers. To all such we say:
