AND Demorest's Monthly Magazine.

A WONDERFUL PUBLICATION.

Many suppose DEMOREST'S MONTHLY to be a fashion magazine. This is a great mistake. It undoubtedly contains the finest FASHION DEPARTMENT of any magazine published, but this is not the case from the fact that great enterprises and experiences are shown, so that each department is equal to a magazine in itself. In Demorest's you get a dozen magazines in one, and secure amusement and instruction for the whole family. It contains Stories, Poems, and other literary attractions, including Artistic, Scientific, and Home-hold matters, and is illustrated with original Steel Engravings, Photographures, Water-Colors, and fine Woodcuts, making it the MOST MAGAZINE OF AMERICA.

Each copy contains a PATTERN ORDER entitling the holder to the selection of ANY PATTERN illustrated in any number of the Magazine, and in ANY OF THE SIZES manufactured, each valued at from 20 cents to 50 cents, or over \$5.00 worth of patterns per year, free.

Yearly subscription, \$2.00. A trial will convince you that you can get ten times the value of the money paid. Single copies (each containing Pattern Order), 20 cents.

Published by **W. JENNINGS DEMOREST, New York.**

The above combination is a splendid chance to get our paper and DEMOREST'S MONTHLY at a special rate. Send your subscriptions to this office.

Something New!

Among the plans for the improvement of our town, has any one ever thought of making it practically a seaport town by extending navigation from Pleasant Mills to our Park? The outlet of the lake, at least as far as it can be seen from the Columbia Road, is enclosed by pretty high banks at a moderate distance, so that but little land would be flooded in raising the water sufficiently to float sloops; and probably, with a small amount of clearing out, small schooners could also come up.—I do not know the difference in altitude between our lake and the Mullica River at Pleasant Mills, but think that only three locks, or at most four, would be required.

Probably this will be set down by most of the readers of the REPUBLICAN as a visionary idea, and I shall not now attempt to deny that it may be so; but, on the other hand, I am not sure that it is impracticable. Probably small steam-tugs, or a tow-path and horse-power, would have to be used, as it would not be easy to work up a narrow channel with sails. All heavy freight which is not so perishable as to require very rapid transit, can be moved very much cheaper by water than by railroad. Sweet potatoes and all other vegetables could be cheaply delivered in New York by such a route; and fish, salt mud, and other sea fertilizers could then be delivered here at a price which would enable our farmers to use them with profit. Shoes, and any other goods which may hereafter be manufactured could be cheaply delivered in New York, and all heavy goods returned as cheaply. **WM. F. BASSETT.**

Hundreds of thousand of dollars worth of property has been destroyed by forest fires in Montana.

Steve Brodie announces his intention of jumping Niagara Falls. The country will now prepare to witness a fool's race to death between the Bowery saloonkeeper and the champion barrel crank Graham.

The iron trade does not weaken under increasing production, which is nearly 4500 tons larger per week this month than last. It is evident that the consumption of iron has been, and is, increasing at a rate beyond the wildest recent estimates.

The trust business is booming in old England. The latest one formed there is a Bread Trust. In London it controls 300 retail bakeries, with a certified yearly profit of \$46,000. The other bakers are joining the combination. This goes ahead of anything of the kind known in this country. But Free-trade England is the home of the trusts.

When broiling steak throw a little salt on the coals and the blaze from dripping fat will not annoy.

The Twenty-Eighth ANNUAL FAIR

OF THE

Atlantic County Agricultural & Horticultural Association will be held at

The Republican.

(Entered as second class matter.) HAMMONTON ATLANTIC CO. N. J. SATURDAY, AUG. 24, 1889.

The Republican State Convention has been called for Tuesday, Sept. 17th, to meet in the Opera House, at Trenton. The basis of representation provides for one delegate to each 200 Republican votes or fraction over 100, at the last election for Governor; each ward, township, or borough, to have at least one delegate. This county will be entitled to the following representation:

Table with 2 columns: Location and Number of Delegates.

Petit Jurors for the next term of Court, Sept. 10th, 1889: Atlantic City, Chas. Whippy, Thor. Oakley, Jr., Eli Amole, John Farthing, Garrison Headley, Jas. Stokes, Wm. H. Gale, Chas. E. Adams, Geo. F. Prince, Edw. Crowell, Horace M. Leeds, Arvine H. Phillips, Gilbert Vansant, George W. Jackson, Elwood Buckley.

Weymouth, Otis Madden, George L. Dukes, Benjamin Chard, Anderson Bourgeois. Pleasantville, Jas. L. Risley, Arnold B. Rao.

Linwood, Peter B. Reed. Madison, Henry McHugh, John A. Abbott, James Hand. Griggley, Henry Strickland, Mark Hughes, Charles Leeds, Ezra Doughty, Ezra Bowen.

Hamilton, William Harris, John Y. Beckett, Job S. Smallwood, Edw. Rape, Daniel Rape. Egg Harbor City, Harry May, Albert Ballback, John Lehnias.

Buena Vista, Chas. Pancoast. Egg Harbor Twp., Enoch A. Doughty, Samuel Horn, Abel W. Smith, Samuel Toews.

Hammononton, Harry Little, George Kluch, William A. Hood, William A. Elvins, Jr. South Atlantic City, Julia H. Horne.

All the members of the Cabinet are absent from Washington, and may be for several weeks. M. Damala, the husband of Sarah Bernhardt, died in Paris, last Sunday, of cerebral congestion.

Senator Cameron is likely to introduce a bill next winter for the extension and improvement of the Executive Mansion.

The President intimated to Senator Pugh that while an extra session of Congress might be called, the question was still undecided.

Ex-King Malitosa, of Samoa, returned to Apia, and was warmly welcomed. The German Consul told him he was at liberty to do as he pleased.

Consumption Can be Cured!

By the use of **Crescent Cough Cordial.**

If taken in time. Or, perhaps, it would be better to say there would be no such thing as Consumption, in most cases, if care were taken to relieve the first symptoms of lung troubles; and for the purpose nothing can beat

Crescent Cough Cordial.

The Republican.

(Entered as second class matter.) HAMMONTON ATLANTIC CO. N. J. SATURDAY, AUG. 24, 1889.

Only one more week of vacation. Roscoe C. Bixford is employed at Stockwell's store. An infant son of Mr. R. R. Ruby died on Sunday last. In one week, Mr. Jacobs has greeted sixteen visitors. Professor Morrison has a number of pupils in voice culture. Hot weather, this week—very hot—with the dust flying. Mrs. Elazar Koene has gone to Massachusetts to spend a few weeks. Mr. Butler, the barber, has a new apprentice, a Philadelphia boy. Young men who will learn the poultry business can always get good positions. Mrs. D. Hollingshead, of Jersey City Heights, visited at Mrs. Copley's this week. The Egg Harbor Fair will be held Sept. 21st to 24th, including Sunday, as usual. Messrs. Peterson, of Vineland, and Church, Hackensack, were among recent visitors. Mrs. Mary Wickham and her boy Jesse returned from a two weeks' stay in Atlantic City. We were misinformed about the Fire Company's election of officers; it occurs Sept. 10th. Book agents report satisfactory business in the sale of standard works in Hammononton. Pastor E. M. Ogden is expected to occupy his own pulpit to-morrow, and administer the ordinance of the Lord's Supper. Prof. Matthews and wife, with Prof. Morrison and C. M. Cook, spent part of the week at Pleasantville and vicinity. The "Shamrocks" failed to appear last Saturday. We suggest that the second syllable of their club name be dropped. Notice Mr. Black's store advertisement, on this page. Keep on noticing it, for each week will show something new. A number of Quakers, from Mt. Ephraim, Pa., visited Hammononton Tuesday. Let them come; they make good citizens. Secretary Zimmerman, of the Camden & Atlantic road, thinks the season at Atlantic City this year is the eighth wonder. The Town Council and Board of Assessors met in joint session on Tuesday, but made very little change in property valuations. Bills are up, announcing a picnic in Brown's grove, Old Hammononton, this afternoon, "benefit of the base ball club," with refreshments and sports. The "Fowler" Club, of Philadelphia, is expected to contribute to the entertainment of lovers of base-ball, this afternoon. Admission, one dime. Hammononton Paint does its full share in making old Winslow look like new; and Hammononton mechanics are putting the buildings in useable shape. Rev. Mr. Ordway and wife started for home, East Haverhill, Mass., on Wednesday morning. We wish the Baptist Church of this place could prevail upon Mr. O. to return as their pastor. St. Mark's Church, Tenth Street after Trinity, Aug. 25th. Morning Prayer, Litany, and Sermon, 10:30 A. M. Evening Prayer at 4:00 P. M. Sunday School at 3. These parties who are making nightly visits to Mr. Colwell's peach orchard may run against something decidedly penetrating, next time. Take warning in time. Mr. Sturdevant raised a large poultry building above a hedge and moved it over fifty feet of flower beds, and only damaged one dahlia plant. That means skill and care. Rev. Father Van Riel offers five dollars reward for information that will convict the party or parties who have broken windows, damaged the doors, and committed other outrages to and about St. Joseph's Church. We hope some one will earn the money, for any one who is mean enough to do such things needs a severe lesson. Insure with A. H. Phillips, 1238 Atlantic Ave., Atlantic City.

LOCAL MISCELLANY.

A short shower, Thursday night. Mr. Jacobs is to be judge of poultry at exhibitions at Dover, Del., Middletown, N. Y., and Rock Island, Illinois. Mr. Warrington will be judge in the same department at Egg Harbor City Fair. Messrs. Plan and Moses Stockwell and H. G. Newton spent a couple of days at Atlantic City, this week, in an unsuccessful endeavor to depopulate the briar bush. Or perhaps they only went fishing. Wednesday was a model day for a picnic, and the little folks of the Loyal Temperance Legion appreciated it well. The W. C. T. U. superintended the affair, and left nothing undone to make the occasion enjoyable. The South Atlantic City Land Company held a meeting a few days ago and elected directors, as follows: I. G. Adams, William Massey, Walter Massey, D. C. Potter, C. J. Adams, Parson Ryan, D. L. Potter. The financial tangle into which the Malaga Glass Company has become involved seems more complicated than ever, and the business in all branches is discontinued. Will, M. Galbraith's vacation is consequently prolonged indefinitely. A neighbor of ours, who has been traveling about the state for several months, says that Hammononton need not feel at all ashamed of her financial condition, for, with the bugs, worms, and storms, the whole of South Jersey feels as poor as Job's fabled turkey. There was a very large attendance at the sale of Walter Doucet's property, on Monday. Major Jordan, the auctioneer, did his part of the business well, and apparently pulled in all the loose cash there was in the crowd. Some of the goods were sold very low, others brought all they were worth. List of unclaimed letters remaining in the Post Office at Hammononton, N. J., Saturday, Aug. 24th, 1889: Dr. Geo. C. Horner, Maggie Healy, Mr. Ed. Heintzman, Mrs. Wm. Lake, Wm. H. Parham, Persons calling for any of the above letters will please state that it has been advertised. CYRUS F. OSGOOD, P. M.

The nomination of Congressman Jas. Buchanan for Governor would not elevate him on the ladder of fame. He is a young man yet, and his friends hope that something still better than governor or congressman is in store for him. Coming generations may read of two presidents, both having precisely the same name but in no way related.—*Journal*.

The "Hammononton Debating Society" was organized, Monday evening, in Murdoch's Hall, and will meet every Friday evening. The following are the officers elected: President, John T. French. Vice-President, Wm. A. Hood. Secretary, P. H. Jacobs. Asst. Sec'y, George King. Treasurer, John W. Myers. Dues will be only nominal. Only five issues to be discussed. All requested to join.

A correspondent suggests that it would be wise to arrest every Italian suspected of carrying concealed deadly weapons, and affirms that nearly all of them carry knives that would be dangerous in the hands of an angry man. We agree with him, that it would be a good idea, whether the offender be an Italian or an American; but, unfortunately, there is no law in New Jersey prohibiting the carrying of weapons, except in the cities. At least we were so informed by an attorney.

Joseph Sterrafina and Louis Pickrela, two Italian employes on the Reading R. R. improvements, bought some trifling articles of Mr. Nicolai, on Main Road, Sunday afternoon, and quarreled over the payment. Each one accuses the other of striking the first blow,—no one knows how it was,—but when the ensuing rumour was ended, Sterrafina had a bad cut in his left side, and at the hearing seemed almost too weak to sit up. Pickrela's nose was split in its full length, and he had a cut out on his left arm. Dr. Edward North dressed the wounds, and by his advice Sterrafina was sent to Cooper Hospital on Monday, after the hearing, and the other fellow went to the County Jail,—both parties to appear for trial in September. Justice Atkinson and Constable Bernhouse are having considerable business of that kind this year.

There is great suffering from destruction in the districts devastated by the recent floods in West Virginia.

Married. ELIA—DEYOUTA: In Hammononton, N. J., on Thursday, Aug. 22nd, 1889, by John Atkinson, J. P., Nicolai Elia and Ursula Deyouta, all of Hammononton.

A Horse for sale cheap. Inquire of A. E. SNOW, Hammononton.

Wanted.—A girl for general housework. Apply with reference, Dr. M. D. YOUNGMAN, 1018 Pacific Avenue, Atlantic City.

That handsome residence on the Lake, known as the Frank Records property, is for sale at a very low price, and on the easiest terms one can ask. For particulars, inquire at the REPUBLICAN office.

Farm for Sale.—50 acres all under cultivation, fruit, etc. Inquire of ELLI JOHNSON, Fourteenth St., Hammononton, N. J.

By Cutting this Out, and presenting With \$2.50, You can have 1 doz. Cabinet Photos

Any style, and finished in the best possible manner, at Cook's Photo Gallery Hammononton (formerly N. D. Page's).

This is only good for the next ten days, as I do it to introduce my work.

Wagon runs through the Town and vicinity.

The Philadelphia weekly Press and the Republican, both one year for \$1.25, cash.

Black's General Store. Hammocks, Hammocks, Hammocks.

Nothing is more necessary to that state of perfect happiness called "taking solid comfort," than a Hammock. We are selling a good Hammock for One Dollar; other grades at higher prices. Hammock spreaders, hooks, and ropes with anchor arrangements for lowering or raising, are the "essentials" of a Hammock. We keep them all.

We have lately added to our grocery stock "Warner's Safe Yeast." Agents of the Company recently canvassed our town, leaving two cakes at each house.—It has proved to be a good article.

We are offering a little job in Baking Powder. A limited number of quarter-pound cans of a good powder at 5 cts. a can.

If this news is true that the Rothschilds have got up a corner on the South African diamond diggings, what in the world will become of the bankers, ball professionals, hotel clerks, aldermen, hoodlums, boss politicians, "sports" and the like.

Foiled by a Mocking Bird.

Under a tree, near the porch, an old hen had gathered her brood of interesting balls of fluff and promissory feathers, some day to be real spring chickens. Between the porch and the tree, under which the old hen was delivering a pious lecture to her thirteen children, lay a plump and religious looking cat. She was not one of your scampish, frisky, half-fledged cats, but a demure old tabby, too well fed and perhaps too moral to even look with evil eye upon the sparrows in the bushes near by. She certainly was at the time I speak of when the mocking bird, whose cage hung on the adjoining piazza, was making a strange ditty out of "Hark! Hark! My Soul" and "Dem Golden Slippers" combined—as quiet and benevolent as a cat can be.

After awhile the mocking bird stopped whistling, and apparently directed all his attention to observing the scene before him. All at once there came from the mocking bird's cage a shrill pipe of a young chicken in pain. The old hen heard the cry, and in an instant had left her flock and down with ruffled neck and wings outspread upon the sheep cat. The cat, however, struck by the suddenness of the assault, and received several sharp pecks, and scurried before she could get away. The old hen kept up the pursuit until the cat fled into the house.

The mocking bird, whose skillful imitation of a chicken's cry had caused the disturbance, cheerily whistled: "There's a land that is fairer than day."

BISMARCK is credited now with having organized a league of peace, that when completed by the adhesion of Spain, will put the European war far into the background and enable the nations to reduce their armaments. The first fruits of the alliance are to be seen in the cessation of war preparations in Serbia and Bulgaria and quietus put temporarily at least upon the threatened uprising in Crete. The league is eminently conservative; everything is to be left just as it is, until the allied powers fall out.

It is not improbable that the trouble with the Hungarians who have been resisting arrest in the coke regions around Councilville are due in part to the ignorance of the men both in the language and the law of the country. They find themselves hunted like wild beasts, and naturally resist when brought to bay. But, whether their riotous behavior is due to ignorance or viciousness, the result is pretty much the same. They are most undesirable neighbors, and the companies that have employed them to break down the wages of other laborers will probably regret, before they ever had anything to do with such dangerous tools.

The somewhat unsafe belief that our fuel products are inexhaustible will be strengthened by the news of the discovery of rich coal deposits in the Rocky Mountains. Professor McGee, of the United States Geological Survey, says that a calculation as to the quantity of anthracite coal in the country and the probable consumption leads to the conclusion that such deposits will be exhausted within a century, while, judging from the known supply, bituminous coal will not last longer than three or four centuries. It is altogether probable, however, that great veins of undiscovered bituminous coal may yet be tapped.

When the United States Fish Commission undertakes to make a report it is obliged to deal in almost as many figures as an astronomer works. It is doing an immense work in trying to restore or maintain American fisheries, and, although it falls in some of its undertakings, there is every reason to believe that much more than the cost of its work is returned to the country in the nature of things, the success of its work should increase as it obtains public recognition and support. At present there are many good but careless and careless sportsmen who help to undo the work of the Commission, but they are decreasing in number as the subject of fish protection becomes better understood. As an example of the labors of the Commission it may be mentioned that more than 100,000,000 shad-ryes were deposited during the year, 23,000,000 going into the Delaware. They are, of course, exposed to many vicissitudes and dangers, and millions of them will perish before any of them reach maturity, but if only a few thousand of them grow up to be caught at Gloucester and served up as planked shad they will repay the cost of planting the millions that have perished. The work of the Commission is of great commercial importance, and could not be carried on effectively except by the National Government, with the aid, also, of State Governments.

We often excuse our own want of philanthropy by giving the name of fanaticism to the more ardent zeal of others

faithfully and mechanically. "Men of the royal family that greeted William Penn," he writes, "were blowing, whistling and garruling in the fields while their people then surrendered. The Indian, has returned to the Atlantic. He was pushed, upward as a hunter and a nomad; he comes back as a farmer, and as an American citizen."

THE SLIDE RAILWAY IN PARIS.

Running Trains by Water Power—A New Motor for Cities.

A Paris correspondent gives an account of a trip on the so-called Chemin de Fer Glissant or Sliding Railway on the Esplanade des Invalides within the Paris Exhibition. The new invention is a singularly original contrivance for enabling trains to run by means of water power, at a speed hitherto undreamt of. "Arriving there without any intimation as to what a 'sliding railway' might be, I at first mistook it for an overgrown switchback, with the humps smoothed away. The train consisted of four carriages, affording room for about a hundred passengers. The carriages had no wheels, being supported at the corners by blocks of iron of a size somewhat larger than a brick, which rested upon a double line of iron girders. In the middle of the line a regular interval jolted out irregularly-shaped pillars, the use of which was not apparent. Having taken our seats and the signal being given, we glided along very gently for the space of a few yards, when suddenly we gathered speed; two or three tugs were felt, and we were flying on at the pace of an ordinary train, but as smoothly as a boat on a river. The absence of any vibration, shaking or 'tail motion' was wonderful. A slight jerk there was at regular intervals, but then again I was told that it was due merely to the shortness of the course and the inability to get up a proper pace. In a hydraulic train travelling at full speed—that is to say at the rate of 140 kilometres, or 87 to 124 miles an hour—there would be almost no consciousness of motion. The journey down the length of the Esplanade only occupied a few seconds."

The sliding railway was invented in 1868 by an engineer named Girard, who was killed in the Franco-German war, and it has been improved to its present state by one of his assistant engineers, M. Barre. As has already been mentioned, the hydraulic carriages have no wheels, these being replaced by hollow slides fitting upon a flat and wide rail, and covered on the inner surface. When it is desired to start the carriage in motion, water is forced into the slide or skates of the carriage from a reservoir by compressed air, and seeking to escape, it spreads over the under surface of the slide, which it raises for about a nail's thickness above the rail. The slides thus resting not on the rails, but on a film of water, are in a perfectly mobile condition; in fact, the pressure of the forefinger is sufficient to displace a carriage thus supported. The propelling force is supplied by the pillars, which stand at regular intervals on the line between the rails. Running underneath every carriage is an iron rack, about six inches wide, fitted with paddles. Now, as the foremost carriage passes in front of the pillar, a tap on the latter is opened automatically, and a stream of water at high pressure is directed on the paddle. This drives the train on and by the time the last carriage has gone past the tap (which then closes) the foremost one is in front of the next tap, the water's action thus being continuous. The force developed is almost incredible. There is some splashing on the rails at the start, but this diminishes the faster the train goes. To stop the train the stream of water that feeds the slides is turned off, and the latter coming in contact with the rails, the resulting friction stops the carriage almost instantaneously.

A water train running at over one hundred miles an hour could, it is claimed, be pulled up within thirty yards; could climb up gradients of sixteen inches in the yard, descend them with equal safety and run on curves of forty-four yards radius. This system would seem peculiarly adapted for elevated railways in cities, being light, noiseless, smooth, without smoke, fast and safe. It is well adapted for use in the mountains, where the water is abundant. "Disease," alcoholism, indigestion, swelling of the entire head. "Five dollars, please. Good morning."

DIAGNOSIS.—Bummer, calling at a phrenologist's office—"See here, you old crank! I'll tell you can't tell my character from my head. There isn't a bump on it."

Phrenologist, feeling bummer's head—"Disease," alcoholism, indigestion, swelling of the entire head. "Five dollars, please. Good morning."

NEW READING.—It was a Connecticut boy who surprised his teacher in reading the other day by his interpretation of the sentence, "There is a worm and it do not tread on him." He read slowly and hesitatingly, "There is a warm doughnut; tread on him."

—Reports from growing crops in Oregon are favorable.

SUNDAY SCHOOL LESSON.

SUNDAY, AUGUST 23, 1893.

The Anointing of David LESSON TEXT.

(1 Sam. 16: 1-13. Memory verse, 11, 13)

LESSON PLAN.

TOPIC OF THE QUARTER: Obedience and Disobedience.

GOLDEN TEXT FOR THE QUARTER: *Behold, to obey is better than sacrifice, and to hearken than the fat of rams.*—1 Sam. 15: 22.

LESSON TOPIC: Obedience Tested.

LESSON OUTLINE: (1) Going to Bethlehem, (2) Rejecting the elder sons, (3) Anointing the Youngest.

GOLDEN TEXT: *Man looketh on the outward appearance; but the Lord looketh on the heart.*—1 Sam. 16: 7.

DAILY HOME READINGS: M.—1 Sam. 16: 1-13. Obedience tested. T.—1 Sam. 15: 24-35. Samuel's sorrow for Saul. W.—1 Sam. 16: 14-23. David in the cave. Th.—1 Sam. 16: 1-13. The anointing of Saul. F.—2 Sam. 7: 1-17. God's favors to David. S.—1 Sam. 8: 1-26. God's favors to David. S.—1 Sam. 8: 27-52. God's favors to David.

LESSON SURROUNDINGS. EXALTATION OF THE LOWLY. Assured in prophecy (Ezek. 17: 24; 21: 26). Assured in the Epistles (Jas. 4: 10; 1 Luke 14: 10, 11). Assured by the Lord (Matt. 23: 11; 23: 12; Luke 14: 10, 11). Practiced by Jehova (1 Cor. 2: 8; Psalms 113: 7; 139: 1; 142: 1). Characterizes the gospel (1 Cor. 1: 26; 23: 9; Eph. 4: 12). Christ Jesus (1 Cor. 1: 26; 23: 9; 10: 1). Rejoices saints (Jas. 1: 9). Illustrated in Joseph (Gen. 41: 14, 39; 40: 15; 45: 17; 46: 17); in David (1 Sam. 16: 11-13; 1 Cor. 7: 7; 12: 9; 27: Phil. 2: 6-11).

LESSON ANALYSIS. I. GOING TO BETHLEHEM.

I. Commandment: Fill thine horn with oil, and go, to Jesse the Beth-lehemite (1). Thou shalt anoint him to be prince over my people (1 Sam. 9: 16). Go to Ramoth-gilead.—Look out there Jehu (2 Kings 9: 1, 2). He chose David, and took him from the sheepfolds (Psa. 78: 70). He raised up David to be their king (Acts 13: 22). II. Peril: How can I go? If Saul hear it, he will kill me (2). Saul eyed David from that day and forward (1 Sam. 18: 7). I go up into the king's... if I perish I perish (Esther 4: 16). Ye shall be hated of all men for my name's sake (Matt. 10: 22). I held not my life... as dear unto myself (Acts 20: 24). III. Obedience: And Samuel did that which the Lord spoke (4). According to all that God commanded him, so did he (Gen. 22: 2). Thus did Moses; according to all that the Lord commanded (Exod. 40: 16). Whosoever he saith unto you, do it (John 2: 5). Abraham, when he was called, obeyed (Heb. 11: 8).

1. "How long wilt thou mourn for Saul?" (1) Saul's fall; (2) Samuel's mourning; (3) God's inquiry.—(1) Unto Sorrowing; (2) Gentle reproval; (3) Halting by man. II. REJECTING THE ELDER SONS. 1. An Ideal King: Surely the Lord's anointed is before him (6). Saul... there was not... a goodlier person (1 Sam. 9: 2). He was higher than any... from his shoulders and upward (1 Sam. 10: 23). Samuel said... There is none like him (1 Sam. 10: 24). Look not on his countenance, or on his stature (1 Sam. 16: 7). II. A Crucial Test: The Lord looked on the heart (7). The Lord seeth not as man seeth (1 Sam. 16: 7). Thou, even thou only, knowest the heart of all (1 Kings 10: 8). The Lord searcheth all hearts (1 Chron. 28: 9). God trieth the hearts and reins (Psa. 7: 11). III. Complete Submission: 1. Samuel said unto Jesse, The Lord hath not chosen these (10). The Lord do that which seemeth him good (2 Sam. 10: 12). The Lord gave, and the Lord hath taken away (Job 1: 21). Not my will, but thine, be done (Luke 22: 42). The will of the Lord be done (Acts 21: 14). 1. "Surely the Lord's anointed is before him." (1) External attractiveness; (2) Haughty conditions; (3) Divine adjustments. 2. "The Lord seeth not as man seeth." (1) Man as seen of man; (2) Man as seen of God. 3. "The Lord looketh on the heart." (1) The human heart; (2) The divine observer; (3) The penetrating gaze; (4) The inspected heart. IV. THE ANOINTING OF THE YOUNGEST SON. 1. An Imperative Call: Fetch him; for we will not sit down till he come (11). Didst thou get out of this place (Gen. 19: 14). They ran and fetched him thence (1 Sam. 16: 23). I took thee from the sheepcote (2 Sam. 9: 1). God, who... called me through his name (1 Cor. 1: 15).

A Clear Designation.

Arise, anoint him; for this is he (12). Behold the man of whom I spake to thee! (1 Sam. 9: 17).

Behold, he hath hid himself among the sheep (1 Sam. 10: 22). There shall meet you a man... follow him (Mark 14: 13). Now send me to Joppa, and fetch one Simon (Acts 10: 5).

11. A Divine Appointment: The spirit of the Lord came mightily upon David (18). Joshua... a man in whom is the spirit of the Lord (Num. 27: 18). The spirit of the Lord came upon Jephthah (Judg. 3: 29).

The spirit of the Lord came mightily upon him (Judg. 14: 6). They were all filled with the Holy Spirit (Acts 2: 4).

1. "There remaineth yet the young-est." (1) Lightly esteemed of men; (2) Highly esteemed of God.

2. "Send and fetch him." (1) Thoroughness; (2) Activity; (3) Success.

3. "This is he." (1) The last called; (2) The first chosen; (3) Least before his brethren; (4) Greatest before the Lord.

LESSON SURROUNDINGS. EXALTATION OF THE LOWLY. Assured in prophecy (Ezek. 17: 24; 21: 26). Assured in the Epistles (Jas. 4: 10; 1 Luke 14: 10, 11). Assured by the Lord (Matt. 23: 11; 23: 12; Luke 14: 10, 11). Practiced by Jehova (1 Cor. 2: 8; Psalms 113: 7; 139: 1; 142: 1). Characterizes the gospel (1 Cor. 1: 26; 23: 9; Eph. 4: 12). Christ Jesus (1 Cor. 1: 26; 23: 9; 10: 1). Rejoices saints (Jas. 1: 9). Illustrated in Joseph (Gen. 41: 14, 39; 40: 15; 45: 17; 46: 17); in David (1 Sam. 16: 11-13; 1 Cor. 7: 7; 12: 9; 27: Phil. 2: 6-11).

I SAW A MAN KNEEL DOWN TO pray. Worldly people in the car looked on, as much as to say, "What does this mean? Suppose the most noble people in the car thought that man was either insane or that he was a fanatic; and he disturbed no one when he knelt, and he disturbed no one when he arose. In after conversation with him I found out that he was a member of a church in my own city, that he was a seafaring man, and that he was on his way to New Orleans to take command of a vessel. I thought then, as I think now, that even such a man with respect for God as that man had, would bring the whole city to a standstill. The rebuke of Saul by Samuel was followed by the king's confession and plea for pardon. But the rebuke was reiterated by Samuel. The rendering of the prophet's robe in the hand of Saul, was made a sign of the reading of the kingdom. All the prophet would condemn was the external recognition of Saul before the Lord (1 Sam. 16: 23). This was followed by the slaying of Agag, king of the Amalekites, by Samuel himself (1 Sam. 15: 32, 38). After this there was no further intercourse between the king and the rejected king (1 Sam. 15: 34, 35). The place of this scene was Bethlehem, afterwards known as "the city of David." The time is not stated. But David, while a boy, was a shepherd, and he was a seafaring man. If he were born in B. C. 1085, then the date indicated by Usher (about B. C. 1063) is a probable one. This would be in the thirty-second year of Samuel's life, when David was about twenty-two years old. Others, however, think an interval of some length should be placed between the anointing as king and the victory over the Amalekites, and accordingly they assign to the former an earlier date.

Some Home-made Remedies. By the purchase of necessary materials and the personal supervision of their preparation and mixing at home, one may easily save half the retail price of many simple remedies, adding this advantage to the satisfaction of obtaining the proper ingredients and those of purer quality than might otherwise be used. Furthermore, when troubled by any irregularities of the system one is not inclined, always, to consult a regular physician, and is still less inclined, if wise, to choose any among the hundreds of patent nostrums sold by druggists, and which are composed of harmless ingredients, proven efficacious and prompt in its results. These, from my limited list, have been well tested:

For Constipation.—One pound of figs, two ounces of senna leaves (obtainable as any drug store), one cupful of good molasses. Chop figs and senna leaves quite fine, then add molasses, mix well and pack in small earthen jars or glasses. Keep well covered with a clean cloth. Rub in well, then wipe with a soft towel. For Chronic Diarrhoea.—Make a mild decoction from the dried leaves of a plant called frost weed, by steeping a small handful of the leaves in boiling water, enough to cover. Drink it hot in small portions until relieved. For Indigestion or Dyspepsia.—One calf's rennet, washed carefully, cut fine and soaked for a week in one quart of best cider vinegar. Take one tablespoonful fifteen minutes before each meal. For Bruises, Strains and Rheumatism.—One cupful of turpentine, one cupful of ammonia, two eggs. Beat well together and mix with one tablespoonful of Dandruff. Two ounces of pulverized borax, two ounces of gum camphor, broken in small pieces, one quart of boiling water. Bottle and cork tightly. Before using, dilute with one strain a small quantity and dilute with an equal portion of water. Apply to the head with a dannel cloth or with the hands. Wash the head and hair afterward with soft water. Glycerine and Rose Water for Softening the Hands.—One-half cupful of glycerine, one cupful of rosewater, one-half teaspoonful spirits of camphor. First put camphor in the bottle, then add glycerine and rose water, and add the one-half teaspoonful fifteen minutes before each meal. To drink ice-cold beverages when one is overheated is to incur the terrible risk of congestion of the brain, and even death resulting therefrom. The writer knows of a case in point; a young countryman, a foreigner who had been cutting hay and was overheated, went to the well and drank a quart of water. He then drank a bowlful, and in five minutes dropped dead. In fever all drinks that are all heating or exciting should be avoided. Anon. One cupful of turpentine, one cupful of ammonia, two eggs. Beat well together and mix with one tablespoonful of Dandruff. Two ounces of pulverized borax, two ounces of gum camphor, broken in small pieces, one quart of boiling water. Bottle and cork tightly. Before using, dilute with one strain a small quantity and dilute with an equal portion of water. Apply to the head with a dannel cloth or with the hands. Wash the head and hair afterward with soft water. Glycerine and Rose Water for Softening the Hands.—One-half cupful of glycerine, one cupful of rosewater, one-half teaspoonful spirits of camphor. First put camphor in the bottle, then add glycerine and rose water, and add the one-half teaspoonful fifteen minutes before each meal. To drink ice-cold beverages when one is overheated is to incur the terrible risk of congestion of the brain, and even death resulting therefrom. The writer knows of a case in point; a young countryman, a foreigner who had been cutting hay and was overheated, went to the well and drank a quart of water.
