ELMIRA, N. Y., Sept. 8, 1888.
MR. EDITOR:—How swiftly the days roll by. So much to see, so many places to visit, and all crowded into so short a time, hours seem minutes, and are gone before realized. As a farewell visit to Big Stream glen, I climbed its rough and moss grown rocks, narrow passages, and wide openings, and examined the curious and wonderful work done by the raging water which pours down here at certain seasons. Rocks worn as smooth as glass, wells formed in the solid stone, as perfect in its circle as if made by geometrical precision, with niches in the sides of the glen, looking as if the rocks had been taken out by human hands, and many other things from the pictures constantly being presented to the eye. There is very little water coming down the glen, so there is little trouble in getting about. Now and then there are pools from three to twenty feet deep, the cavities of which have been made by the action of the water. In the bed of the glen are great varieties of vegetation. I found sweet clover in abundance, marshmallows and other plants that seem much out of place. Woodbine and ivy were clinging to the rocks and trees, and a beautiful green moss covered large surfaces, from which it hung in numerous pedicles like tassels of zephyr. To all of which I gave one long lingering look, and said a sad farewell.

We came to Elmira a few days ago. This is a beautiful city, with great wealth and natural advantages, containing many elegant private residences and many manufactories, and is quite a railroad center. It is the home of Governor Hill, and here his political history commenced, and is about the same as that of Grover Cleveland in Buffalo, and received his first raise from the same class—the saloon and its frequenters. They are still his friends, and will see that he is re-nominated. Here is the home of State Senator Fassett, a Republican, chairman of the Acqueduct Investigating Committee. He has unearthed some very unsavory things, connecting the Governor with some "deeds that are dark," that will be likely to prove too heavy a weight to carry.

I could not refuse the invitation to attend Rev. Tho's. K. Beecher's Church. It was Children's Sunday, and in the body of the church were assembled over 800 children, all belonging to the Church Sunday School. It was an exhilarating spectacle. The manner of talking to children endears the pastor to them, and he is looked upon by children and adults with great veneration. No wonder he is a popular preacher. Among his congregation are found Presbyterians, Congregationalists, Unitarians and Universalists. He says, "no matter about creeds if you are Christians. The church building is a marvel, and the methods connected therewith, are not really very orthodox. Class rooms, social room, theatre or romp room, dining room, kitchen, library (Sunday-school and public), and dwelling. The length of the building is, from Church to Gray Streets, about two hundred and fifty feet, and is a fine structure of which Mr. Beecher is the architect. His Beecherisms are prominent and frequent in his sermons.

There are other things of which I would like to speak, but this letter is already too long. So ta-ta. H. E. B.

President Cleveland's letter of acceptance appeared Monday and dealt entirely with the questions of tariff and trusts.

The Canadian Cabinet discussed retaliation on Saturday with the impression that the United States would soon put it into execution.

The Minnesota Republicans declare themselves "uncompromisingly in favor of Protection." We commend this to the gentlemen who think Free Trade is making headway in the Northwest.

Since he wrote the Free-trade message in which he bore down on the system of protection with a light heart, the President has heard from Oregon, from Rhode Island, from Vermont, from Maine, and even from Democratic Arkansas.

Dillingham's majority in Vermont is 27,649, the largest given since 1864.

When Baby was sick, we gave her Castoria,
When she was a Child, she cried for Castoria,
When she became Miss, she clung to Castoria,
When she had Children, she gave them Castoria.

The Everlast Epoch.

"I will show wonders in the heavens and in the earth."—Job 2:10.

OUR eyes have seen and our heart quickens its pulsation as we read of events in the third century, the sixth century, the eighth century, the thirteenth century, but there are more far-reaching events crowded into the nineteenth century than into any other, and the last quarter bids fair to eclipse the preceding three quarters.

A FEW OF THE DISASTERS. I propose to show you that the time in which we live is an everlast epoch and wonderful for blessing, for there must be lights and shades in this picture as in all others. Need I argue this day that our time is wonderful for disaster? Our world has had a rough time since by the hands of God it was bowled out into space as an earthquake. Coriolis after convulsions.

DISASTERS EPIDEMIC. Look at the disasters epidemic. I speak not of the plague in the fourth century that ravaged Europe, and in Moscow and the Neapolitan dominions and Marseilles wrought such terror in London in 1665, and in the yellow fever, and the cholera, and the diphtheria, and the scarlet fever, and the typhoid of our own time.

DISASTERS VOLCANIC, cyclonic, epidemic. I say volcanic, because an earthquake is only a volcano lashed up. When Stromboli and Cotopaxi and Vesuvius stop-breathing, let the foundations of the earth beware.

AN ERA OF BLESSING. But now I turn the leaf in my subject, and I plant the white lilies and the palm-tree amid the nightshade and the myrtle. This age no more characterized by woe and disaster than by wonders of blessing.

ON THE EVE OF VICTORIES wide and wide-uplifting. There may be many years of hard work yet before the consummation, but the signs are so so encouraging that I can not but believe in it.

BLESSINGS OF QUICK COMMUNICATION; newspapers falling all around us thick as leaves in a September equinoctial. News three days old rapid and state. We see the whole world twice a day—through the newspaper at the breakfast-table, and through the newspaper at the tea-table, with an "extra" here and there.

SEVEN HUNDRED PEOPLE PRAYING, blaspheming, striking. Our great ship poised a moment on the top of a mountain of phosphorescent fire, and then plunged down, down, down, until it seemed as if the never weary waves might be righted.

Should I call the roll of the dead shipping? You monsters of the deep, answer when I call your names. *Victor, Harriet, The Schiller, Gen. Boston, The Monitor, The President, The Gibraltar, The Oregon!* But why should I go on calling the roll when none of them answer, and the roll is as long as the white scroll of the Atlantic surf at Cape Hatteras breakers.

THE SEA, now owning three-fourths of the earth, proposes to capture the fourth, and is contemplating the conquest of the world. The moving of our hotels at Brighton Beach backward from where they once stood, a type of what is going on all around the world and on every coast.

WONDERS OF SELF-SACRIFICE. A clergyman told me in the northwest on one of my visits that for six years he was a missionary at the extreme north, living 400 miles from a post-office, and sometimes he slept out of doors in winter, the thermometer sixty and sixty-five degrees below zero, wrapped in rabbit skins woven together.

WHEN TITANS play quills they pitch mountains, but who owns these gigantic forces you have been reading about the last few years? Whose hand is on the throttle-valve of the volcanoes? Whose foot suddenly planted on the footstool makes the continents quiver?

THE SHIP OF PEACE. A short time ago was at Fire Island, Long Island, and I went up in the cygna from which they telegraph to New York the approach of vessels hours before they come into port.

THE SHIP OF HEAVEN, mightiest craft ever launched, millions of passengers, waiting for millions more, prophets and apostles and martyrs in the cabin, conquerors at the foot of the mast, while from the rigging hands are waving this way as though they knew us, and we wave back again for they know us.

OF LIGHTNING was recently observed at Long Lake Park, south of Akron, Ohio, where a merry party of campers were kept busy dodging the rain drops. Just north of the camp grounds is a large field of oats, which has been gathered into shocks.

THE DISCOVERY OF ALLOYS possessed of special properties has attracted the attention of metallurgists from the earliest times, whose constant attempts to roll and roll to the grand Central depot form successful admixtures of two or more metals in varying proportions.

THE SPECIFIC GRAVITY OF DELTA METAL is 8.1—that is to say, it differs but a little in weight from iron, while it possesses many of its characteristics.

DELTA METAL can be applied to the following uses: pumps, gas-guns, torpedoes, tools for gunpowder-mills, parts of bicycles, guns, etc.

THE AVERAGE STREET GAMBLER is decidedly unmerciful toward insect life whenever he can obtain a little amusement at their expense.

AN ENTHUSIASTIC ornithologist has amused himself by investigating the question at what hour in summer the commonest small birds wake up and sing.

ONE GOOD COW—one that gives a large quantity of milk—is more economical than two that do not equal her.

SCIENTIFIC tests in Hungary show that corn will produce the largest yield of milk, while sorghum produces milk of the richest quality.

FARM NOTES.

TRAINING TOMATOES.—H. P. Johnson, Leavenworth Co., Kan., has found the following method of training tomatoes highly successful in a small garden.

HOW TO KILL AND DRESS A FOWL.—To dress a fowl with the least trouble, hang it up by the feet so that it will drop a convenient height.

IMPROVEMENT IN FARM POULTRY.—English writers are realizing the necessity of giving more attention to poultry.

TO GROW HOUSE PLANTS.—The soil must be rich for the perfect growth of house plants, and should be of a somewhat porous nature.

AFTER the turkeys shall have been well fattened they must be well dressed in order to command the highest market price.

REIN FOR A LEADING HORSE.—James S. Rude, Orange Co., N. Y., furnishes us a sketch and description of a rein.

FLORIDA IS THE GREAT PEANUT-BEARING State, and most of the crop is grown in the counties south and east of Petersburg.

THOUGHT is necessary in breeding, and every improvement that a man makes in his stock is evidence of the improvement of his own mind.

THE BEST breed of fowls you can select, and the one which will prove most satisfactory to you, is the breed you favor.

ONE good cow—one that gives a large quantity of milk—is more economical than two that do not equal her.

WILD cherry bark has long been held in great esteem in domestic practice as a remedy in bronchial inflammations.

FACE-TIA.

MISS CLARA (with a little cough).—You scarcely remember your grandfather, I suppose, Ethel?

TOO FUNNY FOR ANY USE.—Charlie (dejectedly)—Say, Tom, I've lost my best girl.

"IT is with unfeigned sorrow and a bleeding heart, Mr. Sampson," said the girl gently, "that I am compelled to say this, namely, that I love another."

MRS. SCREECHER.—Well, how was my voice to-night? Did it fill the room?

MRS. ANGIOMANIAC.—I see you advertise to furnish servants of any nationality.

HE FED THEM WELL.—New Comer (to summer resort landlord)—Is this a healthy place for my children?

Mr. Editor:—As you published something in regard to street leveling last week, allow me to submit the following as to the conclusions reached from that work. Railroad Avenue, from its intersection with Pleasant St., Pleasant from the same point to a point between Second & Horton, and also a basin on Horton Street, need raising about one foot. The dirt needed for this filling can be taken from the balance of Pleasant Street, across Third to Walter Horn's house, and from Second near French Street, and on to Platt. The ditches on Pleasant Street, when it is thus cut and filled and properly piked, will carry the water from Railroad Ave. to the county ditch on the easterly end of Pleasant Street. When Platt Street is opened and simply piked, the water will flow (if there is ever enough of it) from Railroad Avenue to Third; also along that avenue to Platt Street. The bottom of the county ditch is about eight feet below the level of the ground at Railroad Avenue and Pleasant.

OUR POLITICS.
We believe the Republican party to be the true
instrument of the POLITICAL PROGRESS
of the American people; and holding that the
honest enforcement of its principles is the best
guarantee of the national welfare, we shall sup-
port them with all our might; but we shall always
treat opposing parties with consideration and fair

AGAINST THE SALOON.
The MAIL AND EXPRESS is the recognized lead-
ing journal of the country in the great Anti-
Saloon Republican movement. It believes that
the liquor traffic as it exists to-day in the United
States is the enemy of society, a fruitful source
of corruption in politics, the ally of anarchy, a
school of crime, and, with its avowed purpose
of seeking to corrupt elections and legisla-
tion, is a menace to the public welfare and de-
serves the condemnation of all good men.

In brief, all who wish to have in their
homes a FIRST-CLASS NEWS-PAPER of
national scope, broad views, clean pages and
courteous and unobtrusive notices on ques-
tions of general public interest, will not be
disappointed in the MAIL AND EXPRESS, and
we respectfully solicit their influence and sup-
port.

Mr. HOYT:—As a citizen of this
community, I would like a little light
on the following questions:
1. What is the meaning of the in-
scription on the banner, which says,
"Protection to American Industries"?
does it mean to the distiller and brewer
and wine manufacturer?
2. What has become of the temper-
ance society of Hammonton? has it
been swallowed up by the flood-tide of
the aforesaid industries?
3. What do you think will be the
result of the wine industry which so
many of Hammonton are engaging in?
will it improve the morals or intelligence
of its citizens? will it increase their
wealth, health, or happiness? will it
have a good or bad influence on the
rising generation? Will it fill our in-
stitutions of learning, or our jails and
poor-houses?
4. What did Solomon mean when he
declared wine to be a mocker?
Now, if you will publish these plain
questions, so your readers can have
them answered, I will perhaps ask a few
more, and you may name me

INQUISITIVE.
1. The working classes of Europe are
compelled to work for very low wages,
hence manufactured articles are pro-
duced so cheaply that they can be sold
in America for less than our people can
produce them and pay American wages.
To equalize this, Republicans propose
to maintain a tariff, and thus "protect
American industries." The internal
revenue laws "protect" the liquor men,
but Republicans and Prohibitionists
propose to repeal this.
2. If you mean the Sons of Temper-
ance, they meet every week.
3. This local wine industry is a curse
to the community, as is the liquor busi-
ness anywhere. Its tendency is down-
ward, and it drags down everything
and everybody connected with it.
4. Solomon was wise enough to say
what he meant, and to know what the
effects of liquors are.

The Canadians are talking of seizing
Michigan, but it is all talk. The Re-
publican party has already seized Mich-
igan.
