CLOSING OUT SALE

W. F. DUDLEY

Will sell off his entire stock of

**Watches, Jewelry, Silverware,
Clocks, etc., etc., etc.,**

At Cost, to Close Business by Nov. 1st.

This is Your Chance.

New Sausage--at Jackson's.

FLOUR. FLOUR.

We thought the Flour market had reached its "bed rock" some time ago; but it has again "slumped,"— seems to be bottomless as to prices. We refrain from quoting, only in a general way,— might frighten you. Enough to say, can give

Good Flour, \$3.75 to \$5

Per barrel, with several grades and prices between these extremes. Every bbl. warranted, and delivered free of charge.

Now, just a word on another line. We have a few real bargains in some fine

**Imported English Decorated
Dinner, Tea & Toilet Sets.**

Note the prices we quote to start them,—

100-piece Dinner Set, 3 styles and colors, \$8.40

56-piece Tea Set, 3 styles and colors, \$3.60

10-piece Toilet Set, 2 colors, \$2.40

We know these are very low figures for these goods, but we want you to have them while they last, which won't be very long. We look for a rush,— "Don't get left."

ELVINS & ROBERTS

Bellevue Ave. and Main Road.

HAMMONTON, N. J.

Our World's Fair Letter.

CHICAGO, 1893.

"Chicago Day" at the Fair will live long in History. It broke the World's record of World's Fair attendance. The largest crowd that ever paid admission to one enclosure in a single day was there. The figure is 713,646 paid admissions; 37,000 persons were admitted to the grounds on passes, making a total of over three quarters of a million of people. The largest attendance at the Paris Exposition, (397,150) fades into insignificance beside that number, while the Centennial's largest attendance (217,426) is but a trifle.

Think what that number means,— 713,746! a multitude that could build a metropolis in a night; an army that could defeat a nation. Think again what an exhibition this throng presented.

Three quarters of a million people gathered in one park on one day, rich and poor, the honored and the friendless, the sport and the book worm, wanton youth and defenseless old age, people from every quarter of the earth, strangers and speaking strange languages, pushing, crowding and elbowing one another, all with the greatest good nature and friendliness. It is a scene unparalleled in history. Happy they who can tell of it to their grandchildren.

But Chicago and her friends did it, and Chicago never does things by halves. All trade in the down-town districts ceased—the stores were all closed, and the only life to be seen was the people going to or returning from the Fair, in carriages, tallyhoes, coaches, and all sorts of freight and delivery wagons, with seats improvised for the occasion. The regular transportation routes did nobly. The Cottage Grove Avenue cable cars were a living mass, held together by some strange cohesion. On top, in the windows, on the bumpers and footboards, wherever there was a foot or hand-hold, there was a person for the place. At the entrance to the elevated there was an awful crush for hours in the morning which at times threatened to turn into a panic. At the Van Buren Stoviaduct, leading to the I. C. express trains and steamboats, there was a compact mass that moved only by inches. At noon one had to wait hours to reach the train. But they all waited; they all got there at last, and without any panic.

The day was perfection,—a typical Autumn day, with cool breeze and bright sunshine. The gates at the Fair grounds were opened at 6:30 in the morning, instead of 8:00, the usual time, but it is estimated that there were 15,000 people waiting even at that early hour. For twelve hours thereafter the turnstiles kept up an almost continuous hum. At intervals the people in line at the gate extended almost two blocks.

About noon the hitherto sacred grass around the various buildings began to lose its sanctity, and by afternoon every one preempted as much as he could occupy. From the top of the Manufactures building all that could be seen of the throng was a moving mass of hats. It was impossible to see exhibits with any satisfaction. The State buildings were packed early in the day, and the scene on Midway was indescribable. It seemed as if the people were pushed into the shows whether or no. A way frequently resorted to for getting thro' the crowds was to run in the wake of the ambulance wagons as they dashed to and fro among the crowds, and it seemed getting desperate when a bearded man pushing his wife in a rolling chair came rushing along almost under the axle of a hurrying ambulance.

The other great exhibitions of the day, besides the people, were the fireworks and the procession of floats. Long before the appointed time the line of march was covered with humanity. In vain did the guards clear a fifteen foot passage way; and it was not until the mounted Hussars galloped along in advance of the procession that it could move. The first float was entitled "I will," or Chicago in her growth welcoming the nations of the earth. The next was an Indian float, portraying Chicago in 1812.

The next, Chicago in war, carried her illustrious warriors, Sheridan, Lincoln, Grant, and Richard Yates the war governor, represented by living men. Next came a symbolic representation of Chicago in peace. Then "Chicago Prostrate," depicting the fire and the ruins of Chicago in 1871. At this time on the Lake Front huge bombs were exploding 500 feet in air, filling the sky with radiant stars, fire fountains belched forth streams of green red and gold fires, while Niagara Falls and burned Chicago were pictured in fire. Then a search light wrote the attendance for us on one of the buildings, and we went home. ADAM ANTINE.

J. C. ADAMS FARM, on Oak Road, is for sale. Forty acres, nearly all cultivated. Good house and barn and other buildings. Small cranberry bog included. Terms quite reasonable. Inquire on the premises, or at the Republican Office.

\$100 REWARD. I will pay One Hundred Dollars for evidence that will convict the party or parties who broke the glass on my daughter's grave, in Greenmount Cemetery, Hammonton, N. J., and stole the photograph from its frame, on Sunday afternoon, October 1st, 1893. ALEX. AITKEN.

Time changed on the C. & A. Railroad, on Sept. 27th. Trains now leave Hammonton as follows:

Up,— Accommodation, 6:05 A. M.; Mail, 7:30; Express, 9:40; accommodation, 12:30 P. M.; Mail, 3:50; Express (Wednesdays only), 6:30.

Down,— Acc., 9:19 A. M.; Exp., 9:52; Acc., 3:53 P. M.; Exp., 5:52; Acc., 6:55; Acc., 7:57.

AN OLD SOLDIER MADE HAPPY.—"During my term of service in the army, I contracted chronic diarrhoea," says A. E. Bending, of Halsey, Oregon. "Since then I have used a great amount of medicine, but when I found any that would give me relief it would injure my stomach, until Chamberlain's Colic, Cholera, and Diarrhoea Remedy was brought to my notice. I used it, and will say that it is the only remedy that gave me permanent relief and no bad results follow." For sale by Cochran, druggist.

Mother & Daughter

Testify for Munyon.

They are Entirely Cured of Catarrh,
Nervousness, and Stomach
Troubles,
After Years of Suffering.

Munyon's Home Remedy Co.
GENTLEMEN—Munyon's Catarrh Cure
has cured me of Catarrh, with which
I have been troubled for a number of
years. My daughter Mary has been
cured of stomach trouble and nervous-
ness by using Munyon's Stomach and
Dyspepsia Cure. I have implicit confi-
dence in all of Munyon's Remedies, and
hope you will publish this letter, that
the public may know the good they
accomplish. Yours respectfully,
Miss A. P. McCOMBS,
Haver de Grace, Md.

Are you a sufferer from catarrh? Are
you willing to investigate a treatment
that cures catarrh by removing the cause?
If you cannot come to the office for a free
examination, ask your druggist for a 25
cent bottle of Munyon's Catarrh Cure and
a 25 cent bottle of Catarrh Tablets. The
Catarrh Cure will eradicate the disease
from the system, and the Tablets will
cleanse and heal the affected parts and
restore them to a natural and healthy
condition.

Munyon's Dyspepsia Cure is guaran-
teed to correct constipation and cure all
forms of indigestion and stomach trou-
bles, and all nervous conditions due to a
disordered stomach.

Munyon's Rheumatism Cure never fails
to relieve in three hours, and to cure in
a few days.

Munyon's Homeopathic Home Rem-
edy Company put up specifics for nearly
every disease, which are sold by all drug-
gists, mostly for 25 cents a bottle.

The Republican.

[Entered as second class matter.]

SATURDAY, OCT. 21, 1893.

Chas. A. Baake is the regular
nominee of the Republican party of
Atlantic County for Assemblyman. He
does not represent the Republicans of
this County, and we repudiate his candi-
dacy. — will neither support nor vote
for him.

Last year we submitted to what
seemed the will of a majority, though
against our judgment. Mr. Baake was
elected, and was one of three Republican
members of the Legislature to vote for
the race-track gambling bills, — a dis-
tinctly Democratic measure, supported
by the Democratic caucus, voted for
by nearly every Democratic legislator.
Thus he forfeited all claim on Republican
support. This year, in spite of the
clearly expressed opinion of every
Republican party in the County, in the
face of outspoken opposition on the part
of the best element of the party, Mr.
Baake worked for a re-nomination, and
secured it by so narrow a majority that
pride should have compelled him to
decline. Did he do so? Oh, no! He
accepted, and in his speech defended
his action as an Assemblyman, and
virtually promised to do so again. If
opportunity was afforded him.

Republican voters, scratch his name
from your ticket. We favored an inde-
pendent Republican candidate; but
older heads counseled otherwise. We
cannot yet ask you to vote for the
Democratic nominee, though he prom-
ised his convention to do what he could
for the repeal of race-track laws — yet a
vote for him would be preferable to one
for a nominal Republican who has bet-
rayed his party, and whose re-nomina-
tion was an insult to every Christian, to
every order-loving citizen, to every
moralist in this county.

Smith E. Johnson, the nominee for
Sheriff, has held that position, and
made an efficient official, having the
confidence and approval of the Court.
Mr. Crensey, for Coroner, is entirely
unknown to all with whom we have
conversed.

That we are not alone in our opposition
to the candidacy of Chas. A. Baake for
Assemblyman, will be seen by the
following from the Atlantic Review of
Monday last:

The County Convention on Saturday
last, in the resolutions unanimously endorsed
the address of the Republican State
Executive Committee and then placed
in nomination a man as the county
standard bearer whose acts helped to
make that portion of the address refer-
ring to the race course legislation of last
winter necessary. The Review has
always been opposed to the legislation of
which Mr. Baake was a party to and as
he has accepted the Republican nomi-
nation without defining his future course
on these measures or similar ones we
cannot see our way clear to give him
our support. The issue before the people
is not a party one, but one between right
and wrong, between the good citizens and
legalized gambling. The anti-race-track
movement has always endeavored to main-
tain good government and we do not
care to cast our lot with the faction
which is trying to override law and
corrupt and bias the good name of the
State.

PAINT! PAINT!

THE

HAMMONONTON.

When you buy the Hammononton
Paint, you do not buy seven-
eighths of a gallon for a gallon,
or three pints for a half gallon;
nor do you get one of those
packages that weigh 12 to 14
pounds, and containing so much
alkali that it appears to be so
thick that it is impossible to
use it without thinning; but in
buying the Hammononton you get
a full standard gallon of paint,
weighing 14 to 16 pounds to
the gallon, made from the best
materials known to the trade,
and costs the consumer from \$1
to \$1.50 per gallon for honest
paint.

If the purchaser doesn't want
honest paint, and wants to be
honest to himself, then be sure
to buy the Hammononton Paint,
and the manufacturer will give
a receipt with every gallon sold
telling you how to make two
gallons of paint out of one of
the Hammononton. It will cost
33 cents for the extra gallon.

One Dollar.

And then here comes Commercial
Paint, in 30 shades, — the best wearing
paint ever put on the market for so low a
price as \$1 per gallon, and guaranteed
to be a first-class wearing paint. If any
one should not want to pay so high a
price for a good exterior paint, then work
the 33 cent racket, and get two gallons
for \$1.33. Manufactured at
Hammononton Paint Works.

Fruit Growers' Union

Hammononton, Oct. 21st, 1893.

Just now, when money is
"scarce," it is very natural for
you to want to make every
dime and every dollar count.
You should make your pur-
chases where you can buy most
advantageously, — not neces-
sarily where the Price is lowest,
but where Quality and Price
are best proportioned. A care-
ful examination of our stock,
and inquiry as to prices, will
show that we had that "best
proportion" in mind when
marking the goods.

Looking for Dress Goods?

One of the most desirable of
Dress Goods is the Storm
Serge. It makes up well, is
always "in style," and wears
"like a board." Our 45-inch
all-wool Diagonal Storm Serge
at 90 c. is a decided bargain —
\$1 is its value. We have it
in both Navy Blue and Black.
Then we have another, a
38-inch Storm Serge, in Navy
Blue only, at 50 c.

We take particular pride in
our stock of Black Dress Goods
— both as to variety and price.

Black Dress Goods

At 25 c. Wool Faced Hen-
rietta, full 36 in. wide. Great
value.

At 45 c. Wool Cashmere,
full 36 in. wide. A regular
50 c. quality.

At 55 c. Wool Cashmere,
full 38 in. wide. Very fine
grade.

At 75 c. Wool Cashmere,
full 38 in. wide.

At \$1. Wool Cashmere,
full 45 in. wide. Also Wool
Henrietta, 38 in. wide.

Shawl Bargains.

Small lot of Cashmere and
Merino Shawls, some slightly
damaged, others are all right.
Former prices were all the way
to \$1.80; anything in the lot
can be had for 50 c.

Calicoes at 6 c.

A whole counterful of re-
nants, short ends, etc., of high
priced prints, century cloth, etc.
Were from 8 to 19 c.
Just the thing for quilts.

You will Save

from \$2 to \$5 on your
coat if you buy it here and
now. The Ladies' Coats be-
gin at \$3, and are up to \$7.50.

Flannels.

Probably there isn't another
stock in town as complete as
to qualities, colors, and prices,
as this.

Blue Flannel from 25 c. to 55 c.
Red Flannel from 22 c. to 45 c.
White Flannel from 9 c. to 47 c.
Grey Flannel from 15 c. to 33 c.

Hammononton to Newtonville on Monday
evening, and organized a Y. P. S. C. E.
in the M. E. Church.

The Baptist C. E. Society will
give a social, next Monday evening,
at the residence of David Menaley.
Admission, — cents.

Geo. C. Crawford, of Cape May
City, with his little son, visited our
townsman Capt. Crawford. He was
delighted with our beautiful town.

The Whitte family have moved
to their new home, Second and Grape
Streets. R. G. White and family will
occupy the Third Street house thus
vacated.

S. E. Brown & Co. appear in an
advertisement this week. The firm is
too well known to need any recom-
mendation from us. Read what they have
to say for themselves.

The convention of Christian
Evidences at Trenton last week
adopted resolutions pledging its voters
throughout the State to support only
anti race candidates.

A terrible storm visited us last
Friday night. The wind's force was
fearful, rocking houses to the danger

WAITING.
I am waiting alone while shadows grow,
And the light is the light of dawn.
Waiting, while shadows come and go,
In the sunset glow.
A roselike gleam through the falling light,
Just the ghost of a roselike glow,
In its loveliness drops of light—
Will be come to-night.
"I will come to you when the sun gleams
redly."
"O'er the golden sea to the west," he said;
"Alas! the sun has already set."
"And you're not here!"
"The sea is gray" beneath the twilight
skies.
"The seagulls hover and wheeling fly,
To their nests on the cliff, bare and
high."
"And still wait I."
"He is waiting yet upon his way,
Tarrying he, until I wait and pray
at the garden gate, north the rose spray,
Where the moonbeams play."
"Alas! how the perfume of that rose
Amid the silence heavy grows!"
"The wandering night wind" scarcely blows
In the dreamy repose.
"It will come," he said. Ah! Love, come
now.
For time flies fast, I know not how.
I wait beneath the starry hough,
But where the dawn
—Lydia M. Wood, in Chambers' Journal.

THE FEUD IN HICKEY.

BY R. C. MERRICK.

HE feud all started
on account of
a peaching calf,
which, per-
mit me (a stock-
raiser of limited
but fruitful ex-
perience) to in-
ter-
lope, there never
was nor can there
ever be a creature
more hopelessly
unconquerable and
vicious, nor more
productive of
sinful language
and display of sultry temper on the part
of its keepers. Yielding calves have
caused the recording angel more trouble,
broken up more old friendships, pro-
duced more family jars, and, in the
form of veal, begotten more indigestion
and the incalculable amount therefrom,
than has not an eagle on the sig-
nificant, sportive stealer and his short-
comings.

The Walkers and the Benedicts had
been old neighbors for years—back in
"Toway" in fact, the elder Walker
and the elder Benedict had been mar-
ried about the same time, at the
beginning of the war, and had just
started on adjoining homesteads when the
first gun was fired on Fort Sumter.
The men enlisted in the same company,
fought side by side, ate and slept and
suffered together, and at home their
young wives waited and wept together.
When the little Walker and the little
Benedict grew large enough to talk
about, they were playmates and boon
companions; the children of one family
as much as liberty in the home of the
other. They did not quarrel, but as the
twenty-eight years the two families had
lived in peace and amity, and then that
miserable calf precipitated an irreparable
row.

It was too bad, all the neighbors
said, but it is a noticeable fact that none
of them attempted to catch up the calf,
—life in Hickey Township and
Hickey Corners would have been dull,
indeed, but for the feud; so everybody
aid and watched each new phase of the
war with nervous, morbid interest,
and commented thereon, but not in a
manner likely to prove conducive to a
truce on the part of the disputants.

It was this way: "The Benedict and
Walker houses had been built on adja-
cent corners of the homestead quarter,
and were quite close together; in fact,
one wall, sunk on the quarter-section
line between the two homesteads, had
been built for both families for the
first four years after coming to Dakota,
and it was only a short distance from
either house.

But it came to pass that on the Walker
domain there was born, and grew, and
waited fat and "easy," a brute calf,
with a right smart countenance and
eyes and a plethora of deep-dyed mischief
in its soul—and he (for it was a young
gentleman "colt"), well, yet of ten-
der age but tough enough engendered
the feud. He had wandered away the
day before, and when he returned at
night the gate of the calf-pen was shut
against him; and in the morning, when
Papa Benedict arose from breakfast
family prayers, and, followed by the
younger male Benedict, hid him to-
ward the stable, he beheld his neigh-
bor's impatient stealer nipping in the bud
sundry young and toothsome calves,
and kicking out of the earth, in his
bovine abandon all he could not eat.

engagement, and started, in some haste,
to keep it, heading directly across the
croquet ground. Papa Benedict waited
to follow with more dignity than the
calf desired, his feet were
scraped from under him by a
wicket, and he was being handled the
way the vaqueros in South America are
supposed to make butter—stirred out of
a hoag. "I don't look very neat
when a few minutes later, he reached
the Walker place, and called him out
to see what he was doing. He was hold-
ing the calf up short, but the calf was
so impatient that he slipped the calf
under his arm, and Papa Benedict
to which Papa Walker replied in kind—
whereat Papa Benedict seized a conven-
ient neck yoke and killed the cause of
the trouble.
Of course there was a fight, and con-
siderable ill-chosen language; then, as
soon as possible, Papa Benedict sued
Papa Walker for the damage to his cal-
ves, and Papa Walker sued Papa
Benedict for the value of the calf. After
that, they prosecuted each other for
assault and battery; the younger members
of both houses "bussed" each other at
every available opportunity. Mrs. Walker
and Mrs. Benedict did no more "neigh-
borly" than most Benedict and Neig-
Walker "busted up" with each other.
That is, Nellie broke with Mort, who,
for his part, was a wholesome content
for funds and such nonsense, and would
fair have ignored the state of affairs, so
far as the Nephe was concerned, except
for the opposition any overtures from him
would have cost him. As for Papa Ben-
edict, he was a little more "neigh-
borly" than Papa Walker, and he had to
grin and bear it, leaving, however, all
hostilities to the others, and speaking
pleasantly to any of the Walkers he
came across.

But, finally, through a rash act of his
own, he was forced into the feud. There
was a building here, of the good old fash-
ion, at Thompson's, one night,
and the younger members of the houses
house attended. During the evening,
Mort found a red ear in his pile, and
he never knew what impelled him to do
it, unless it was that Nellie looked so
pretty and tempting—he took his former
swath in his arms and kissed her,
not once, but three times.
As soon as it could be done without
knowing of it, Bud Walker and Jarvis
Frederick invited Mort and Pel together
into the moonlight pasture, where Bud in-
vited on "having it out." Mort de-
clined, but in vain, and, much to his
dislike, was forced to "lick" to a stand-
still; not only the man—he hoped some-
day to call his brother-in-law, but the
house's second as well. Pel, however, a
cripple and unable to accommodate
young Frees, who was "punch" on ac-
count of his principal defeat.

That settled it. Thereafter, even if
tender-hearted Mrs. Walker, who, like
Mrs. Benedict, sincerely but silently re-
gretted the trouble that kept her apart
from her old-time friends these four
long years, and who had always had a
special fondness for Mort, who was a great fa-
vorite of hers—cut him dead when she saw
him, and even the frigid
inclination of the head with Nellie
household, recognize his presence
on those rare occasions on which they
met was now denied him.

All this cut Mort deeply, but he was
made of too tough fiber to show it; so,
at the end of the feud, he tried to act
as though he did not care, just as did
Nellie, who, however, was obliged to
confess to "herself" once in awhile, that
she did care, "lots."
The spring of 1885 is a memorable
one in the history of many portions of
the Dakotas. The amount of rain in the
fall, and the snowfall of the winter pre-
ceding, had been very slight, indeed,
and there were no spring rains to en-
courage the farmers. The creek beds
and coulees were dry; the lake beds and
sloughs were as innocent of water as
powder-magazines; and the matted
grasses and reeds standing in them were
as dry as the grass on the prairie.
Everything invited the fire-drift, and the
outcrops of the homestead quarter,
and were quite close together; in fact,
one wall, sunk on the quarter-section
line between the two homesteads, had
been built for both families for the
first four years after coming to Dakota,
and it was only a short distance from
either house.

In C. County and its neighbors,
however, all felt secure; the fire was
far from them, and being gradually
exterminated. Besides, they were in the
Jim River Valley; it is curious how much
confidence the proximity of a river will
give to the settler who is threatened by
prairie fires.
Mort Benedict and his father were re-
turning from the county town one day,
having been in to leave "mother" for a
few weeks, and on the way, when they
were passing the place where the head-
quarters of the feud were, they saw
that there had been rumors of fire only twenty
miles or so to the north, and they were
talking of this as they crossed the bridge,
four miles from home. As they rounded
the top of the hill on the west side of
the river, Mort glanced at the northern
horizon, which was not distant, on ac-
count of a range of hills running east
and west, and he saw that the smoke
was just rolling up above the line of
hills.

"Look, father!"
"Startled, the older man did so.
"Good heavens, Mort! She's coming!"
"an' come fast!—We got 'r race, 's a
thing!"
"And race they did, but the fire was
driving east and when they drove their
horses into the door-yard, the
dames were only a few miles away and
coming down at lightning speed.

While Tom and Roy saddled their
ponies and rounded up the live stock,
Mort Benedict and the three elder boys
and—Ben—were in an incessantly short-
space of time, put into the two wagons every
thing that was valuable to them, and
Nutmegs in the quantity of two of
these dynamite will cause both stupor and
delirium.
A stove sat laid on the hot coals in
the center of the hall, and the children
were so hot that they may be easily
removed.
The main elements in the make-up of
the world are oxygen, nitrogen, hydro-
gen, carbon, silicon, sulphur, aluminum,
calcium, copper, iron, lead, potassium,
sodium and iodine.
Oysters come nearer to milk than all
most any other common food material
as respects the nutritive value. The re-
lative proportion of nutrients, the food
value of equal weights of milk and oys-
ters being nearly the same.
It is somewhat singular that, notwith-
standing the great advances made in
the study of nutrition, very little satis-
factory silver alloy has been dis-
covered for coinage and other purposes
than the alloy used 800 years ago.
The best lighted city in Europe is
Munich, Germany. One street only is
employed in its two central stations.
The curious feature of the system of dis-
tribution is that the wires, instead of being
carried on poles, are suspended from the
bushes under the eaves of the houses.
In summer, Paris is a city of flowers.
The two parts of the bridge Post-
Neut about a hundred cubic inches of
water every second, moving with a force
of 3500 horse-power. Every hour
360,000 cubic metres of water pass
under the arches of the bridge, or 6,640,
000 cubic metres in a day.
A Roman has offered King Humbert
a novel instrument of warfare. This is
a projectile, which on being shot from
a cannon and striking an object will
produce a luminous stage, of 100,000
candle power, and thereby expose to
view an enemy's position by night at a
distance of from three to four miles.
A miniature thunder factory has been
constructed for the science and art de-
partment at South Kensington, Eng-
land, with plates seven feet in diameter,
which, it is believed, would give sparks
thirty inches long, but no Leyden jars
have been found to stand the charge, all
being pierced by an enormous tension.
M. Bonnet, Chief Engineer of
the French Light-house, has perfected a sys-
tem by which he can project a force
of 2,000,000 candles by means of four lenses
instead of twenty-four, as previously,
and by a novel system of rotation make
the light as bright as the sun. The
inventor claims, as the finest result
yet achieved anywhere.
Electric light baths are among the
latest inventions. The necessary parts
of such a bath are a cabinet which will
inclose the entire body of the patient,
and fifty electric lamps of sixteen candle-
power, or 110 volts, arranged about the
body in groups, with a separate switch
for each group. The light is thrown on
the patient by means of a battery of
frisky and brawling the alkali like an
ocean bath.

C. G. Jennings, formerly Superin-
tendent of the Brush Electric Light
Company of Buffalo, N. Y., has pat-
ented a system of telephonic communi-
cation, by means of which barbed wire
fences can be utilized between railroad
stations, farmers' houses and large
ranches. The patent involves the use of
a portable transmitter or telephone,
which can be attached to the barbed
wire at any point, and by which mes-
sages can be received or sent to railroad
stations or other places at which there
are regular telephones.
Has a Finger-Reducing Patent.
The Patent Office has granted a pa-
tent on a device worthy of the ancient
Greeks. It is a system of finger-plate
and joint-reducing bands. The idea
which can be attached to the hand
and wrist, and by which mes-
sages can be received or sent to railroad
stations or other places at which there
are regular telephones.

When Mort awoke, he could not get
some time realize where he was, and lay
for some minutes trying to remember.
Oh, yes; he was in Will Berry's room.
He remembered the entries on the wall
and the white curtains at the windows.
Some one came in softly from the next
room.
"Who is it?" he asked.
"It was Nellie, and she came and leaned
over him. "It's me, Mort. I've been
here all the time. I thought you know
me, sometimes. You've been always, I
mean, here, I've been here, I've been here."
She sat down on the edge of the bed
and put her hand on his shoulders.
"If you want me to, Mort."
He lay there for a moment, but he
her at arms' length, and she said:
"But how about 'er feud, Nellie?"
"You ain't no more feud, Mort."
—St. Catharines Argonaut.

It is stated by an actor that the elec-
tric lamp used as footlights is harder on
the eyes of the performers than either
gas or candle light.
Every day is a little life, and our
whole life is but a day repeated.
Those, therefore, that dare lose a day,
lose a day, and those, therefore, that
dare mispend it, mispend it.
If you have grit and perseverance, you
cannot fail. Choose your under-
taking according to the best common
sense and stick to it. You are bound
to win.

There have been delivered to cer-
tain persons through the postoffice
during the last week notices which,
aside from their solemnity, are some-
what ludicrous. Here is one of them,
addressed to a former citizen, who is
now, it is hoped, in a better and
thinner than this: "You are hereby notified
that, pursuant to the statute in that
behalf, a court of revision of the
voters' list for the municipality of
St. Catharines, in the year 1893, will be held by the judge
of the county of Lincoln, at the
court-house in the city of St. Catharines,
on the 6th day of September,
1893, at 10 a. m., and you are re-
quested to appear at the said court,
for that—bath complained that
your name is wrongfully inserted in
the list, and you are requested to
appear at the said court, for that—
St. Catharines Star.

calcium, copper, iron, lead, potassium,
sodium and iodine.
Oysters come nearer to milk than all
most any other common food material
as respects the nutritive value. The re-
lative proportion of nutrients, the food
value of equal weights of milk and oys-
ters being nearly the same.
It is somewhat singular that, notwith-
standing the great advances made in
the study of nutrition, very little satis-
factory silver alloy has been dis-
covered for coinage and other purposes
than the alloy used 800 years ago.
The best lighted city in Europe is
Munich, Germany. One street only is
employed in its two central stations.
The curious feature of the system of dis-
tribution is that the wires, instead of being
carried on poles, are suspended from the
bushes under the eaves of the houses.
In summer, Paris is a city of flowers.
The two parts of the bridge Post-
Neut about a hundred cubic inches of
water every second, moving with a force
of 3500 horse-power. Every hour
360,000 cubic metres of water pass
under the arches of the bridge, or 6,640,
000 cubic metres in a day.
A Roman has offered King Humbert
a novel instrument of warfare. This is
a projectile, which on being shot from
a cannon and striking an object will
produce a luminous stage, of 100,000
candle power, and thereby expose to
view an enemy's position by night at a
distance of from three to four miles.
A miniature thunder factory has been
constructed for the science and art de-
partment at South Kensington, Eng-
land, with plates seven feet in diameter,
which, it is believed, would give sparks
thirty inches long, but no Leyden jars
have been found to stand the charge, all
being pierced by an enormous tension.
M. Bonnet, Chief Engineer of
the French Light-house, has perfected a sys-
tem by which he can project a force
of 2,000,000 candles by means of four lenses
instead of twenty-four, as previously,
and by a novel system of rotation make
the light as bright as the sun. The
inventor claims, as the finest result
yet achieved anywhere.
Electric light baths are among the
latest inventions. The necessary parts
of such a bath are a cabinet which will
inclose the entire body of the patient,
and fifty electric lamps of sixteen candle-
power, or 110 volts, arranged about the
body in groups, with a separate switch
for each group. The light is thrown on
the patient by means of a battery of
frisky and brawling the alkali like an
ocean bath.

Scientific and Industrial.
The glow worm lays luminous eggs.
Banana flour has been produced in
small quantity in some parts of America.
Nutmegs in the quantity of two of
these dynamite will cause both stupor and
delirium.
A stove sat laid on the hot coals in
the center of the hall, and the children
were so hot that they may be easily
removed.
The main elements in the make-up of
the world are oxygen, nitrogen, hydro-
gen, carbon, silicon, sulphur, aluminum,
calcium, copper, iron, lead, potassium,
sodium and iodine.

FRAZER AXLE GREASE

BEST IN THE WORLD.
 The following qualities are unsurpassed, actually
 outlasting two boxes of any other brand. Not
 sold by dealers, only by the FRAZER AXLE GREASE CO.
 FOR SALE BY DEALERS GENERALLY. 1917

WE WANT YOU

As set at our agent. We furnish an expensive
 suit and all you need free. It costs nothing to
 try the business. We will treat you well, and
 help you to earn ten times ordinary wages. Both
 sexes of all ages can live at home and work in
 spare time, on all the time. Any one who
 can earn a great deal of money. Many have made
 Two Hundred Dollars a Month. No class of
 people in the world are making so much money
 without capital as those at work for us. Business
 pleasant, strictly honorable, and pays better than
 any other offered to agents. You have a clear
 field, with no competition. We equip you with
 everything, and supply printed directions for
 beginners which, if obeyed faithfully, will bring
 more money than will any other business. Im-
 prove your prospects! Why not? You can do so
 easily and surely at work for us. Reasonable
 industry only necessary for absolute success.
 Pamphlet circular giving every particular is sent
 free to all. Do not miss sending for it.

FOLKS REDUCED
 From Mrs. M. J. H. of
 Belleville, Kan.:
 "When I began your
 treatment I weighed 160 lbs.
 and was 5' 10" tall. After
 using your Compound Oxygen
 I now weigh 120 lbs. and
 am 5' 6" tall. I feel like a
 new being. My blood is
 pure and all my ailments
 are gone. I am now
 strong and healthy. I
 can do all my work
 and am happy. I
 am a great
 believer in your
 Compound Oxygen
 and will
 recommend it to
 all my friends."
 PATENTS TREATED BY MAIL. CONFIDENTIAL.
 Send 6 cents in stamps for particulars to
 DR. G. W. F. SYDNER, 1100 WICKER STREET, CHICAGO, ILL.

Papers and magazines
 of all kinds, in any language,
 furnished at reduced rates by
 the Editor of the SOUTH JERSEY
 REPUBLICAN. Call and get our
 figures for anything of the kind
 wanted, whether literary, reli-
 gious, trade, or any other sort
 of periodical.

Between the Compound
 Oxygen Treatment of Dis-
 eases and that by the use
 of Drugs? It is an import-
 ant one.
 Drugs are taken into the
 stomach. For this reason
 their action is not direct.
 Compound Oxygen is taken
 into the lungs, and, there-
 fore, comes immediately into
 contact with and is absorbed
 into the blood.
 Drugs, being generally
 poisons, act by causing a
 disturbance in the body.
 Compound Oxygen, being
 composed of the elements
 of the air, and acting upon
 the blood, is not open to this
 objection.
 But, however it may act,
 it has certainly cured many
 cases of chronic disease,
 in which drugs have failed.
 This is the point
 of greatest interest to all
 chronic sufferers. To all
 such we say:
 Send for our book of 200
 pages, — sent free. Read
 for yourselves what Com-
 pound Oxygen is, how it
 acts, and, above all, what it
 has accomplished.
 Address,
DRS. STARKEY & PALEN,
 1529 Arch St., Philadelphia,
 San Francisco, Cal., New York City,
 Toronto, Canada.

AT
BEDTIME
 I TAKE
 A
PLEASANT
HERB
DRINK
 THE NEXT MORNING I FEEL BETTER
 AND MY COMPLEXION IS BRILLIANT.
 My doctor says it acts gently on the stomach,
 liver and kidneys, and is a pleasant laxative. This
 drink is made from herbs, and is prepared by
 an expert chemist. It is called
LANE'S MEDICINE
 All druggists sell it at 50c. and \$1.00 a package.
 It cannot be taken too often. For the complete
 Family Medicine more the best
 in order to be healthy, this is necessary. Address

President Cleveland should revise that
 remark of his about having a Democratic
 Congress "on his hands." The failure
 of silver repeal calls for its reversal, so
 as to read that Congress has the Presi-
 dent on its hands.

The Monmouth Democrat, in the issue
 of last week, justifies its course in holding
 its party's nominations thus: "There
 are but two parties in the present election
 canvas—the race track party and the
 anti-race track party. On one side are
 all the gamblers and others who prey
 upon the honest industry of the State,
 and upon the other side the honest
 business men, and the respectable and
 moral and religious elements of the
 community. This is a plain statement
 of the bottom facts as the parties stand
 arrayed against each other. Twist it in
 any way you please, you can make no
 other showing than this."

The South is in the saddle on the
 silver question, as on other public mat-
 ters. But then there is nothing new in
 its attitude. It always held that its
 own minority could rule the Northern
 majority.

There are forty-five Democratic mem-
 bers of the Senate all pledged to the
 repeal of the Sherman act. They are a
 majority of five in the whole membership
 of the chamber. Why was a test of
 physical endurance necessary. Can't
 the majority control its own votes?

THEY GIVE THEIR REASONS.—Perhaps
 some of our readers would like to know
 in what respect Chamberlain's Cough
 Remedy is better than any other. We'll
 tell you. When this Remedy is taken as
 soon as a cold has been contracted, and
 before it has become settled in the sys-
 tem, it will counteract the effect of the
 cold and gradually lessen its severity;
 and it is the only remedy that will do
 this. It acts in perfect harmony with
 nature, and aids nature in relieving the
 lungs, opening the secretions, liquefying
 the mucous and causing its expulsion
 from the air cells of the lungs, and re-
 storing the system to a strong and heal-
 thy condition. No other remedy in the
 market possesses these remarkable prop-
 erties. No other will cure a cold so
 quickly. For sale by A. W. Cochran, the
 druggist.

 All the Weekly News of the World for a Trifle!

The NEW YORK Weekly TRIBUNE

A twenty-four page journal, the leading Republican family paper of the United States, is filled with interesting reading matter for every member of a country family. It is a National Family Paper, and gives all the general news of the general news of the United States and the world. It gives the events of foreign lands in a nutshell. Its "Agricultural" department has no superior in the country. Its "Market Reports" are recognized authority in all parts of the land. It has separate departments for "The Family Circle" and "Our Young Folks." Its "Home and Society" columns command the admiration of wives and daughters. Its general political news, editorials and discussions are comprehensive, brilliant, and exhaustive.
