New York, Oct. 24, 1877.

Business.

As everything pertaining to the business of the country is of interest, I called upon several of the business men. The reports were all alike. Business is now better than at any time since the war. The volume of trade is not so large, more discretion and judgment is being used, and the quality of the goods purchased is different. The purchases of fine goods are much less, and trade runs largely to necessities. In brief, merchants are buying liberally, though very carefully, and buying intending to pay. The reports are all to the effect that the farmers are doing well, and buying fairly well, while the working people in the towns, especially those that are dependent upon manufactures, are poor, and are buying very little, as yet. But there is a strong hope of improvement in these, as the good condition of the farming community cannot but improve their condition. Altogether the merchants are of the opinion that the good times have commenced, and that they will continue till we get back to a good, safe, steady-going condition of things.

THE OBLISK.

The English succeeded in getting permission of the Khedive of Egypt to remove to London the Alexandrian obelisk, which every school-boy has read of, known as Cleopatra's Needle. It is now on its way to England and will be set up in Trafalgar Square. Not to be behindhand, an American merchant, who withholds his name, persuaded the Khedive to permit another one to be brought to New York, and he donated the cost of bringing it, \$100,000. The papers are all drawn, and as soon as steam can do it, an obelisk that Moses and Aaron looked upon will be set up in the youngest of the great cities of the world. Who the donor is, no one knows, but time will reveal the secret. It was a generous and noble act.

ANOTHER STRIKE.

This time it is the cigar-makers. Five thousand of them, and doubtless justly so, have quit work, and are trying to make the strike general. The notable feature in this episode, is the fact that a woman is one of the leaders, and a principal one. Mary Heiler, a young Bohemian woman who has gained a great deal of influence over the laborers of the city by her fervid oratory and advanced communistic ideas, was elected vice-president of the central association, and she at once took position as its real head. The cigar-makers, who are largely foreigners, look upon her as a second Joan of Arc, and they obey her commands without question. The majority of the cigar makers are the lowest grade of Germans and Poles, who live in the filthiest tenement houses, doing their work there. They are underpaid and overworked, for the reason that the trade is easily learned, and there is such a glut of workers that the employers can get any amount of labor at their own price. The employers are almost all foreigners, and are merciless toward the poor of their own nationalities. The strikers now number five thousand, and it is probable that the movement will go on till it will embrace all the operatives in the city.

THE LAST SWINDLER.

The last swindle is a variation of an old one which originated in this city, and is being prosecuted from here. The modus operandi is very simple. It is a wire fence of a not very new pattern, and which is not even patentable. The smooth-tongued agent shows it to a farmer, and solicits him to become an agent for it. As an inducement he is offered fifty rods free, provided he will put it up along the road where it can be seen and serve as an advertisement. It is a handsome fence, and the farmer's bites at the offer. First he gets fifty rods of fence for nothing, and if he does take an order, he gets a liberal commission. He signs what he supposes is an order for fifty rods, and immediately the wire is shipped him. Then comes another agent who demands pay for one hundred and fifty rods. Indignant farmer, explains that he was to have fifty rods free. Agent says, "certainly, but you have ordered one hundred and fifty rods, and the one hundred rods you must pay for at four cents a foot." And he produces an order with the farmer's signature, to that effect. The process is very simple. The farmer saw a contract for fifty rods, but when he came to sign, that order was slipped up, and he really put his name to another one for one hundred and fifty rods, that lay just underneath. He is frightened into giving his note for, say \$200, which he expects to retail, but he always finds that it has been discounted at the nearest bank, and he pays it. When will farmers learn that all these gifts and everything of the kind are merely swindles, and that there is always a cat under the meal.

POLITICAL.

The democracy of the city opposed to Tammany are attempting to combine their forces, so as to make a successful fight against the hydra-headed monster. The Tribune says, "they procrastinate," and at the same time they procrastinate, as anti-Tammany always did and always will, for there is nothing honest in the

movement. The anti-Tammany democracy are just like the other Tammany democracy, only they happen to be the ones left out in the cold. They organize, not to beat Tammany, but to compel a division of the spoils. If they are weak, Tammany laughs at them; if they are strong, Tammany buys them up. This has been the practice for years, and will be to the end of time. John Kelly will look them over, buy up such as he wants, and contemptuously kick the others. "Procrastination" in this case means waiting for a bid. The Republicans are doing little or nothing. Neither in the Times or Tribune of Tuesday was there a word relating to the state ticket.

LOTTERIES.

The police, guided by Anthony Comstock, are making a raid on the lotteries. Comstock succeeded in breaking up the sale of obscene literature, but he will fail in his attack upon the lotteries. The lottery people are rich and well organized, and the business of gulling fools is too profitable to be given up without a fight. They have the best legal talent in the city behind them, and their methods of doing business are so secret and well guarded that it is difficult to convict them. There are a large number of lotteries that have their headquarters in the city, and all of them, with few exceptions, are bogus. They take in vast sums of money, though.

Our Washington Letter.

WASHINGTON, D. C., Oct. 22, 1877.

The business out for extra session, viz., voting appropriations to discharge indebtedness now existing on army, navy and United States Courts account, and to provide for those arms of the public service for the balance of the present fiscal year, hang fire, awaiting the designation of the proper committee by Mr. Randall to which the message, cut into appropriate "chunks," is to be referred. It is obvious that President Hayes meant to leave Members of Congress no pretext for lingering here longer than the 5th proximo; and he is reported as very desirous that the business imperatively necessary, be promptly transacted, and then that an adjournment be as promptly effected leaving him ample time to prepare his annual message, after the estimates of Department and bureau heads shall have been received. With the exhaustive discussions had at the last session of these appropriations protracted debates over them can now only come from factious opposition, a desire to embrace the Administration or to enhance home popularity so as to make it available at the November elections. The exigencies of Democracy require no bamboozling of voters under the state pretense of economy and reform; besides the demagogic resorts of last session would be rather tedious now than otherwise. The hurried requisitions of several Democratic Governors last summer on the Federal Government for troops to protect them against the strikers, has reduced Bourbon representatives to just one grievance, the old howl of fraud; and though the Democratic legislator of average manhood would consider himself extorted from all further silly complaints of the working of a measure for which that party was practically a unit, yet the stream of vituperation and foul abuse of the President burst its barriers at the jubilation meeting over the Ohio triumph and is still running at full head. Blackburn, who if at all sensitive to the abhorrence with which the name is still remembered, would court seclusion, uncorked himself and there was no mistaking the malignant sentiments still animating him toward all those who struck at the Confederacy or contributed to its final collapse. Representative Banning who is unpleasantly associated in the public mind with the exploits of Eph Holland and his gang of imported repeaters and ruffians, continues to attract attention by his vigorous denunciations hurled against the turpitude that encouraged Mr. Hayes to hold on to the Presidential chair procured by "8 to 7" though Mr. Tilden was more than anxious to relieve him.

Gen. Hawley and other influential citizens are laboring diligently for early and favorable action on the recommendations relative to representation at the Paris Exposition, and the unanimity of public sentiment in favor would seem to preclude any apprehension of opposition. With the exception of a small sum to enable us to be represented at the Stockholm Pledge Congress to which we have been formally invited by Sweden and Norway, and an appropriation needed for repairs of the Patent Office, nothing further in the way of money is asked; and a few days hard work would dispose of all the business actually needed to be done at this session. But Senator Ingalls has given voice to the wishes of many western constituents by the introduction of a bill providing for coining silver dollars and making them legal tenders for all debts, public and private, save those specially contracted to be paid in gold. He will not be entirely destitute of Eastern and Southern support, and the matter of resumption threatens to preclude itself so that it cannot certainly be predicted that it will prove a short session. The opposition to Mr. Grant's confirmation does not appear so general as to defeat it, though, doubtless, the feel-

ing is entertained by many that there are other men whose records would have suggested their selection in preference to Judge Harlan. Locality, it is likely, had something to do with the matter, however. The report that Mr. Bristow would seek to antagonize the appointment is strenuously denied. The choice for a successor to Judge Emmons seems to lie between Tennessee and Michigan; and the fact that the former is in divided in sentiment between the Democrats, started the Western competitor with some advantage. The solid Republican vote relative to the contents for seats in the Senate has been a very disagreeable and discouraging surprise to Democratic Senator David Davis' vote to refer the credentials of Kustle to the Committee on privileges and elections has also had a very depressing effect; and a Democratic Sunday paper in its last issue dismally foreshadowed a solid Republican vote in favor of Kellogg's admission. The disposition among Republicans to forget family dissensions in the presence of the enemy, is quite as apparent in the House.

Since the first day of the session when Cox pranced into the arena and cavorted around the ring, ignoring the humiliation put upon him by the refusal of the New York delegation to present his name as Speaker, up to the present time, there has not been a sign of dividing into factions, which Democrats have been all the while predicting; and the votes in the Senate testify to the hope that the cases of Messrs. Kellogg and Corbin will be decided on their merits without any reference to the recognition of Mr. Nichols and Hampton or the refusal to recognize their Republican rivals.

Among the rumors is one to the effect that Mr. Kelly will to-day, under the call of States, introduce a bill to repeal the resumption act, and will move to suspend the rules and put it on its passage, if the regular order is insisted on. It is not believed, however, that the necessary two-thirds can be obtained; but it will put members on the record, either for or against resumption.

Report of Judges on the 2nd Annual Fair of the Hammonton Park Association.

CLASS 1—HORSES, CATTLE AND SWINE.
Judges, Wm. Bernhouse, Wm. Murphy, G. W. Holmes, Daniel Westcott, C. B. Colwell.
A. S. Gay, pair of horses, 1st premium
John Bernhouse, single horse, general utility, 1st pr.
Wm. Sturtevant, 2nd pr.
Wm. Bernhouse, 4 year old, 1st premium
Chas. E. Redman, q/t, 18 months old, 1st
D. Ballard, filly, colt, 1st
Wm. Myers, colt, 1st
D. C. Herbert, short horn cow, 1st
D. R. Wolfson, 2nd
Anson Green, Devon, 1st
E. W. Howland, Albany, 1st
Wm. D. Frost, 6 months old calf, 1st
A. S. Gay, pig, 1st
Wm. Bernhouse, goat, 1st

CLASS 2—POULTRY, &c.
Judges, Harry Hanson, R. D. Whitmore, John French, E. C. Lobdell.

Jacob Taylor, light brahmas, 1st premium
N. Scull, partridge cochins, 2nd
L. F. Wyatt, do 2nd
H. Gilbey, white cochins, 2nd
N. Scull, Plymouth rocks, 2nd
Theodore Watts brown leghorn, 2nd
do silver grey dorkins, 2nd
Wm. Bernhouse, dominique, 1st
Thos. Adams, honsans, 2nd
C. Mayhew, do 1st
N. Scull, dark brahmas, 2nd
G. French, brown red games, 2nd
J. Hartman, golden faced Poland, 1st
H. M. Jewett, white leghorns, 1st
Wm. Bernhouse, greatest and finest varieties pigeons, 1st
J. T. French, English Jacobus, 1st
do Antwerp, 1st
A. J. Rider, bronze turkeys, 2nd
G. French, do 2nd
Wm. Sturtevant, ducks, 1st
E. M. Howland, ducks, 1st
Chas. Herbert, guinea fowls, 1st
Wm. Bernhouse, Japanese chicken, 1st

CLASS 3—VEGETABLES AND GRAINS.
Judges, A. J. Ryder, R. H. Brown, W. S. Seely, Chas. Rohmann, A. S. Gay.

D. Furlough, corn, 1st premium
N. M. Cathart, corn, 2nd
A. S. Gay corn on ear, 2nd
J. E. Watkins, do 1st
P. J. Fitting, bushy corn, 1st
P. J. Fitting sweet corn, 1st
M. Parkhurst and B. R. Brown, fine samples of rye, 1st premium
P. J. Fitting, rye, 2nd
Wm. Bernhouse, do 2nd
Alfred Reed, turnips, 2nd
Wm. Bernhouse, turnips, 1st
W. B. Hilditch, cabbages, 2nd
G. Valentine, do 1st
Chas. Rohmann, carrots, 1st
M. Parkhurst, do 2nd
A. G. Clark, beets, 2nd
Wm. Bernhouse, beets, 1st
A. Hawking, onions, 1st
P. J. Fitting, celery, 1st premium
Wm. Bernhouse, early root potatoes, 1st
B. Draper, Potatoes and King of the Earth, 1st premium
P. J. Fitting, sweet potatoes, 2nd
H. O'Brien, tomatoes, 1st
Wm. Frost, do 2nd
John Scullin, white beans, 1st
Wm. Bernhouse, lima, 1st
John Scullin, squashes, 1st
Wm. Bernhouse, do 1st
C. M. Hall, tobacco, 1st
E. R. Spruill, jamon grass, 1st
B. R. Brown, golden millet, 1st
I. J. Naylor, peanuts, 1st
H. Colwell, watermelons, 2nd
M. J. Black, do 2nd
Mrs. Smith, citrons, 1st
Jacob Muhle, do 2nd

CLASS 4—FRUITS.
Judges, Albert Irving, G. F. Sexton, Geo. Tudor, A. G. Clark, D. Colwell.

S. M. Oathart, largest collection and best specimens of apples, 1st premium
do 2nd
John Scullin, do 2nd
Thos. Rogers, 2 plate fine apples, one of which was superior to any on exhibition, variety, Fallwater, 1st pr.
D. Colwell, 2 varieties apples, Smith's Older and Hollow corned Pipples, (very fine), 1st premium
Robert Little, 4 plate fine apples, 1st
John Fitting, best collection pears, 1st
D. Colwell, do 2nd
Wm. D. Frost, Lawrence pears, 1st
Chas. Rohmann, Glenmore pears, 2nd
G. W. French, do 2nd
Wm. Frost and S. M. Oathart, fine specimens pears, 2nd
E. R. Spruill, J. E. Watkins, M. Parkhurst, exhibited fine specimens—Victor of Winkfield pears, 1st premium
G. F. Sexton, fine specimens apples and Lawrence pears, 1st
Robert Little, quinces, 2nd
E. C. Lobdell, do 2nd
Geo. Taylor, cherries, 1st
Wm. Frost, do 2nd
A. J. Ryder, do 2 specimens, very choice and largest quantity on exhibition.
C. Burgess, very fine exhibit cranberries on vine, 1st premium.
H. T. Pracey, chestnuts, 1st

CLASS 5—ORCHARD SMALL FRUITS, &c.
Judges, Geo. Elvins, J. O. Hanson, M. Parkhurst, Thos. Rogers, H. Biggs.

L. Hall, 1 acre Wilson blackberries, yield 3000 qts. 1st pr.
M. Parkhurst, 1 acre Wilson blackberries, yield 1975 qts. 2nd premium
J. O. Hanson, 1/2 acre Ives seedling grapes, yield 5,000 lbs. grapes, 1st premium.

CLASS 6—GRAPES AND WINE.
Judges, Wm. Hay, Orrie Packard, A. L. English, Louis Kechulu, Wm. H. Hoping.

J. G. Fitting, Catawba wine, 1st premium.
E. W. Howland, Concord wine, 1st
L. H. Parkhurst, do 2nd
D. Colwell, 8 year old, 1st
L. Hanson, California Madeira, 1st
Wm. Frost, Blackberry wine, 1st
D. Colwell, Olden Vinegar, 1st

CLASS 7—FLOWERS, PLANTS, &c.
Judges, Miss Mary Pracey, Mrs. Dr. Trowbridge, Miss Anna Cogley, Mrs. Geo. Farmer, Mrs. Thos. Irving.

Wm. Bassett, house-plants shown by Florist, 1st premium
Mrs. L. O. Morris, flowers and plants raised in private garden, 1st premium
Wm. Bassett, floral designs exhibited by Florist, 1st pr.
R. D. Whitmore, floral design by amateur, 1st premium
Mrs. L. O. Morris, do 2nd
R. D. Whitmore and G. W. Pracey, exhibited fine specimens of Vick's new Japan camellia.
E. Keen exhibited fine line tree.

CLASS 8—FANCY WORK.
We the Judges on fancy work in Women's department, award the following premiums:

Mrs. S. Draper, embroidered yokes, 1st premium
Wm. Simpler, card case, 1st
Miss Zoe Smyth, card case, 2nd
Mrs. Wm. Simpler, work-box, 1st
Sedie W. Hartwell, crocheted toy set, 1st
Mrs. S. I. Bernhouse, toilet set, 1st premium on style
Miss Minnie Samson, largest display of toys, 1st pr.
Mrs. Joseph Platt, lamp mat, 1st
Mrs. S. I. Bernhouse, crocheted tidy, 2nd
Mrs. Joseph Platt, crocheted tidy, 2nd
Mrs. L. B. Rogers, lamp mats on display, 1st
Miss Mary Robbins, worsted jackets on display, 1st pr.
Miss Minnie Samson, worsted jacket, 2nd premium
Mrs. E. H. Carpenter, mull toilet set, 1st premium
Mrs. Thomas, cushion, 1st
Mrs. Wm. Frost, shoe box, 1st
W. E. Westcott, glass checker board, 1st
Mrs. Jas. Packard, wax work, 1st
Miss Mary Robbins, lacework, 1st
Mrs. Lizzie Wilson, card receivers, on display, 1st pr.
Mrs. Lizzie Wilson, on general display of card board work, 1st
Mrs. W. A. Morrill, hanging basket, for style 1st pr.
Mrs. Thomas Fasco, hanging basket, for workmanship 1st premium.
Mrs. S. I. Bernhouse, wall pocket, 1st
Mrs. Lizzie Wilson, wall pocket, 2nd
Miss Minnie Samson, do 2nd
Mrs. Lizzie Wilson, air castle, 2nd
Miss Anna Thomas, Java canvas tidy, 2nd
Miss Carrie Bowles, Java canvas tidy, 2nd
Mrs. L. O. Rogers, daisy tidy, 1st
Jennie Foster, quilted tidy, 1st
Mrs. L. A. Vick, crocheted board case, 1st
Henry Hedrick, crocheted set, 1st
Mrs. Annie E. Miller, quilt, 1st
Mrs. W. Frost, quilt, fine needle work, 1st
Mrs. E. H. Carpenter, quilt, on style, 1st
Mrs. H. Wyatt, shoe box, 1st
Miss Minnie Samson, butterfly, on workmanship 1st pr.
Mrs. Jones, not of "Fatha, Hope and Charity," 1st pr.
Miss Jennie Prater, motto, "Old Arm Chair," 2nd pr.
Miss Minnie Samson, vase mats, 1st premium.
Miss A. Thomas, skirt bread-tidy, 1st
M. Wm. Packer exhibited a very fine tidy. Miss Smyth exhibited a very pretty air-cake which was worthy of notice. The hunting coat of arms was very fine and worthy of 1st premium, no name on it.

Mrs. S. I. Bernhouse, } Con.
Miss Geo. Elvins, }

CLASS 9—BREAD, CAKE, BUTTER, &c.
Judges, Mrs. D. Colwell, Mrs. Jas. Silbey, Mrs. Frank Roberts, Mrs. John D. Hay, Mrs. Alvin Bailey.

Mrs. Marie Howland, butter, 1st premium
Mrs. Bernhouse, do 2nd
Mrs. O'Brien, butter, do very fine.
Mrs. Wm. D. Packer, brown bread, 1st
do cake, 1st
do rolls, 1st
do pastry, 1st
Mr. Packer's exhibit of bread, cakes and pastry, very fine.
Mrs. Wm. Frost, chow-chow, 1st premium
do jelly, 1st
do preserves, 1st
Mrs. Jesse Rogers, canned fruit, 1st
Mrs. Bernhouse exhibited specimen of canned eggs, very fine.

CLASS 10—PAINTINGS, DRAWINGS, PHOTOGRAPHS, &c.
Judges, Mr. and Mrs. S. R. Morse, Mr. and Mrs. E. J. Byrnes, Mrs. Wm. Hay.

A. Chevalier, oil painting, 1st premium
Miss Ellen Bassett, pencil drawing, 1st
Miss Lucetta Conkey, do 2nd
Miss Lucetta Conkey, water work, 1st
Wm. Rutherford, photographs, 1st
R. D. Whitmore, collection pictures of all kinds, 1st pr.
Preston Kirk, drafting, 1st
A. H. Whitmore, amateur scroll sawing inside work, 1st
W. E. Westcott, etching on glass, 1st

CLASS 11—MANUFACTURED ARTICLES MADE IN THIS AND ADJOINING TOWNS BUT NOT KEPT FOR SALE.
Judges, Wm. Rutherford, E. R. Spruill, Geo. Farmer, A. G. Wetherbee, Dr. E. North.

Hay & Co., glass and hollow ware, 1st premium
A. Allen, wares, 1st
Tilton & Co., glass, 1st
R. D. Whitmore, picture frames, 1st
H. E. Wiles, job printing, 1st
Geo. Farmer, chairs, 1st
T. S. Wetherbee, berry boxes, 1st
Geo. Farmer, chairs, 1st
H. F. Reed, brooms, 1st
H. F. Reed, brooms, 1st
H. F. Reed, brooms, 1st
H. F. Reed, brooms, 1st
H. F. Reed, brooms, 1st

CLASS 12—MANUFACTURED ARTICLES MADE IN THIS AND ADJOINING TOWNS BUT KEPT FOR SALE.

Judges, H. M. Jewett, D. G. Barnard, R. E. Morris, L. G. Rogers, G. W. Rich.
M. I. Lavett, boots and shoes, 1st premium
Geo. A. Wackerbush, plows, 1st
P. F. Field, harness, 1st
CLASS 13—FARMS, HEDGES, &c.
Judges, John R. Hay, John Langham, J. W. Farrell, Dr. H. E. Bowles, Dr. J. H. North.
L. Hall, best farm, 10 acres, 1st premium
J. O. Hanson, hedge over a year old, 1st
J. O. Hanson, hedge over a year old, 1st
Committee on making up reports of Judges for publishing, G. W. Pracey and R. D. Whitmore.
Exhibitors of Judges wishing to correct mistakes in reports please apply to said committee.

RESOLUTIONS.
Resolutions passed by the Hammonton Park Association, Monday eve, Oct. 22, 1877:

Resolved, That the thanks of this body be and are hereby tendered to N. Scull of Winslow, for his very handsome exhibit of poultry as well as his valuable assistance in making up the reports of the Judges for publication.
Resolved, That we present N. Scull's specimens of stock of the Hammonton Park Association as premium for largest and best collection of poultry.
Resolved, That the thanks of this Association be and are hereby tendered to Wm. Bernhouse for his splendid exhibit of pigeons and poultry, and exhibit of pigeons consisting of twenty-five varieties, also for his valuable assistance in conducting this very useful and entertaining part of the Fair.
Resolved, That the thanks of the Association be and are hereby tendered to H. M. Jewett and Theodore Watts of Winslow, for their valuable assistance and great interest in the poultry department.
Resolved, That the thanks of this Association be and are hereby tendered to Hay & Co. of Winslow, for their very generous tender of place for the building just completed on the grounds of the Association.

Resolved, That the thanks of the Association be and are hereby tendered to H. M. Jewett and Theodore Watts of Winslow, for their valuable assistance and great interest in the poultry department.

Resolved, That the thanks of this Association be and are hereby tendered to Hay & Co. of Winslow, for their very generous tender of place for the building just completed on the grounds of the Association.

Resolved, That the thanks of this Association be and are hereby tendered to Hay & Co. of Winslow, for their very generous tender of place for the building just completed on the grounds of the Association.

Resolved, That the thanks of this Association be and are hereby tendered to Hay & Co. of Winslow, for their very generous tender of place for the building just completed on the grounds of the Association.

Resolved, That the thanks of this Association be and are hereby tendered to Hay & Co. of Winslow, for their very generous tender of place for the building just completed on the grounds of the Association.

Resolved, That the thanks of this Association be and are hereby tendered to Hay & Co. of Winslow, for their very generous tender of place for the building just completed on the grounds of the Association.

Resolved, That the thanks of this Association be and are hereby tendered to Hay & Co. of Winslow, for their very generous tender of place for the building just completed on the grounds of the Association.

Resolved, That the thanks of this Association be and are hereby tendered to Hay & Co. of Winslow, for their very generous tender of place for the building just completed on the grounds of the Association.

Tin Roofing and Repairing
In our line promptly attended to.

FAIRM, GARDEN AND HOUSEHOLD.

Some Cautions of Housewives.
Ringbone is of two kinds—true and false. The false ringbone is an enlargement of the middle of the hoof. When it is true, it is a lameness. As a rule, however, it never gives inconvenience to the animal.

The true ringbone is quite another matter. There are two kinds—the high and the low. It is called high when it involves the bone immediately above the joint.

Ringbone, whether high or low, varies in size; but the degree of lameness does not depend upon the size of the formation. An animal may be very lame with but little deposit, and another may show but little lameness with a very large ringbone. Very often the circle of the ring is defective, and the deposit appears only on one side of the limb, or on both sides, and none in front. When the sides they do not cause the same degree of lameness as when in front.

Ringbone is not the cause, but the result of disease, being the result of an inflammation originating in the bone.

Shoulder Slip.—This is a sprain or laceration of the fibres of the only muscles, together, probably, the abductor magnus and teres extensor. The humerus, lacking the tension of these muscles, rotates outward at every step, with unusual freedom.

In shoulder or knee lameness, the signs of pain are more discernible during the elevation of the foot from the ground; whereas, in foot and other diseases below the knee, the converse is the rule.

Strained Leg.—An involuntary, convulsive motion of the muscles of one or both hind legs.

Speedy cut.—Is the name of an injury to the knee. It is inflicted by the horse striking his knee with the opposite foot.

The symptoms are inflammation and swelling of the skin, collection of fluid in the sub-cutaneous areolar tissue, constituting a serious abscess.

Seedy Toe.—This term is applied to a perverted secretion of horn at the lower margin of the hoof, in some of the sub-horn cells, which the horn has detached from the horny lamina.

Thorough Pin.—Thorough pin is a bursal enlargement situated on the lower part of the hock and upper back part of the hock.

Turn-out.—A discharge of foetid material from the frog.

Sprain.—A violent twisting or straining of the soft parts around the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured.

The symptoms are swelling around the sprained part, attended by lameness.

Sprain of the Metacarpal Internus.—This is visible over the trapezium on the inner and lower part of the bone.

Sprain of the Metacarpal Extensor Magnus.—Indicated by a swelling in front of the knee and above it.

Sprain of the Metacarpal Extensor.—This is made visible by an enlargement on the outside of the knee, over the small metacarpal condyle.

Sprain of the Radial Ligaments.—Is manifested by lameness, and difficulty in flexing the knee, with swelling, heat and tenderness immediately above the knee.

Sprain of the Psoas Muscles.—Inability to rise when down, a knee which is stiff, and the fetlock joints when standing; when made to walk he drags his legs or trails them.

There is scarcely any elevation of the foot or flexion of the knee, and a great tendency to shorn to knuckle over at every step.

Sprain of the Fetlock Joint.—In inflammation of the fetlock joint, from whatever cause, the lameness is characterized by inability to flex the joint, by heat, swelling, pain or pressure.

Wound.—A wound made with a clean-cutting instrument is an open wound, without perforating the skin, is a contused wound. When the skin is divided and torn, with jagged, uneven edges, it is called a lacerated wound. —Chicago Field.

Mercuric.—Cont. Disease for Workmen's Families.

Strawed Lavender.—Put a pint of plain boiled lard into a saucepan, cover with any kind of pot-lid, add one ounce of chopped onion, two ounces of drippings, quarter of an ounce of salt, and stir with a spoon for twenty minutes; serve hot. This dish costs about ten cents.

Homemade Bread.—Put seven pounds of flour into a deep pan, and make a hollow in the center of the flour. Put a quart of lukewarm water, one tablespoonful of salt, one teaspoonful of sugar, and half a gill of yeast; have ready three pints of lukewarm water, and use as much of it as is necessary to make a rather soft dough, mixing and kneading it well with both hands. When it is smooth and shining, and has risen upon it, lay a large towel over it folded, and set it in a warm place by the fire for four or five hours to rise; then knead it again for fifteen minutes, cover it with the towel, and set it to rise once more; then divide it into two or four loaves, and bake it in a quick oven. This quantity of flour will yield eight pounds of bread, and will require eight pints of water, and two pounds of yeast. It will cost about thirty cents, and will last about two days and a half for a family of six. In cold weather, the dough should

IS IT A CARDIFF GIANT?

A Stone Giant Described in Cardiff.
A few months since, says a local newspaper, a stone was found in the Cardiff region lying southwest of Pwllheli, and was named after the Cardiff Giant.

Mr. W. A. Conant, who has been traveling in the Cardiff region, has discovered a sea turtle in an excellent state of preservation. Mr. Conant called the attention of the newspaper press of the State to his discovery, and considerable comment was elicited. The matter gradually passed from the attention of the public, though Mr. Conant determined to search further in the same locality with the hope of making additional discoveries.

On Tuesday he arrived in the city, bringing with him a large stone figure of a man, which he had unearthed at the head of a long, dry arroyo about six miles north of the residence of P. K. Dolson, Esq., about twenty-five miles from the city. The figure was found in a cave, and was about the size of a man, and was made of a material which was very hard, and was very smooth, and was very much like the stone of a man.

Mr. Conant, who is a very experienced geologist, has been traveling in the Cardiff region, and has discovered a sea turtle in an excellent state of preservation. Mr. Conant called the attention of the newspaper press of the State to his discovery, and considerable comment was elicited.

A Mountain Slide.
An interesting account of the recent falling of a mountain in Tennessee, very serious disaster to two flourishing villages, has been communicated to the *Courier des Alpes*, by M. Benard.

The phenomenon has been incorrectly reported as instantaneous, and the destructive effect close together, but no longer united complete, whereas the case is that of a mountain which has been crumbling for some time, and is now falling in a series of small slides.

STAGE ROAD LANDLORDS.

Some Cautions of Housewives.
Ringbone is of two kinds—true and false. The false ringbone is an enlargement of the middle of the hoof. When it is true, it is a lameness. As a rule, however, it never gives inconvenience to the animal.

The true ringbone is quite another matter. There are two kinds—the high and the low. It is called high when it involves the bone immediately above the joint.

Ringbone, whether high or low, varies in size; but the degree of lameness does not depend upon the size of the formation. An animal may be very lame with but little deposit, and another may show but little lameness with a very large ringbone. Very often the circle of the ring is defective, and the deposit appears only on one side of the limb, or on both sides, and none in front. When the sides they do not cause the same degree of lameness as when in front.

Ringbone is not the cause, but the result of disease, being the result of an inflammation originating in the bone.

Shoulder Slip.—This is a sprain or laceration of the fibres of the only muscles, together, probably, the abductor magnus and teres extensor. The humerus, lacking the tension of these muscles, rotates outward at every step, with unusual freedom.

In shoulder or knee lameness, the signs of pain are more discernible during the elevation of the foot from the ground; whereas, in foot and other diseases below the knee, the converse is the rule.

Strained Leg.—An involuntary, convulsive motion of the muscles of one or both hind legs.

Speedy cut.—Is the name of an injury to the knee. It is inflicted by the horse striking his knee with the opposite foot.

The symptoms are inflammation and swelling of the skin, collection of fluid in the sub-cutaneous areolar tissue, constituting a serious abscess.

Seedy Toe.—This term is applied to a perverted secretion of horn at the lower margin of the hoof, in some of the sub-horn cells, which the horn has detached from the horny lamina.
