The Cheapest
 AND
The Best!
Life Insurance at Actual Cost.

THE NATIONAL LIFE INSURANCE COMPANY OF CHICAGO, invites the attention of those contemplating insuring their lives to its **Mutual or Reciprocal**
 PLAN, which enables even the poorest man provide for his family in case of death, without depriving them of the necessities of life, as do many who endeavor to pay the high premiums of old line companies, who charge for Assurances DEARER LOSSES WATER NEVER OCEAN, and then add a heavy loading for extravagant expenses. On this plan you only pay for the cash losses actually experienced, and as they occur, with a small fixed sum for expenses. Call on the agent for circular fully explaining this system.
The Practical Results!
 Since its organization in 1870, the NATIONAL has paid in death losses \$57,784, at a cost to the deceased of \$791,000 in premiums. Old Line Companies would have paid for the same premiums \$21,221, showing a gain by insuring in the NATIONAL of over \$36,600.
 The Capital and Securities of this Company are sufficient to comply with the Insurance Laws of any State in the Union.
 HENRY LOMBARD, Pres. A. C. TERZD, Sec'y
H. E. BOWLES,
 Agent for Atlantic County, New Jersey.

Prof. Taylor's Report.
 It will be remembered that the above-named gentleman was sent from the Department of Agriculture, at Washington, at the solicitation of the Cranberry Growers' Association of this State, to investigate the rot and mold, and ascertain, if possible, the cause and remedy. He labored faithfully, traveling from one bog to another in our State, and rendered valuable services to our cranberry growers. He makes his report to the Department, and in the October number of the monthly reports, his statement is given, a part of which we transfer to our columns. Cranberry growers should preserve it for future reference.

Previous to visiting the cranberry plantations, I deemed it best to make an examination of the healthy and unhealthy vines, their roots and fruit, with samples of the soils in which they grew, and now present a preliminary report of the results of my investigations. I accordingly requested A. J. Rider, Esq., of Atsion, Burlington County, to forward to this Department such specimens as were necessary for my purpose. Two specimens of vines, one healthy the other unhealthy, were in a short time received by the Department, and a specimen of the soil in which each plant grew. An examination of the roots of each vine showed that the one which bore rotting fruit had much larger and darker roots than the other. The peaty muck in which the healthy plants grew had a healthy odor, and was not in a fermenting condition, while that of the unhealthy plant was in a condition of fermentation, and had the odor of sulphuretted hydrogen. A second set of plants was received, with specimens of the soil in which they grew. It was again observed that the vines on which unhealthy berries grew had darker and larger roots than those which bore healthy fruit, and that the soil of the latter was odorless, while that of the former had a bad odor, and was in a fermenting condition. These facts led me to believe that the sour condition of the soil was the primary cause of the rotting of the berries.

On the 22d of July last, I visited Cranberry Park Station, Atsion, Burlington County, and made a careful examination of the condition of the soil, the mode of cultivation, the roots of the vines, their foliage and fruit, the construction of water-dams, ditches, &c., at that place. The plantations of the company comprise about one hundred and thirty acres, the greater part of which were set out in 1869. In 1871 there was a light crop, partly rotted, in 1872 half a crop, and nearly all rotted, in 1873 a full crop, and nearly all rotted, only 800 bushels of sound fruit being picked out of a total crop estimated at 10,000 bushels. No fertilizers were used till the spring of 1873, when sand and plaster were applied to the higher portions of the land, a small area being at the same time treated with a coating of decomposed manure. No rain fell after these fertilizers were applied until June 12, when rot began. The seasons of 1872 and 1873 were noted at this particular locality for protracted droughts in June and July.

In the fall of 1873, sixty acres were drained, by cutting ditches about two rods apart, and a coating of sand was spread over the vines. The outlets and feeding ditches were opened to give free circulation of water, as well as thorough drainage. Where foliage was destroyed last year by the vine-worm, there was very little fruit, where plaster was applied, with a layer of sand over it, the vines looked healthy and had few rootlets. Several other plantations in the same vicinity were examined, including those of Mr. Miller and Mr. Rookwood. I visited Bricksburg, Ocean County, July 24, and made an examination of several cranberry plantations in this neighborhood, commencing with that of Dr. Merriman, two miles southwest of the village. We found the berries very thickly set on the vines where the blossoms had not all disappeared, but traces of the rot were discernible on this plantation. I made a careful examination of the nature of the soil, the roots of the vines, and the degree of acidity of the fruit from the different portions of the bog. Where guano had been applied a marked improvement

of the foliage and roots was visible. In answer to an inquiry made by me whether any of the growers present had given attention to the condition of the soil and of the roots of the vines, a unanimous answer was given in the negative. We visited the plantations of Mr. J. W. Campbell, Rev. Isaac Todd, and Mr. Ferro, all being connected, and forming one continuous plain. This extensive bog was formerly a mill pond. The soil of such places generally found to be very favorable for cranberry cultivation, which proved to be the case in this instance. These three plantations have never failed to produce healthy crops. An examination of the soil proved that the peaty matter, which it principally consists of, was well decomposed. Our attention was directed to one small portion of the pond where about two years ago the berries rotted. I examined the place, by digging up the ground, and found that the soil was not well decomposed, and that the muck was in a condition of active fermentation, giving off strong odors of sulphuretted hydrogen. The roots of the vines here were unusually large, matted, and of a dark, unhealthy color.

We next visited the plantation of Mr. U. G. and E. W. Crane, at Long Swamp, consisting of about thirty acres. This plantation had been recently laid out, and was provided with the latest improvements. The ground here proved generally good, although in some places there were decided indications of sour, fermenting soil. The Darron plantations were next examined. The soil here is of a mixed character, some portions of it proving to be well decomposed and without odor, while other portions were in a state of fermentation. It was observed that the rot was confined to the parts indicating fermenting soil, while the sound berries grew on the well-decomposed soil, which has generally a pleasant odor.

We next visited Butterfly Bridge plantation. Here, a plantation, laid out some years ago by F. M. Todd, Esq., in the best manner, and now belonging to different parties, was next visited. The vines on this plantation rotted in the last season. An examination of the roots showed undecomposed peat, the unhealthy roots, the latter being very large and closely matted. Having stated to the committee of cranberry growers accompanying me that fermenting soil and stagnating water were probably the principal causes of the rot, I was informed that, although my theory was good thus far, there was a neglected cranberry plantation known as the Carey bog, near Bricksburg, the water of which they believed to be stagnant, as it had no visible outlet, but notwithstanding, the soil of the bog had not been affected by the disease. An examination of the bog showed that the water which flooded it was perfectly fresh, being supplied probably by the means of springs, and passing off through the sand. The whole surface was covered with a dense growth of moss and weeds, interspersed with cranberry plants. The cranberry roots were growing in the moss and confined to it. They were short, of a whitish color, and very healthy, and to the depth of eight inches had at one time been spread over the peat muck. I cut through it, and found it to be very pure and free from any odor. This bog very much resembles a wild bog, being wholly neglected. I have also examined the roots of the cranberry plants as found growing in the wild state, and in all cases have found them to be healthy and similar to those. I have this year failed to discover any healthy cranberry vines growing in stagnant water.

I next proceeded to Tom's River. We visited the Berkeley plantation, one and a half miles from Tom's River. This plantation contains about fifty acres of vines, which appeared very promising. They had been planted about nine years. The berries, at the date of our visit were affected slightly with rot. On my first examination of the soil I detected imperfect roots, but no sulphuretted hydrogens. On going deeper the latter was found in abundance at a depth of about two feet six inches. The soil of this plantation is of the variety known in New Jersey as savanna, consisting of sand, with a slight trace of vegetable matter. An analysis

made in the laboratory of the Department, shows that the proportions are sand, 57 parts; peaty matter, 3 parts. Mr. Shreve informed us that a layer of peat about two inches in thickness had been spread over the surface of the bog. From some cause this peaty matter was in a state of fermentation, and its odor very bad. We were informed that gas lime had been spread over portions of this plantation with but little effect. In my opinion, the use of stone or shell quick lime would produce more important results. The water in the ditches was highly impregnated with iron—probably as bicarbonate or iron—which is soluble in water. Gas lime is composed mostly of sulphide of calcium; that is, a mixture of sulphur and calcium. It also contains caustic lime, but in limited quantity. When gas lime is exposed for a considerable period to the action of rain and air, a large portion of the sulphide is converted into sulphate of lime, or land plaster. I consider that, for the purposes required, caustic shell or rock lime would prove more profitable, for several reasons.

We next visited the plantation of Gen. Morris, of Eggville. His vines are only of four years' growth, and the cranberries have rotted each year. An examination of the peat revealed the presence of sulphuretted hydrogen, which was also found in the substratum of the savanna bottoms of this plantation. One half of the plantation was covered with sand taken from an adjoining cultivated field, the particles of which were very fine, and it probably contained clay. The vines covered with this fine sand were situated in growth—while those sanded with coarse sand, taken from an uncultivated bank near by, were very thrifty and in full bearing. Samples of these two kinds of sand have been procured, and will be analyzed in the laboratory of the Department.

I also visited the plantation of A. T. Plun, of New York, consisting of thirteen acres. The vines appeared healthy and were fruited, although the berries were rotting. An examination of the soil of this bog revealed the presence of fermentation and unhealthy roots. We were informed that the vines last year appeared healthy, and yet the berries rotted so badly that but twenty-five bushels were harvested from thirteen acres.

We next visited a very thrifty bog known as the Shreve plantation, near Tom's River. This bog has always borne fruit free from rot. A examination proved that all the conditions were favorable, the soil being well decomposed and free from odor, and the roots small and healthy in appearance. From this point I proceeded to West Creek, and visited the extensive and highly cultivated plantations of Col. D. R. Gowdy, and also the Eagle Company plantation. I found here good and bad soil, plenty of water, and refreshing, cool breeze blowing over the surface of the grounds, the latter circumstance being of common occurrence. Mr. Gowdy claims to have a very superior short vine, which is known as the "Gowdy vine." He is one of the oldest cultivators in the State of New Jersey, and has been very successful. The land under cultivation at this place is generally good, though I found many spots on it in a state of fermentation.

A diversity of opinion seemed to prevail at this place between Mr. Gowdy and the Eaglewood Company, as to the bearing and depth of ditches and the width of the lands between them. The irrigation of cranberry land is of the highest importance at all times, but especially when the soil is sour. The Eaglewood Company lately ditched their bogs very deep, and on the day of my visit to their plantation, I observed that the water in the ditches did not come within sixteen inches of the roots. There were probably about five inches of sand over the peat bottom. I examined the roots of the vines, and found them taking in pure air, and at a very high temperature. The owner in charge informed me that they had been in this condition for some time, and that having no instructions to fill the ditches with water he was powerless to act. This was probably the condition of about eight acres during the hottest days of August last. The peat of this plantation is several feet in depth (near bottom), and is capable of still higher cultivation, owing to the general mellow condition of the soil and its being well supplied with water. I do not consider that the extra expense of these ditches will prove injurious to the vines, provided they are supplied with substantial ditch-gate to enable the person in charge to regulate the height of water in the ditches at will.

A MEDICAL TRIUMPH!
Dr. D. S. PERRY'S
Vegetable Aromatic Bitters.

These Bitters must become the universal remedy of the age. There is nothing like them or equal to them under the sun. They restore the weak, invigorate the feeble, and give new life and tone to the broken down system. In miasmatic and malarious districts they are worth a ship load of quinine powders and pills. They are especially adapted to persons suffering from.

Dyspepsia, Liver Complaints, Costiveness, Headache, Neuralgia, Rheumatism, Chills, Fever and Piles.

TO DELICATE FEMALES.

Ladies, old or young, will find these bitters especially adapted to diseases peculiar to their sex. Nervousness, Lassitude, Want of Appetite, and General Debility, all yield to the magic charm of these inestimable Bitters.

HEAR WHAT IS SAID.
HEAR WHAT IS SAID.
HEAR WHAT IS SAID

"Wonderful effects have resulted from your Dr. Perry's Bitters."

"My chills are gone. I can hardly believe it."

"Send me one case Perry's Bitters again. Nothing like them here."

"I enclose affidavit of my case. I had to do so to convince you of the wonderful cure."

"Surely they are the most delightful wine tonic in the world."

"Dr. Wilson says that you are a public benefactor."

"Harrah! No more rheumatism."

"No more headaches, thanks to you."

We could fill this paper twice over with just such genuine extracts, but the above must suffice. Our Bitters are prepared under the supervision of Dr. D. S. Perry, Member of the Royal College of Physicians and Surgeons, London, England, and of the Medical Clinic of Glasgow.

All orders should be addressed to the
Perry Aromatic Bitter Co.,
NEW YORK, U. S.

These Bitters are sold either by the bottle or case at \$1 a Bottle.

Parties in sending letters for advice as to their diseases, will confer quite a favor by giving names of County as well as Town where they reside. It will save us a wonderful amount of time and annoyance if this will be observed.

KEARNEY'S

FLUID EXTRACT
BUCHU

IS THE ONLY KNOWN REMEDY FOR
BRIGHT'S DISEASE,

and a positive remedy for
GOUT, GRAVEL, STRICTURES, DIABETES, DYSPEPSIA, NERVOUS DEBILITY, DROPSY, FEMALE COMPLAINTS,

Non-Retention or Incontinence of Urine, Irritation, Inflammation or Ulceration of the
Bladder and Kidneys.

Spermatorrhea, Leucorrhoea or Whites, Irregular or Painful Menstruation, Bearing Down, Chlorosis, Stricture and
All Complaints incident to Females.

KEARNEY'S EXT. BUCHU

For Stone in the Bladder, Calculus Gravel or Brickdust Deposit and Mucus or Silky Discharges, and Diseases of the Prostate Gland.

Kearney's Ext. Buchu

Cures diseases arising from Imprudence, Habits of Dissipation, etc., in all their stages, at little expense, little or no change in diet, no inconvenience and no exposure. It causes a frequent desire, and gives strength to urinate, thereby removing Obstructions, preventing and curing Strictures of Urethra, allaying Pain and Inflammation, and expelling all poisonous matter.

Used by persons in the decline or change of life; after confinement or labor pains, bed-wetting in children, etc.

Prof. Steale says: "One bottle of Kearney's Extract Buchu is worth more than all other Extracts combined."

KEARNEY'S EXT. BUCHU

Permanently cures all affections of the Bladder, Kidneys and Prostate Glands existing in Men, Women and Children, no matter what the age.

Ask for Kearney's. Take no other.

Price One Dollar per bottle or Six Bottles for Five Dollars.

STRAWBRIDGE & CLOTHIER,

Have lately been showing they stock of
Blankets and Quilts,
Linen Goods and Muslins,
Wool and Cotton Flannels,
and offer many undoubted bargains in every variety of

HOUSE-FURNISHING DRY GOODS

We have also taken advantage of the late depression in the prices of
BLACK SILKS AND DRESS STUFFS,

and have secured many goods far under value.

In Water-Proof Cloakings,
BLACK BEAVER CLOTHS,

And every variety of Woolens, we present an unequalled stock, at attractive prices to all consumers

The recent changes in the Postal laws enable us to send packages through the mails when not exceeding four pounds in weight, and we will in all cases transmit free of cost to our customers when P. O. money order or cash accompanies the order.

Samples cheerfully sent on application. Orders receive prompt personal attention. We have but one uniform price to all whether ordering or buying in person.

STRAWBRIDGE & CLOTHIER,

N. W. corner Eighth and Market Streets.
PHILADELPHIA.

A GREAT STRIDE
OVER OLD BUSINESS CUSTOMS.

OAK HALL.
The Largest Clothing House in America,
Starts on a New Career!!!

BUSINESS MEN thoroughly bent on upright dealing, have long been thinking over, working out and experimenting on various propositions, and here and there in an establishment which has accepted one or another of them, and ordered their business accordingly: One "Cash," another "Easy Price," &c., &c.

WE UNHESITATINGLY ADOPT THEM ALL,

and confidently relying on the approval and support of an intelligent public, we inaugurate what we believe to be the best system in the world, and

WE NOW ANNOUNCE THESE

AS OUR
FOUR CARDINAL POINTS:

ONE PRICE.

Under the Cash Payment System, one pays only for what he gets, and contributes nothing to a striking fund, to provide for losses on bad debts.

2d Point, ONE PRICE,

not the "First Price," but the "LAST and LOWEST PRICE." The Price marked in Plain Figures on every garment, and no deviation allowed.

3d Point, Full Guarantee.

A Printed Guarantee, bearing the signature of our firm, accompanying each garment.

GUARANTEE.

We hereby guarantee:
1st. That the price of our goods shall be as low as the same quality of material and manufacture ever sold anywhere in the United States.
2d. That the price we are precisely the same to everybody for same quality, on same day of purchase.
3d. That the quality of goods is as represented on price labels.
4th. That the full amount of cash will be returned, if customers find the articles unsatisfactory, and return them within 10 days of date of purchase.

(Signed) **WANAMAKER & BROWN,**
OAK HALL,
N. W. corner Eighth and Market Streets, Phila.

4th Point, Cash Returned.

This is simply a concession on our part to our customers to secure them full confidence in dealing for goods they know very little about, and we thus prevent any occasion for dissatisfaction from any and every cause whatsoever. If the garment is not exactly what you thought, if your taste changes, if the "hobby-horse" greets another color or another shape, bring it back, un worn and unaltered, and the full amount of money you paid will be returned on the spot.

We have for years been working to attain the present point, and though naturally falling into the current methods of trade, we ultimately turned the wheels of the old system, and have been carefully weighing for a long time these four points, and preparing for this

ENTIRE CHANGE OF BASE.

We now swing clear of all combinations of customs, and turn the bridges behind us. With all departments reconstructed, we begin business

Saturday, October 3d, 1874,

for the Fall Trade, and anticipate that

Marvelous and Unprecedented Increase of Business for which we are well prepared.

WANAMAKER & BROWN,

S. E. Cor. Sixth & Market Streets,
PHILADELPHIA.
