## DR. JOHN BULL'S Smith's Tonic Syrup FOR THE CURE OF FEVER and ACUE Or CHILLS and FEVER, AND ALL MALARIAL DISEASES.

The proclaimer of this celebrated medicine justly claims for it a superiority over all remedies ever offered to the public for the SAFE, CERTAIN, SPEEDY and PERMANENT cure of Ague and Fever, or CHILLS and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assertion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been sufficient for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, however, prudent, and in every case more certain to cure, if its use is continued in smaller doses for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any aid to keep the bowels in good order. Should the patient, however, require a cathartic medicine, after having taken three or four doses of the Tonic, a single dose of BULL'S VEGETABLE FAMILY PILLS will be sufficient.

BULL'S SARSAPARILLA is the old and reliable remedy for Impurities of the blood and Scrofulous affections—the King of Blood Purifiers.

DR. JOHN BULL'S VEGETABLE WORM DESTROYER is prepared in the form of candy drops, attractive to the sight and pleasant to the taste.

## GO TO PACKER'S AT THE Old Stand, The Hammon Bakery.

Where the usual rolls, cakes, pie, etc., are prepared, in quantities to suit the trade, and of the highest quality. Also for the supply of all kinds of bread, cakes, etc., for the liberal patronage of the community. Attention is invited to the fact that the bakery is now under the management of a first-class baker, who will merit a liberal patronage. Also a great variety of goods for sale. Also a great variety of goods for sale. Also a great variety of goods for sale.

## TUTT'S PILLS

**TORPID BOWELS,  
DISORDERED LIVER,  
and  
MALARIA.**  
From these symptoms the disease of the liver, the disorder of the bowels, the torpid bowels, the disordered liver, and malarial fever, are the result. The symptoms are: Headache, loss of appetite, nausea, vomiting, constipation, or diarrhoea, a feeling of fullness, or aching in the liver, a yellowish tinge to the skin, and a general debility. The cure is to be had in TUTT'S PILLS, which act directly on the liver, and remove all impurities from the system. They are a safe and reliable remedy, and are sold by all druggists.

**TUTT'S HAIR DYE.**  
GRAY HAIR OR WHISKERS changed instantly to a GLOSSY BLACK by a single application of this DYE. Sold by Druggists, or sent by express on receipt of \$1.  
Office, 44 Murray Street, New York.  
TUTT'S MANUAL OF USEFUL RECEIPTS FREE.

### Street Drainage.

I was not a little surprised to see, in a recent number of the REPUBLICAN a suggestive hint about a graded gutter along Bellevue, and now, I am still more surprised to see this hint acted upon, so far as to plow several ugly-looking furrows along a portion of said street. I would like to ask if it has been ascertained by the use of a level that this will afford any other relief than uniting several small mud puddles in one? I suppose that if the "greatest good of the greatest number" requires that we should have an ugly, deep, open ditch in front of our houses we shall be obliged to submit to it; but I would suggest that an easier and surer method of getting rid of the surplus water in front of the Post Office, and at the corners of Third Street and Bellevue would be to run a drain into our friend Stockwell's cellar. Possibly he would object, but upon the Republican principal just quoted (the greatest good of the greatest number), would he not be obliged to wear the mantle of resignation? But seriously, this matter of drainage is too important to be trifled with, as it has evidently been in the present undertaking; and before going to work to get clear of the water, it should first be ascertained, as nearly as possible, not only whether the plan proposed will effect the desired end, but whether it is the best method; and also whether it is necessary, not only to seriously mar the beauty of our principal street, but also to make cuts across Third street which cannot be trotted over without a severe jolt, and across the side-walks in such a manner as to make it dangerous to walk over them in dark evenings.

I have a suggestion or two to offer about this matter; and

1st. If open drainage is necessary, would it not require much less of it to run along Third Street, instead of Bellevue?

2nd. If it is necessary to carry the water across the street, and across the walks, is it not necessary that these openings should be covered, or bridged over?

3rd. Is it not possible that it would be a more effectual, easier and less objectionable method of disposing of the water, to dig a well and fill it with some porous material?

This question of drainage for our streets is likely soon to become a very important one; and I hope it will be studied thoroughly, and that if any of our citizens can see any valuable suggestions they will bring them out and not "hide their light under a half-bushel."  
CITIZEN.

### From the Capital.

WASHINGTON, D. C., Nov. 3, 1883.  
Government Receipts to-day.—Internal revenue, \$380,683.28; customs, \$647,675.32

General Sherman has completed the settlement of official matters incident to his retirement from command of the army, and will leave this afternoon for Philadelphia to visit his daughter for a few days. From that city he will go to New York, where he will also make a short stay, proceeding then to St. Louis, accompanied by his two aids, Colonels Bacon and Tourtelotte, who are to remain with him until his retirement.

On October 29th Secretary Folger received from a New York bank a communication stating that a large amount of three per cent bonds, embraced in the 122d and 123d calls, were accumulating there, and asking if the Department would redeem one million of said bonds at par and interest to the day of presentation. The Secretary replied: "I have to say that you may present any of the bonds included in those calls for payment prior to their maturity, and they will be redeemed and interest allowed thereon up to the date of their presentation."

The Speakership canvass will be one of the principal topics of interest in Washington to-day. Members of the House are arriving daily, and

friends of the respective candidates are on hand to sound them. In the course of a few days more, no doubt, Messrs. Randall, Carlisle, Cox and Springer will be here to personally direct matters in their own interest. Besides the avowed candidates there are several who are regarded as dark horses, with some hope of finally winning in the race. A Democratic member said today he would not be surprised to see a contest over the Speakership protracted for several days, and in that event a dark horse, he believes, will win. His opinion is that neither Randall nor Carlisle has votes enough to win so long as Cox remains in the field. Should the fight last two or three days, he added, either "Morrison, Converse or Eaton, or some man not yet considered in the race, is likely to be chosen as a saviour of the trouble."

The Adjutant General's annual report contains the very significant admission that in spite of every effort it has been impossible to find satisfactory recruits to fill even our nominal army of 22,000 men. And of those who were accepted nearly one-half were foreigners. Another extraordinary feature of the report is the statement that the losses by discharge, death and desertion for the year footed up 9,749 men, or 40 per cent of the whole military establishment. During the year 3,578 men deserted; and apparently without recapture or inconvenience to themselves. This is a scandalous state of affairs, demoralizing to military discipline, costly to the government and hurtful to all concerned. No wonder good men refuse to enlist, if the pay, duty and social condition of the soldier is so intolerable that thousands in the service quit the ranks by stealth, and in violation of their oath, at the first opportunity.

The Controller of the Currency has made an abstract of his report showing the resources and liabilities of the national banks on the 2d of October. The number of banks reporting was 2,501, an increase of 530 since October 3, 1882. The capital stock was \$500,000,000, an increase of \$20,000,000 during the last year. The increase in surplus is \$11,000,000, while the bank circulation on October 3, 1882, of the going banks was \$314,721,215, and on October 2, 1883, it was \$314,931,575, an increase of only \$210,360. The total contraction of national bank notes, including the notes of insolvent banks and those in voluntary liquidation and those which had deposited legal tender notes for the purpose of retiring their circulation, is about \$10,000,000. The loans have increased from \$1,243,000,000 to \$1,303,000,000. The bonds of the United States held for all purposes is \$382,000,000, a reduction of \$13,000,000 during the year. The amount of specie held by the banks was \$107,000,000, an increase of \$5,000,000, during the year. Of this about \$10,000,000 is in silver coin and silver certificates. Individual deposits amounted to \$1,049,000,000, which was a falling off from the deposits of the previous year. In his report the controller will urge the importance of providing some means by which the circulation of national banks may be kept up to the highest amount.  
HOWARD.

Avoid the harsh, irritating, griping compounds so often sold as purging medicines, and correct the irregularities of the bowels by the use of Ayer's Cathartic Pills, which are mild and gentle, yet thorough and searching, in their action.

**BEST MARKET PEAR.**  
EARLY CLUSTER  
Gerry Valentinc,  
UNDERTAKER,  
Is prepared to furnish Coffins, Caskets (with handles and plates), Shrouds, Robes of a quality wanted. Funerals promptly attended to. Churns resorted, and Furniture repaired and renovated.  
SHOP on Egg Harbor Road, next to Aiken's Carriage Factory, Hammonton.

## Know

That BROWN'S IRON BITTERS will cure the worst case of dyspepsia.

Will insure a hearty appetite and increased digestion.

Cures general debility, and gives a new lease of life.

Dispels nervous depression and low spirits.

Restores an exhausted nursing mother to full strength and gives abundant sustenance for her child.

Strengthens the muscles and nerves, enriches the blood.

Overcomes weakness, wakefulness, and lack of energy.

Keeps off all chills, fevers, and other malarial poison.

Will infuse with new life the weakest invalid.

37 Walker St., Baltimore, Dec. 1882.  
For six years I have been a great sufferer from Blood Disease, Dyspepsia, and Constipation, and became so debilitated that I could not retain anything on my stomach, in fact, life had almost become a burden. Finally, when hope had almost left me, my husband seeing BROWN'S IRON BITTERS advertised in the paper, induced me to give it a trial. I am now taking the third bottle and have not felt so well in six years as I do at the present time.  
Mrs. L. F. GALTHER.

BROWN'S IRON BITTERS will have a better tonic effect upon any one who needs "bracing up," than any medicine made.

## SALE FOR TAXES

### TOWN OF HAMMONTON.

NOTICE is hereby given that by virtue of a warrant issued by N. Heartwell, Esq., to make the taxes laid on unimproved and unencumbered lands, and on lands tenanted by persons not the lawful proprietors, who are unable to pay their tax, in the Town of Hammonton, County of Atlantic, the Collector of said town will, on WEDNESDAY, the

28th day of November

Next, at the hour of twelve P.M., at the office of the Town Clerk, sell the timber, wood, bridge, and other real estate property to bid on the premises, tax, and other under named persons, to make the taxes due, as annexed to their respective names:

The Costs in each case will be 50 cents.

Science.

Bars of steel obtained by the cementation process in the works at Unieux frequently contain crystals in those portions exposed to the hottest portion of the furnace.

In Krupp's great gun manufactory, at Essen, compressed carbonic acid is used for a manufacture of what is called seltzer water may be required by the workmen.

Sparks appear to be a veritable plague at Pergamos, in Asia Minor, and the inhabitants have begun to urge the Turkish Government so take some measures to abate the nuisance.

When carbonic anhydride, says Professor E. Noack, is passed over heated zinc dust contained in a combustion tube it is almost completely reduced to carbonic oxide, the last traces of carbonic anhydride being easily removed by passing the gas through some soda solution.

Wire rope must not be coiled or uncoiled like a coil of rope. When mounted on a reel the latter should be turned on a spindle to pay off the rope.

A German journal gives the following leather polish: Mix 200 parts of shellac with 1,000 of spirits—95 per cent.—in a well-stoppered bottle.

To prevent the skin from discoloring after a blow or fall, take a little dry starch or arrow-root and merely moisten with cold water and lay it on the injured part. This must be done immediately, so as to prevent the action of the air upon the skin.

Sea water differs a little in weight at different places, but at the same spot it is nearly the same at all depths. It is estimated at sixty-four pounds to the cubic foot, or 1 1/2 pounds to the cubic foot more than fresh water.

Prof. W. F. Barrett, of Dublin, has been making some interesting experiments to test the correctness of the discovery claimed to have been made by the late Baron von Reichenbach, viz., the peculiar luminous effect resulting from a faint electric discharge in rarified air, emanated from the poles of a magnet, and was rendered visible in a perfectly darkened room.

The utilization of slag waste is fast assuming considerable economical importance. The manufacture of bricks from granulated blast furnace slags will soon be begun in Germany.

A new invisible ink has been introduced by Dr. Wideman. It is made by intimately mixing linseed oil, part with of ammonia 20 parts, and water 100 parts.

Sleeves are set high and bouffant in the shoulders, both in dresses and coats. Abroad they are wearing sleeves gathered and banded in at the wrist, but that does not take here.

High things to each mind are the things above it. Let each put forth his hand for those on his own level. It is difficult to think of things as high in the abstract.

It is impossible for a man to be careless in business affairs, or unmindful of his business obligations, without being weak or rotten in his personal character. Show me a man who never

regarding the tornadoes which swept over Kansas on May 30, 1879, maintains that these meteorological phenomena, like other storms and hurricanes, are due to whirlwinds descending with vertical axes, and originating not in the lower atmospheric strata, but in the upper currents, whose direction may be quite different from the light winds which previously prevailed near the surface of the earth and quite independent of them.

It is reported that a firm in Paris has patented an invention for the instantaneous formation of steam, so that it can be used at once in the cylinder of the engine. A pump sends the required quantity of water between two plate surfaces, which are heated, and between which there is only capillary space. The liquid, spreading into a thin layer, evaporates instantly without going into the so-called spheroidal state, and the steam acts in the cylinder as fresh-formed steam.

The telegraph, says the Nature, has made another advance in China. It has had the honor of being mentioned in a memorial to the throne.

A German journal gives the following leather polish: Mix 200 parts of shellac with 1,000 of spirits—95 per cent.—in a well-stoppered bottle.

It seems that the luminous animal, like Pelagia noctiluca, Beroa cœca, etc., owe their peculiar light-giving function to a kind of fat which they secrete.

Milan, Italy, has recently become possessed of a treasure in the shape of a clock which is made entirely of bread. The maker is a Peruvian, who for years has been employed in the construction of this singular curiosity.

The Munich antiquary, Karl Fr. Mayer, found in the library of the former Carthusian monastery at Buxheim, a volume which had evidently been bound in the monastery itself.

Dr. Kaiser described a process of nickel-plating by boiling. A bath of pure granulated tin, tartar and water is heated to the boiling and a small quantity of red-hot nickel oxide is added.

Many men are mere warehouses full of merchandise—the heart, the head, are stuffed with goods. There are apartments in their souls which were once tenanted by love and taste and joy, and the rooms are filled with earthly and material things.

High things to each mind are the things above it. Let each put forth his hand for those on his own level. It is difficult to think of things as high in the abstract.

Food for Reflection.

If you want to succeed in the world you must make your own opportunities as you go on. The man who waits for some seventh wave to toss him on dry land will find that the seventh wave is a long time coming.

To die in order to avoid the pains of poverty, love, or anything that is disagreeable, is not the part of a brave man, but of a coward; for it is a cowardice to shun the trials and crosses of life, not undergoing death because it is honorable, but to avoid evil.

Things which never could have made a man happy develop a power to make him strong. Strength and not happiness, or rather only that happiness which comes by strength, is the end of human living.

The joys and sorrows of this world are so strikingly mingled! Our mirth and grief are brought so mournfully in contact! We rejoice while others weep, and others rejoice while we are sad!

It is not an extravagant anticipation that Japan may become a Christian nation in seventeen years.

Concerning earlier and later methods of cooking oysters, Mr. Joel Conklin read before a recent meeting of the Society of Old Brooklynites a paper, of which the subjoined was not uninteresting portion.

A man's transit from one life to the other, or from one world to the other, is like a journey from one place to another, and he takes with him all things that he possesses in himself as a man.

Hawthorne's weird fancy that our secret weakness or sin should hang like a black veil over our faces between us and other men, is true in fact.

How Captain Boswell's Money was Saved.

You must have some rare experience to tell us, Mrs. Boswell, said persuasive Lieutenant Russell, while he waited for the mail stage.

Yes, we have been here eight years, she replied, with the rare smile that glorified her face.

But, my young lady! Never mind me in such a case as this, I was always very tender-hearted.

Will you relate it, and oblige us? urged Russell.

Three of us were sitting in an inner apartment of the small frontier-hotel.

It was in 18—, she began; I had just made the acquaintance of Captain Boswell.

Ex-Governor and Ex-United States Senator T. F. Randolph, died very suddenly, Wednesday morning, at his residence, in Morristown, N. J. Cause, probably, heart-disease.

Hon. Leon Abbutt was elected Governor of New Jersey by about 7000 majority. We regret it, of course. The Senate is Republican, the House Democratic.

In New York, Republicans elected their Secretary of State, and have a majority in both branches of the Legislature.

Virginia went Democratic. In Massachusetts, Butler was defeated—the Republicans having about 20,000 majority.

Maryland and Mississippi are Democratic. Connecticut strongly Republican. Minnesota 25000, or more, Republican.

Pennsylvania Republicans elected every man they nominated in the entire State, including Philadelphia.

There are other items of interest connected with the elections this week, which we have not time to present.

"The Diploma of the Trenton Business College is a passport to success in business."

I owe my success in life to the thorough drill at the Trenton Business College.—A successful merchant.

Ottawa, Ill., Dr. T. A. Smurr, says: "Brown's Iron Bitters give entire satisfaction."

"Better than money at 10 per cent.—Time and money invested in an education at the Trenton Business College."

I earned \$3 per week, spent one year at the Trenton Business College and took a position at \$10 per week.—A common experience.

As a purifier, Ayer's Sarsaparilla acts directly and promptly. A single bottle will prove its merits. Many thousands of people are yearly saved from dangerous fevers by the exercise of a little timely care in properly cleansing the system by the use of this remedy.

\$20 per month on a farm, \$50 in an office. Does a business education pay? Trenton Business College.

\$50 to \$100 per month paid to young men trained at the Trenton Business College. In its original methods of instruction, its cheerful rooms, its competent and gentlemanly corps of instructors, stands at the head.

The Trenton Business College is now in its eighteenth year, and is doing better and more successful work than ever before in preparing young men for successful business careers. Farmers' sons will find the present a favorable season to enter. One quarter there is worth more than a whole year at the common schools.

Illustration of a man in a suit standing next to a sign that says "ACRYL'S DRESSING".

The display of our Ready-Made Clothing and the Low Prices arrest the attention and wonderment of every passer by, and visitors to the city must not forget to reckon our stock among the sights worth seeing. To the "can't-get-away" we say SEND FOR SAMPLES.

A. C. YATES & CO., 1000 Building, Chestnut & 6th, PHILADELPHIA.

### The Clothing Business of the Period.

The demand is for a great stock, for novel styles, for finer workmanship, for better finish. The day has passed in which mere goodness will do in a clothing stock. It must unite goodness with bigness, variety with style, and top all with economy. If Oak Hall did not do all this in the strongest and best way we could not claim your business. We do offer you the biggest, best, and cheapest retail clothing stock in the United States, and we simply want to tell you that it will not pay you to go elsewhere for your winter outfit. If you do not propose to visit Philadelphia, send for our new catalogue.

## WANAMAKER & BROWN,

Oak Hall,

South-East Corner Sixth and Market Streets, Philadelphia.

Has a selected stock of  
**Millinery and Fancy Goods,**  
In the Trumper store, Hammonton, to which she invites the attention of the Ladies. Having years of experience, I feel confident of my ability to please my patrons.

**Babon Remnants a Speciality.**

### LOCAL MISCELLANY.

A. C. Wetberbe caught a three-foot eel in Hammonton lake, last week.  
Dr. Bowles and A. B. White, were home from Washington, D. C., this week.  
D. C. Herbert moved into his new store, this week. He is most delightfully situated for business.  
H. L. Jackson issues a call, this week, which we hope our readers will understand and heed.  
Mr. and Mrs. Moss Stockwell started north on Tuesday morning, for a month's vacation.

German Weeden has sold his property in Hammonton, to a gentleman from New York.  
The Mr. or Mrs. office has been removed into the rear of the office of late office, known as "Pressy's Hall."  
Fortunes made and saved every year by young men who have been trained at the Trenton Business College.  
Miss White, mother of Mrs. F. L. Simpson, reached Hammonton on Saturday evening. She has been visiting in Illinois for some time.

Miss Jennie Wright, teacher at Elwood, has been on the sick list for a week or two. Miss Annie Curl took her place in school.  
Rev. D. T. Davies will administer the ordinance of baptism in the Lake to-morrow (Sunday) afternoon at three o'clock.  
Mr. J. O. Ransom will lecture for the Progressive Spiritualists, at Union Hall, to-morrow morning, at half-past ten. All are invited.  
Mr. C. P. Kallong, the celebrated inspirational speaker, will lecture for the Progressive Spiritualists, at their Hall, on the evening of Thursday the 15th inst.

The Grand Army Post have made their arrangements for a "camp-fire" at the hall, on Thursday evening, Nov. 22. Members of Atlantic and Egg Harbor City Posts will be invited.  
The Temperance Convention voted to head their ticket—"Prohibition Ticket," but some one vetoed the resolution and substituted the word "Temperance."  
St. Mark's Church, Sunday, Nov. 11, 1888. Services, 10:30 a. m.—Morning Prayer, Litany and Holy Communion, 2:00 p. m., Sunday School, 3:30 p. m., Evening Prayer and Sermon.

Andrew K. H. Doughty, of Elwood, and his brother, were made seriously sick, on Tuesday last, by eating freely of "steamed corn beef." Prompt measures afforded relief.  
Jacob Well, formerly a resident of Gibbstown, but now living at English Creek, Atlantic County, had a portion of his hand blown off last Wednesday by the discharge of a sub-gun.  
Henry T. Pressy, Esq., has purchased D. B. Herri's milk route and stock, and commenced the delivery of milk yesterday. We hope he will give as good satisfaction as did his predecessor, and make money besides.

There will be a meeting at the Central School House, Hammonton, on Monday evening next, Nov. 12, to organize a class in "Chautauqua" course of Readings. The course includes ancient and modern history, with various classical readings. All persons who desire to unite with the class, or to obtain information concerning the same, are invited to attend this meeting.  
The Soobale at the house of Mr. L. Hoyt on Wednesday evening was, as usual, an enjoyable affair. A goodly company were present, each one fully occupied in having a good time. Refreshments in abundance were provided, to which the company did justice. The amusements of the evening consisted of music, readings, and for the young people various games. Such gatherings serve to unite friends in even closer bonds, by indulging in pleasant social chat, while the articles selected for reading are of an elevating character.

Mr. A. J. King received a letter last Monday, which is quite a curiosity. It was written in London, England, and by mistake addressed to "Hammington, New Zealand." The post-marke on the envelope show that it reached that distant colony, and then traveled from one town to another, wherever the post office name at all resembled the address. At last, some official thought himself of "New Jersey, U. S. A.," and after a year of nearly six months' duration, he reached its intended destination. Have we an illustration of the necessity of care in addressing letters, and of the perseverance of post office officials, in forwarding away lands.

### OFFICIAL RETURNS

Of the Votes Cast in Atlantic County, N. J., November 6th, 1888.

	Abolition.	Atlantic City.	Bruna Vista.	Egg Harbor City.	Egg Harbor Township.	Gallopahy.	Hammonton.	Weymouth.	Trenton.	Majorities.
For Governor:										
Jonathan Dixon	51	262	61	182	202	198	178	88	50	458
Hon. Leon Abbutt	20	10	10	10	10	10	10	10	10	30
Benjamin Urner	10	10	10	10	10	10	10	10	10	10
John J. Gardner	10	10	10	10	10	10	10	10	10	10
Edward Justice	10	10	10	10	10	10	10	10	10	10
Cyrus P. Osgood	10	10	10	10	10	10	10	10	10	10
For Congress:										
Charles Souder	46	207	103	225	211	128	118	61	50	450
Dr. J. B. Rimmers	11	11	11	11	11	11	11	11	11	11

**FOR SALE.**—A lot of first-class Pigeons, D. Colwell.  
**FOR SALE.**—A good farm horse and general shaver. Inquire of W. H. Bruozes, Hammonton.  
Domino Campanelli, one of our best-known Italian citizens, was presented with a little son on Monday of last week—October 29th.  
For the first time in several years, M. L. Jackson's "beef-critter" has disappeared from our last page. See his new advertisement.  
Mr. John Bethell and wife have removed to Batsto for the winter. They are greatly missed in the Baptist Church and Sunday School.  
Rumored,—that new houses are to be built on the corner of Central Ave. and Grape Street, and corner of Peach and Second Streets.  
William Bernshaw, Esq., has the contract for the main building for the new glass works at Elmer, Salem County, N. J., twenty-six miles south of Camden, on the Bridgeton Branch of the W. J. R. R.

Is it business to go on working at \$12 per month, when by a few months' training at the Trenton Business College and \$100 expense you can earn \$40 to \$50 per month, with chances for future advancement increased 10 fold?  
Mr. Frank Fay, brother of Geo. W. Fay, Mrs. J. D. Fairchild, and Mrs. John Fay, was killed last Sunday, at Camden, while attempting to board a moving train. The funeral services were held on Wednesday.  
Mrs. D. H. Kent, wife of the Cashier of the Atlantic City National Bank, died in Hammonton on Thursday morning last, after a long illness. Services (under the care of Funeral Director Champion, of Atlantic City) will be held at the late residence, this morning.  
John Hensel, of Greenland (near Kirkwood), was killed at Kirkwood on Thursday morning by the 755 Express from Atlantic City. He attempted to drive across the track when the train was near by. Wagon entirely destroyed, and horse killed. The body was viewed by a Camden Coroner, and the inquest will be held to-day.

What kind of training to make its mark on the salary and success of the student? Your chance for success in life will be increased fourfold, by a few months at the Trenton Business College. Now is a good time to enter. Apply for Catalogue and full information to A. J. HIRSH, Principal, 20 and 22 East State St.  
We had in the Rochester (N. Y.) Union and Advertiser, a notice of the death, Nov. 10, of Frank H. Lee, son of Uriah D. and Abigail L. Lee, aged 27 years. The Lee family formerly resided and resided on the place now occupied by the Fother family, Valley and Bellevue Avenues. Frank was confined to his home for two years, and was finally removed by that "dread destroyer"—pulmonary consumption.

Election day dawned pleasantly, a brisk west wind blowing all day. 358 votes were polled in Hammonton,—being 68 more than last Spring, and 42 less than the highest number ever cast in the town. All parties were on hand at the polls in good season, and did what they could to secure votes for their respective candidates; but everything was remarkably quiet, all day. After the polls were closed, the large number present indicated the interest felt in the result, yet such good order was maintained that in a little more than one hour the entire vote was counted and the report made. We refer to the official returns for a complete statement.

**Manchesteer Strawberry.**  
The "Manchesteer" has given the most universal satisfaction of any Strawberry that has appeared since the "Wilson." Good strong plants for sale at \$4 per thousand; 60 cents per hundred.  
Z. U. MATTHEWS.  
I hereby forbid any and all persons to trust anyone on my account, on any pretense whatever, as I will pay no debts contracted by anyone except myself, from this date.  
Hammonton, Oct. 2nd, 1888.  
J. C. GAGE.

**Ladies' Tonic.**—THE GREAT FEMALE REMEDY, is prepared by the Women's Medical Institute of Buffalo, N. Y., and is their favorite prescription for ladies who are suffering from any weakness or complaint common to the sex. It is sold by druggists at \$1 per bottle. Ladies can obtain advice free. Send stamp for names of those who have been cured.

**A Card.**  
To all who are suffering from errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, etc., I will send a recipe that will cure you, free of charge. It is a great remedy, and is sold by a missionary in South America. Send a self-addressed envelope to the Rev. JOSEPH T. INGRAM, Boston, New York City.  
Front Royal, Va.—Dr. G. H. Hill, says: "Brown's Iron Bitters seems to give me general satisfaction. I recommend it strongly."

### John Wanamaker's Store, Philadelphia.

These are the First Days of the Fall Business, already the hum of activity begins. We launch the busy season with

## Some Special Things

that prove to be strangely low. A few of these have been in store some days, but, to give everybody a fair chance, we held the announcements until the return of people from their holidays.

A good lot of first-rate Cashmere for 50 cents (all wool). The new variety will prevent this quality from ever again selling at this price. The best Twilled, All-Wool Red Flannel we ever sold for 25c. A Black Dress Silk at 75 cents, that until recently was always \$1.00. A fine Black Camel's Hair, 4 1/2 inches wide, at 60 cents. A good 36-inch all-wool Cashmere at 40 cents. An excellent Black Suiting, 42 inches, at 50 cents. We sold the same at \$1.00. Another in stripes at 65 cents. Not dear at \$1.00. Robes at one-third off of A quality of Lupin's usual price.

**These lots of Shoes that are amazingly desirable for the prices:**

250 pairs Women's Straight Goat Button, \$4.35  
172 pairs Women's Straight Goat Button, \$3.25  
245 pairs Women's Curacao Kid Button, \$4.25  
186 pairs Women's French Kid Button, \$5.00  
141 pairs Women's Front Lace Walking Boots, \$3.25  
131 pairs Women's Front Lace Walking Boots, \$4.50  
150 pairs Women's French Kid Button, \$5.25

**China and Glassware** we hardly dare to risk saying anything about, as the lots announced are nearly always sold out in a few hours of the day they are presented. Watch the city daily papers for the announcements, and if these lots are sold when you come do not be disappointed, as we have new lots in every day or two.

**In Furniture.** Young couples should see the New Ash Suite of Bed Room Furniture for \$25. The same goods in Cherry for \$28.

Our Works at present turn us out only four suites per day of these goods, so that first come, first served. Nothing like this has ever been done in Philadelphia before.

**A fine frame Body Brussels Carpet** at \$1.25 that we are willing to endorse as a good thing.

**We are not permitted to give the makers' names.** The goods are new season, and fifty patterns at least to choose from.

The first Fall Offering of Ladies' Robes are of ample material, in nine varieties, dark, rich hues, and in terms are on the plain order. The effect is much the same as that of the full equivalent, as though an expensive Cashmere shawl were made into a robe, as is often done—the expense is \$25. Also, a few rappers, Patterns, Personal, Oriental silk. The olive, old gold, and rich, dark hues are in a broad border of consistent but curious formation, each \$10 per yard.

There are other lots equally interesting and new things daily arriving.

Samples of Dress Goods sent by mail; a "Postal" will receive immediate attention.

**John Wanamaker**  
Thirteenth Street  
Market Street and New City Hall

THIS SWEET LOVE OF MINE.

BY ORALD MARSH. No jewel beauty is my love, Yet in her earnest face...

The Squire's Peaches.

A STORY FOUNDED ON FACT. The squire was on his way home from the village; a peep at the back of the wagon...

The sun had just dropped to rest behind a pile of gold and crimson clouds, which lay banked together in the west...

He is just passing under the noble elms in front of the Hartorne place, having climbed the steep hill from the village...

There have been a hundred sunsets like this, a hundred twilights just as fresh, and the squire has passed this way...

"I like to see it look warm and bright as this. It was just such a night as this that I brought my bride away..."

"The squire was so busy with his thoughts and 'those academy boys' that he left the turnpike and was driving by Blacksmith Porter's without noticing the little man in his leather apron..."

"Whoa, Prince! Here are a couple of letters for your folks. I guess one of them is from your son William; the other is one of those outlandish West-Indians..."

Mrs. Holt had finished her supper and was standing by her husband's chair. She drew his head close to her side, and stroking his grey hair, said: "Can I help you about anything?"

"You little woman, I think you can. I want you to think out one of your plans to conquer the rogues from the village academy, who they tell me, are at their pranks again, and are planning a raid on our peach orchard this very night..."

They talked sometime; at last the best plan was decided upon. Before the squire went to the barn to shut up for the night, he took his plain-faced little woman into his strong arms, and kissing her cheek, said: "What could I do without you? You teach me a lesson every day. And then he went out singing, 'The dearest spot on earth to me is home, sweet home!'"

It was nearing midnight, and Mrs. Holt was growing very anxious. Three long hours the squire had been gone. She said to herself: "The boys will do him no harm, I am sure. They are a little wild on these night raids, but at heart they are good-meaning fellows. I hope our plan will work good things. My heart yearns over them..."

"Oh! ain't you smart to come away without any? If I'd gone there wouldn't have been a peach left on the trees. I wouldn't care for old Holt or the boys if I had my way..."

"Sit up your brag? I won't hear you were a coward and names. You know you were a coward and names. You know you were a coward and names..."

"Well, you see, we went as sly as mice, climbed the wall, and were heading straight for that rarest tree, when who should come up alongside of us but Squire Holt himself!"

"Well, boys," said he, "I suppose you have come to take my peaches. I've been watching you for a long time to tell you that they are not fit to eat. I know they look rich, but they will be much nicer a week from now..."

So the boys fled back into the village and into their beds, determined that Squire Holt should never have cause to feel uneasy about them again.

pitcher of cream, and her sugar-crusted sponge cake. If Benton and Gregg will bring the big milk-pan of peaches from the pantry, we'll give them a fair trial."

"You may find us on your farm again, some day. But I'll give you my word it won't be to steal your property. If any one of us can do you a favor, just let us know."

"The boys went back to the village full of plans for the coming harvesting. The farmer and his wife Lucy gathered up the fragments, talked over the merits of the boys, and put out the lights."

"You women can get at the hearts of such boys; they won't forget your kindness very soon. What were you and Gregg so busy about?"

"On't not much. Only I told him to bring down his winter feeling, and I went to look for cold weather, for you know husband, there's but one pair of stockings for me to mend now."

When harvesting time came the squire went out to his corn field one day, saying as he went: "I don't feel very strong, I'll admit, but I guess I can manage to cut a few rows."

"And you, sir," said Arthur Gregg, stepping forward and grasping the sun-burnt hand, "have worked your way into ours, and made us proud of the tender spot in our hearts and anxious to cultivate it. You have touched this spot with your confidence and friendlyness. When we have housed and husked this field of corn, then you may thank us if you wish; but you and your noble wife must always remember that you once did us a kindness far beyond anything we have done for you..."

"To ascertain if any textile fabric is of vegetable or animal material take a small piece of it and hold it near the glowing coals. Cotton or linen fibres will turn with flame and leave only a slight ash. Woolen or silk fibres will not blaze, but smoulder until reduced to a heavy ash. Another method is to put some of the threads, separated into small fibres, into boiling nitric acid. Silk will turn to bright yellow, wool to a darker yellow, and cotton or flax will remain colorless. If the fibres are boiled with acid while the proportion of vegetable or animal material can be judged by the amount of colored and colorless threads."

"The very best thing to make a belt hold well is a can of good neat-foot oil, applied often enough to make it soft and pliable. This will cover glass over, so you know just how much lead it will bear and not give out. This is what is called the natural and proper treatment for a belt. There are a great many that make it a point to keep a dish of resin at hand, and every little while use it to make the belt do what it ought to do without resin. It makes things snap for a little while, but it soon glazes over, and in the end is worse than nothing."

Recent Legal Decisions.

SAVINGS BANK - STOCKHOLDER'S DEBT - LINDLEY v. BANK - S., a stockholder in a savings bank, died, heavily indebted to the corporation. The bank went into liquidation and declared a dividend, but refused to pay the estate of S., claiming that it could apply the amount of the dividend to his indebtedness to it. An action was brought to recover the dividends and the plaintiff had a verdict. From the judgment entered upon his verdict the bank obtained a writ of error to the Supreme Court of Pennsylvania - Merchants' Bank of Easton, vs. Shouse, administratrix - but that Court affirmed the determination below. Judge Gordon, in the opinion, said: "The defendant's charter did not give the bank a lien upon S.'s stock for any debt he might owe it. Neither can we entertain the idea that the defendant had a common law lien upon S.'s stock. Corporations are not the creatures of the common law. Such a thing as a common law corporation is wholly unknown to the laws of Pennsylvania, hence these artificial bodies can have a common law right, except as such rights may become incidental to the proper execution of the legislative grants by which such bodies are created. But when for a corporation a distinct power or right is claimed, as in the present case, such claim must have for its foundation some statutory grant or it has no validity. Besides, it has been decided in this State that there is no such thing as a common law lien on stocks in favor of a corporation for a debt due it by a shareholder."

BANKRUPTCY - FRAUD OF ONE PARTNER - DISCHARGE - One of a firm of attorneys received money from a client to invest, but converted it to his own use. The firm went into bankruptcy and obtained a discharge. The client sued one of the other partners for the amount, claiming that as this liability rested in fraud it was not, under the Bankruptcy act, barred by the discharge. The defendant contended that as to him, he not having participated in the fraud, the liability was a simple debt only, which the discharge released him from. In this case - Cooper vs. Pritchard - the plaintiff recovered a judgment, and the defendant carried it to the Court of Appeal in England, where it was affirmed. The Master of the Rolls, Brett, in his judgment said: "As this money was intrusted to the firm through one of its members who could receive it for the partnership, the defendant was liable before the bankruptcy, and the question now is whether he is still so. This turns upon the construction of the Bankruptcy act, by which an order of discharge shall not release the bankrupt from any debt or liability incurred by means of any fraud or breach of trust." Unless we can construe these words to mean that the fraud must have been committed by him, the defendant, as a bankrupt, the contention that this is a simple debt cannot be allowed. There is nothing to justify us in altering the words of the section, or putting in any words which are not already there. Lord Justice Lindley added that the debt was a debt of the firm, incurred by fraud, and he illustrated this in the following way: "Suppose in a firm of distillers or tobacconists one of the partners, without the concurrence or knowledge of the other, in the course of the business of the firm, commits offenses against the revenue laws whereby penalties are incurred, the debts so arising would clearly be excepted. The innocent partner could not say that he had taken no part in the offenses against the revenue laws, and therefore was entitled to his discharge. The language of the section is general, and we ought not to restrict it." Lord Justice Fry also said: "I see no reason for limiting the plain words of the section. This was a debt or liability clearly incurred by means of a fraud. Whether it was incurred by means of a breach of trust it is not necessary to decide."

CAMPBELL vs. UNITED STATES - brought by them to recover the duties they had paid on 'finned' which they manufactured into linned oil and oil cake and had exported. An appeal was taken to the Supreme Court of the United States, where the judgment was reversed. Justice Miller, in the opinion, said: "It would be a curious thing to hold that Congress, after clearly defining the right of the importer to receive drawbacks upon subsequent exportation of the imported article on which he had paid duty, had empowered the Secretary, by regulations which might be proper to secure the Government against fraud, to defeat totally the right which Congress had granted. If the regulations of themselves worked such a result no Court would hesitate to hold them invalid as being altogether unreasonable. But the regulations in this case are not unreasonable. It is the order of the Secretary to proceed under these regulations in any other mode which is the real obstacle. Is wholly a defense to this action? Can the Secretary by this order do what he could not do by regulations - repeal or annul the law? Can he thus defeat the law he was appointed to execute by making regulations, and then, by ordering his officers not to act under them, and not to act at all, place himself above the law and then defy it? It is an error to suppose that the officers of the customs, including the Secretary, are, in regard to this law, created a special tribunal to ascertain and decide conclusively upon the right to drawback. Their function is entirely ministerial. The rights which the law gives cannot be defeated by the refusal of the Collector to act, nor by his decision that no drawback was due. Neither the act of Congress or any rule of construction known to us makes the claimant's right, where the facts on which it depends are clearly established, to turn upon the view which the Collector or the Secretary, or both combined, may entertain of the law upon that subject, and much less upon their arbitrary refusal to perform the duties which the law imposes upon them."

TENANTS IN COMMON - PARTITION OF REAL PROPERTY - One of two tenants in common (as the land could not be divided) brought an action against his co-tenant to compel a sale of the land, and had a judgment to that effect. The defendant carried the case - Johnson vs. Olmstead - to the Supreme Court of Errors of Connecticut, where the judgment was affirmed. Judge Pardee, in the opinion, said: "No person can be compelled to remain the owner with another of real estate, even if he become such by his own act; every owner is entitled to the fullest enjoyment of his property, and that can come only through an ownership free from dictation by others as to the manner in which it may be exercised. Therefore, the law afforded to every owner with another relief by way of partition, and this regardless alike of the difficulties attending separation and the consequences to his associate. Rights to the use of running water, rights to dig ores, have been declared subject to this law. But, inasmuch as it might sometimes happen that by partition the property would be practically sacrificed, the statute has opened a way of escape from such a result. It permits a Court of Equity to order a sale when in its opinion a sale will better promote the interests of the owners. Therefore, since the passage of the statute, there have been two modes of relief within the power of the Court - partition and sale. Every owner with another is entitled to separate ownership by one of these; by partition first and always, if that is possible; if it is not, then by sale; every petitioner for a sale assumes the burden of proving a partition impossible, and if upon such petition the Court is much bound to order a sale as it would have been to order a partition upon a prayer for it, and upon proof that it could be conveniently and equitably made. If upon a petition for a sale it is proven that partition is impossible and that a sale would result in a diminution of income, the petitioner is not for that reason to be shut up to continued joint ownership. He must have leave to go out of the possible door, notwithstanding that diminution. Upon such petition the most that plaintiff or defendant can insist upon is that the undeniable right to severality in ownership shall be secured by the least injurious of the two specified modes."

CUSTOMS - DRAWBACKS - FAILURE OF THE SECRETARY TO CARRY OUT REGULATIONS - An act of Congress allows drawbacks to be made on articles manufactured from imported materials and exported to the amount of duty paid upon the materials, but as the Secretary of the Treasury did not enforce the regulation made to carry the act into effect the Court of Claims decided it had no jurisdiction of a suit to recover the amount of such duties.

Among the Little Folks. Pearl. The sunshine falls warm on the dower. The breeze haunts the dew-drooping wood. And where the sweet rose bend over The arbor and trellis, rude, A songbird with bright brown eyes At baby Pearl often doth peep: Our own dainty pet, white as pie a. In the flash of innocent gleam Sweet baby Pearl!

Our snow-bird darling has risen. Her pillow is tossed to the floor; Like dew-drops her azure eyes glisten. Like a sunbeam the fit to the door. Her elders are yet at the table, She gathers up crumbs here and there: A sprits, not of myth or of fable, But yet wondrous winsome and fair. Like a feather that borne by a zephyr, She flits with the mites in her hand. And offers them all to the redoubt - Fairest aims-giver she in the land! Pearl - baby Pearl!

"What will you have, my little man?" asked a neighbor of Master Johnny. "I dunno," was his reply. "Mamma told me not to dare ask for pie or cake, like I did the last time, and I dunno what else you've got in the pantry."

"A little friend of ours had rather a 'figurative' way of writing when he closed his composition on Babes, with, 'The mother's heart gives 4th joy at the baby's 1st 2th.' We suppose it's solid food shortly after."

"One morning I found little Dora busy at the ironing-table smoothing the towels and stockings. 'Isn't it hard for the little arms?' I asked. 'A look like sunshine came into her face as she glanced toward her mother, who was rocking the baby. 'It isn't hard work when I do it for mamma,' she softly said."

"How true it is that love makes labor sweet. 'I's 'Fraid We's Lost, Pussie. The other evening a little girl was found seated on the steps of a house in New York city. Her little red hat rested on the back of her head, and her cheeks were tear-stained. She was scarcely three years old. She pressed to her breast a small white-and-black kitten which she had been carrying, and said: 'It's 'fraid we's lost, Pussie.' By and by she began to cry, and a passing policeman, finding that she had strayed from home, brought her and her kitten to the Police Central Office, where she was placed in charge of Matron Webb. At 9 o'clock an excited man ran into the Central office and said his little daughter was lost. He was sent to the lost children's department, where he recognized his daughter. He said his name was Elias Micklen, and that he lived at 355 Greenwich avenue. He had never seen the kitten before."

The Secret of Non-Success. "Have you been a good boy to-day, Fred?" The question rang in Fred's ears as he went up stairs. It was with him all the time he was kneeling by the side of his bed, he could not sleep for thinking.

"Have you been a good boy to-day, Fred?" His mother's searching eyes looked gravely into his face as she asked this question. "It is pretty certain that mamma thinks that I have not been good," thought Fred.

"But what do you think?" asked conscience. Fred tried to quiet the voice. He closed his eyes and pretended to go to sleep; but it was of no use, for his thoughts were too busy to allow him to do so, and presently he gave it up, opening his eyes, and resigning himself to that which was inevitable. The moon was shining brightly, and the room looked cozy.

"I ought to be a good boy," thought Fred. "Everybody is very kind to me, and all my wants are supplied. And yet it is certain that I am not good. I want to be, but somehow I always fail. I cannot think how it is. It is not because I am careless and indifferent. I care very much to please my father and mother. I want nothing more than to give my satisfaction, and satisfy my own conscience too. I mean to be always busy, and yet I never get things done as soon as Harry does. I am tired out at night, and yet I am sure mamma thinks I am idle, and do not try to do my best. I am a most unfortunate boy."

Just then Harry, who was sleeping in another bed, seemed to be disturbed in his sleep, and Fred thought he would get his brother to wake up and say a comforting word to him. "Harry! Harry! I say, Harry!" "Yes. What is it?" "Are you awake?" "Yes."

"Well, I feel so wretched." "Do you, Fred? What is the matter? Are you not well?" "Oh yes, I'm very well; but I don't get on well. I am forever being blamed and feeling that I deserve it, and yet I try to be all right, you know." "Oh yes, to be sure you do. You are a very good fellow, Fred; go to sleep."

Agricultural.

It would be a great mistake to suppose that because turnips are often grown without a direct supply of nitrogen in manures, they are less dependent upon a supply of this substance than corn crops. If any farmer feels a doubt upon this point, let him try to grow roots for a few years in succession on the same land, using mineral manure alone, and removing the produce. A rapid decline in the crop will soon convince him how dependent the turnips are on a liberal supply of nitrogen in the soil. - J. B. Laws.

A member of the Onondaga Community, writing on the importance of mulching fruit-trees and plants of every kind, says that he mulched a row of the Franconia raspberry and also one of the Philadelphia-side by side. The effect was very marked. While the Franconias, which were not mulched, were literally scorched and the leaves crumpled in the sun, the row which received the mulching carried through nearly double the crop of fruit: The material used for mulching was old, half-dressed buckwheat straw, etc.

In an address before the Maryland Horticultural Society, on March 29, 1888, William Sanders, Superintendent of the Grounds and Gardens of the Agricultural Department at Washington, D. C. said: "The blight on the apple and pear trees is, in the aggregate, a source of much loss. I will not discuss the point as to whether this malady is caused by a low form of vegetable life, fungi, or by a low form of insect life, but allude to it to mention the fact that no part of a tree coated with lime-wash has ever been affected."

The new breed of fowls, - Wyandottes, formerly known as American Seabrights, is rapidly growing in favor. They have heavy, compact bodies, beautiful plumage, very small combs, and make good layers. The strongest points in their favor are that they have legs of a deeper yellow than the Plymouth Rock, and the combs being small prevent frosting in winter. They equal the Dorking in compactness of body, grow rapidly, and are very hardy. The demand for this breed has been very heavy this season, which is due to their being only recently introduced.

Poultrymen are sometimes troubled with partial blindness in their young chickens, occasioned possibly by too little variety in their food. The eyelids, in the morning, are stuck together so firmly that the chicken cannot open them without assistance. When both eyes are in this condition the chicken cannot feed with facility, as it has to be guided by hearing and smell, therefore, floss flesh for want of food, droops and dies. These drooping chickens can often be saved by having their heads dipped in clean water and the eyes washed open. They then see readily, devour their rations greedily, and begin to gain flesh.

In regard to yellow-skinned Jerseys the American Dairyman says: "We remember once taking part in a test of about thirty Jerseys belonging to Mr. Churchman, of Indianapolis, Ind. We selected all the pale skinned cows and tested their cream yield, and then did the same with the cows possessing yellow skins, and while these cows uniformly gave milk in color equal to corresponding milk in the color or lack of color in their skins, yet the cream yield was so nearly equal that there was no practical advantage on either side. In other words, so far as butter yield is concerned, the color of the skin is probably of no value whatever as a criterion."

The Tribune and Farmer says: "Through tillage not only adds to the yield of corn but it is of decided benefit in preparing the ground for subsequent crops. Hence it is essential that a cultivator or horse-hoe be kept moving much of the time for weeks ensuing, particularly in regions where the crop is grown extensively. Good culture - frequent stirring of the soil - is the great factor in corn growing. On light soils a little esch, plaster or other fertilizer, applied to each hill, or along the drilled row, if in drills, will stimulate the corn crop materially; but keeping the cultivator moving lively, and thus stirring the soil, is the great factor, and all important."

Separated from the soil man never yet has succeeded in thriving. At best, without it, he is a potted plant, and some of the pots are miserably small. I have visited many factorles in New England, and I find that wherever the operatives have a good-sized garden, with access to pasture for a cow, the people are healthy, contented and saving. Whenever this is the case the population is likely to live without actual starvation or extreme destitution in the event of the mills being closed for even a very long period. Whenever they are separated from the soil, as in some of our large and crowded cities, there is squallor, demoralization and despair." - James Payton.

The Canadian Horticulturist tells how to blanch celery: "To blanch celery in hot weather, nor in the evening when there is any danger of frost. When sunshine long-continued, says Darwin, has stimulated the plant into violent action, if that stimulus of heat be suddenly diminished by the effusion of cold water, or by its sudden evaporation, death ensues, exactly as it has frequently happened to those who have bathed in cold spring water after having been heated by violent and continued exercise on a hot day. Very lately in this city some very precious plants, by accident, were not watered early in the morning, but at 11 o'clock, when the sun was high, and the earth was much heated, the consequence was the sudden death of six out of eleven of them."

An English gardener, Mr. Barnes, of Devonshire, in giving an opinion of the importance of hoeing, said he "did not agree with those who say that one good weeding is worth two hoeings. I say never weed any crop in which a hoe can be got between the plants, nor so much for the sake of destroying the weeds and vermin, which must necessarily be the case if the hoeing be done well, as for increasing the porosity of the soil to allow the water and air to penetrate freely through it. He adds: "I am well convinced, by long and close practice, that oftentimes there is more benefit derived from crops from keeping them well hoed than there is from the manure applied. Weeds or no weed, I will keep stirring the soil, well knowing from practice the very beneficial effects it has."

Cattle are sometimes poisoned by eating the wilted leaves of the wild cherry. The green leaves are not poisonous, but the poison seems to develop by some chemical change which takes place during the wilting. Take care, therefore, not to cut wild cherry trees and leave the branches where the cattle can get them, for, strange though it may seem, they will abandon good grass to eat them. If the cattle are suspected of having eaten the leaves mix one pint each of hog's head and molasses and warm it until it will run readily, pour into a long-necked bottle, raise the animal's head, and, inserting the nose of a bottle in the corner of the mouth so as to reach well back on the tongue, pour it down. The usual dose varies from a pint to a quart, according to size of animal and severity of case, but there is no danger of an overdose.

A sheep is peculiar in respects to eating well and retaining the brightness of the eyes while it is gradually wasting by sickness until it dies at the feed-trough. When a sheep loses flesh and becomes very thin without exhibiting any other marked symptoms of disease, it is probable that it is suffering from tuberculosis of the intestines. If the skin is pale and the eye is unusually bright, this is still more probable. If the eyes are yellowish and the skin of a yellow cast, the disease is in the liver. If the digestive organs are involved. If the urine is thick or of an unusual appearance or odor, disease of the kidneys or of the liver may be suspected. All of these disorders would be accompanied by a loss of flesh and gradual wasting, but it is impossible to advise any treatment without knowing precisely what is the matter. - New York Tribune.

Corn should be cut as near to the ground as possible. This is not so much for the sake of the stalk that is saved

cannot be covered in the next plowing, and thus remain upon the surface for years, a disagreeable nuisance in a meadow, and among the hay. In setting up the shocks it is preferable to make large ones, and to take at least ten rows each way, by which the shocks will stand firmly and will not break down or tumble over. A large shock will dry quite as well, although somewhat more slowly, as a smaller one, and can be more easily preserved by damage from storms. The shock should be put up so that the centre is open below and air can pass freely through it, and should be bound securely just above the centre and at the top with straw bands. It is very important that the top should be closely bound, so that the rain may not enter. Corn fodder so put up may remain a long time without injury, but the husking should not be postponed any later than when the corn is dry, because husking corn in a snow-storm is neither convenient, agreeable nor healthful. - N. Y. Times.

Healthy Homes. Robert Rawlinson, C. E., London, says: "The tub soil beneath a house should be naturally dry, or it should be made dry by land drainage. The ground floor of a house should not be below the level of the land, street or road outside. A site excavated on the side of a hill, or steep bank, is liable to be dangerous, as external ventilation may be defective, and the subsoil water from above may soak toward and beneath such houses. Middens, cesspools and ash-pits, if at the back, must also sink basements. The subsoil within every basement should have a layer of concrete over it, and there should be full ventilation. Cesspools, cesspits, sinkholes, drains, &c., should not be formed nor retained within house basements. The grounds round dwellings houses should be paved, flagged, asphalted, covered with concrete, or be gravelled. Outside channels should be in good order, and be regularly cleaned. House eaves should be guttered and sprouted. Sewer tubes should not be near doors or windows. Pigstyes should ever be at a distance and, where pigs are kept, there should be

### A Few Facts Concerning the 4 C's, or

## TRENTON Business College

It is the most practical and complete course of study. It omits nothing necessary to a thorough business education, yet can be accomplished in a remarkably short space of time.  
It has a novel and original method of teaching, which are attended by astonishing results. The student is interested from the start, and never fails to make satisfactory progress.  
It has the largest and best appointed rooms, the most expensive and perfect appliances.  
It employs the best teachers, and pays the most liberal salaries. In fact, it is the liveliest, most thorough and complete institution in the country.  
It has been established 18 years, and sent thousands of young men and women whose success attests its efficiency.  
It is a member of the Bryant & Stratton Chain of Colleges, or I. B. C. A., with recognition of scholarships, etc., all the advantages of a liberal education, so indispensable to a life of modern business training.  
It now contemplates a course at a Business College, or desiring a practical education, the student may begin September 2d, and receive the diploma of this college.

## AYER'S PILLS.

A large proportion of the diseases which cause human suffering result from derangement of the stomach, bowels, and liver. AYER'S CATHARTIC PILLS act directly upon these organs, and are especially designed to cure the diseases caused by their derangement, including Constipation, Indigestion, Dyspepsia, Headache, Dysentery, and a host of other ailments, for all of which they are a safe, sure, prompt, and pleasant remedy. The extensive use of these Pills by eminent physicians in regular practice, shows unmistakably the estimation in which they are held by the medical profession.  
These PILLS are compounded of vegetable substances only, and are absolutely free from calomel or any other injurious ingredient.

A Sufferer from Headache writes:  
"AYER'S PILLS are invaluable to me, and are my constant companion. I have been a severe sufferer from Headache, and your PILLS are the only thing I could look to for relief. One does will quickly move my bowels and free my head from pain. They are the most effective and the easiest. I have ever found. It is a pleasure to me to speak in their praise, and I always do so when occasion offers."  
W. L. PAGE & Bro.,  
Franklin St., Richmond, Va., June 3, 1882.

"I have used AYER'S PILLS in numberless instances as recommended by you, and have never known them to fail to accomplish the desired result. We constantly keep them on hand at our home, and prize them as a pleasant, safe, and reliable family medicine. FOR DYSPEPSIA they are invaluable."  
J. T. HAYES,  
Mexico, Texas, June 17, 1882.

The Rev. FRANCIS D. HARLOWE, writing from Atlanta, Ga., says: "For some years past I have been subject to constipation, from which, in spite of the use of medicines of various kinds, I suffered increasing inconvenience, until some months ago I began taking AYER'S PILLS. They have entirely corrected the entire habit, and have vastly improved my general health."  
AYER'S CATHARTIC PILLS correct irregularities of the bowels, stimulate the appetite and digestion, and by their prompt and thorough action give tone and vigor to the whole physical economy.

PREPARED BY  
**Dr. J. C. Ayer & Co., Lowell, Mass.**

### MRS. VAN BUREN'S

## LADIES' TONIC.

The Great Female Remedy.  
The Favorite Prescription of the  
**Women's Medical Institute,**  
BUFFALO, N. Y., U. S. A.  
For Leucorrhoea, or Whites; Inflammation and Ulceration of the Womb; Protrusion or Falling of the Womb; Irregularities, Flooding, Sick Headache, Kidney Complaints, Barrenness, Painful and Irregular Menstruation, and Amenorrhoea.  
For making labor easy, and a remedy for women when nursing children, or through change of life, this preparation has NO EQUAL in this WORLD.  
If you have tried other remedies without success, do not be discouraged, but give "Ladies' Tonic" a single trial. It never fails to give quick and permanent relief.  
If you are troubled with any weakness or complaint common to our sex, lay aside the doctor's prescription for once, and try "Ladies' Tonic," which we guarantee will positively cure you.  
\$500 will be given for any case of Female Weakness or inability which "Ladies' Tonic" will not cure. This is a bona fide offer, made by responsible men, who know from experience what "Ladies' Tonic" can do.  
Sold by Druggists. PRICE, \$1.00.  
The Women's Medical Institute is an association of prominent Lady Physicians, who have successfully treated the diseases common to their sex, for years. Wives, Mothers and Daughters can obtain advice concerning their health and diseases by mail, free, by sending symptoms and description of case, and a few lines of their names for our pamphlet to women. Address  
**Women's Medical Institute, Buffalo, N. Y.**  
(Send this paper.)

### GOLD

Great chance to make money. Those who always take advantage of the good chances for making money that are offered, generally become wealthy, while those who do not improve such chances remain in poverty. You can do it. Many men, women, boys and girls work for us right in their own localities. As one can do the work properly from the first start. The business will pay more than ten times ordinary wages. Expensive outfit furnished free. No one who engages falls to make money rapidly. You can devote your whole time to the work, or only your spare moments. Full information and all that is needed sent free. Address TAYLOR & CO., Portland, Maine.

### ESTABLISHED

## HOWARD A. SNOW,

Washington, D. C.  
SOLICITOR OF  
**AMERICAN and FOREIGN PATENTS,**  
Successor to GILMORE, SMITH & Co., and CHIPMAN, HOSMER & Co.

Patents procured upon the same plan which was originated and successfully practiced by the above-named firm. Pamphlet of sixty pages sent upon receipt of stamp.

### MILLVILLE

## Mutual Marine & Fire Ins. Co.

This Company have disposed entirely of all its STOCK PLAN BUSINESS, and having been RE-ORGANIZED, has decided to in the future do a

### Strictly Mutual Home Business.

Having succeeded in paying ALL ITS LIABILITIES, and securing an

Actual Net Available Surplus of Over \$30,000,

the Directors feel that they can offer to all who desire insurance not only as LOW RATES as UNQUESTIONABLE SECURITY, but much greater probability of security from assessment for years to come, than other Companies, since this surplus is large enough to pay all probable losses on the policies now in force, until their expiration, without any dependence on receipts from new business—a condition of things that can be shown by a very few companies in the State. The present Directors pledge to the Policy Holder an

### ECONOMICAL MANAGEMENT

and a  
Careful Supervision of the business

and will continue in the future, as in the past, to act on the principle of

### PROMPT PAYMENT

OF  
HONEST LOSSES

without seeking to EVADE them on technical grounds.

Hereafter, no notes will be subject to assessment, until they are a year old.

We would call especial attention to our  
**Marine Department,**  
and LOW RATES and FAVORABLE FORM OF POLICIES.

Any information cheerfully given by the  
Gen. Sec'y of the Company or its Agents,  
**L. MULFORD, Pres.**  
**R. J. MURPHY, Sec'y.**  
100-111, N. J.

### HELP

Youself... always...  
We do not improve ourselves by we want many more...  
You can do it. Many men, women, boys and girls work for us right in their own localities. As one can do the work properly from the first start. The business will pay more than ten times ordinary wages. Expensive outfit furnished free. No one who engages falls to make money rapidly. You can devote your whole time to the work, or only your spare moments. Full information and all that is needed sent free. Address TAYLOR & CO., Portland, Maine.

### AYER'S Sarsaparilla

cures Rheumatism, Neuralgia, Rheumatic Gout, General Debility, Catarrh, and all disorders caused by a thin and impoverished, or corrupted, condition of the blood; expelling the blood-poisons from the system, and restoring the blood, and restoring its vitalizing power.  
During a long period of unparalleled usefulness, AYER'S SARSAPARILLA has proven its perfect adaptation to the cure of all diseases originating in poor blood and weakened vitality. It is a highly concentrated extract of Sarsaparilla and other blood-purifying roots, combined with Iodide of Potassium and Iron, and is the safest, most reliable, and most economical blood-purifier, and blood-food that can be used.  
Inflammatory Rheumatism Cured.  
"AYER'S SARSAPARILLA has cured me of the Inflammatory Rheumatism, with which I have suffered for many years."  
Durham, La., March 2, 1882.

"Eight years ago I had an attack of Rheumatism so severe that I could not move from the bed, or dress without help. I tried several remedies without much benefit, until I took AYER'S SARSAPARILLA, by the use of two bottles of which I was completely cured. I have not been troubled with the Rheumatism since. I have sold large quantities of your SARSAPARILLA, and it still retains its wonderful popularity. The many notable cures it has effected in this vicinity convince me that it is the best blood medicine ever offered to the public."  
R. F. HARRIS,  
River St., Buckland, Mass., May 13, 1882.

"Last March I was so weak from general debility that I could not walk without help. Following the advice of a friend, I commenced taking AYER'S SARSAPARILLA, and before I had used three bottles I felt as well as I ever did in my life. I have been at work now for two months, and think your SARSAPARILLA the greatest blood medicine in the world."  
JAMES MAYNARD,  
620 West 42d St., New York, July 19, 1882.

AYER'S SARSAPARILLA cures Scrofula and all Scrofulous Complaints, Erysipelas, Eczema, Ringworm, Itchings, Sores, Boils, Tumors, and Eruptions of the Skin. It clears the blood of all impurities, aids digestion, stimulates the action of the bowels, and thus restores vitality and strengthens the whole system.

PREPARED BY  
**Dr. J. C. Ayer & Co., Lowell, Mass.**  
Sold by all Druggists; price \$1, six bottles, \$5.
