**\$2.60 for  
South Jersey Republican  
AND  
Demorest's Monthly Magazine,  
A WONDERFUL PUBLICATION.**

Many suppose DEMAREST'S MONTHLY to be a fashion magazine. This is a great mistake. It undoubtedly contains the finest FASHION DEPARTMENT of any magazine published, but this is the case from the fact that great enterprise and experience are shown, so that each department is equal to a magazine in itself. In DEMAREST'S you get a dozen magazines in one, and secure amusement and instruction for the whole family. It contains Stories, Poems, and other literary attractions, including Artistic, Scientific, and Household matters, and is illustrated with original Steel Engravings, Photographs, Water-Colors, and Fine Woodcuts, making it the MONTHLY MAGAZINE OF AMERICA.

Each copy contains a PATRONS ORDER entitling the holder to the selection of ANY PATTERN illustrated in any number of the Magazine, and in ANY OF THE SIZES manufactured, each valued at from 20 cents to 50 cents, or over \$3.00 worth of patterns per year, free. Yearly subscription, \$2.60. A trial will convince you that you can get ten times the value of the money paid. Single copies (each containing Pattern Order), 50 cents. Published by W. JENNINGS DEMAREST, New York. The above combination is a splendid chance to get our paper and DEMAREST'S MONTHLY at a reduced rate. Send your subscriptions to this office.

The first steamer to arrive at Fernandina since last September was the David Clark, of Savannah, which arrived on Saturday.

The people of this state are making a movement for improved election laws and the Australian system is preferred.

The First M. E. Church of Asbury Park has adopted a system of compelling the delinquents to pay up by exposing their names in the church vestibule.

Industrial Hall, Philadelphia, was damaged to the extent of \$10,000, Sunday morning. A number of battle flags and other valuable relics belonging to Cavalry Post, G. A. R., were burned.

There is only one thing to prevent the consummation of the scheme proposed by Representative Oates, of Alabama, for disfranchising the negro. That one thing is known as the Constitution of the United States.

As we understand the situation in Indiana, the Democrats out there propose to prosecute the wicked Republicans who bought their votes. The high-minded witnesses in the case will doubtless enjoy it.

Thos. G. Boyle & Co., of Pittsburg, have made large purchases of nails and virtually control the nail market.

We cannot too strongly urge upon our readers the necessity of subscribing for a family weekly newspaper of the first class—such, for instance, as *The Independent*, of New York. Were we obliged to select one publication for habitual and careful reading to the exclusion of all others, we should choose *The Independent*. It is a newspaper, magazine and review, all in one. It is a religious, a literary, an educational, a story, an art, a scientific, an agricultural, a financial and a political paper combined. It has 32 folio pages and 21 departments. No matter what a person's religion, politics or profession may be, no matter what the age, sex, employment or condition may be, *The Independent* will prove a help and instructor, and educator. Our readers can do no less than to send a postal for a free sample copy, or for thirty cents the paper will be sent a month enabling one to judge of its merits more critically. Its yearly subscription is \$3.00, or two year for \$5.00. Address, *The Independent*, 251 Broadway, New York City.

**Electric Bitters.**

This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise. A purer medicine does not exist, and it is guaranteed to do all that is claimed. Electric Bitters will cure all diseases of the liver and kidneys, will remove pimples, boils, salt rheum, and other affections caused by impure blood. Will drive malaria from the system and prevent as well as cure all malarial fevers. For cure of headache, constipation, and indigestion, try Electric Bitters. Entire satisfaction guaranteed, or money refunded. Price, 50 cts and \$1 per bottle, at Cochran's drug store.

**Godey's Lady's Book  
For 1889.**

Madam! See what Fifteen Cents will do! It will bring you a sample copy of Godey's Lady's Book, the Silk Dress, the Gold Watch, and Cottage Organ, and other valuables, without a dollar.

**You Cannot Get a Better**

Two Dollars' worth of Magazine than by subscribing to GODEY'S, the best family magazine in America. For 1889 it will contain: Fashions in Colors, Fashions in Black and White, latest from Europe. Original Knowledge in Needle Work and Embroidery. Latest and most popular Music. Plans for the house you want to build. Directions for decorating your home. Cookery and household help by Mrs. Chase. Hope teacher in seven fashionable New York academies, not selected by the Board of Education for the New York Public Schools. Literary enrichments by Nelly Hill, who got to self back up in an insane asylum to find out how they treated the insane. Ella Holman Church, Emily Louisa, Olivia Lovell Wilson, Mrs. Hirstand, Edgar Fawcett, David Lowry, etc.

**Every Lady her own Dressmaker**

Who subscribes to Godey's Lady's Book. The Coupon which you will find in each number entitles you to your own selection of any cut paper patterns illustrated in Godey's Lady's Book. Your 15 cent Sample Copy will contain one of these coupons. Send 15 cents for sample copy which will be allowed on your subscription you want. The pattern shows how to cut out the garment you want. That's all we can say in this space. For the rest, see your sample number, for which send 15 cents at once. Godey's is only \$2.00 a year. Address: "Godey's Lady's Book," Philadelphia, Pa.

"Godey's" and REPUBLICAN one year, \$2.55, which should be sent to this office.

The Republican. (Entered as second class matter.)

HAMMONTON, ATLANTIC CO., N. J. SATURDAY, DEC. 8, 1888.

Our Terms.—Our subscription price will be \$1.00 per year in advance. If not paid within the first two months, \$1.25 per year, invariably. To subscribers outside of this county always \$1.35 in advance—

as we are compelled to wrap papers and prepay postage.

Congress met last Monday, and appears to be happy in their own way, talking against time. The President's message contained nothing startling on any subject, but the writer adheres to his theory of tariff reform. The Senate is earnestly discussing the tariff bill, but will probably not reach any definite conclusion before the holidays.

Mrs. C. M. Jordan is agent for the Wheeler & Wilson Sewing Machine, and invites the ladies to call at her residence and see the new No. 9. We have seen samples of its work, which were very fine.

Mr. L. Hoyt and family expect to occupy the Chevalier residence, corner of Second and Grape Streets. Mr. C. and family will remove to Pittsburgh, Pa., where a business opportunity is in prospect.

Mr. French is preparing for heavy business in his new paint store, at 2202 Atlantic Ave., Atlantic City. We all know that his paints are the best made, and builders down shore will soon find out that fact.

St. Mark's Church, Second Sunday in Advent, Dec. 9th, 1888. Holy Communion at 7:30 A. M. Morning Prayer, Litany, and Sermon at 10:30. Evening Prayer at 3:30 P. M. Sunday School at 2:30.

Louis O'Donnell is station agent on the P. & A. C. Railroad. He has leased Mrs. Arltz's house, on Central Avenue. Mr. O'Donnell was a Hammononton boy, and finds many friends to welcome him here.

The Guide and Friend for November is just out,—late, but greatly improved in every respect. Mr. Boyer is satisfied that Hammononton is the place for a poultry paper, and just the place to live, if one wishes to really enjoy life.

Next Monday night is the date for the Board of Trade meeting; but whether it will materialize or not will be known when the time comes. We suggest that all who have accounts against the Board should present their bills Monday night.

Mr. H. M. Phillips was evidently not discouraged by his recent heavy loss, for he already has extensive buildings approaching completion. Judging by the loads of iron pipe passing our office, no broader lamp will cause the destruction of these new buildings.

Mr. Bernhouse has moved the wing of his planing mill and will use it for a lumber-shed. In its place he will build a large two-story wing, giving him much needed additional room. There is considerable ingenious machinery in that building, and some fine wood-work is being done there, for buildings in Pennsylvania.

"Is Consumption Incurable?" Read the following: Mr. C. H. Morris, Newark, Ark., says: "Was down with a case of lung, and friends and physicians pronounced me an incurable consumptive. began taking Dr. King's New Discovery for Consumption, and now on my third bottle, and am able to oversee the work on my farm. It is the finest medicine ever made." Jose Millwright, Decatur, Ohio, says: "Had it not been for Dr. King's New Discovery for Consumption, I would have died of lung trouble. Was given up by doctors. Am now in best of health." Try it. Sample bottle free, at Cochran's.

The natives of Alaska, who claim to be oppressed by the Alaska Commercial Company, have sent out an appeal for help to the people of the United States.

We have made arrangements by which we may be able to benefit our subscribers occasionally. That is, we will receive subscriptions for almost any paper or magazine published, at club rates. For example, we can furnish *Hayes's Weekly*, or *Monthly*, *Frank Leslie's*, *Puck*, or *Judge* (each of them \$4 per year) at \$3.50 each. There are thousands of papers on our list; come and see. On most of the \$1 weeklies we cannot make any reduction, but we can save your postage and the expense of forwarding money.

Building Lots.—One Third and one Sixth Streets, Hammononton,—large size, good location. Bargain, if sold soon. Call on H. L. WOODS.

Snow enough fell, Tuesday morning, after seven o'clock, to whiten the earth; but by noon scarcely a trace of it remained.

Dr. G. D. Johnson has nearly one thousand hens on his egg-farm. There is music when they all begin to cackle.

The Republican. SATURDAY, DEC. 8, 1888.

LOCAL MISCELLANY.

The Tax Collector will be in his office, over the Post-office, every Monday, Wednesday, and Friday evening during December, for the accommodation of those having business with him. Office open every day, of course.

Court, next Tuesday.

Save part of your Christmas cash until the fair opens.

The shoe business is dull,—hands making but short days.

Mr. D. M. Ballard has built a barn on the rear end of his lot.

Mr. E. L. Titus is about building a house, near St. Joseph's Church, on Third Street.

The heart of man is like the loe the Master.

All persons caught playing cards on railroad trains in Russia are to be "judicially pursued," by order of the Minister of Railways, who is believed to have been caught on a pair of Jacks or something of that kind by some innocent-looking passenger.

ANOTHER GOOD MARK is to be put down to the credit for the United States Navy. The officers and crew of the Thetis raised a schooner that had been sunk in Arctic waters, repaired her and sent her to San Francisco and then declined to accept salvage, restoring her to her owners free of cost.

THE FRENCH REPUBLIC is having a hard time of it between enemies within and enemies without its borders. The Royalists are becoming every day more active, seeking an opportunity for restoration to power, and Germany and Italy are forming an agragrativ alliance, which the organ of the Italian War Office predicts will force France to war. It is impossible for France to deal with her enemies in other lands until war has been declared, but she would justifiably in dealing harshly with the Royalists, who, to all intents and purposes, traitors to the Government, since they are not, it is to be observed, posted to the administration, but to the form of government itself.

A WAR ON CIGARETTES.—The *Niles* and the *Journal* of Chicago connect their war against cigarettes. The *Niles* has had a number of cigarettes of popular brands analyzed. The "smokers" were stripped of every distinguished mark, each brand put in a separate box, the lid of which was inscribed with a letter, and the whole lot then handed over to a well-known chemist. He found that the cigarettes submitted were generally made of tobacco "imperfectly fermented," and that nearly all had an unnatural proportion of insoluble ash, that several kinds were steeped in an injurious substance, and were impregnated with dirt in varying proportions.

IT IS A SIGN OF DETERMINATION on the part of the incorporators of the Nicaragua Canal Company that, having failed to get a charter through Congress, they have obtained one from the Legislature of Vermont. This will, at least, serve for purposes of organization and to start the enterprise. It is not improbable that the Nicaragua canal may be the first one connecting the Atlantic and the Pacific oceans, notwithstanding the long start obtained by De Lesseps.

BROOKLYN BRIDGE does an enormous business, and the receipts from the railroad alone are more than sufficient to pay running expenses. More than thirty-two million people crossed the bridge last year, less than a tenth of the number by the promenade. The bridge is over one mile in length, and that why nine-tenths of those who cross it pay railway fares. In 1883-84, the first full year when the bridge was open, there were more people who crossed on the promenade than for the last twelve months (probably because of curiosity), but the number of passengers on the railroad was less than one-third the number for the year. The bridge has been very nearly trebled since 1883, but the earnings, owing to reduced rates, are a little greater than in 1886-87, and only about 60 per cent. more than in 1883-84.

THE RIO GRANDE BORDER of the United States has several times given symptoms of becoming the cause of serious differences between Mexico and this country. On both sides of the river there are many lawless men who commit depredations on their neighbors, and then, if occasion offers appeal to their government to save them from the punishment they deserve. But a more troublesome question than any of these has now arisen. Mexican engineers are said to be constructing works on the Rio Grande, opposite El Paso, which may change the course of the river, damage the American bank and destroy the boundary as it now exists. It is obvious that the control of a boundary river of this kind should be in the hands of a joint commission, neither party interfering with it in any way without the consent of the other. But, the Mexicans having begun obstructive work, it may be difficult to get them to assent to this principle.

As to the other cause of dispute there, it does not amount to much. The Mexicans who arrested some United States soldiers in all ways over the boundary to hunt were not as courteous as they might have been, but they had so much of right on their side that, if they had been treated as they were, they would have no just ground of complaint. Besides, the discourtesy shown by the Mexicans having the men in custody is counterbalanced by the courtesy of other Mexicans who secured their release.

### TOBACCO KILLED HIM.

A Clever way in which to kill a Largo shark.

In a short while we had caught a nice mess of small snappers, from ten to twelve inches long, and were having real good time, says a writer in *Garden and Stream*. We had not fished very long, however, before a large shark put in an appearance and spoiled our sport. We first knew of his presence by his greedily snapping off the fish from one of my neighbors' lines, having followed it up from the bottom. He executed this performance several times, and then the snappers stopped biting entirely. Not even a nibble could we get, so we hauled in our lines and began to pay attention to the shark. He was a monstrous fellow, about fifteen feet long, and he kept swimming round and round the vessel, sometimes on top of the water and sometimes away down deep below us, but always at a respectful distance. His reddish-brown body could be plainly seen through the clear, transparent green water, and you may be sure he was the cynosure of all eyes. A great many plans for his capture were discussed, but none appeared practicable within our limited means. The engineer suggested that if the shark would give him time, he would forge a proper hook and chain, but as the shark was unable to give him a guarantee he abandoned the project.

While we were thus talking I noticed the native pilot every now and then throwing overboard one of the snappers we had so recently caught. And as the current carried it a little distance clear of the vessel the shark would gobble it down, and in fact the intervals were so regular that Mr. Shark seemed impatient when the regularity was broken by a little delay. We over to a well-known chemist. He found that the cigarettes submitted were generally made of tobacco "imperfectly fermented," and that nearly all had an unnatural proportion of insoluble ash, that several kinds were steeped in an injurious substance, and were impregnated with dirt in varying proportions.

As he was born and reared on the coast and had probably served his pilot's apprenticeship as a fisherman, he knew the shark with his inveterate foe, the shark. Anyhow, we all thought so, and gave him credit for it, and although he did not say much, he went about in a very earnest manner. After having thrown over ten small fish he selected another, a little larger than the others, and with a stick of wood rammed a roll of chewing tobacco nearly as large as a man's hand down into its belly and pressed it tight together. He held it ready to throw, and as the shark came up, anxiously looking for its fish, he tossed it to him, and as it barely touched the water the shark turned over on its back and sucked it in. The shark then swam off as usual to the side of the vessel, and then below us, and was apparently rising again in the expectation of another fish when the nicotine began to work. His struggles and contortions were horrible to behold as he darted here and there in a blind rage vomiting blood, but as a wham was carried by the current away from us, his struggle grew gradually less, until it ceased altogether. The tobacco had killed him.

How Sea Birds Dine.

A correspondent writing to *Nature* from Loch Lurchair, Ross-shire, N. B., says: "As I have ascertained that the following facts is not well known, I send you this account in the hope that it may be of interest to naturalists and to the general public. Any one who has been in the Western Hebrides will have often watched on a calm day the sea birds feeding with noisy clamor in the sea-lochs and about the numerous isles. This is especially the case in August, when the shoals of small herring are very plentiful. Some years ago, when in a sailing-boat off the west coast of Mull, I caught with a hand-net a dishful of these small fry as they swam along the surface of the water. Last year, noting from a stean-launch the birds congregated in great numbers at one spot, the idea struck me to team to the place and try to get a share of the birds' repast. The idea was at once carried out. I stood on the prow with hand-net in hand, and the launch was steered towards the birds. As we drew near, the launchers flew away with evident dissatisfaction at the interruption, a few of the more greedy making their last hasty dives. In another moment we were at the spot, and I saw, to my intense surprise, about a foot under the surface, a large reddish-brown ball, 2 to 3 feet in length and 2 feet in depth. I made a frantic swoop with the net into the ball, and brought on deck half a pintful of the sea-bird's dinner. Even as we passed we could see the great living ball sinking and breaking into pieces. This year I and others have tried the same spot with great success. Sometimes the ball has sunk too deep to be reached; sometimes

there were no ball to be seen; but on the most successful day I filled a pailful in three hauls. In September we saw no ball, because, perhaps, the ball had grown too large for the birds to manage. I can judge, from the motions observed, it is carried out by the divers, who surround a shoal and hem them in on all sides, so that the terrified fish huddle together in a vain effort to escape inevitable destruction. The divers work from below and other sea birds feed from above; and, as in some cases, after the birds had been at work for some time, I saw no ball. I suppose not one fish is left to tell the tale. I must leave to naturalists the real explanation of the matter, but I may mention that, when disturbed by the boat, the divers seem to come to the surface in a great ring round the scene of their feast. I may also mention that once, when the boat was still 300 or 400 yards away, the birds suddenly rose and whirled about with frightened screams. I wondered what could be the cause, until I saw the round back of a porpoise lazily rolling at the exact spot, and then rolling back again. When we steamed past there was no sign of a ball. What two delicious mouthfuls for the porpoise!

LUCK IN LIFE.

The finer inner sense of the so-called "lucky" person.

It was mentioned recently that some person had drawn \$15,000 in a lottery. There are such instances from time to time, but when one comes to reflect upon it he perceives that the prizes were won from those who had cried before to buy the tickets. This is one form of luck most people understand; that is, they see that there is nothing inherent in the individual that causes the success. A man throws sixes, or he draws the highest prize, and nothing is inherent in the individual that causes the success. A man throws sixes, or he draws the highest prize, and nothing is inherent in the individual that causes the success.
